

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

SUBSCRIPTION PRICE \$1.00 PER YEAR.
VOL. 2, NO. 2, JANUARY, 1895.
ENTERED AT THE CHICAGO POST OFFICE AS SECOND-CLASS MATTER.

PREFACE.

Few years in times of profound peace have been so crowded with stirring political and social events as 1894. The year opened with serious and disastrous labor troubles, which continued, with almost unabated intensity, until the middle of July. Political disturbances over the tariff controversy in congress created as much interest as any legislative action in our national history, while the November elections were a surprise to all parties. The democrats claim the republican majorities were the result of democrats failing to vote. The voluminous election tables in the almanac show whether this claim is well founded. Add to these disturbances the financial panic, which caused so much distress during the whole year up to the first of October, and the year 1894 becomes the most interesting of any in our history since the close of the war.

THE DAILY NEWS ALMANAC for 1895 contains an impartial discussion of most of these great events. Besides these there are articles upon many subjects that have engrossed a considerable share of public attention, among which are proportional representation, referendum, Coxeyism, the Bluefields incident, the Hawaiian republic, party strength in congress, history of the agitation over honorary titles, state laws upon arbitration in labor troubles, the Guttenberg liquor system and many others.

The present issue is singularly rich in statistics bearing upon the tariff, gold and silver, our commerce and trade, pensions, national finances, agricultural statistics, mortgage indebtedness and many other subjects of prime importance to every citizen.

The election tables are comprehensive and full, showing the vote of every congressional district in each state and giving the new congress complete. It is believed that the work is as fair, exact and accurate as it is possible to make so comprehensive a volume in the time that can be devoted to its compilation.

CHICAGO, Ill., Jan. 1, 1895.

Chicago Daily News Almanac 1895.

NOTE.—The time given in this Almanac is local mean time, except when otherwise indicated.

ECLIPSES.

In the year 1895 there will be five eclipses, three of the Sun and two of the Moon.
I. A Total Eclipse of the Moon, March 10-11. Visible entire to North and South America, and the Atlantic Ocean, and more or less to Europe, Africa, and the eastern Pacific Ocean. Occurring as follows:

	CHICAGO.			ST. LOUIS.			ST. PAUL.		
	D.	H.	M.	D.	H.	M.	D.	H.	M.
Moon enters Penumbra.....	10	6	57 A.	10	6	57 A.	10	6	57 A.
Moon enters Shadow.....		7	53 A.		7	53 A.		7	53 A.
Total Eclipse begins.....		8	51 A.		8	51 A.		8	51 A.
Middle of Eclipse.....		9	39 A.		9	39 A.		9	39 A.
Total Eclipse ends.....		10	27 A.		10	27 A.		10	27 A.
Moon leaves Shadow.....		11	25 A.		11	25 A.		11	25 A.
Moon leaves Penumbra.....	11	0	21 M.	11	0	21 M.	11	0	21 M.

First contact of shadow, 54 degrees from south point of the Moon's limb towards the east. Magnitude of Eclipse = 1.627. (Moon's diameter = 1.)

II. A Partial Eclipse of the Sun, March 26. Visible to North America east of Fredericton, N. B., to Greenland, the extreme western edge of Europe and the North Atlantic Ocean.

III. A Partial Eclipse of the Sun, August 20. Invisible to America. Visible to Russia.

IV. A Total Eclipse of the Moon, September 3-4. Visible entire to North and South America, and in part to portions of Europe, Africa, Australia, the Atlantic and Pacific Oceans. Occurring in Central time as follows: Commences on the 3d at 8 h. 48 m. P. M. and ends on the 4th at 3 h. 6 m. A. M. First contact of shadow, 54 degrees from north point of the Moon's limb towards the east. Magnitude of Eclipse = 1.557. (Moon's diameter = 1.)

V. A Partial Eclipse of the Sun, September 19. Invisible to America. Visible to eastern Australia, Tasmania, New Zealand, and neighboring South Pacific Ocean.

THE FOUR SEASONS.

SEASON.	Begins.		Lasts.	
			D.	H. M.
Winter.....	December	21, 1894, 2:58 P.M.	88	0 04
Spring.....	March	20, 1895, 2:49 P.M.	92	19 58
Summer.....	June	21, 1895, 10:44 A.M.	92	14 36
Autumn.....	September	23, 1895, 1:11 A.M.	89	18 31

NOTE.—To ascertain any day of the week first look in the table for the year required and under the months are figures which refer to the corresponding figures at the head of the columns of days below. For Example: To know on what day of the week July 4 will be in the year 1855, in the table of years look for 1855, and in a parallel line, under July, is figure 1, which directs to column 1, in which it will be seen that July 4 falls on Thursday.

*1752 same as 1772 from Jan. 1 to Sept. 2. From Sept. 14 to Dec. 31 same as 1780 (Sept. 3-15 were omitted).—This Calendar is from Whitaker's London Almanack, with some revisions.

IMPORTS OF MERCHANDISE, WITH RATE OF DUTY,

For the fiscal year ended June 30, 1894, compared with the corresponding period of 1893.
[Abbreviation: n. e. s., not elsewhere specified.]

THE NEW TARIFF.

How the bill was passed by congress and became a law.

Probably the most stubbornly fought battle ever carried on by our lawmakers in congress preceded the passage of the new tariff law, which went into effect on the 26th of August, 1894. For the first time in a generation the democratic party found itself practically in control of the national branch of the government on the 4th of March, 1893. The political campaign of the preceding year had been contested on the tariff issue. The democratic platform of 1892 was pronounced in its opposition to the high protective system then in operation, while the republican platform was as positive in its declaration of the protection of the policy of the administration of Mr. Harrison. Both the popular and electoral vote of the country was largely on the side of a change in the tariff policy of the country.

Congress met in extra session, pursuant to the call of the president, on the 7th of August, 1893, and, after a delay of some two weeks, the house committee of ways and means was appointed, with William L. Wilson, representing the 2d district of West Virginia, as its chairman. Mr. Wilson was in abilities and training well-equipped for the position assigned him to draw and defend a tariff measure that would meet the demands of his party and carry out the pledges contained in its last national platform. The chairman at once entered upon the discharge of his duties. The extra session was occupied with laws relating to the currency and came to a close before the tariff bill was ready for presentation. The regular session of congress opened on the first Monday in December, 1893, but it was not until Jan. 8 that the bill was introduced into the house. The introduction of the bill raised a storm of disapproval against it, a large proportion of which came from the republicans, but its provisions for free wool, coal, lumber and other duties caused so violent opposition from democrats representing states where those interests were likely to be seriously affected. In the whole history of the government it may be doubted whether any previous attempt at tariff reform had been so radical as was to be accomplished by the Wilson bill, for it proposed within the space of one year to abolish about 38 per cent of the duties then being paid upon imports besides carrying to the free list manufactures and farm products which paid from 50 to 60 per cent duties.

The bill, however, passed the house by a

vote of 204 to 140, and went to the senate Feb. 2, 1894, where it was confronted by a condition of things wholly unlike that which existed in the house. The democratic strength in the senate was exactly forty-four, one more than a majority, there being three vacancies.

The republicans numbered thirty-seven and the populists four, whose sympathies were equally divided between the democrats and republicans. Under these circumstances it became absolutely essential for the democrats to command every vote in their own party to carry any measure they might present. While it was apparent that the democrats in the senate were more strongly inclined than those in the house to a moderate degree of protection, The Louisiana democratic senators opposed the free sugar features of the Wilson bill, the Maryland and West Virginia senators opposed free coal, the Alabama senators objected to free iron ore, the New York, New Jersey and Ohio senators did not favor free wool or the reductions in the rate on some manufactured products. The impossibility of harmonizing these discordant elements to the support of so radical a bill as that passed by the house became at once apparent. The bill was referred to the finance committee of the senate—of which Mr. Voorhees, of Indiana, was chairman—and by it to a subcommittee, consisting of Jones of Arkansas, Vest of Missouri and Mills of Texas.

Two courses were open to the subcommittee to follow. It could have framed a bill to meet its own ideas and reported it to the senate to be amended and defeated, as it would have been, or it could formulate a bill that would command the united support of the party in the senate, with the hope that something toward a reform in the tariff could be accomplished. The committee resolved upon the latter course, and a caucus was called with a view to party harmony, which was essential to any definite result. For three days the caucus was held behind closed doors in which appeals, arguments and threats gave little hope of the harmony of action that was desired and was, at the same time, the object of the caucus. On the fourth day a terrible came—the senate tariff bill on the 20th of March, when it was reported, but it was no longer the Wilson bill that passed the house. The principle of free raw material, which was the feature of the house bill had been, in a great degree, eliminated. Coal and

iron ore were made dutiable at the rate of 40 cents a ton; a tax of 1 cent a pound was laid on raw sugars, with incidental protection of an additional one-fourth of a cent a pound on the refined article; the rates in the metal, glass, earthenware, wool, cotton and agricultural schedules had been increased. Salt, lumber, and wool still retained their places on the free list.

The general debate began in the senate on the 2d of April and closed on the 24th, after which the bill was considered by paragraph until the 3d of July, when the final vote was taken. Thus, after five months of consideration and debate, the bill passed the senate by a vote of 39 to 34. The affirmative vote was cast by 37 democrats and 2 populists (Kyle of South Dakota and Allen of Nebraska), while the negative vote was made up of 31 republicans, 2 populists (Pfeffer of Kansas and Stewart of Nevada), and 1 democrat (Mr. Hill of New York), who opposed the measure on account of its income-tax feature.

The bill then went to the conference committee of the two houses and the result was, as was generally expected, a dead-lock. Two weeks were spent in the vain endeavor to agree upon the sugar, coal, iron ore, and woolen and cotton schedules, when a disagreement was reported to the house by Mr. Wilson. It is likely that the senate and house might have adjusted their differences had not Mr. Wilson, in his speech to the house, read a letter from the president which will be found in full among the president's messages in this volume, in which the senate bill was denounced as a treacherous departure from democratic principles and the senators ac-

cused of party perfidy and dishonor. The effect of this letter on the senate was immediate and disastrous and the indignation of a portion of the democratic senators reached its height. The feeling in the senate became intense, and Mr. Morgan of Maryland, who was the leader of those whose ideas of tariff reform were less radical than prevailed in the house, assumed the leadership of his party in the senate, and in one of the most remarkable speeches ever delivered in the senate, he defended the action of that body against the charges made by the president.

The dead-lock continued, but party harmony had given away to pride of opinion and personal feeling. Proposals of compromise were made and rejected and bitterness of feeling grew more intense each day. A caucus was held in the house at the suggestion of some who were willing to yield to the senate, but nothing was accomplished. Another caucus of the house was held, and on the 13th of August the house ended the struggle by accepting the senate bill in its entirety in place of the Wilson bill. The bill passed the house and was sent to the president on the 15th of August and became a law without his approval.

It is impossible to tell what the effect of the bill will be upon the revenues, as little reliance can be put on calculations based upon the imports of 1888. In that year imports were larger than any previous year in the history of the country. Under the old (McKinley) law the average rule of duty was 45.56 per cent, in the Wilson bill the average was 35.52 per cent, and in the senate bill, as it finally passed, it is about 37 per cent.

TARIFFS, OLD AND NEW.

The following table shows the rate of duty on each article under the old (McKinley) law and also under the new law. The ad valorem averages, showing the differences between the two rates are based on the imports of 1888, and show what the ad valorem duties would have been that year, but with change in the values of imports, or in the quantity imported, these figures would be considerably varied. [Abbreviation: n. s. p. f., not specially provided for.]

The difference between the amount of money in the country and the amount in circulation represents the money in the treasury.

Currency certificates, act of June 8, 1872, are included in the amount of United States notes in circulation in tables for years 1873 to 1891, inclusive; since 1891 they are reported separate.

STATISTICS OF MANUFACTURES.

* Of 2,240 pounds.

† Includes such amounts of beet sugar as may have been imported.

‡ Leading refiners state that little or no sugar is manufactured from domestic molasses; also that in refining there is only about 2% waste of original weight. Messrs. Willet and Gray, New York, state that of the sugar consumed in 1890 only about 83,000 tons were unrefined.

CONSUMPTION OF DISTILLED SPIRITS, WINES AND MALT LIQUORS.

Quantities of distilled spirits, wines and malt liquors consumed, and the average annual consumption per capita of population, in the United States during each of the fiscal years from 1875 to 1886, inclusive.

*Since 1886 includes domestic spirits exported and returned. †Product less exports.

NOTES.—1. The production of domestic wines from 1875 to 1892 was estimated by the department of agriculture by Mr. Charles McK. Leoser, president of the Wine and Spirit Traders' society, of New York, and other well-informed persons, and the production for 1889 (opposite the year 1890) is that officially reported by the United States census. 2. The consumption of domestic spirituous and malt liquors from 1875 to 1892 was obtained from the reports of the commissioner of internal revenue. 3. The consumption of imported liquors and wines from 1875 to 1892 was taken from the official returns made to the bureau of statistics by collectors of customs. 4. In computing the quantity of sparkling and still wines and vermouth in bottles, five so-called quart bottles are reckoned as equivalent to the gallon.

SALES OF MALT LIQUORS---1888-94.

The *Brewers' Journal* for October publishes the following statistics, compiled from the report of the commissioner of internal revenue, of the sales of malt liquors in the various states and territories and in the leading cities of the country for the year 1894, as compared with the six preceding years. For the first time in eighteen years there is a decrease in the sales of malt liquors. The states showing an increase are Missouri, Texas, Rhode Island and some others. The six states in which there has been the largest decrease are Wisconsin, New York, Ohio, Pennsylvania, Illinois and Michigan. The net decrease for 1894 as compared with 1883, is 1,038,273 barrels:

SUMMARY.								
38 high-license cities ...	6,000,653	2000 to 500	17,591	375		354,834	197,008	33.5
39 low-license cities	7,750,000	400 to 50	38,199	208		389,741	196,905	39.4

COST OF THE LIQUOR TRAFFIC.

The following table, compiled from extra census bulletin No. 70, shows the amount received from saloons in licenses and the amount paid for courts and other purposes, made necessary very largely by the retail liquor traffic:

STATES AND TERRITORIES.	EXPENDITURES MAINLY DUE TO LIQUOR TRAFFIC.					Receipts from Liquor Licenses, State and Local.
	Judicial, including Co. Courts and Inquests.	Penal and Reformatory, Less Receipts.	Police.	Charitable.	Total.

In the total number of applications filed in 1894 are included 6,643 invalids and 15,329 widows, etc., under the act of June 27, 1890; 387 survivors and 1,139 widows of the Indian wars and 189 army nurses. In the number of claims allowed in 1894 are included 8,810 invalids and 16,026 widows, etc., under the act of June 27, 1890; 838 survivors and 1,368 widows of the Indian wars and 137 army nurses. In the number of pensioners on the roll under the heads of "Invalids" and "Widows, etc.," are respectively included pensioned survivors of all wars and dependent relatives of every class.

LABOR DISTURBANCES IN 1894.

MINOR STRIKES.

The year that has just closed has been characterized by the most bitter and disastrous labor revolts in the history of the country. Notwithstanding the fact that the country was just emerging from a period of severe business and industrial depression, in which closed manufactories, shops and stores were everywhere to be seen, when the wageworker was idle and capital unemployed, yet there has seldom been a time when labor was more persistent and extreme in its demands or capital more cautious and conservative.

The early disturbances of the year did not, by any means, foreshadow the turbulent events of the early spring and midsummer. In January the hatters of Danbury Conn., closed their strike, and in February the silk weavers in New York struck for an increase in wages. In January and February there was some trouble among the miners of West Virginia and in Pennsylvania, but while it was threatening it was settled without much difficulty. In Chicago and some other cities there were strikes in the building trades, but they created only local and temporary disturbances.

THE GREAT COAL STRIKE.

Preliminary to the great coal strike of April was the outbreak among the Hungarian and Slav operatives in Fayette and Westmoreland counties, known as the Connellsville coke region. In Pennsylvania, which occurred on the 2d of April. This outbreak was characterized by rioting, murder and the most wanton destruction of property by the infuriated and ignorant mob. English-speaking laborers were driven from their work, mines and machinery were blown up and destroyed by dynamite, and the chief engineer of the Frick Coke company at Connellsville, J. H. Paddock, was murdered by a mob of 200 Hungarians. The citizens of the town organized and united with the sheriff to restore order, and some of the foreigners were killed, while 156 of the rioters were lodged in jail. This put an end to the trouble and temporarily broke the strike. In May the riotings broke out again at Scottdale. The Hungarian women led some 200 discharged strikers against the new operatives put in their places, and a desperate battle resulted, in which ten of the rioters were shot and the superintendent of the works nearly

killed. The new workmen were driven out, but the rioters were later dispersed by deputy sheriffs armed with Winchester rifles.

A general strike of the miners of bituminous coal throughout the country on the 11th of April, to go into effect on the 21st of that month, was ordered by John McBride, president of the United Mineworkers of America. The intention of the strike was to call out of the mines about 200,000 miners and close all the mines in an area covered by ten states and one territory, embracing Pennsylvania, Ohio, Indiana, Illinois, Michigan, Iowa, West Virginia, Tennessee, Kentucky, Alabama and Indian Territory. The causes assigned for the strike were low wages and lack of steady employment given by the mine operators. In January, 1893, the operators and the miners made an agreement as to wages for the current year. According to this agreement the rate for mining soft coal in the Pittsburg district was 79 cents a ton and in the Hocking Valley district of Ohio, 70 cents a ton. The rates in Indiana, Illinois and other coal fields varied, but the net results of a day's work in the mines were about the same in each. In the fall of 1893 the operators in the Pittsburg district reduced the wages to 70 cents a ton, and successive cuts brought the price down to 65 and 55 cents a ton. Some operators paid the agreement price of 79 cents until the middle of November, and then reduced it to 60 cents, with the consent of the miners' organization. In the Ohio field the agreement price of 70 cents was paid by nearly all the operators until the middle of February, 1894, when it was cut to 60 cents. The Pittsburg operators again cut the wages to the same price. Before these cuts in prices Hocking Valley coal sold at the pit at from \$1 to \$1.10 per ton, but in May, 1894, it was sold as low as 75 cents.

The mine operators declared that the business depression of 1893 brought down the price of labor. It was said that by reason of the financial panic 25 per cent of the users of soft coal in manufacturing shut down, decreasing consumption to that extent, but the operators kept on mining and increased their stocks of coal. The mine-owners at first began to cut prices of coal privately to catch trade. These cuts were met by other operators, until the price of coal at the pit reached, in many cases, 75 cents a ton. The

operators had too much coal on hand and the overproduct was sold at ruinously low prices. On the other hand it is claimed that the retail price of coal remained almost stationary and it has been said that the operators made all the difference in wages as profit to themselves, a statement that can hardly be verified, although the cut in the wages was fully 24 per cent, while the falling off in the price of the coal was not to exceed 20 per cent, which left a margin of 4 per cent for the operator.

The strike began as ordered on the 21st of April, and the reports from the mines showed that on the 27th, six days later, 152,000 miners had left their work. As a rule the miners obeyed the order to strike with alacrity, but in many instances they were unwilling to join the strike, and in this way the first lawlessness was inaugurated. The miners who were willing to work were intimidated and driven out, and force was employed to compel the closing of mines. Owners of mines naturally called upon the local authorities to protect their property, and deputy sheriffs were sworn in and armed for that purpose. In a few days after the inauguration of the strike the whole bituminous coal region of the United States was a scene of insurrection and lawless violence against the civil authorities. At this stage of the trouble an effort was made to settle the difficulties, and on the 15th of May a conference was held at Cleveland, O., at which 345 delegates were present, 150 representing the operators and 195 the miners, but it resulted in a failure, as did also a conference held at Columbus on the 23d of May. At this time 175,000 miners had joined the strike, which stopped the output of the entire soft-coal production of the United States.

The failure of these conferences added seriously to the gravity of the situation. In Pennsylvania the coke rioters who had been for the time intimidated joined the strikers, while the mine-owners organized mounted forces, armed with carbines, revolvers and machine guns to protect their property. Near Uniontown the armed strikers ordered the coke works closed, and upon refusal 1,500 strikers attacked the works, which were guarded by fifteen armed deputies. A battle took place, in which the assailants were defeated, and retreated, leaving five dead and eight wounded. These conflicts were duplicated in many places.

In Illinois the strike became a rebellion against the state. The affair at LaSalle on the 24th and 25th of May is typical of the condition of things in the coal region of the state. An effort was made to protect the mines at that place by deputies, which infuriated the strikers. A posse, consisting of forty armed deputies under the command of the sheriff, was fired upon by the strikers, and the fire was returned and kept up until the guard, being out of ammunition, was forced to flee, nearly all of them wounded. A number of the rioters were arrested and put in jail, but were released by the mob. On the same day the mines at Centralia, Odlin and Pana were attacked and closed. At the first-named place the buildings and machinery were destroyed by mobs from Duquoin. The governor was called upon for troops, and with some reluctance they were ordered to Centralia and Pana under orders to preserve order and keep the peace, but not to act as guardians of private property. The day following mobs collected at Carbondale, Cartersville and Spring Valley for the purpose of releasing rioters which had been arrested and confined in the various jails in adjacent counties. For more than a week the coal region of the state was a pandemonium with mobs threatening miners, closing mines, wrecking coal trains, firing on

trainmen, defying troops and the civil authorities and putting a complete embargo on all kinds of business.

In Indiana the situation was alarming, and on the 1st of June the governor brought out the militia of the state and checked the lawlessness which had gained such headway in Illinois.

In Ohio the governor called out 1,500 state troops and sent them to the Bellaire district, where mines had been closed, trains stopped, bridges burned and tracks torn up. Troops were also sent to Massillon, Mineral Point, Ironton, St. Clairsville and Batesville, and in all about 8,000 troops were under arms doing guard duty. Similar outbreaks were reported from West Virginia at Charleston; in Maryland at Cumberland; Frostburg and other points and at various places in Iowa and other states.

By the 6th of June it was evident that the strike had spent its force and must fail. The funds of the miners' union were exhausted and the great army of strikers could not be supported, the jails were full of strikers and there were no funds to defend the legal proceedings against them. The country was abundantly supplied with men out of work who were anxious to take the places of the strikers, and they saw that they would soon be supplanted. It was impossible to sustain and carry on the strike against the militia in the field and to permit the mines to be opened was to find them at once filled with new men.

A conference was called to meet at Columbus on the 8th of June, at which an agreement was made and signed on the 11th, which put an end to the strike. The agreement placed the ton of coal definitely at 2,000 pounds. The mine that it agreed that in Pittsburgh the price in thin veins 60 cents shall be paid, in thick veins 56 cents per ton. In the Hocking district 60 cents is the set price. In Indiana, in the bituminous region, 60 cents is named, while in the black-coal region 70 cents is the price. In Illinois the price agreed upon varies from 62½ cents in the summer to 60 cents in the winter. In the winter, different districts in that state having prices fixed varying between these extremes. This scale of prices, it was agreed, shall be in effect and bind both parties thereto from June 15, 1884, until May 1, 1886, subject to the conditions that a general recognition of these prices is obtained, and, further, that in case a general agreement is not at once reached, the differences shall be submitted to arbitration. While the leaders of the miners admit that the concessions made were less than they hoped for, they claim they were the best that could be got under the circumstances.

Thus ended a strike in which the miners lost in wages \$12,500,000, while the losses in other departments of business are estimated at \$20,000,000 more.

THE GREAT NORTHERN STRIKE.

The trainmen on the Great Northern road struck on the 13th of April, being ordered by James Hogan of Spokane, Wash., organizer of the American Railway union. The strike was against a new schedule of wages which went into effect April, under which the pay of the men was reduced from 15 to 33 per cent, it being the second cut within six months.

On the 18th Judge Sanborn granted an injunction restraining strikers from disabling any of the cars, engines or other property of the company or from interfering in any manner with men who desired to continue in the service of the company or with men who may be employed to take the place of those who quit its service and from interfering with or obstructing in any way the operations of the railway.

On the 19th Mr. Debs addressed a letter to Mr. Hill, president of the road, asking for a conference. Mr. Hill assented, stating that he would meet the committee on the 21st.

The strikers disregarded the injunction of the court and returned back a train from St. Cloud to St. Paul.

On the 21st the strikers seized a train in the possession of United States Marshal Bede at Wilmar, Minn., and stopped another train at Litchfield.

The efforts to settle the strike by conference failed, and on the 27th Debs issued orders for a strike on all the Minnesota divisions of the Great Northern road, which completed the tie-up from St. Paul to the Pacific coast. On the 28th the Brotherhood of Locomotive Engineers and Firemen held a conference with President Hill, and as a result of the conference Mr. Hill agreed to raise the schedule of both engineers' and firemen's wages to their last July rate if they would go work on the 30th instant, which was agreed to.

As to the wages of the other employees that belonged to the American Railway union a committee of arbitration was agreed upon. On the 1st of May the committee made the following report as to their findings:

"WHEREAS, At a joint meeting held this day (May 1) between the management of the Great Northern railway and its employees and this committee of arbitration, at least 90 per cent of the differences in wages in controversy were amicably settled between the company and its employees; and after hearing the statements submitted by the parties in interest, we find, as a result of our deliberations, that 75 per cent of the reduction in wages made since August, 1893, of all other classes of men whose claims were submitted to us should be restored."

The result of the arbitration was accepted and the strike declared off.

THE PULLMAN BOYCOTT.

Following immediately upon the termination of the coal strike came the troubles at Pullman, which had their climax in the boycott of the Pullman cars by the American Railway union and the fierce conflict that ensued. The city of Pullman (now a part of the city of Chicago) is located on the west shore of Lake Calumet, fourteen miles south of the business center of Chicago, on the Illinois Central railroad, and has a population of about 12,000. It is the location of the plant of the Pullman Palace Car company, and the city is laid out very handsomely, with wide, paved streets, and all the buildings are substantial, handsome brick structures. The entire town, and every building in it, is owned by the Pullman company. Churches, stores, markets, opera house, hotel, school buildings, library, ball, fire engine house, and dwellings, with the sewerage, water and lighting plants, belong to the company and bring it a large revenue from rentals. Most of the operatives and workmen, in the car works, owned by the company, reside at Pullman, although it is not compulsory for them to do so. These employees number, in busy seasons, between 5,000 and 6,000 men and women.

During the year between August, 1892, and August, 1893, business at Pullman was unusually active, several hundred new cars being added to the company's service, in anticipation of the increased travel resulting from the World's Fair. Work was abundant and the wages paid the workmen were satisfactory. With the close of the fair came the business depression, which became general throughout the entire country, the reaction and depression being felt at Pullman as elsewhere. The force of workmen in the shops of the company was gradually reduced from about 4,500 to less

than 1,100 on Nov. 1, 1893. Reduction in wages and hours of labor followed decrease of the force.

Early in the winter of that year the company secured contracts for building cars for various railroads, while the large number of the company's cars in use during the World's Fair were returned for repairs. This increase of business caused an increase in the number of employees, and the force was enlarged until nearly, if not quite, 4,000 men were on the pay-rolls. The cutting of wages was again resorted to at this time, until the reductions averaged 3 1/2 per cent, but while there was such a reduction in wages there was no reduction in rents or water rates, which the company collected monthly of its employees. In some instances men could earn just barely enough to pay their rent, while the wife took boarders or rented out a part of her rooms to provide food for the family.

Under this condition of things the employees became dissatisfied, and the discontent was universal. The men were getting in debt for their rent and there seemed to be little prospect for an improvement. On the 5th of May, 1894, the Pullman carpenters met at Kennington, an adjoining village, and organized union No. 236 of the American Railway union, and this was followed shortly after by the formation of a blacksmiths' union. At the meetings of these unions a strike was advocated if wages were not increased.

Of the situation at this time the Rev. William H. Carwardine, pastor of the First M. E. church at Pullman, says: "It is generally agreed that the maximum average wage paid at the time of the strike was \$1.00. As to the lowest wages, it is difficult to average. The wages are paid every two weeks. Two checks are given to each employee—one a rent check, the other a pay check at the bank. When they go to the bank to receive their two weeks' pay the half month's rent is taken out and the pay check cashed. The scenes enacted at the bank during last winter were pitiable. Not only was the current rent urgently demanded, but back rent was asked for under circumstances in many cases entirely uncalled for. After deducting rent the men invariably had only from \$1 to \$5 or so on which to live for two weeks. One man has a pay check in his possession of 2 cents after paying rent. He has never cashed it, preferring to keep it as a memento. He has it framed. Another I saw the other day for 7 cents. It was dated September, 1893. The man had worked as a skilled mechanic at ten hours a day for twelve days, and earned \$9.07. He keeps a widowed mother and pays the rent, the house being in his name. His half month's rent amounted to \$9. The 7 cents was his, but he had never cashed it. Another man had 47 cents coming to him on his pay check, and then was asked if he would not apply that on his back rent."

A committee consisting of three employees was appointed to wait upon Mr. Pullman and ask an increase of wages, and, on the 9th of May, such a committee, consisting of E. C. Haney and Watson, met Mr. Pullman, stated their case and received from him the following reply:

"At the commencement of the very serious depression last year we were employing at Pullman 5,516 men, and paying out in wages there \$265,000 a month. Negotiations that were then pending for new work were stopped, orders were canceled and we were obliged to lay off, as you are aware, a large number of men in every department, so that by Nov. 1, 1893, there were only about two thousand men in all departments, or a little over one-third of the normal number. I realized the necessity for the most stren-

uous exertions to procure work immediately, or there would be great embarrassment among not only the employees and their families at Pullman, but also to the people living in the immediate vicinity, including between eight and nine hundred employees who had purchased homes, and to whom employment was actually necessary to enable them to complete their payments. I canvassed the matter thoroughly with the manager of the works, and instructed him to assure the men that the company would do everything in its power to meet competition which was sure to occur because of the great number of large car manufacturers that were in the same condition and that were exceedingly anxious to keep their men employed. I knew that if there was any work to be let bids would be made upon a basis very much lower than ever known before. The result of this discussion was a revision in piece-work prices, which I understand to be entirely satisfactory to the men under the circumstances.

"Under these conditions and with lower prices upon all materials, I personally undertook the work of attending the lettings of cars, and by making lower bids than other manufacturers secured work enough to gradually increase our force from 2,200 up to about 4,500, which is the number at present employed.

"This result has not been accomplished merely by reduction in wages, but the company has borne its full share by eliminating from its estimates the use of capital and machinery, and in many cases going below the bid and taking work at considerable loss, notably the Long Island cars, which was the first large order of passenger cars let after the great depression and which was sought for by all the car builders in the country. My anxiety to secure that order, so as to put as many men at work as possible, was such that I put in a bid at a considerable sum per car less than the actual cost to the company. The stock cars built for the Northwestern road and the refrigerator cars now under construction for the same company will result in a loss of at least \$12 a car, and the twenty-five cars built for the Lake Street Elevated road show a loss of \$79 a car.

"I mention these so that you may understand what the company has done for the mutual interests and to secure for the people of Pullman and vicinity the benefit of a disbursement of the large amount of money involved in these and similar contracts.

"To further benefit the people of Pullman and vicinity we concentrated all the work that we could command at that point by closing our Detroit shops entirely and laying off a large number of men at our other repair shops, and gave to Pullman the repair of all cars that could be taken care of there.

"Also, for the further benefit of our people at Pullman, we have carried on quite a large system of internal improvements, having expended nearly \$160,000 since August last in work there which under normal conditions would have been spread over one or two years. The policy has been to continue this class of work to as great an extent as possible, provided, of course, the Pullman men show a proper appreciation of the situation by doing whatever they can to help themselves to tide over the hard times which are being so seriously felt in every part of the country.

"There has been some complaint made about rents. As to this I would say that the return to this company on the capital invested in the Pullman tenements for the last year and the year before was 3.82 per cent. It will be readily understood that there is no room for reduction under these circumstances. There are hundreds of tenements in Pullman rent-

ing for from \$6 to \$9 a month, and the tenants are relieved from the usual expenses of exterior cleaning and the removal of garbage, which is done by the company. The average amount collected from employees for gas consumed is about \$2 a month.

"In order to ascertain the exact amount of water used by the tenants, separate from the amount consumed by the works, we have recently put in meters, by which we find that the water consumed by the tenants, if paid for at the rate of 4 cents per 1,000 gallons, in accordance with our original contract with the village of Hyde Park, would amount to about \$1,000 a month, almost exactly the rate which we have heretofore charged the tenants, this company assuming the expense of pumping. At the rate the city is now charging us for water we are paying about \$600 a month in excess of the amount charged to the tenants.

"The present pay-rolls at Pullman amount to \$1,000 a day.

"On the next day the three men who composed this committee of the workmen were 'laid off,' which was regarded as equivalent to a dismissal.

"The grievances of the men were investigated by an ex parte committee, composed of Vice-President Wickes, General Manager Brown, Manager Middleton, Chief Accountant Wilde, Mr. Campbell of the repair department, and Mr. Russell, attorney for the company, no one appearing in behalf of the men. The complaints of the men were treated as trivial, and no increase of wages was made. On the night of May 10 a secret all night meeting was held, composed of forty-six men, representing the different local unions at Pullman, and it was unanimously voted to strike on Saturday, May 12. Secret as the meeting was its proceedings were all known to the officers of the company early the next morning. On the next day, May 11, at 10 o'clock, a meeting was held, and learned that the company had decided to close down the works at noon of that day, and, rather than have a 'lock-out,' the men laid down their tools and walked out. Of about 2,500 men some 600 remained until noon, and a few returned after dinner and remained until night, when notices were posted by the company on the shop gates to the effect that the works would be closed indefinitely.

"Matters remained in statu quo until about the 15th of June. There was no rioting or disturbances of any kind at Pullman, the men being as quiet and peaceable as the average citizens. Proposals had been made to the Pullman company to arbitrate the differences between it and its employees, but such proposals were not entertained by the company. On the 15th of June the American Railway union held a national convention in Chicago, which was presided over by its president, Eugene V. Debs, and a special committee was appointed to confer with the officials of the Pullman company. This committee consisted of six delegates from out of the city and six from among the strikers, as follows: W. C. Lynch, John D. Sheehan, S. B. Fields, W. D. Mayhail, S. E. Hoberling, R. M. Shackelford, R. W. Brown, Miss Jennie Curtis, William Doody, F. E. Tollins, R. W. Coombs and Eugene Block.

"The committee met Vice-President Wickes on the next day, and Mr. Lynch, on behalf of the committee, said:

"We are a committee appointed by the convention of the American Railway union to ascertain whether you would recognize the American Railway union in a request for arbitration of the differences existing at Pullman."

"I will simply say that we have nothing to arbitrate," replied Mr. Wickes.

"Then you positively refuse to entertain the American Railway union in reference to the Pullman matter?" said Mr. Lynch.

"I do refuse," replied Mr. Wickes, but after some reflection he said: "I will not say 'refuse.' I will say that I will decline, and in reply to your question I will say that I am in a position to answer for the Pullman company in this matter."

On the 22d of June the committee again waited on Mr. Wickes with the same request, and, a like reply being given, formal notice was served on him of a boycott, to be inaugurated on the 26th. The boycott was not unexpected by the railroad companies, and at a meeting of all the general managers of the roads entering Chicago John M. Egan was appointed chairman, and the following resolutions were passed:

"WHEREAS, We learn through the public press that the American Railway union will declare a boycott on all Pullman cars; and,

"WHEREAS, Said boycott is in relation to matters over which we have no control, and in which we have no interest whatever; and,

"IT WHEREAS, It is stated that the object and intent of the said boycott is to discommode the traveling public and embarrass the railroads, in the belief that the public and the railroads affected will influence the settlement of the question as the American Railway union desires; and,

"WHEREAS, It is necessary that these companies determine for themselves what cars they shall or shall not handle; and,

"WHEREAS, It is important that the traveling public should understand the position of the railroads in this matter; therefore, be it

Resolved, That it is the sense of this meeting that the said proposed boycott, being confessedly not in the interest of any employees of said railroad companies and said employees, is unjustifiable and unwarranted.

Resolved, That the employees of said railway companies cannot nor can any of them with propriety embarrass said companies or discommode the traveling public because of their sympathy with the supposed wrongs of employees engaged in a wholly different class of labor.

Resolved, That we hereby declare it to be the lawful right and duty of said companies to protest against said proposed boycott; to resist the same in the interest of their existing contracts and for the benefit of the traveling public, and that we will act unitedly to that end."

Upon the same day Mr. Pullman, who was in Chicago, issued a comprehensive statement to the public with regard to the efforts of the company to keep its works open and give employment to its men. Among other things he said:

"During the night of May 10 a strike was decided upon, and accordingly next day about 2,500 of the employees quit, leaving about 800 at work, of whom only a few were of the Pullman class. As it was found impracticable to keep the shops in operation with a force thus diminished and disorganized, the next day those remaining were necessarily laid off, and no work has since been done in the shops. The pay-rolls at the time amounted to about \$7,000 a day, and were reduced to \$1,500 by the strike, so that during the period of little more than six weeks which has elapsed the employees who quit their work have deprived themselves and their comrades of earnings of more than \$200,000.

"While deploring the possibility of annoyance to the public by the threats of irresponsible organizations to interrupt the orderly administration to the comfort of travelers on railway lines aggregating 125,000 miles in length, the Pullman company can do no more

than explain its situation to the public. It has two separate branches of business, essentially distinct from each other. One is to provide sleeping cars, which are delivered by it under contract to the various railway companies to be run by them on their lines as a part of their trains for the carriage of their passengers, over the movement of which this company has no control. The other, and a distinct branch of the business of the Pullman company, is the manufacture of cars. The business of manufacturing cars for sale gives employment to about 70 per cent of the shop employees.

"The manufacture of sleeping cars for use by railway companies under contract, and which under normal conditions gives employment to about 15 per cent of the shop employees, cannot be resumed by the company to an important extent for a very long time, for out of the provision made for the abnormal travel last year the company now has about 400 sleeping cars in store ready for use, but for which there is no need in the existing conditions of public travel.

"The company now threatened by the American Railway union officials that railway companies using Pullman sleeping cars shall be compelled to deprive their passengers of sleeping-car accommodations unless the Pullman company will agree to submit to arbitration the question as to whether or not it shall open its manufacturing shops at Pullman and operate them under a scale of wages which would cause a daily loss to it of one-fourth the wages paid."

On the 26th the order of the American Railway union to boycott all Pullman cars, with directions to begin on the Illinois Central road and to extend rapidly to other railroads in the country using those cars, went into effect. This order carried the threat of a strike on every railroad that should not refuse to draw Pullman cars until that company should consent to submit the demand of its employees for increased wages to arbitration.

This boycott was the most serious blunder ever committed by American laborers. It was a sympathetic strike, not one of the men asked to take part in it having any grievance of which to complain. Switchmen, engineers, firemen, trainmen and conductors were satisfied both with their hours of labor and the wages paid them. Furthermore, the railroads were asked to do something they could not do. The railroad companies had nothing to do with the manufacture of the Pullman cars, and, beside, they were each under contract for a long term of years with the Pullman company, with heavy pecuniary bonds for a faithful performance. They were asked to draw and use its cars, and it was not in the power of the roads to obey the orders of Mr. Debs, even had they been disposed to submit to dictation from an entirely irresponsible outside party.

There was no disturbance on the 26th until late in the day. At 8 o'clock in the evening the St. Louis express, on the Illinois Central, was scheduled to leave. It had one ordinary and two Pullman coaches, which were filled with passengers. Twenty minutes late, the train pulled out and proceeded, with many interruptions, to Grand Crossing. Upon stopping there the train was surrounded by a crowd of switchmen and trackmen, the leaders demanding that the engineer and fireman quit the train because it contained Pullman coaches. The train could not proceed. The chief of police of Chicago was notified and sent Inspector Hunt, with a detail of officers, to Grand Crossing in the morning. The passenger and freight switchmen at the Randolph street station had struck and the suburban service of the road was tied up. A

special train took the officers to Grand Crossing. Arriving there, the officers attempted to disperse the crowd of strikers, but were unable to do so. There was no disorder and the police were unwilling to use forcible measures to clear the tracks. The train had nothing to do except to wait, but delayed trains accumulated at Grand Crossing, and by 10:30 o'clock nine trains were blocked at that point. Not only was the passenger traffic blocked, but the freight trains were tied up, and not a wheel could turn on the line from Kensington to the Randolph street station. The boycott was inaugurated.

On Wednesday, the 27th, the strike extended to the Chicago & Northwestern, the Panhandle, Western Indiana, Wisconsin Central, Louisville, New Albany & Chicago, Baltimore & Ohio and the Erie. The switchmen on most of these roads went out, and so far as possible the officials of the road took their places. On some of the roads, like the Great Western, trains were ordered to proceed only by flagging off the Pullman coaches. The Illinois Central was completely tied up and nearly all the roads were hampered in the moving of trains. The strike had spread to St. Paul, where most of the business on the railroads was suspended, to Milwaukee and various points on the Pacific coast. On many roads entering this city, the transportation of the mails was practically abandoned.

On the 28th Mr. Milchrist, the United States attorney in Chicago, received from Attorney General Olney, the following dispatch:

"See that the passage of regular trains carrying the United States mails in the usual and ordinary way as contemplated by the act of congress and directed by the postmaster-general, is not obstructed. Procure warrants or any other available process from the United States courts against any and all persons engaged in such obstruction and direct the United States marshals to execute the law by such number of deputies or such posse as may be necessary."

At this time railroad business at Cairo, Ill., Pueblo, Colo., Kansas City, Mo., Topeka, Kas., Duluth, Minn., Los Angeles, Cal., Fargo, N. D., and at many intermediate points had been suspended.

On the 29th no trains were permitted to pass Hammond, Ind.—twenty miles southeast of Chicago—while nearly all roads entering the city moved their trains with difficulty, and on some traffic had been entirely suspended. The Illinois Central road applied to the governor for troops to be sent to Cairo and in response to the request. In the afternoon Debs raised the boycott on the Mobile & Ohio, the managers promising to haul no more Pullman cars. The strike had spread so that there was a complete tie-up on the Pacific coast, while at St. Louis, Mo., Terre Haute, Ind., Toledo, O., Omaha, Neb., and Dubuque, Iowa, there was practically a suspension of railroad business. During the 30th the gravity of the situation was increased and more roads were involved in the strike. The sheriff was called upon for deputies to quell disturbances at various points and 150 men were sworn in. A Rock Island train was attacked at Blue Island and produce and stock business of the city was wholly suspended. During the day the Michigan Central called upon the government for aid.

The situation was worse on the 1st of July. The engineers of the Northwestern road went out and tracks of various roads were blocked by overturned freight cars. On the 2d of July a cabinet meeting was held at Washington and the questions of interference with interstate commerce, the transportation of the mails and the protection of roads in the hands of receivers, and therefore in the care of the

government, were discussed. On the next day the regulars at Fort Snider were ordered to Chicago and arrived at 5 o'clock in the afternoon. The troops consisted of Companies B and D of the 15th regiment. The first detail was sent to move a beef train at 47th street. A great crowd had congregated at that point and held possession of the tracks. The regulars reached that place after a struggle with the mob, which was too large for the troops. Reinforcements were sent for and arrived about noon, when the train moved under a heavy guard of regulars. The same day (4th) more regulars arrived, consisting of artillery and cavalry. In the entire southern portion of the city south of 47th street, mob rule and rioting prevailed. The troops were jeered at by the crowd, and when violence was threatened the mobs were charged upon with fixed bayonets. Mobs held complete possession at various places like Blue Island, Hammond, Grand Crossing and other railroad points, and trains could only be moved by squads of troops. On the 5th the first blood was shed. A special train was sent out by the Chicago & Fort Wayne railroad officials, and when at 39th street it was attacked by a crowd of strikers. They began throwing stones at the cars and engine, and one hitting the fireman knocked him senseless. The engineer was unable to get the train away from the mob, and Officer Gregory, seeing that he was about to be overcome, climbed over the tender into the cab. Seeing a man with an armful of stones preparing to throw them, he fired at him, hitting him in the leg. During the day cars loaded with produce, fruit and other goods were looted and the freight scattered over the prairie near 45th street and the Wabash tracks. Pandemonium prevailed in all the south and southwest railroad districts and the tracks were crowded with excited, angry mobs of men overturning and breaking open cars.

On the same day Gov. Altgeld sent the following letter to President Cleveland:

"EXECUTIVE OFFICE, STATE OF ILLINOIS, July 5.—The Hon. Grover Cleveland, President of the United States, Washington, D. C.—DEAR SIR: I am advised that you have ordered federal troops to go into service in the state of Illinois. Surely the facts have not been correctly presented to you in this case or you would not have taken this step, for it is entirely unnecessary and, as it seems to me, unjustifiable. Waiving all questions of courtesy, I will say that the state of Illinois is not only unable to take care of itself, but it stands ready to-day to furnish the federal government any assistance it may need elsewhere. Our military force is ample, and consists of as good soldiers as can be found in the country. They have been ordered promptly whenever and wherever they were needed. We have stationed in Chicago alone three regiments of infantry, one battery and one troop of cavalry, and no better soldiers can be found. They have been ready any moment to go on duty, and have been and are now eager to go into service. But they have not been ordered out because nobody in Cook county, whether official or private citizen, has asked for and their assistance or even intimated in any way that their assistance was desired or necessary.

"So far as I have been advised the local officials have been able to handle the situation. But if any assistance were needed the state stood ready to furnish 100 men for every man required, and stood ready to do so at a moment's notice. Notwithstanding these facts the federal government has been applied to by men who had political and selfish motives for wanting to ignore the state government. We have just gone through a long coal strike, more extensive here than in any

other state, because our soft-coal field is larger than that of any other state. We have now had ten days of the railroad strike, and we have promptly furnished military aid wherever the local officials needed it.

"In two instances the United States marshal for the southern district of Illinois applied for assistance to enable him to enforce the processes of the United States court, and troops were promptly furnished him and he was assisted in every way he desired. The law has been thoroughly executed and every man guilty of violating it during the strike has been brought to justice. If the marshal for the northern district of Illinois or the authorities of Cook county needed military assistance they had but to ask in order to get it from the state.

"At present some of our railroads are paralyzed, not by reason of obstructions, but because they cannot get men to operate their trains. For some reason they are anxious to keep this fact from the public, and for this purpose are making an outcry about obstructions in order to divert attention. Now I will cite you two examples which illustrate the situation: Some days ago I was advised that the business of one of our railroads was obstructed at two railroad centers; that there was a condition bordering on anarchy there and I was asked to furnish protection so as to enable the employees of the road to operate the trains. Troops were promptly ordered to both points. Then it transpired that the company had not sufficient men on its line to operate one train. All the old hands were orderly, but refused to go. The company had large shops in which worked a number of men who did not belong to the railway union, and who could not run an engine. They were appealed to to run the train, but flatly refused. We were obliged to hunt up soldiers who could run an engine and operate a train.

"Again, two days ago, appeals, which were almost frantic, came from one of our railroads, stating that at an important point on their lines trains were forcibly obstructed and that there was a reign of anarchy at that place, and they asked for protection so that they could move their trains. Troops were put on the ground in a few hours' time, when the officers in command telegraphed me that there was no trouble and had been none at that point, but that the road seemed to have no men to run trains, and the sheriff telegraphed that he did not need troops, but would himself move every train if the company would only furnish an engineer. The result was that the troops were there over twelve hours before a single train was moved, although there was no attempt at interference by anybody.

"It is true that in several instances a road made efforts to work a few green men and a crowd standing around insulted them and tried to drive them away. This is shown by the fact that so very little actual violence has been committed. Only a very small per cent of these men have been guilty of any infractions of the law. The newspaper accounts have in many cases been pure fabrications and in others wild exaggerations.

"I have gone thus in details to show that it is not soldiers that the railroads need so much as it is men to operate trains, and that the conditions do not exist here which bring the case within the federal statute, a statute that was passed in 1861, and was in reality a war

measure. This statute authorized the use of federal troops in a state whenever it shall be impracticable to enforce the laws of the United States within such state by the ordinary judicial proceedings. Such a condition does not exist in Illinois. There have been a few local disturbances, but nothing that seriously interfered with the administration of justice, or that could not be easily controlled by the local or state authorities, for the federal principle of our constitution, that the state troops can not do.

"I repeat that you have been imposed upon in this matter, but even if by a forced construction it were held that the conditions here came within the letter of the statute, then I submit that local self-government is a fundamental principle of our constitution. Each community should govern itself so long as it can and is ready and able to enforce the law, and it is in harmony with this fundamental principle that the statute authorizing the president to send troops into states must be construed. Especially is this so in matters relating to the exercise of police power and the preservation of law and order.

"To absolutely ignore a local government in matters of this kind when the local government is ready to furnish assistance needed and is amply able to enforce the law, not only insults the people of this state by imputing to them an inability to govern themselves or an unwillingness to enforce the law, but is in violation of a basic principle of our institutions. The question of federal supremacy is in no way involved. No one disputes it for a moment, but under our constitution federal supremacy and local self-government must go hand in hand, and to ignore the latter is to do violence to the constitution.

"As governor of the state of Illinois I protest against this and ask the immediate withdrawal of the federal troops from active duty in this state. Should the situation at any time get so serious that we cannot control it with the state forces we will promptly and cheerfully ask for federal assistance, but until such time I protest, with all due deference, against this uncalculated reflection upon our people, and again ask the immediate withdrawal of these troops. I have the honor to be, yours respectfully,
JOHN P. ALTGELD,
Governor of Illinois."

President Cleveland made the following reply to Gov. Altgeld's demand:

"EXECUTIVE MANSION, WASHINGTON, D. C. July 5, 1894.—*The Hon. John P. Altgeld, Governor of Illinois, Springfield, Ill.*: Federal troops were sent to Chicago in strict accordance with the constitution and laws of the United States, upon the demand of the post-office department, that obstruction of the mails should be removed, and upon the representations of the judicial officers of the United States that process of the federal courts could not be executed through the ordinary means, and upon abundant proof that conspiracies existed against commerce between the states. To meet these conditions, which are clearly within the province of federal authority, the presence of federal troops in the city of Chicago was deemed not only proper but necessary. Had there been no objection of the state by interfering with the plain duty of the local authorities to preserve the peace of the city."
"GROVER CLEVELAND."

On the 6th matters were still more desperate than they had yet been. The mob set fire to and burned 775 freight cars in the yard of the Pan-Handle road, situated between 55th and 63d streets, involving a loss of \$500,000. In an affray at Kensington two men were shot, where a mob of 1,000 infuriated men had attacked and overturned a freight train. In the yards of the Burlington road at Western ave-

nue and at Hawthorne 211 freight cars, many of them loaded with merchandise, were fired, and about \$80,000 worth of property destroyed. During the day five regiments of state troops were called out and ordered to report to the mayor of Chicago for assignment.

On the same day Gov. Altgeld sent the following letter to the president:

"SPRINGFIELD, Ill., July 6.—*The Hon. Grover Cleveland, President of the United States, Washington.*—SIR: Your answer to my protest involves some startling conclusions and ignores and evades the question at issue, that is that the principle of local self-government is just as fundamental in our institutions as is that of federal supremacy.

"1. You calmly assume that the executive has the legal right to order federal troops into any community of the United States in the first instance whenever there is the slightest disturbance, and that the executive can do without any regard to the question as to whether the community is able to and ready to enforce it itself, and, inasmuch as the executive is the sole judge of the question as to whether any disturbance exists or not in any part of the country, this assumption means that the executive can send federal troops into any community in the United States at his pleasure and keep them there as long as he chooses. If this is the law, then the principle of local self-government either never did exist in this country or else has been destroyed, for no community can be said to possess local government if the executive can at his pleasure send military force to patrol the streets under pretense of enforcing some law. The kind of local self-government that could exist under these circumstances can be found in any of the monarchies in Europe and is not in harmony with the spirit of our institutions.

"2. It is also a fundamental principle in our government that, except in times of war, the military shall be subordinate to civil authority. In harmony with this provision the state troops when ordered out act under and with the civil authorities. The federal troops you have ordered to Chicago are not under the civil authorities and are in no way responsible to them for their conduct. They are not even acting under the United States marshal or under any federal officer of the state, but are acting directly under military orders issued from military headquarters at Washington, and insofar as these troops act at all it is military government.

"3. The statute authorizing federal troops to be sent into states, in certain cases, contemplates that the state troops shall be taken first. This provision has been ignored, and it is assumed that the executive is not bound by it. Federal interference with industrial disturbances in the various states is certainly a new departure, and it opens up so large a field that it will require a stretch of authority to absorb to itself all the details of local government.

"4. You say that troops were ordered into Illinois upon the demand of the postoffice department and upon representation of the judicial officers of the United States that process of the courts could not be served, and upon proof that conspiracies existed. We will not discuss the facts but look for a moment at the principles involved in your statement. All of these officers are appointed by the executive. Most of them can be removed by him at will. They were not only obliged to do his bidding, but they are in fact a part of the executive. If several of them can apply for troops, one alone can, so that under the law as you assume it to be, an executive through one of his appointees can apply to himself to have the military sent into any city or number of

cities and base his application on such representations or showing as he sees fit to make. In fact it will be immaterial whether he makes any showing or not, for the executive is the sole judge and nobody else has any right to interfere or even inquire about it. Then the executive can pass on his own application—his will being the sole guide—he can hold the application to be sufficient and order troops to as many places as he wishes and put them in command of any one he chooses and have them act, not under the civil officers either federal or state, but act directly under military orders from Washington and there is not in the constitution or laws of the land, whether written or unwritten, any limitation or restraint upon his power. His judgment—that is, his will—is the sole guide, and it being purely a matter of discretion his decision can never be examined or questioned. His military assumption as to the power of the executive is certainly new, and I respectfully submit that it is not the law of the land. The jurists have told us that this is a government of law and not a government by the the caprice of individuals, and, further, that instead of being autocratic it was a government of limited power. Yet the autocrat of Russia could certainly not possess or claim to possess greater power than is possessed by the executive of the United States if your assumption is correct.

"4. The executive has the command, not only of the regular forces of the United States, but of the military forces of all the states, and can order them to any place he sees fit to, and if there are always more or less local disturbances over the country it will be an easy matter under your construction of the law for an ambitious executive to order out the military forces of all of the states and establish at once military government. The only chance of failure in such a movement could come from rebellion, and with such a vast military power at command this could readily be crushed, for as a rule, soldiers will obey orders. As for the situation in Illinois, that is of no consequence now, but comes with the far-reaching principle involved. True, according to my advice, federal troops have now been on duty for over two days, and, although the men are brave and the officers valiant and able, yet their very presence proved to be an irritation because it aroused the indignation of a large class of people who, while upholding law and order, had been taught to believe in local self-government and therefore resented what they regarded as an unwarranted interference. Inasmuch as the federal troops can do, and believe that what the state troops can do, and believing that the state is amply able to take care of the situation and to enforce the law, and believing that the ordering out of the federal troops was unwarranted, I again ask their withdrawal.

JOHN P. ALTGELD,

Governor of Illinois.

President Cleveland replied as follows to Governor Altgeld's last message:

"EXECUTIVE MANSION, WASHINGTON, D. C., July 6.—*The Hon. John P. Altgeld, Governor of Illinois, Springfield, Ill.*: While I am still persuaded that I have neither transcended my authority nor duty in the emergency that confronts us, it seems to me that in this hour of danger and public distress, discussion may well give way to active effort on the part of all in authority to restore obedience to law and to protect life and property.

"GROVER CLEVELAND."

Saturday, July 7, was the worst day of the strike, being the day of the riot at 48th and Looney streets, where a mob made free on the mob, killing two persons and fatally injuring several others. At 3 o'clock in the afternoon

Company C of the 2d regiment, I. N. G., numbering about forty men, went out with a work train on the Wabash road as far as 44th street. At every crossing mobs were encountered and the wrecking crew was unable to do any work. The train and troops started back to the city. They were transferred to the tracks of the Grand Trunk road. When the train reached Loomis and 49th streets the crowd of rioters so increased that it was seen that a conflict was inevitable. With the troops were eighty police officers, who had been with them the entire day. The wrecking crew had been clearing up overturned cars near Frazer street and the soldiers and police were gathered about the crew, all being surrounded by a howling, hooting mob of thousands of infuriated men. The work had been completed when the crowd began stoning the soldiers and several were hit and badly injured. In the mob were many women. Suddenly, as if by command, the women retired from the mob and an attack was expected by the troops. Stones and other missiles were showered on the men and a policeman fired a revolver at the crowd, which had no effect. Then the attack was renewed. Capt. Mair formed his men to withstand the attack, when a stone struck Lieut. Reed on the head. Satisfied that further delay was folly Capt. Mair gave the command to fire, which was obeyed. The command was then given to charge and the mob was dispersed at the bayonet's point. During the day 630 cars and locomotives were burned or wrecked, ninety-six cars were overturned, nine buildings were burned and twenty-six men were killed or injured.

On the 8th the following proclamation was issued by the president:

WHEREAS By reason of unlawful obstructions, combinations and assemblages of persons, it has become impracticable, in the judgment of the president, to enforce by the ordinary course of judicial proceedings the laws of the United States within the state of Illinois, and taking as part in such unlawful obstructions, combinations and assemblages, within said state; and,

"WHEREAS, That with the purpose of enforcing the faithful executions of the laws of the United States and protecting its property and removing obstructions to the United States mail in the state and city aforesaid, the president has employed a part of the military forces of the United States:

"Now, therefore, I, Grover Cleveland, president of the United States, do hereby admonish all good citizens and all persons who may be or may come within the city and state aforesaid, against aiding, countenancing, encouraging or taking any part in such unlawful obstructions, combinations and assemblages; and I hereby warn all persons engaged in or in any way connected with such unlawful obstructions, combinations and assemblages to disperse and retire peaceably to their respective abodes on or before 12 o'clock noon on the 9th day of July.

"Those who disregard this warning and persist in taking part with a riotous mob in forcibly resisting and obstructing the execution of the laws of the United States, or interfering with the functions of the government or destroying and attempting to destroy the property belonging to the United States or under its protection cannot be regarded otherwise than as public enemies.

"Troops employed against such a riotous mob will act with all moderation and forbearance consistent with the accomplishment of the desired aim, but the necessities that confront them will certainly permit discrimination between guilty participants and those who are mingled with them from curiosity and without criminal intent. The only safe course, therefore, for those not actually

unlawfully participating is to abide at their homes, or at least not to be found in the neighborhood of riotous assemblages.

"While there will be no hesitation or vacillation in the decisive treatment of the guilty, this warning is especially intended to protect and save the innocent.

"In testimony whereof I hereunto set my hand and cause the seal of the United States to be hereto affixed.

"Done at the city of Washington, this 8th day of July, in the year of our Lord one thousand eight hundred and ninety-four, and of the independence of the United States of America the one hundred and eighteenth."

A battle took place at Hammond, Ind., between the rioters and the regulars in which one rioter was killed and seven wounded. The tracks of the Western Indiana road were torn up and only such trains as were heavily guarded could move in any direction, except on a few of the roads.

On the 9th the 2d brigade of state troops was ordered to Chicago by the governor. Wrecking trains were sent out by some of the roads and began to clear the tracks of overturned and wrecked cars.

On the 10th Debs was arrested on a bench warrant issued by Judge Grosscup of the United States District court, charging him with conspiracy against the United States. He was soon after released on bonds of \$10,000. The force of the strike had about spent itself and the day was comparatively quiet. A large number of trains were moved under guard. To prolong the strike an effort was made to call out the Knights of Labor, which signally failed. The last company of regulars ordered to Chicago arrived on this day and this was practically the last day of the strike. There were occasional disturbances, but the railroads had begun their regular business and trains moved with comparative regularity and on schedule time.

On the 12th of July Mr. Debs sent the following letter to the Board of Directors answering their call:

"CHICAGO, July 12.—To the Railway Managers—GENTLEMEN: The existing troubles growing out of the Pullman strike having assumed continental proportions, and there being no indication of relief from the widespread business demoralization and distress incident thereto, the railway employees, through the board of directors of the American Railway union, respectfully make the following proposition as a basis of settlement:

"They agree to return to work in a body at once provided they shall be restored to their former positions without prejudice, except in cases, if any, that may be, where they have been convicted of crime.

"This proposition, looking to an immediate settlement of the existing strike on all lines of railway, is inspired by a purpose to subserve the public good. The strike, small and comparatively unimportant in its inception, has extended in every direction until it involves or threatens not only every public interest but the peace, security and prosperity of our common country. The contest has waged fiercely. It has extended far beyond the limits of interest originally involved and has laid hold of a vast number of industries and enterprises in no wise responsible for the differences and disagreements that led to the trouble. Factory, mill, mine and shop have been silenced; widespread demoralization has sway. The interests of multiplied thousands of people are suffering. The common welfare is seriously menaced. The public peace and tranquillity are imperiled. Grave apprehensions for the future prevail.

"This being true, and the statement will not be controverted, we conceive it to be our duty as citizens and as men to make extraordinary

efforts to end the existing strife and approaching calamities, whose shadows are even now upon us. If ended now the contest, however serious in some of its consequences, will not have been in vain. Sacrifices have been made, but they will have their compensations. Indeed, if lessons shall be taught by experience the troubles now so widely deplored will prove a blessing of inestimable value in the years to come.

"The differences that led up to the present complications need not now be discussed. At this supreme juncture every consideration of duty and patriotism demands that a remedy for existing troubles be found and applied. The employees propose to do their part by meeting their employers half way. Let it be stated that they do not impose any condition of settlement except that they be returned to their former positions. They do not ask the recognition of their organization or any organization.

"Believing this proposition to be fair, reasonable and just it is respectfully submitted, with the belief that its acceptance will result in the prompt resumption of traffic, the revival of industry and the restoration of peace and order. Respectfully,

"E. V. Debs, President.

"G. W. Howard, Vice-President.

"Sylvester Kelher, Secretary.

"American Railway Union."

The letter was returned to him the same day without reply.

On the 13th of July Mr. Pullman issued from the company's office in New York the following statement as to the attitude of the company in reference to the strike, its causes, merits, and settlement:

"There is hardly anything new to be said as to the position of the Pullman company, but I have so many misapprehensions of the facility with which my expressions and those authorized by me have become distorted, and thus misleading to the public, and of an entire forgetting of my earnest efforts to prevent the strike that perhaps it is well that I should again make a public assurance that the deplorable events of the last few weeks have not been caused by the Pullman company taking an obstinate stand in a debatable matter and refusing to listen to reason. The leaders of disorder have not hesitated to harass the public by all means in their power, because, as they say, the Pullman company would not submit to arbitration, and now that disorder seems to be quelled they are reinforced in their clamor for arbitration by some prominent newspapers, but so far as I know by very few if any business men in the country.

"What is the demand concealed under the innocently used word 'arbitration'? A little more than a year ago the shops at Pullman were in a prosperous condition, work was plenty, wages were high, and the condition of the employees was indicated by the fact that the local savings bank had of savings deposits nearly \$700,000, of which nearly all was the property of employees.

"Our pay-rolls for that year show an average earning of over \$600 per annum for every person, man, woman, or youth, on the roll. Then came the great panic and depression of last summer. Many customers stopped negotiations and canceled orders, and our working force had to be diminished from nearly 6,000 to 2,000 in November, 1886. The great business depression existing throughout the country had naturally resulted in a wage depression, and the only hope of getting orders was by bidding for work at prices as low or lower than could be made by other shops, and this of course necessitated a reduction in the wages of the employees at Pullman. This was

arranged satisfactorily, as I supposed, and in close competitions, disregarding all account of capital and machinery, I secured enough work to gradually increase our force to 4,200, the number on the roll last April.

"Nine weeks ago the car shops at Pullman were working with car-building contracts on hand enough to keep them going for about sixty days, and with all business forecasts leading to the belief that no considerable new orders could soon be had. The most important of the work in hand had been taken by me in competition at prices which were less than the actual cost to the company of delivering, without any reckoning for the use of capital and plant. This work was taken to keep the large force of men employed, and to postpone, and with the hope of avoiding the numberless embarrassments to all classes of people at Pullman and in its vicinity of a closing down of the work, to prevent which the company's conservative policy to operate the shops temporarily at an actual loss.

"In this condition of things came the agitation seeking to create a labor organization embracing all railway employees and apparently other industries. It is my belief that the controversy excited at Pullman was merely a move in the greater scheme, these shops being selected not on account of discontent in them, but because of their prominence in various ways, and because of the chance of a show of justification for a simultaneous and causeless attack upon the railways of the company, for the use under long-time contracts by three-fourths of the total of the Pullman sleeping-car system, a branch of the company's business totally distinct from its manufacturing of cars for sale.

"In the early part of May a committee of the employees demanded a restoration of the wages of a year ago. I explained to this committee minutely and patiently, and showing that the company was already paying them more than it was receiving for their contract work, and I offered them, for complete assurance and to end all question, an inspection of our books and contracts in hand.

"This and the beginning at once of Pullman of a promised careful investigation of a number of shop complaints seemed to end all trouble, but a day later, under the excitement of their recruiting into the new organization, the workmen closed the shops by abandoning their work, thus themselves doing what I was strenuously trying to prevent being done by the depression of the car-building business, and the employees who quit their work have deprived themselves and their comrades of earnings of more than \$300,000 up to this time. The demand made before quitting work was that the wages should be restored to the scale of last year, or in effect that the actual outgoing money losses then being daily incurred by the company in car-building should be deliberately increased to an amount equal to about one-fourth of the wages of the employees. It must be clear to every business man and to every thinking workman that no prudent employer could submit to arbitration the question whether he should commit such a piece of business folly.

"Arbitration always implies acquiescence in the decision of the arbitrator, whether favorable or adverse. How could I, as president of the Pullman company, consent to agree that if any body of men not concerned with the interests of the company's shareholders should, as arbitrators, for any reasons seeming good to them so decree, I would open the shops, employ workmen at wages greater than their work could be sold for, and continue this ruinous policy indefinitely or be accused of a breach of faith? Who will deny that such a question is plainly not a subject

of arbitration? Is it not, then, unreasonable that the company should be asked to arbitrate whether or not it should submit such a question to arbitration?

"Removing the original and fundamental question one stage does not help the matter; the question would still remain: Can I as a business man, knowing the truth of the facts which I have stated, bind myself that I will in any contingency open and operate the Pullman car shops at whatever loss if it should happen to be the opinion of some third party that I should do so? The answer seems to be plain.

"The public should not permit the real question which has been before it to be obscured. That question was as to the possibility of the creation and duration of a dictatorship which could make all the industries of the United States and the daily comfort of the millions dependent upon them hostages for the granting of any capricious whim of such a dictator. Any submission to him would have been a long step in that direction, and in the interest of every law-abiding citizen of the United States was not to be considered for a moment.

"A few words are pertinent as to some industriously spread charges against the company. One of these charges is that rents are exorbitant and it is implied that the Pullman employees have no choice but to submit. The answer is simple: The average rental of tenements at Pullman is at the rate of \$3 per room per month and the renting of houses at Pullman has no relation to the work in the shops. Employees make, and very many do, own or rent their houses outside of the town; and the buildings and business places in the town are rented to employees or to others in competition with neighboring properties. In short, the renting business of the Pullman company is governed by the same conditions which govern any other large owner of real estate, except that the company itself does directly some things which in Chicago are assumed by the city. If, therefore, it is not admitted that the rents of any landlord are to be fixed by arbitration, and that those of the adjoining towns of Kensington and Roseland should also be so fixed, it can hardly be asked that the Pullman company alone should abandon the ordinary rules which govern persons in that relation.

"As to charges for water, the company until lately had a contract with the village of Hyde Park, under which it paid 4 cents per 1,000 gallons and pumped the water itself. The gross amount paid the village per month for the water consumed by the tenants was almost exactly the gross sum paid by the tenants therefor. Since the inclusion of Hyde Park and Pullman within the city of Chicago the company paid the city about 10 cents per 1,000 gallons, and not having increased the charge to the tenants is paying for the water consumed by them about \$500 per month more than is charged to them. The company has made repeated efforts to disassociate itself from the supplying of water to tenants, but the city of Chicago has yet failed to apply the ordinary frontage rates to the houses and shops in Pullman, although it is done in the adjacent towns.

"Strenuous efforts have also been made to create a prejudice against the Pullman company by charges that its stock is heavily watered. The Pullman company was organized twenty-seven years ago with a capital of \$1,000,000, of which two-thirds represented the appraised value of its cars, then held by three owners, and one-third represented the appraised value of its franchises and existing contracts. The company has grown until its sleeping-car service covers 125,000 miles of

railway, or about three-fourths of the railway system of the country, and that increase of service has necessitated increase of its capital from time to time until it is now \$36,000,000. Every share of this increase has been offered to stockholders and sold to them or to others in the ordinary course of business at not less than par in cash, so that for every share of increase outstanding the company has received \$100 in cash. There are over 4,000 stockholders of the company, of whom more than one-half are women and trustees of estates, and the average holding of each stockholder is now eighty-six shares, one-fifth of them holding less than six shares each."

The following statement shows the detachments of regular troops that did service in the city during the strike and where they were stationed:

The first troops to reach Chicago were those from Fort Sheridan on the night of July 3. The 15th, 16th, 17th, 18th, 19th, 20th, 21st, 22nd, 23rd, 24th, 25th, 26th, 27th, 28th, 29th, 30th, 31st, 32nd, 33rd, 34th, 35th, 36th, 37th, 38th, 39th, 40th, 41st, 42nd, 43rd, 44th, 45th, 46th, 47th, 48th, 49th, 50th, 51st, 52nd, 53rd, 54th, 55th, 56th, 57th, 58th, 59th, 60th, 61st, 62nd, 63rd, 64th, 65th, 66th, 67th, 68th, 69th, 70th, 71st, 72nd, 73rd, 74th, 75th, 76th, 77th, 78th, 79th, 80th, 81st, 82nd, 83rd, 84th, 85th, 86th, 87th, 88th, 89th, 90th, 91st, 92nd, 93rd, 94th, 95th, 96th, 97th, 98th, 99th, 100th, 101st, 102nd, 103rd, 104th, 105th, 106th, 107th, 108th, 109th, 110th, 111th, 112th, 113th, 114th, 115th, 116th, 117th, 118th, 119th, 120th, 121st, 122nd, 123rd, 124th, 125th, 126th, 127th, 128th, 129th, 130th, 131st, 132nd, 133rd, 134th, 135th, 136th, 137th, 138th, 139th, 140th, 141st, 142nd, 143rd, 144th, 145th, 146th, 147th, 148th, 149th, 150th, 151st, 152nd, 153rd, 154th, 155th, 156th, 157th, 158th, 159th, 160th, 161st, 162nd, 163rd, 164th, 165th, 166th, 167th, 168th, 169th, 170th, 171st, 172nd, 173rd, 174th, 175th, 176th, 177th, 178th, 179th, 180th, 181st, 182nd, 183rd, 184th, 185th, 186th, 187th, 188th, 189th, 190th, 191st, 192nd, 193rd, 194th, 195th, 196th, 197th, 198th, 199th, 200th, 201st, 202nd, 203rd, 204th, 205th, 206th, 207th, 208th, 209th, 210th, 211th, 212th, 213th, 214th, 215th, 216th, 217th, 218th, 219th, 220th, 221st, 222nd, 223rd, 224th, 225th, 226th, 227th, 228th, 229th, 230th, 231st, 232nd, 233rd, 234th, 235th, 236th, 237th, 238th, 239th, 240th, 241st, 242nd, 243rd, 244th, 245th, 246th, 247th, 248th, 249th, 250th, 251st, 252nd, 253rd, 254th, 255th, 256th, 257th, 258th, 259th, 260th, 261st, 262nd, 263rd, 264th, 265th, 266th, 267th, 268th, 269th, 270th, 271st, 272nd, 273rd, 274th, 275th, 276th, 277th, 278th, 279th, 280th, 281st, 282nd, 283rd, 284th, 285th, 286th, 287th, 288th, 289th, 290th, 291st, 292nd, 293rd, 294th, 295th, 296th, 297th, 298th, 299th, 300th, 301st, 302nd, 303rd, 304th, 305th, 306th, 307th, 308th, 309th, 310th, 311th, 312th, 313th, 314th, 315th, 316th, 317th, 318th, 319th, 320th, 321st, 322nd, 323rd, 324th, 325th, 326th, 327th, 328th, 329th, 330th, 331st, 332nd, 333rd, 334th, 335th, 336th, 337th, 338th, 339th, 340th, 341st, 342nd, 343rd, 344th, 345th, 346th, 347th, 348th, 349th, 350th, 351st, 352nd, 353rd, 354th, 355th, 356th, 357th, 358th, 359th, 360th, 361st, 362nd, 363rd, 364th, 365th, 366th, 367th, 368th, 369th, 370th, 371st, 372nd, 373rd, 374th, 375th, 376th, 377th, 378th, 379th, 380th, 381st, 382nd, 383rd, 384th, 385th, 386th, 387th, 388th, 389th, 390th, 391st, 392nd, 393rd, 394th, 395th, 396th, 397th, 398th, 399th, 400th, 401st, 402nd, 403rd, 404th, 405th, 406th, 407th, 408th, 409th, 410th, 411th, 412th, 413th, 414th, 415th, 416th, 417th, 418th, 419th, 420th, 421st, 422nd, 423rd, 424th, 425th, 426th, 427th, 428th, 429th, 430th, 431st, 432nd, 433rd, 434th, 435th, 436th, 437th, 438th, 439th, 440th, 441st, 442nd, 443rd, 444th, 445th, 446th, 447th, 448th, 449th, 450th, 451st, 452nd, 453rd, 454th, 455th, 456th, 457th, 458th, 459th, 460th, 461st, 462nd, 463rd, 464th, 465th, 466th, 467th, 468th, 469th, 470th, 471st, 472nd, 473rd, 474th, 475th, 476th, 477th, 478th, 479th, 480th, 481st, 482nd, 483rd, 484th, 485th, 486th, 487th, 488th, 489th, 490th, 491st, 492nd, 493rd, 494th, 495th, 496th, 497th, 498th, 499th, 500th, 501st, 502nd, 503rd, 504th, 505th, 506th, 507th, 508th, 509th, 510th, 511th, 512th, 513th, 514th, 515th, 516th, 517th, 518th, 519th, 520th, 521st, 522nd, 523rd, 524th, 525th, 526th, 527th, 528th, 529th, 530th, 531st, 532nd, 533rd, 534th, 535th, 536th, 537th, 538th, 539th, 540th, 541st, 542nd, 543rd, 544th, 545th, 546th, 547th, 548th, 549th, 550th, 551st, 552nd, 553rd, 554th, 555th, 556th, 557th, 558th, 559th, 560th, 561st, 562nd, 563rd, 564th, 565th, 566th, 567th, 568th, 569th, 570th, 571st, 572nd, 573rd, 574th, 575th, 576th, 577th, 578th, 579th, 580th, 581st, 582nd, 583rd, 584th, 585th, 586th, 587th, 588th, 589th, 590th, 591st, 592nd, 593rd, 594th, 595th, 596th, 597th, 598th, 599th, 600th, 601st, 602nd, 603rd, 604th, 605th, 606th, 607th, 608th, 609th, 610th, 611th, 612th, 613th, 614th, 615th, 616th, 617th, 618th, 619th, 620th, 621st, 622nd, 623rd, 624th, 625th, 626th, 627th, 628th, 629th, 630th, 631st, 632nd, 633rd, 634th, 635th, 636th, 637th, 638th, 639th, 640th, 641st, 642nd, 643rd, 644th, 645th, 646th, 647th, 648th, 649th, 650th, 651st, 652nd, 653rd, 654th, 655th, 656th, 657th, 658th, 659th, 660th, 661st, 662nd, 663rd, 664th, 665th, 666th, 667th, 668th, 669th, 670th, 671st, 672nd, 673rd, 674th, 675th, 676th, 677th, 678th, 679th, 680th, 681st, 682nd, 683rd, 684th, 685th, 686th, 687th, 688th, 689th, 690th, 691st, 692nd, 693rd, 694th, 695th, 696th, 697th, 698th, tion that the force in the Pullman shops Nov. 1, 1893, was less than 1,100, while the average number employed in the fiscal year ended July 31, 1894, was 4,497. In the months of August and September, 1893, we had an opportunity of making only six bids for work, of which but three were accepted.

"In order to procure car-building contracts a reduction of the wages of April, 1893, of the car-shop employees, averaging 19 per cent, was made to make them correspond with those paid by other car manufacturers.

"I have learned in various ways that a good many persons during the strike lost sight of its true origin and gained the impression that it was influenced by the house rents at Pullman not being lowered when wages were reduced from the high scale of the spring of 1893. That this is not true is shown by the fact that more than two-thirds of the employees who began the strike were not tenants of the company; indeed, between 500 and 600 of them owned their own homes. It is true that frame houses, at slightly lower rents, may be had in the adjacent towns by such employees as do not consider the small difference in rent to be much more than made up by the advantages of well-built brick houses with gas and water and drainage connections, situated on paved and shaded and cleaned streets and in attractive surroundings.

"These things being taken into account, the rents in Pullman are really cheaper. When it is considered that there are more than 1,800 tenements in Pullman and that there have been in the fourteen years since the town was founded only about six forcible evictions of undesirable tenants it is clear that the relations of the company with its tenants have been free from difficulty in a most extraordinary degree.

"The number of men now employed in the shops is 2,640, and the scale of wages now is the same as that existing at the time of the strike and rents are promptly paid. As to the tenants who are not re-employed, none of them have been evicted or unduly pressed for their arrearages of rent; there has been a gradual voluntary return of the unemployed tenants going on, as they have found work elsewhere, and there are now 279 of them remaining.

"The real cause of complaint during the autumn of 1893 and the succeeding winter was not altogether on account of the scale of wages, but largely because there was not enough work to give an opportunity for anything like full earnings by all the men.

"The average daily pay to journeymen mechanics at the time of the strike was \$2.08, and charges of insufficient wages have for their foundation chiefly the misleading statements of but three months when full employment could not be given, but two of whom nevertheless earned \$384 and \$342 respectively in the year and the other earned \$345, working hardly more than half time. The wages paid were in fact current wages in such trades and substantially the same as at our Wilmington shops, where the attempt of the American Railway union to cause a strike met with no concurrence on the part of the employees.

"If the men had continued at work instead of remaining idle for nearly three months, wages amounting to more than \$350,000 would have been paid them, a sum to be contrasted with the total value of contracting done made for them, which, so far as we are advised, did not exceed \$50,000.

"By making bids at shop cost and less we secured work aggregating about \$1,500,000, and were underbid on bids for nearly the same amount. On the accepted bids our net loss was over \$50,000. By continuing course we had been able by last May to secure work enough

to raise the number having employment to nearly 3,800.

"Although these conditions were carefully explained to a large committee of the shop employees three-fourths of them were persuaded to enter upon the strike because the company declined to restore wages to the scale of the prosperous times of the early part of 1893. Several suggestions were made to the company that it should consent to arbitration as a means of ending the strike, but it declined to do so on the ground that it being an ascertained fact that even at the existing rate of wages car-building contracts could only be procured for execution at actual and serious losses, the company could not possibly submit to the discretion of any person not responsible to its shareholders the question whether or not it should increase its manufacturing losses by any increase of wages, or even whether or not it should continue the manufacturing of cars at current prices at the wages complained of.

"June 22 a demand for arbitration was presented to the company by a committee of the American Railway union, accompanied by the threat of an attempt to stop the operation of Pullman cars. This attempt began June 26, and after much public discomfort had been caused and great disorders had been inspired, of such violence and extent as to require the intervention of the United States military forces, it was practically overcome by about the middle of July.

"We then began receiving applications for employment at the shops, and were able to open the repair department on Aug. 2, and gradually the other departments, but the business to be done has justified the employment of little more than three-fourths of the number employed at the time of the strike.

"There has been no substantial change in the condition of the car-building business, and the contracts taken by us before the strike and those taken since the strike are being executed at prices which give no profit, and such contracts are taken because the shops are being kept in operation for the repairing of the company's own cars and to give as much employment as is possible in the present condition of business.

"I may observe also that there have been indications of a feeling in some quarters that this company ought to have maintained the scale of wages existing in the car-manufacturing department in April, 1893, without regard to the current selling price for cars, paying the consequent increased losses in the car-building business out of the company's earnings in the independent business of operating sleeping cars, and thus sharing the sleeping-car earnings with the car-building employees, who to use the language of the union, 'had been working for a long time.' Such a principle of business would as well require the mechanics to be kept on the roll at full pay, even if there was no work for them. It must also be remembered that the company's business of operating sleeping cars is the growth of twenty-seven years, and of the independent business of car manufacturing for sale at Pullman has been going on only one-half that time. At what point did a principle take effect that the latter business must be kept going by the former regardless of their independence or of the discrepancy between the cost and selling price of cars? At the time of the strike 277 of the shop employees had been in the employment of the company for less than a year, and more than half the entire force had been with the company less than five years. Had all of them earned a guaranty of uninterrupted, undiminished wages, and if not where would we have been drawn, and what was to be done in respect to

shop employees of varying terms of service who were laid off in the summer of 1893 for lack of work and who have not been re-employed.

"Of the present force at the car shops only about 300 are new employees, and the remainder have returned to their former work with, I believe, a widely prevailing feeling that they have learned by experience that this company was earnest in befriending them in seeking work for them when little was to be had, and in giving them work at wages which the selling prices of their product did not justify, and that the genuineness of the interest of this company in their welfare is far more to be trusted than the promises of the agitators who misled them.

"By increased attention to their work the mechanics have under the same scale of piece-work prices increased their average daily earnings from \$2.03 in last April to \$2.16 in the last half of September, the latest report received.

As to the cost of the strike no strictly reliable statistics can be given. The commission pointed by the president to investigate the strike, consisting of Carroll D. Wright, Washington, D. C.; John D. Kernan, Utica, N. Y., and Nicholas E. Worthington, Peoria, Ill., made some attempt to ascertain the losses in Chicago alone, and in its report the commission says:

According to the testimony the railroads lost in property destroyed, hire of United States deputy marshals, and other incidental expenses, at least \$335,303. The loss of earnings of these roads is estimated at \$4,572,916. Some 8,100 employees at Pullman lost in wages, as estimated, at least \$350,000. About 100,000 employees upon the twenty-four railroads centering at Chicago, all of which were more or less involved in the strike, lost in wages, as estimated, at least \$1,339,143. Many of these employees are still adrift and losing wages. Total, \$7,067,367.

Beyond these amounts very great losses, widely distributed, were incidentally suffered throughout the country. The suspension of transportation at Chicago paralyzed a vast distributive center, and imposed many hardships and much loss upon the great number of people whose manufacturing and business operations, employment, travel, and necessary supplies depend upon and demand regular transportation service to, from and through Chicago.

During the strike the fatalities, arrests, indictments and dismissals of charges for strike offenses in Chicago and vicinity were as follows:

Number shot and fatally wounded.....	12
Number arrested by the police.....	575
Number arrested under United States statutes and against whom indictments were found.....	71
Number arrested against whom indictments were not found.....	119

For the protection of city, state and federal property, for the suppression of crime and the preservation of order, the city, county, state and federal forces were utilized as shown in the following statement:

From July 3 to July 10 the number of United States troops sent to and used in Chicago to protect the United States mail service and federal buildings, and to sustain the execution of the orders of the United States courts was.....	1,936
Between July 6 and July 11 the state militia was ordered on duty at Chicago and remained so long as needed, to the number of about.....	4,000
Extra deputy marshals about.....	5,000
Extra deputy sheriffs.....	250

Police force of Chicago.....	3,000
Total.....	14,186

THE COTTON-SPINNERS' STRIKE.

On the 20th day of August the cotton spinners of New Bedford, Mass., struck against a reduction of wages. The strike spread to Fall River and other cotton-spinning centers until it was estimated that more than 36,000 operatives were involved.

The strike was caused by a notice posted in nearly all the mills of New Bedford that on and after Monday, Aug. 20, there would be a reduction of 10 per cent in the rates paid for most of the work and 6 per cent in the remainder. The same reduction was made in all of the mills in the city of Fall River and as a matter of course the managers of the mills in the former place took the initiative and the strike occurred there first.

The reason given by the mill owners for cutting down wages was the sharp decline in the market price for cotton goods and particularly for prints, which were then lower than they ever were before and were quoted at 2½ cents a yard, less 1 per cent on all bills. At the time of the strike they were as low as 2 7-16 cents a yard. During the summer of 1893 they dropped to 2¼ cents, but the average rate for the year was nearly 4 cents, and in 1892 the lowest price reached was 3 1-16 cents. Prices had been gradually falling for several years.

The mill men said they could not pay the old wages and sell cloth at 2½ cents a yard without losing money, and it was simply a question of reducing the cost of production or closing their factories. More than half the companies reduced their July dividends, and some claim to have paid them out of their own surplus. The remainder passed their dividends altogether. There was a reduction of 10 per cent in wages in the fall of 1893 and the mill men stood it without grumbling, but since then cottons had fallen from 3¼ to 2½ cents a yard and the managers insisted that their workmen should share the difference with them.

It cost about 1 cent a yard to manufacture cotton prints for the labor alone, not including raw material, machinery, repairs, interest, insurance and other fixed charges which represent the rest of the value in the goods and which the manufacturers said cannot be reduced. So when any cut is made it must come out of the labor, and by the 10 per cent reduction the labor cost would be 9 mills.

Fall River is the largest cotton-mill town in America. It has seventy-five factories, representing a capital stock and probable investment of \$45,000,000. Ninety-two per cent of it is owned by residents of that city. The mills of Lowell, Lawrence, Manchester and other places are mostly owned by Boston and New York men or other non-residents, and the stock is held in large blocks, often by single families. But in Fall River it is different. The stock of all but two or three of the mills is widely scattered in small holdings among the thrifty people of the town, having been upon the market many years and regarded as the best investment that people of slender means can command. It is estimated by one of the leading brokers here that there are 3,200 stockholders in the Fall River mills, not 3,200 different persons, for some own stock in nearly all the mills. But he says that the \$45,000,000 that represent the capital of the seventy-five mills is divided into at least 3,200 holdings. Many of the operatives own stock of the mills they work in, and there are few tradespeople who haven't a share or two, who must not strike of more than ordinary interest and importance. Another peculiarity is that all the

managers and officers of the mills live in Fall River except two, one of whom resides in Boston and the other in Providence.

In these mills are 2,546,688 spindles, nearly 16 per cent of the total for the whole United States, or twice as many as are found in any other city; more than in any other state except Massachusetts, and outside of New England more than in all of the other states combined. The principal business is the manufacture of print cloths and dyeing of cotton goods and the making of cotton thread and yarn. There are a few woolen mills also and some factories in which hats and other wearing apparel are made, and there are several manufacturers of patented machinery, such as is used in the mills, but cotton prints are the best staple and this city furnishes two-thirds of all that are used in the United States.

When all the mills are in full operation their looms are spindles demand the attention of upward of 80,000 employees. The last time a count was made, there were 25,920, and over 23,000 made idle because of the strike.

The weekly pay-roll is \$172,675, which gives a very low average per capita, about \$6.65, but the majority of the hands are women and boys and girls over 14, for that is the age limit of labor in the state of Massachusetts. The

men and some of the women who are weavers and spinners are paid by the piece, so that the more skillful get the better wages. The boys and girls are paid by the week, earning from \$3 to \$5. The adult women make from \$5 to \$7.50 and some as high as \$10, while the men make from \$10 to \$16 or \$20, according to their skill, with an average of perhaps \$12.50. Nine hours is a day's labor in ordinary times, but when large orders are in and business is rushing the mills may run longer, but wages are increased in proportion.

The strike was not an unmixed evil to the mill owners as it gave an opportunity for repairs and the reduction of accumulated stocks. The strike continued until the 12th of October when the spinners accepted the proposal of the mill owners. This proposal was that the spinners return to work under a reduction of 5 per cent. If the margin holds at 85 cents, as at present, for sixty days, the other 5 will be restored. If it declines to 85 cents, or below, the 5 per cent will be increased to a 10 per cent reduction.

It was accepted and the strike declared off. The weavers were unwilling to return to work at these wages and the strike was continued on their part until near the close of the year.

ARBITRATION IN LABOR DISPUTES.

Laws providing for the settlement of disputes between employers and employes by means of mediation, conciliation and arbitration have been enacted in California, Colorado, Iowa, Kansas, Maryland, Massachusetts, Michigan, Missouri, New Jersey, New York, Ohio and Pennsylvania; but state boards have not been established for the purpose, except in Massachusetts, New York, California, Ohio and New Jersey. An act of the legislature of the state of Michigan, approved July 3, 1893, authorized the governor of that state to appoint a state board of mediation and arbitration, but thus far the governor has failed to exercise the authority thus conferred upon him. The law of Colorado provides that when differences arise between employers and employes, threatening to result or resulting in a strike or lockout, it shall be the duty of the commissioner of the bureau of labor statistics to mediate between the parties to the controversy, if either party request his intervention. Similar powers are conferred upon the commissioner of labor statistics of the state of Missouri, and he is also authorized, under certain circumstances, to form local boards of arbitration and act as the president thereof. The laws of Iowa, Kansas, Maryland and Pennsylvania simply authorize the courts to appoint a tribunal of voluntary arbitration when the parties to labor disputes petition for or consent to their appointment; the jurisdiction of each of such tribunals being limited to the county or portion of the state in which the dispute may arise.

THE MASSACHUSETTS LAW.

Under the law of Massachusetts the governor appoints three competent persons to serve as a state board of arbitration and conciliation, one of whom shall be an employer of labor, one selected from some labor organization and a third appointed upon the recommendation of the other two. The members of the board receive a salary not exceeding \$1,200 a year each. The law provides that:

Whenever any controversy or difference not involving questions which may be the subject of a suit at law or bill in equity, exists between an employer, whether an individual, copartnership or corporation, and his em-

ployee, if at the time he employs not less than twenty-five persons in the same general line of business in any city or town in this commonwealth, the board shall, upon application as hereinafter provided, and as soon as practicable thereafter, visit the locality of the dispute and make careful inquiry into the cause thereof, hear all persons interested therein who may come before them, and the respective parties what, if anything, ought to be done or submitted to by either or both to adjust said dispute, and make a written decision thereof. This decision shall at once be made public, shall be recorded upon proper books of record to be kept by the secretary of said board, and a short statement thereof published in the annual report hereinafter provided for, and the said board shall cause a copy thereof to be filed with the clerk of the city or town where said business is carried on.

Said application shall be signed by said employer or by a majority of his employees in the department of the business in which the controversy or difference exists, or their duly authorized agent, or by both parties, and shall contain a concise statement of the grievances complained of, and a promise to continue on in business or at work without any lockout or strike until the decision of said board, if it shall be made within three weeks of the date of filing said application. When an application is signed by an agent claiming to represent a majority of such employees, the board shall satisfy itself that such agent is duly authorized in writing to represent such employees, but the names of the employees giving such authority shall be kept secret by the board. As soon as may be after the receipt of said application the secretary of said board shall cause public notice to be given for the time and place for the hearing thereon; but public notice need not be given when both parties to the controversy join in the application and present therewith a written request that no public notice be given. When such request is made, notice shall be given to the parties interested in such manner as the board may order; and the board may, at any stage of the proceedings, cause public notice to be given, notwithstanding such request.

The law further provides for the appoint-

ment of experts who shall be skilled in and conversant with the business or trade concerned in which the dispute has arisen. The board may also summon as witnesses any operative in the departments of business affected who are paid 50 cents for attendance and a further sum of 25 cents for each hour's attendance in excess of two hours.

The decision shall be a written one and a part of the record of the board, and shall be open to public inspection.

The decision is binding upon the parties who join in the application for six months or until either party has given the other notice in writing of an intention not to be bound by the same at the expiration of 60 days. The law also provides that the parties to the controversy or difference as described in section 3 of this act may submit the matters in dispute, in writing, to a local board of arbitration and conciliation; such board may either be mutually agreed upon, or the employer may designate one of the arbitrators, the employees or their duly authorized agent, another, and the two arbitrators so designated may choose a third who shall be chairman of the board. Such board shall, in respect to the matters referred to it, have and exercise all the powers which the state board might have and exercise, and its decision shall have whatever binding effect may be agreed by the parties to the controversy in the written submission. The jurisdiction of such board shall be exclusive in respect to the matters submitted to it, but it may ask and receive the advice and assistance of the state board. The decision of such board shall be rendered within ten days of the closing of the hearing held by it; such decision shall at once be filed with the clerk of the city or town in which the controversy or difference arose, and a copy thereof shall be forwarded to the state board. Each of such arbitrators shall be entitled to receive from the treasury of the city or town in which the controversy or difference exists, if such payment is approved in writing by the mayor of such city or the board of selectmen of such town, the sum of \$3 for each day of actual service, not exceeding ten days for any one arbitration. Whenever it is made to appear to the mayor of a city or the board of selectmen of a town that a strike or lockout is seriously threatened or actually occurs, the mayor of such city or the board of selectmen of such town shall at once notify the state board of the facts. The state board shall use its efforts to secure arbitration by a trial board or may investigate the matter itself.

THE CALIFORNIA LAW.

The law of 1891 provides for the appointment of three commissioners, one of whom shall represent the employer of labor, another who shall represent labor employees, and a third, who shall represent neither and be the chairman of the board. They are appointed by the governor and receive \$5 a day for actual service and necessary traveling expenses.

Whenever any controversy or difference exists between an employer, whether an individual, copartnership, or corporation, which, if not arbitrated, would result in a strike, lockout, and his employees, the board shall, upon application, as hereinafter provided, and as soon as practicable thereafter, visit, if necessary, the locality of the dispute and make careful inquiry into the cause thereof, hear all persons interested therein who may come before them, advise the respective parties what, if anything, ought to be done or submitted to by either, or both, to adjust said dispute, and make a written decision thereof. This decision shall at once be made public,

shall be recorded upon proper books of record to be kept by the board.

Said application shall be signed by said employer, or by a majority of his employees in the department of the business in which the controversy or difference exists, or their duly authorized agent, or by both parties, and shall contain a concise statement of the grievances complained of, and a promise to continue on in business or at work, without any lockout or strike, until the decision of said board, which must, if possible, be made within three weeks of the date of filing the application. Immediately upon the receipt of said application, the chairman of said board shall cause public notice to be given of the time and place for hearing. Should the petitioners fail to keep the promise made therein, the board shall proceed no further thereupon without the written consent of the adverse party. And the party violating the contract shall pay the extra cost of the board entailed thereby. The board may also reopen the cause and proceed to the arbitration thereof as provided in section 2 hereof.

The decision rendered by the board shall be binding upon the parties who join in the application for six months, or until either party has given the other a written notice of his intention not to be bound by the conditions thereof after the expiration of sixty days or any time agreed upon by the parties, which agreement shall be entered as a part of the decision. Said notice may be given to the employees by posting a notice thereof in three conspicuous places in the shop or factory where they work.

THE COLORADO LAW.

Section 9 of the law creating the bureau of labor statistics of the state of Colorado makes the following provision for the settlement of labor disputes: If any difference shall arise between any corporation or employer employing twenty-five or more employees, and such employees making threats resulting in a strike on the part of such employees, or a lockout on the part of such employer, it shall be the duty of the commissioner, when requested so to do by fifteen or more of said employees, or by the employer, to visit the place of such disturbance and diligently seek to mediate between such employer and employees.

THE IOWA LAW.

The Iowa law is very complicated and involves a great many transactions and conditions. A tribunal for the settlement of disputes between men and their employers may be established in any or every county in the state, provided a license is obtained from the district court for that purpose. The form of the license is given in the statute, and reads as follows:

"Whereas, The joint petition and agreement of four employers and four workmen have been presented to this court, praying the creation of a tribunal of voluntary arbitration for the settlement of disputes in the ———— trade within this county, and naming A, B, C, D and E, representing the employers, and F, G, H, I and K representing the workmen in pursuance of the statute for such case made and provided, said named persons are hereby licensed and authorized to be and exist as a tribunal of voluntary arbitration for the settlement of disputes between employers and workmen for the period of one year from this date, and they shall meet and organize on the ——— day of ———, A. D. ———,

"Signed this day the ———— 18—,

"Clerk of the district court of ———— county."

Then, if this tribunal cannot agree, it is authorized by the law to select an umpire, first having signed an agreement to abide by and carry out his decision.

In order to obtain a license, the parties engaged in the dispute, that is the workmen who are dissatisfied with their condition, or have struck work and their employers—must first agree to arbitration. Then they must select a number of arbitrators to represent each side. It may be two, or it may be six—persons who are mutually agreeable. Then they must join in a petition to the court, which must be of a certain form—the phraseology is given in the law—and contain an agreement that they will abide by the decision. The petition must be signed by at least twenty persons employed as workmen, or by four or more firms or employers, each of whom shall employ at least five persons, or by a single firm or employer who shall employ not less than twenty workmen, and it must be supported by testimony, either oral or written, as to the representative character of the persons whose names are attached. This is to guard against straw petitions, for the law requires the court to deny the petition unless it shall be fully satisfied that the parties presenting it represent the wishes of at least one-half the persons whose interests may be involved in the dispute. Vacancies upon the tribunal must be filled by the court, but the disputants may make suggestions if they desire to do so.

The members of the tribunal may not receive any compensation, reward or consideration of any sort, but their actual expenses may be paid by voluntary contributions from the parties interested or the public. They must sit in the courthouse at the county seat. The chairman, who is selected by the members of the board, has the power to administer oaths, and if a majority of the members so determine they have the right to examine books, papers, records, etc., or by unanimous consent, an expert accountant may be employed for that purpose, whose report shall be made in writing and sworn to.

In case the tribunal fails to agree and an umpire is selected the question in dispute must be presented to him in writing, signed by all parties, and he then has all the powers and authority that are vested in the board. Decisions must be in writing, one copy to be furnished to each of the parties interested and a third to be filed with the clerk of the court. If the decision involves an award of money the court is directed to enter judgment and enforce the collection of the same.

THE KANSAS LAW.

The Kansas law is almost identical with that of Iowa, except that a license may be granted upon the petition of five persons employed as workmen and two employers, and the board is limited to four persons, who can select an umpire, as in Iowa. If they cannot agree, The Kansas arbitrators are allowed \$2 a day compensation.

THE MARYLAND LAW.

In Maryland whenever a dispute arises between a company incorporated by the state and its employees, which "shall tend to impair the usefulness and prosperity of such corporation," the board of public works has the power to demand a statement of the grounds of controversy from both parties, and if in their judgment it be necessary they may propose arbitration. If the opposing parties agree, all well and good. If both or either refuse, the board must investigate the causes of the difficulty and report upon the same at the next session of the legislature. They may also recommend a basis of settlement.

All subjects of dispute between corporations and any person in their employ or serv-

ice, and all subjects of dispute between employers and employees in any trade or manufacture may be settled in the following manner:

Whenever such subjects of dispute shall arise it shall be lawful for either party to the same to demand and have an arbitration or reference thereof in the manner following, that is to say: Where the party complaining and the party complained of shall come before, or agree by any writing under their hands, to abide by the determination of any judge or justice of the peace, it shall be lawful for such judge or justice of the peace to hear and finally determine in a summary manner the matter in dispute between such parties; but if such parties shall not come before, or agree to abide by the determination of such judge or justice of the peace, but shall agree to submit their said cause of dispute to arbitrators appointed under the provisions of this article, then it shall be lawful for any such judge or justice of the peace to hear and determine or justice of the peace is hereby required, on complaint made before him, and proof that such agreement for arbitration has been entered into, to appoint arbitrators for settling the matters in dispute; and such judge or justice of the peace shall then and there propose no less than two nor more than four persons, one-half of whom shall be employers and the other half employees, acceptable to the parties to the dispute, respectively, who, together with such judge or justice of the peace, shall have full power finally to hear and determine such dispute.

In all such cases of dispute as aforesaid, as in all other cases, if the parties mutually agree that the matter in dispute shall be arbitrated and determined in a mode different from the one hereby prescribed, such agreement shall be valid, and the award and determination thereon by either mode of arbitration shall be final and conclusive between the parties. It shall be lawful in all cases for an employer or employee, by writing under his hand, to authorize any person to act for him in submitting to arbitration and attending the same.

Every determination of dispute by any judge or justice of the peace shall be given as a judgment of the court over which said judge presides, and of the justice of the peace determining the same; and the said judge or justice of the peace shall award execution thereon as upon verdict, confession or nonsuit; and every award made by arbitrators appointed by any judge or justice of the peace under the provisions of this article shall be returned by said arbitrators to the judge or justice of the peace by whom they were appointed.

THE MICHIGAN LAW.

This law closely resembles the Massachusetts in some particulars. The governor is authorized, "whenever he may deem it necessary," to appoint a permanent board of three persons, two of whom shall constitute a quorum, with a secretary, who has the same power and authority as the clerk of a court. The board shall have its headquarters at the capital, but can sit anywhere within the limits of the state.

Whenever any grievance or dispute of any nature shall arise between any employer and his employees, it shall be lawful for the parties to submit the same directly to said state court, and shall jointly notify said court or its clerk, in writing, of such grievance or dispute. Whenever such notification to said court or its clerk is given, it shall be the duty of said court to proceed, without delay, to hear and decide the locality of such grievance or dispute, and inquire into the cause or causes of grievance or dispute. The parties to the

grievance or dispute shall thereupon submit to said court, in writing, succinctly, clearly and in detail, the facts and complaints, and the cause or causes thereof, and severally agree in writing to submit to the decision of said court as to matters so submitted, and a promise or agreement to continue on in business or at work, without a lockout or strike, until the decision of said court, provided it shall be rendered within ten days after the completion of the investigation. The court shall thereupon proceed to fully investigate and inquire into the matters in controversy, and to take testimony, under oath, in relation thereto, and shall have power, by its chairman or clerk, to administer oaths, to issue subpoenas for the attendance of witnesses, the production of books and papers, to the same extent as such power is possessed by courts of record, or the judges thereof, in this state.

After the matter has been fully heard the said board, or majority of its members, shall, within ten days, render a decision thereon in writing, signed by them, or a majority of them, stating such details as will clearly show the nature of the decision and the points disposed of by them. The decision shall be in triplicate, one copy of which shall be filed by the clerk of the court in the clerk's office of the county where the controversy arose, and one copy shall be served on each of the parties to the controversy.

Whenever a strike or lockout shall occur or is seriously threatened, in any part of the state, and shall come to the knowledge of the court, it shall be its duty, and it is hereby directed to proceed, as soon as practicable, to the locality of such strike or lockout and put itself in communication with the parties to the controversy, and endeavor by mediation to effect an amicable settlement of such controversy; and, if in its judgment it is deemed best, to inquire into the cause or causes of the controversy, and to that end the court is hereby authorized to subpoena witnesses and compel their attendance.

LAW OF MISSOURI.

The law empowers the commissioner of labor, in case of a dispute between employer and employee, to visit the place and seek to mediate between the parties.

If a mediation cannot be effected the commissioner may, at his discretion, direct the formation of a board of arbitration, to be composed of two employers and two employees engaged in a similar occupation to the one in which the dispute exists, but who are not parties to the dispute, and the commissioner of labor statistics and inspection, who shall be president of the board.

The board shall have power to summon and examine witnesses and hear the matter in dispute, and, within three days after the investigation, render a decision thereon, which shall be published, a copy of which shall be furnished each party in dispute, and shall be final, unless objections are made by either party within five days thereafter; provided, that the only effect of the investigation herein provided for shall be to give the facts leading to such dispute to the public through an unbiased channel.

In no case shall a board of arbitration be formed where work has been discontinued, either by action of the employer or the employees; should, however, a lockout or strike have occurred before the commissioner of labor statistics could be notified, he may order the formation of a board of arbitration upon resumption of work.

The board of arbitration shall appoint a clerk at each session of the board, who shall receive \$3 per day for his services, to be paid,

upon approval by the commissioner of labor statistics, out of the fund appropriated for expenses of the bureau of labor statistics.

LAW OF NEW JERSEY.

The New Jersey law provides for voluntary arbitration by mutual agreement by a local board of five persons, and where the workmen involved in a dispute belong to a labor organization that organization shall have the privilege of selecting two of the members, or they may be selected by a majority of the workmen interested. The employer may select two, and the four shall designate the fifth, who shall act as chairman. When the board has been selected it is required to report the fact to a judge of the court of the county and receive from him an order or license to proceed with an investigation. The decision must also be filed with the court. An appeal may be taken by either party within ten days to a permanent state board of three persons, who shall be appointed by the governor and hold office for five years. At least one of them must be a member of some labor organization. Upon receiving an appeal the state board must make an investigation and render a decision that is final and conclusive.

It is lawful for the parties to a dispute to apply directly to the state board if they prefer to do so, but they must first agree to continue at work and to abide by the decision.

Whenever a serious strike or lockout occurs or shall be threatened the state board is required to make an investigation and endeavor by mediation to secure a settlement.

The members of the state board are paid \$10 a day while engaged in the performance of their duties, with their actual expenses. They are required to make full reports each year to the legislature and "suggest such legislation as may be necessary to harmonize and preserve amicable relations between labor and capital."

LAW OF NEW YORK.

The law provides for a local board consisting of three persons, one representing the laborers, one the employers and the third is selected by these two. The board elects a president and clerk. This board acts whenever any grievance of any nature shall arise between any employer and his employees and the same is submitted to the board for settlement.

After the matter has been fully heard, the said board or a majority of its members shall, within ten days, render a decision thereon in writing, signed by them, giving such details as will clearly show the nature of the decision and the points disposed of. Such decision shall be a settlement of the matter referred to said arbitrators unless an appeal is taken therefrom as is hereinafter provided. The decision shall be in duplicate, one copy of which shall be filed in the office of the clerk of the county and the other transmitted to the secretary of the state board of mediation and arbitration, hereinafter mentioned, together with the testimony taken before said board.

New York also has a permanent board, appointed under a law similar to that of New Jersey, except that it requires that one of the three members shall be selected from the party casting the largest number of votes at the previous election for governor, a second from the party casting the next largest number of votes and a third from some bona fide labor organization. They hold office for five years, receive salaries of \$5,000 a year, and have a clerk whose salary is \$2,000.

An appeal may be taken from the local board to the state board, and in such case the board reviews the case and makes a decision.

In case of labor disputes the case may be brought at once before the state board, without going to the local board, and in such case the state board shall investigate the dispute and decide it, rendering its decision in writing, one copy of which is filed with the clerk of the county in which the trouble is located.

THE LAW OF OHIO.

The Ohio law is almost identical with that of Massachusetts, except that the members of the board of arbitration are not paid salaries, but a per diem of \$5 and their expenses when employed.

THE LAW OF PENNSYLVANIA.

The Pennsylvania law authorizes judges of the Court of Common Pleas to appoint boards of arbitration upon petitions from not less than fifty workmen and corporations employing not less than seventy-five men. But the petition, as in Iowa, must be supported by evidence to show that it comes from the persons whose interests are involved in the controversy. The petitioners must also be citizens of the United States and must have resided in the county and been engaged in actual labor at the trade involved in the dispute for at least two years. The petition must contain the names of the arbitrators proposed, not more than two being named by each side and an umpire who shall be satisfactory to both.

In case a petition is filed by only one party to the controversy the court may issue a temporary license, conditional upon its future

acceptance by the other party. If such acceptance be filed within sixty days a full or final license shall be granted, but if the other party will not consent to arbitration the conditional license must be canceled and the original petition denied.

If more than one trade or industry be involved in the difficulty, additional boards of arbitration may be appointed in a similar manner, or the causes of difference in all may be submitted to the same.

No arbitration shall take place until work shall be resumed, and both parties must agree to accept the decision, which is filed in the office of the clerk of the court by which the license was granted.

The arbitrators receive no compensation, but their expenses may be paid by voluntary subscription, as in Iowa. The general expenses, such as office rent, fuel, lights, furniture, stationery, clerk hire, etc., are to be paid by the county at the order and subject to the approval of the court. The chairman has the authority to administer oaths, and may summon witnesses and order the production of books and papers, but attorneys at law or other representatives or agents are not allowed to appear. The persons engaged in the controversy must submit their own evidence and make their own arguments.

The decision when rendered must be filed with and approved by the presiding judge, when it has all the force of a judgment of that court, and if it includes an award of damages the same can be collected in the usual way.

THE COMMONWEAL ARMIES.

Early in the spring of 1894 a movement growing out of the disturbed conditions between labor and capital was started by J. S. Coxey, a horse-breeder and stone-quarry operator who had recently transferred his residence from Louisville, Ky., to Massillon, O. The organization was known as the "Commonweal Army," or the "Industrial Army," and was formed for the purpose of marching to Washington, D. C., to urge upon congress the passage of two laws which Mr. Coxey and his followers believed would prove a panacea for all the ills of which the wage workers of the country complained. One of these laws was to provide for an issue of \$500,000,000 legal-tender notes to be expended by the secretary of war at the rate of \$20,000,000 per month in constructing roads throughout the country. The other law provided that any state, city or village might deposit in the national treasury non-interest-bearing bonds to an amount not exceeding one-half the assessed valuation of its property, on which bonds the secretary of the treasury should be obliged to issue legal-tender notes to an amount equal to the face of the bonds. The idea of Mr. Coxey and his followers was to reach Washington on the 1st of May, and he expected that at least 100,000 men would follow him and petition congress to pass the measures he advocated.

The measures proposed by the commonwealers sufficiently indicate the visionary ideas of its leader. Mr. Coxey was a fairly successful business man and, from being a greenbacker in politics, he had become a populist. He was a man of good address and had elements of popularity enough to make him a good leader of the men about him.

The people of the country very generally regarded the march as a great farce, while the more conservative were fearful that so large an army of men as Coxey proposed to collect, being wholly irresponsible and bound to obey no leader further than suited their pleasure,

was a menace to the government and a danger to the towns and villages along the line of march.

On the 21st of March, 1894, Coxey and his army of about 100 men started from Massillon for Washington, and at the head of the column was carried a banner on which was inscribed, "Peace on earth, but death to interest on bonds," the center of the banner bearing a coarse picture designed to represent the Savior. The second in command of the army was "Marshal" Carl Browne, whose father was a veteran of the Mexican and civil wars. He had been by turns a printer, painter, cattle-rancher, journalist, cartoonist and politician, and had been the private secretary of Denis Kearney in his agitation against the Chinese in California. Both Coxey and Browne were religious enthusiasts.

Whether or not Coxey or his Lieutenant, Browne, was aware of the fact there was nothing new in this idea of a "petition in boots," as the movement was sometimes called, but it had been in vogue exactly as it was now to be practiced. In this country, Prof. H. H. H. of the Chicago university, who is himself a Russian, says: "In Russia it frequently happens that the peasants of some remote village or group of villages, finding no relief for their grievances with the home authorities, send their delegates to bring 'petitions in boots' to the seat of the central government. The weary 'walkers,' as they are called in Russia, march thousands of miles, very often begging for Christ's sake. That men should come to the adoption of such methods of petitioning in America is a phenomenon so extraordinary that it deserves study from another than a policeman's standpoint."

No sooner was Coxey's movement well under way than it met with a hearty response in various parts of the country, for the incentive of the movement did not exist alone

in Ohio, but wherever there were bodies of unemployed men the idea was seized upon and industrial armies began forming in many localities. The number of these organizations has been greatly overestimated for it is not probable that the total strength of the six armies that attracted public attention ever exceeded 6,000 men. The first of these armies was Coxey's, which had a maximum strength of 600 men. Next was Frye's detachment from Los Angeles, Cal., with 1,000 men. Kelly's contingent from San Francisco reached a maximum of 2,000; Randall's, from Chicago, 1,000; Hogan's, from Montana, 500, and one from Oregon 900. This gives a total of about 6,000 in the leading organizations. Smaller bands from other sections would swell the total to about 10,000.

Coxey's army made slow progress and traveled by an indirect route. The "soldiers" committed no depredations and their wants for food and shelter were supplied by the towns and people along the line of their march. The personnel of the army was, however, daily decreasing and accommodations from the number of unemployed in the towns through which the army passed. Coxey's army entered Washington on the 25th of April and numbered 336 men, and on the 1st of May paraded through the streets to the capitol grounds. The police authorities had taken precautions against any lawlessness on the part of the army. Under a law of the District of Columbia unofficial processions or parades through the capitol buildings or grounds were prohibited, and when the army reached the grounds every avenue was closely guarded by the capitol police. Coxey and two of his associates were determined to speak from the capitol steps and sought to make a short cut across the grounds. They were promptly arrested and tried, the offense being carrying a banner in the capitol grounds and trespassing on the grass. They were convicted and sentenced to twenty days' imprisonment without parole. Their imprisonment began on the 21st of May.

The army had a hard time in Washington, suffered for want of food, was forced to camping grounds out of the city where its members were arrested for vagrancy, both by the officers of Virginia and Maryland, and it rapidly disintegrated and went to pieces.

One remarkable feature of the movement is the fact that while its first army was recruited quite near to the capital the whole idea of the "petition in boots" originated in this country on the Pacific coast. Browne, who was the moving spirit in Coxey's army, had petitioned congress from San Francisco while operating with Denis Kearney, of sand lot notoriety, and brought the idea with him from the Pacific coast to Ohio where Coxey united with him to put it into active operation. It is also noticeable that the two most formidable armies that entered the movement were recruited from Los Angeles and Kelly's from San Francisco, while Oregon and Montana each furnished bodies of men of considerable size and a good deal of spirit which degenerated into lawlessness and train-stealing. In fact, the only body of men of any importance, as to size, that made up the various detachments of the Commonwealth army came from the western slope, except the gathering known as Randall's Chicago army. The armies recruited in the eastern states were inconsequential, embracing a band of fifty or sixty from Boston, and a smaller band from Philadelphia.

One can hardly help admiring the spirit that should induce a set of men to undertake a march across the continent on such a mission. They undertook a far longer march than Napoleon when he left Paris for Mos-

cow. While the various detachments of the industrial army that had their origin in localities east of the Mississippi were guilty of no lawlessness or depredations against public or private property, those from the Pacific slope in many instances resorted to violence to secure the means of transportation, but rarely did more than indulge in the "forcible borrowing" of an occasional railway freight train. As one writer has mildly stated it: "If some of them occasionally stole a train, they took it as a necessity of transportation. It was borrowing rather than stealing. They took the loan of the rolling stock for a time. They stole nothing else. No bodies of broken, landless men ever seemed to have behaved with a more scrupulous regard for the rights of property." They begged—it may be they took collections—but no acts of robbery are reported by their enemies nor does there seem to have been any acts of violence perpetrated by the industrials. If they had been lazy tramps, vicious vagabonds preying upon society, this extraordinary absence of crime could not have been recorded. This is the verdict of no less a personage than the English writer, Mr. W. T. Stead. In many of the camps the singing of hymns and preaching was the main occupation of the men in the evenings.

The rules and regulations adopted by the Randall band were not unlike those adopted by each army. Gen. Randall's rules were as follows:

"All members must submit to its discipline, be orderly, peaceful and law-abiding.

"Every member must obey promptly the directions and orders of those who have been elected or appointed to places of authority over them.

"A guard will be detailed every day for the succeeding twenty-four hours of a sufficient number of men, to be divided into three reliefs, which shall be under command of the officer of the day.

"Every day a sufficient number of men will be detailed to act as police, to see that the camp, barracks or other place of shelter is kept clean, and to direct men who are thoughtless and careless about their persons to keep as clean as possible.

"Every man must keep his person and his immediate portion of the quarters clean, and refrain from boisterous, profane and obscene talk, and conduct himself in such an orderly, sober, dignified way, whether in or out of quarters, as will inspire the public everywhere that we are American citizens; that we take pride in our country; that we have a just sense of our rights under the laws of our land; and that we are banded together to make the whole people as a jury listen to our grievances.

"No person will be allowed in camp except members of the Commonwealth army and those who have permit or countersign.

"No speechmaking shall be allowed in camp without consent from the commanding officer.

"As all men in the army have joined for 'pot luck,' and expect to take it, let there be no grumbling over rations or the quarters furnished to us, no matter what the quality of the one or the inconviences of the other. We are patriots and must endure our lot, whatever it may be."

These or similar rules were in force in the camps of the industrials very generally.

Students of sociology were much interested in the character and station in life of the men composing the industrial forces. Prof. Horwich, already referred to, subjected 200 members of Randall's army to a close examination and the results at which he arrived appear to be conclusive and do not differ from the investigations as to the composition of

Kelly's industrials made in Iowa. Prof. Hourwich's conclusions may be summarized as follows:

Of the 230 industrials one-half were American born; of the other half the majority were British born. Two-thirds were English-speaking men. They averaged 30 to 32 years of age.

Of 232 industrials 181 were skilled mechanics, representing 70 trades; 74 were unskilled and 7 were tradesmen. The fourth were union men. Of the skilled mechanics 70 were unionists and 111 outside unions. Their average wage when at work was: Unionists, \$2.50 per day; non-unionist mechanics, \$1.75; unskilled laborers, \$1.50.

Of 115 questioned as to education only two were badly educated. They averaged seven years of school life; 26 had attended high schools, business and professional colleges, academies and universities.

Of 138 questioned as to politics 88 were democrats, 39 republicans, 10 populists, 25 did not vote, while the rest were over this period, but their savings were spent. Only five or six appeared to be of questionable character.

"It is, therefore," says Prof. Hourwich, "not the tramp but the unemployed workman—the unfortunate citizen—who has turned into the ranks of the commonweal." It is worth noting that the leaders of these armies were not in accord in their demands upon the government. Coxey and Browne asked the government to provide the means for the construction of good roads. The Pacific coast leaders had nothing to say about good roads, but Kelly asked state and government to provide the means for the arid lands of the west, while Frye demanded government employment for the unemployed, the prohibition of all immigration for the period of ten years, and the prevention of alien land-holding in the United States. The demands of these men appealed with some force to the people of the country, and to this is due the popular sympathy their followers had, which enabled them to subsist upon the generosity of the citizens as they tramped across the country.

The march of the industrials has introduced a new feature into the discussion of the labor question. When an unarmed mass of people can march across the country, seize railroad trains, derange the nation's commerce, compel the employment of the militia and federal troops to capture them, and live off the people along their route, the possibilities of a general uprising of the unemployed is a serious matter. The movement in the summer of 1884 was a play spell of a few thousand men out of work—probably not 5 per cent of the whole number—but it is suggestive of a far more serious condition of things under less peaceably disposed leaders with larger bodies of unemployed men as their followers.

MOVEMENTS OF THE INDUSTRIALS.

The following gives the more important movements of the larger industrial armies, while not complete in all its details, is sufficiently so for all practical purposes:

COXEY'S MARCH TO WASHINGTON.

March 25—The army of Coxey, with Carl Browne, in command, leaves Massillon, O., with about 100 men.

26—Army leaves Canton, O., for Louisville, O., the number being 122.

27—Army reaches Alliance, O.

29—Army arrives at Columbiana, O., and numbers 300.

31—Army enters Pennsylvania.

April 1—The army is welcomed by thousands at New Beaver, Pa., and supplied with food. The numbers are increased by 137 new recruits.

2—Marches eighteen miles and camps on the outskirts of Pittsburg.

3—Marches into Allegheny City, escorted by bands and labor deputations. The army is received by a crowd of 100,000 people and loudly cheered.

4—The army is besieged in its camping ground by the police and thirty commonwealers are arrested and sent to the workhouse.

5—Marches to Homestead, 500 strong, having been joined by many Huns and Slavs.

6—On the march from Homestead to McKeesport, Pa., the army is joined by nearly 100 coke strikers.

10—The army encamps at Uniontown, Pa., for a day, owing to the effects of the weather.

11—The commonwealers march out of Uniontown, and in a snowstorm climb one of the loftiest peaks of the Blue mountains.

12—The army, numbering 250 men, reaches Addison, Pa., after toiling for thirteen miles through snow and ice.

13—Marches another thirteen miles in the cold and wet. Chief Marshal Browne and Bandmaster Smith quarrel. Army enters Maryland.

14—Marshal Browne is deposed and "Unknown" Smith put in his place.

15—Army reaches Cumberland and Browne is ordered to command.

17—The army leaves Cumberland in canal-boats on the Chesapeake & Ohio canal for Williamsport, a distance of ninety miles.

19—The commonwealers disembark at Williamsport, Md.

20—The army goes into camp at Hagerstown, Md., for a few days.

23—Coxey's army marches out of Hagerstown.

24—The army encamps at Frederick, Md.

25—In a drunken brawl some shots are fired and one man is injured.

28—The Commonweal army is joined by a contingent from Philadelphia at Rockville. Together they number about 400 men.

29—Ten thousand people turn out to see the army march into Brightwood park, on the outskirts of Washington.

May 1—The army reaches Washington. Coxey attempts to speak from the capitol steps and is arrested.

21—Coxey, Browne and Jones convicted of violating the laws of the District of Columbia and sentenced to twenty days' imprisonment and to pay a fine of \$5 each.

June 10—Coxey, Jones and Browne released. In the meantime their band had become reduced by desertion. The remainder had made camps in Virginia and Maryland, from which they were dispersed.

15—Coxey nominated for congress in 18th Ohio district by the populists.

August 9—Eighty-eight members of Coxey's army arrested at Hyattsville, Md., and sent to the house of correction.

14—Last contingent of Coxey's army left Washington for the west.

19—Gov. Brown of Maryland pardoned all the industrials in the house of correction and sent them by rail to Cincinnati, Ohio.

FRYE'S ARMY'S MARCH.

March 15—Gen. Frye's army of about 700 left Los Angeles, Cal.

20—Arrived at Tucson on his way east on a Santa Fe train.

21—Frye arrested at El Paso, Tex., for vagrancy but released.

- 25—Army encamped at Finley, the Southern Pacific road refusing to carry them.
- 26—The Santa Fe railway officials sidetrack the train in the prairie, where they can get no food. Gov. Hogg, of Texas, sympathizes with the commonwealers and refuses to call out the militia.
- 27—The army reaches Sierra Blanco, Tex., the junction of the Texas & Pacific and the Southern Pacific roads without food.
- 28—People of El Paso pay for a special train for the army.
- 29—Army reaches San Antonio, Tex., 600 in number.
- 3.—Frye reaches Austin, Tex.
- 31—Frye continues his journey in fourteen box cars.
- April 3—Frye's army reaches St. Louis.
- 4—Crosses the river into Illinois.
- 5 and 6—Frye remains at East St. Louis trying to get transportation, but does not succeed. He is ordered by the police to leave the town. Joined by several recruits, bringing his number up to 800.
- 8—Reaches St. Jacobs, Ill.
- 11—Arrives at Mendalia, Ill., with his force reduced to 300.
- 14—There is a split in Frye's army, 156 of the men declaring that they cannot march any further and must have transportation. Frye with 200 men starts east.
- 17—Capture a train at Odin, Ill., and ride to Elora, Ill.
- 21—Army arrives at Terre Haute, Ind.
- 24—After loading into a freight train their horses, etc., bound for Brazil, Ind., the engine is set in motion, leaving the men behind. The army encamps round fires made of railway fencing.
- 25—The men board a train at Terre Haute, bound for Brazil.
- 26—Two hundred of Frye's men climb on top of a freight train and ride to Indianapolis.
- 28—Frye's army increases to 500; makes a long stay in Indianapolis. It parades the streets and secures provisions.
- May 1—Labor leaders of Indianapolis petition the mayor to rid the town of the commonwealers.
- 4—The mayor requests the army to move on. The populists raise funds.
- 8—Gen. Frye arrives at Fountaintown, Ind., with 200 men.
- 9—Frye refused permission to enter Shelbyville, camps outside and is visited by 2,000 people.
- 18—Arrives at Cincinnati, O.
- 19—Frye is appointed by Coxey commander-in-chief of the Commonwealth armies. He leaves Cincinnati with 500 men in barges for Pittsburgh.
- June 5—Some of his party steal a train in West Virginia. Frye's army, having reached Parkersburg, W. Va., splits into three divisions, one of which starts to follow the pike to Washington, another takes the B. & O. tracks, and the third remains in Parkersburg.
- 24—Frye's army of 125 reaches Washington and joins the Coxey camp near Bladensburg, Md., famishing for food.

KELLY'S ARMY'S MARCH.

- April 2—Four hundred men, under Kelly, leave San Francisco.
- 5—Kelly's army increased to 300 men, encamps in the Revival tabernacle, and refuses to be transported to Sacramento in box cars. The mayor calls out the militia, produces a gatling gun, arms the police and fire departments, and enrolls 1,300 deputies. At 2 in the morning a general alarm is sounded by the ringing of the fire bells and the city forces surround the tabernacle. The army refuses to move. Kelly is arrested and released. The army is finally shipped to Sacramento in eight box cars.
- 6—Kelly's army arrives at Sacramento in freight cars. He is joined by 200 men. City authorities feed the army on coffee, bread, beef and soup. The mayor makes arrangements for the transportation of the army east in twenty freight cars.
- 8—Gov. West of Nevada calls out the militia and goes to meet the approaching army at Ogden, Utah, with a gatling gun. Kelly's men come into Ogden on a Southern Pacific train. The Union Pacific refuses to transport them except at full rates.
- 10—Gov. Waite telegraphs permission to Kelly to go through Colorado. Gov. West orders them to return west. The men refuse. The Southern Pacific refuses to transport them back again excepting at full rates. The men threaten to seize a Union Pacific train. The men are fed by the charity organization and supplied with enough food by the mayor of Ogden to last them to the Nevada frontier. Meanwhile the camp is surrounded with soldiers.
- 11—The army leaves Ogden and marches east.
- 12—Kelly's army, now consisting of 1,200 men, seizes a Union Pacific train of twenty coal cars at Uni a.
- 14—Gov. Jackson places the Iowa national guard under arms and proceeds to Council Bluffs to meet Kelly, in passing through Grand Island, Neb., in twenty-five box cars, Kelly's army is plentifully supplied with provisions by the mayor.
- 15—The army is supplied with provisions on condition that they do not leave the train at Omaha. On arriving at Council Bluffs the army consists of 1,400 men. They are increased by 150 recruits and supplied with food.
- 16—Marches out of Council Bluffs amid the enthusiastic cheers of the citizens to Weston, a few miles to the east. At Weston the army increases to about 1,900 men, and has fourteen wagon-loads of provisions.
- 20—Sympathizers with Kelly in Council Bluffs seize a train and give it to him, but he refuses to accept the gift.
- 22—The army, 1,470 strong, marches from Weston to Neola. It is received by the mayor, council and citizens in procession. The people hang Judge Hubbard in effigy for calling out the militia.
- 24—Quarrel in the ranks and a plot to kill Kelly is discovered. The army reaches Atlantic.
- 28—Kelly reaches Des Moines and food and shelter are provided.
- May 2—Falls to secure railroad transportation for his men.
- 6—Begins the building of boats to take his men down the river.
- 8—Des Moines men contribute money and provisions.
- 9—Kelly starts down the Des Moines river with 104 flatboats.
- 28—Reaches St. Louis.
- 31—The forces divide, one wing being under Speed. Kelly and his men continue down the river to Cairo.
- June 1-10—Proceed on their journey and have trouble at Cairo and other river towns.
- 8—Destroy their boats near Cairo.
- 14—Reach Henderson, Ky.
- July 6—Army reaches Morris Landing, Ky., in a badly used-up condition.
- 8—Kelly's "wealers" captured the east-bound freight train of the Chesapeake & Ohio on the 7th; arrived at Kenova, W. Va., and were arrested by militia. Gov. McCorkle and his legal advisers arrived at Kenova on a special train and tried to induce the army

to go back to Kentucky, which they refused to do.

- 13—Before daylight about 275 members of Kelly's army capture a north-bound freight train on the Ohio River railway between Huntington and Parkersburg. At the latter point 150 of the party got off, but the remainder came on north. At 10 a. m. the police of Wheeling, W. Va., were notified and twenty-five officers were taken by Chief McNichols in a patrol wagon to 48th street, the city line. When the train arrived there were but twenty-five on it and they were notified not to cross the city line. All obeyed but two, who were promptly arrested. The remainder of the army was strung along the railroad for seventy-five miles.

From this point the remnant of the army straggled on to Washington and most had arrived by the 25th of July.

RANDALL'S CONTINGENT.

- May 1—Leave Chicago and march fifteen miles.
3—Reach Hessville, Ind.
4—Reach Hobart, Ind.
5—Arrive at Valparaiso, Ind.
7—Army splits at Westville and one section follows Sullivan.
8—Randall reaches Laporte and is arrested and put in jail.
9—He is released. Sullivan with his band of sixty-five reach South Bend.
11—Randall arrives at South Bend.
13—Randall at Elkhart, Ind.
14—He reaches Milford.
17—Arrives at Columbus City, Ind.
18—Reaches Fort Wayne, Ind.
20—Sullivan's band reaches Toledo, O.
22—Randall arrives at Van Wert, O.
24—He reaches Lima, O.
27—Sullivan reaches Norwalk, O.
June 7—Randall has difficulty in reaching Massillon and his army goes to pieces.

GALVIN'S ARMY.

- April 14—This army was formed of deserters from Frye's forces at Vandalia, Ill.
28—Is driven out of Mt. Sterling, Ill., by the militia.
29—Reach Columbus.
30—Sent to Benwood on a train.
May 6—Leaves Pittsburg.
9—Leaves McKeesport.
10—Reaches West Newton, Pa.
11—Arrives at Irwin.
13—Reaches Greensburg, Pa., and reaches Washington the last of the month.
July 26—Large and indignant delegations from the industrial armies encamped about Washington applied at the room of the house committee on labor to-day, not to urge their bills but to plead for assistance.

The expected has happened—their leaders have deserted them and they seek congressional aid to return to the localities whence they came. Coxey's men said that their leader had left them in the lurch yesterday. Kelly's men averred that their leader had drifted away several days ago and that they did not expect to see him again, while Frye's men said their leader had probably abandoned them. The men who were brought from the Pacific coast by Kelly were particularly indignant and some expressed a fervid desire to tar and feather their general. They were told that there was not the slightest chance of a government appropriation for their return and sent them to the local superintendent of charities.

Aug. 8—The Galvin and Thomas division sent back to their homes by citizens of Washington.

The following is as near as possible a correct list of the various armies, their leaders and location on the 25th of April, the time when the commonwealthers were at their strongest:

Kelly.....	Iowa.....	1,118
Vinette.....	California.....	850
Coxey.....	Maryland.....	300
Inman.....	California.....	300
Fitzgerald.....	Massachusetts.....	300
Grayson.....	Colorado.....	210
Sanders.....	Colorado.....	400
Galvin.....	Ohio.....	210
Shepherd.....	Washington.....	950
Sweetland.....	Connecticut.....	300
Morrison.....	Missouri.....	300
Aubry.....	Indiana.....	150
Hogan.....	Montana.....	420
Norman.....	Wisconsin.....	75
Jones.....	Maryland.....	30
Healey.....	Connecticut.....	20
Johnson.....	Missouri.....	40
Beaumont.....	Oklahoma.....	350
Jeffries.....	Michigan.....	250
Bakowski.....	Ohio.....	40
Wilson.....	Iowa.....	40

Of these Coxey's, Frye's, Galvin's, Kelly's and Fitzgerald's armies reached Washington with stragglers from some other detachments.

On the 11th of October, 1894, "Gen." Kelly commenced at Oakland, Cal., the organization of another industrial army which is to move in the spring for Washington. The object of this march is to secure signatures to a congressional petition for relief of the unemployed and incidentally obtain contributions of supplies for the army that is rapidly increasing in numbers at its big tent.

Branches of the army will be established in various parts of the state, with the intention of massing the forces at Sacramento during the next session of the legislature in the manner that Coxey and his followers went to Washington.

THE REPUBLIC OF HAWAII.

Our record in the affairs of Hawaii closed last year Dec. 1, 1893. (See Daily News Almanac for 1893, page 71.)

Early in the year 1894 the friends of annexation were forced to abandon the project and set about the organization of a permanent form of government. The resolutions passed by the house of representatives known as the McCreary resolutions showed the people of Hawaii that they had little to expect from the United States in response to their proposals for annexation. These resolutions, in brief, criticized the American minister for "employing United States naval forces and illegally aiding in overthrowing the constitu-

tional government of the Hawaiian islands in January, 1893," and further declaring it to be "the sense of this house that the annexation of the Hawaiian islands to our country, or the assumption of a protectorate over them by our government, is uncalled for and inexpedient." In the senate the opinion was embodied in a report made by Mr. Morgan which sustained the action of the president and was opposed to annexation or protectorate.

On the 8th of March a bill was introduced taking steps toward the establishment of a permanent government. The bill was as follows:

Be it enacted by the executive and advisory

councils of the provisional government of the Hawaiian Islands:

Section 1. There shall convene at the call of the president a convention to frame a constitution. Said convention shall consist of the president, the executive and advisory councils and eighteen delegates to be elected as herein provided.

Sec. 2. An election shall take place on such day as shall be proclaimed by the minister of the interior.

Sec. 3. For the purposes of this election there shall be four electoral divisions, viz.: 1. Island of Oahu, from which shall be elected six delegates. 2. The Island of Hawaii, from which shall be elected five delegates. 3. The Islands of Maui, Molokai and Lanai, from which shall be elected four delegates. 4. The Islands of Kauai and Niihau, from which shall be elected three delegates.

Sec. 4. Every male resident of the Hawaiian Islands of Hawaiian, American or European birth or descent who shall have taken the oath by this act provided, and who shall have paid his taxes for the year 1893, unless exempted by law from paying taxes, who shall have attained the age of 20 years, who shall have been domiciled in the Hawaiian Islands for one year, and who shall have caused his name to be entered on a list of voters of the precinct in which he resides, and who is not insane or an idiot, or who shall not have been convicted of a felony, unless pardoned, shall be entitled to vote for delegates to be elected from the island on which such voter resides.

Sec. 5. Each voter for delegates may cast as many votes as there are delegates to be elected from the division in which he resides, and may cast one vote for each delegate, or cast them all for one delegate, or may otherwise divide his votes among several delegates. The required number of candidates receiving the highest number of votes in the respective divisions shall be the delegates for such divisions.

Sec. 6. The election shall be by ballot. The ballot shall be printed by the minister of the interior at government expense, and shall conform in size, quality and general form to the ballots required for nobles under the election law of 1890. No other form of ballot shall be received. Each voter shall place a figure after the name of the candidate or candidates for whom he votes, showing how many votes he casts for each candidate. Any ballot containing more votes than the total number of delegates apportioned for the electoral division in which said ballot is cast shall be rejected.

Sec. 7. The minister of the interior shall appoint three inspectors of election for each polling place heretofore established by law for the election of representatives. Any two of such inspectors may act, and in case of the disability of two of such members the remaining inspector may fill the vacancies. In case it occurs so near to the date of the election that the minister of the interior cannot make an appointment. The inspectors shall prepare a list of all persons who have registered and are entitled to vote, and shall post a copy of the same in their respective precincts, not less than six days prior to such election. No person shall be so near to the date for delegates unless his name is on such list.

Sec. 8. Inspectors of such election shall have all the powers in regard to the general conduct of the election as were vested by the election law of 1890 in inspectors of elections. The inspectors, or any one of them appointed under this act, shall administer the oath by this act required. No person shall be registered until he shall have taken and subscribed to such oath.

Sec. 9. No person shall be eligible as a dele-

gate unless he be a male resident of the Hawaiian Islands who shall have attained the age of 25 years; who shall know how to read and write either Hawaiian, English or some European language; who shall have been domiciled in the Hawaiian Islands not less than one year, and who shall have taken the oath by this act prescribed.

Sections 10, 11, 12, 13, 14, 15 and 16 provide for the returns of the election and the compensation of delegates. The bill concludes as follows:

Sec. 17. The convention shall be the sole judge of the qualifications of the delegates. Unfaithfulness to the oath required by this act shall be a sufficient cause for the rejection or expulsion of delegates.

Sec. 18. Form of oath: No. —, Hawaiian Islands, Island of —, District of —, —, aged — years, native of —, residing at — in said district do solemnly swear, in the presence of Almighty God, that I will support and bear true allegiance to the provisional government of the Hawaiian Islands and will oppose any attempt to depose the Liliuokalani to the throne or to re-establish a monarchical government in any form in the Hawaiian Islands.

The convention consisted of eighteen elected members and eighteen of the council. The election was held the 2d of May, and the character of the eighteen members elected by the people showed that the idea of a new form of government was not by any means an alien sentiment, as six of the delegates were native-born Hawaiians, and nine others were born and brought up on the islands while the remainder had been residents of the country for many years.

The constitutional convention met on the 20th of May and closed its labors on the 3d of July. On the next day, July 4, the constitution was adopted by public proclamation, and on the same day, S. B. Dole, president of the provisional government, was sworn in as president of "the republic of Hawaii," the new government is called, under Dec. 31, 1900. The constitution contains many features peculiar to itself. Its first section, dealing with the rights of persons and property, recognizes God as the supreme ruler of the universe, and declares for universal equity and liberty of the press and Hawaiian subjects. Any newspaper, however, which advocates restoration of the monarchical government, or any speaker taking the platform in the queen's cause or suggesting force to accomplish a change of government shall be considered a traitor and treated accordingly. "The right of habeas corpus is declared to be vested in all men and only to be suspended in time of national peril. It is not available to persons having entered the country illegally. The right of trial in all cases is decreed and slavery forever prohibited. Whenever a slave enters the territory of this republic the constitution enacts 'he shall be free.'"

Articles 12 and 13, relating to the powers of taxation and appropriation vested in the legislature of eminent domain and of military subjection to law, follow closely the lines of the American constitution. The republic of Hawaii is to include all the territory previously known as the kingdom of Hawaii, and the right of citizenship is extended to persons born in the Hawaiian Islands; persons naturalized according to the laws enacted in their behalf; persons who, not being Hawaiian citizens, have taken an active part in the formation of the republic or supported the provisional government, in whose cases all usual qualifications are to be waived. The persons of naturalization is to be similar to that of the United States, applicants being required to have at least one year's residence in the

islands and the intention of permanent location. They must also be able to read and write, and speak the English language, and to explain in English intelligently any part or parts of the constitution. They must be citizens or subjects of a country having treaty relationship with the Hawaiian republic, and of good, moral character; engaged in some lawful calling, employment, capable of yielding support and possessors in each and every case of property within the republic worth at least \$200. Female suffrage is denied. Letters of denization are provided for in case of the temporary residence of those who do not desire citizenship. The executive power is invested in the president and cabinet of four ministers, as follows: Minister of foreign affairs, minister of interior, minister of finance and attorney-general. The president is required to be not less than 35 years of age, a native of the islands or a resident therein for not less than fifteen years and a citizen. He shall be elected to hold office for six years and cannot succeed himself in office. An advisory council is appointed—five by each house and

five by the president—which is to act in cases of pardons, the appropriation of moneys and in great emergencies. All legislative powers are vested in a legislature consisting of two houses—a senate and house of representatives.

The senate shall consist of fifteen members, elected to hold office for six years. The house of representatives shall consist of fifteen members, elected every second year. A senator must be a male citizen of not less than 30 years of age and three years a resident, and must be the owner of property in the republic worth \$1,500 above possible incumbrance, with a money income of not less than \$300 per annum. Representatives may be of any age over 25 years with a property qualification of \$1,000 and an income of \$300. The first regular session of the legislature shall convene on the third Wednesday in February, 1886, and biennially thereafter in Honolulu.

This council will fix the character of the government of Hawaii, perhaps for all time.

REFERENDUM.

This system of legislation which consults the electors of a state or country, to whether new laws that have passed the legislative body shall be confirmed has excited considerable interest in this country, where so much of the legislation is either useless or positively bad. Switzerland is the home of the referendum, and in some of its cantons it has been in practice since the sixteenth century. As it is now employed it was adopted by the canton of St. Gallen in 1830, and in 1848 it was incorporated in the Swiss federal constitution. It has been so extended since then that it is now in operation in all the Swiss cantons except Freiburg.

According to the Swiss constitution all amendments thereto must be ratified by the Swiss electors before they become effective. Other measures, like ordinary enactments, must be submitted to a popular vote if a demand is made for such submission, written ninety days after their publication. This demand must be made by 30,000 voters or by the government of eight out of the nineteen entire and six half cantons. In Switzerland the referendum has proved to be entirely satisfactory as a check upon hasty or class legislation.

As to the practical working of the referendum in Switzerland Albert Bushnell Hart says:

A judgment of the referendum must be based on the working of the electoral machinery, on the interest shown by the voters, and on the popular discrimination between good and bad measures. The process of invoking and voting on a referendum is simple and easily worked if not used too often. Although the assembly has, in urgent cases, the constitutional right to set a resolution in force at once, it always allows from three to eight months' delay so as to permit the opponents of a measure to lodge their protests against it. Ordinary committees take charge of the movement, and if a law is unpopular, little difficulty is found in getting together the necessary 30,000 or 50,000 signatures. Only thrice has the effort failed when made. When, as in 1882, the signatures run up to 150,000, the labor is severe, for every signature is examined by the national executive to see whether it is attested as the sign manual of a voter; sometimes, in an interested canton, as many as 70 per cent of the voters have signed the demand. The system undoubtedly

leads to public discussion; newspapers criticize; addressers and counter-addressers are issued; cantonal councils publicly advise voters, and of late the federal assembly sends out manifestoes against pending initiatives. The federal executive council distributes to the cantons enough copies of the proposed measure, so that one may be given to each voter. The count of the votes is made by the executive council as a returning board. Inasmuch as the Swiss are unfamiliar with election frauds, and there has been but one very close vote in the national referenda, the count is not difficult, but there are always irregularities, especially where more than one initiative is presented to the voters at the same time.

What is the effect of the popular votes thus carried out? The following table, based on official documents, shows the results for the twenty years, 1875-1894:

	Re- Passed. jected.	Total
1. Constitutional amendments proposed by the assembly (referendum obligatory).....	1	6 7
2. Constitutional amendments proposed by popular initiative (50,000 signatures).....	2	1 *4
3. Laws passed by the assembly (referendum demanded by 30,000).....	14	6 20
	17	13 31

Making allowances for cases where more than one question has been submitted at the same time, there have been twenty-four popular votes in twenty years. In addition, most of the cantons have their own local referenda in Zurich, for example, in these twenty years, more than one hundred other questions have been placed before the sovereign people. These numbers are large in themselves, but surprising in proportion to the total legislation. Out of 158 general laws passed by the federal assembly from 1874 to 1892, twenty-seven were subjected to the referendum; that is, about one-sixth are reviewed and about one-tenth are reversed. Constitutional amendments usually get through sooner or later, but more than two-thirds of the statutes attacked are annulled. On the twenty referenda between 1875 and 1891 the average vote in pro-

*One measure still pending.

portion to the voters was but 58.5 per cent; in only one case did it reach 67 per cent; and in one case—the patent law of 1887—it fell to about 40 per cent in the confederation and to 9 per cent in Canton Schwyz. On the serious and dangerous question of recognizing the right to employment, this present year, only about 56 per cent participated. In Zurich there is a compulsory voting law, of which the curious result is that on both national and cantonal referenda many thousands of blank ballots are cast. The result of the small vote is that laws, duly considered by the national legislature and passed by considerable majorities, are often reversed by a minority of the voters. The most probable reason for this apathy is that there are too many elections—in some cantons as many as fifteen a year. Whatever the cause, Swiss voters are less interested in referenda than Swiss legislators in framing bills.

Of the comparative wisdom of the representatives and their constituents it is difficult for a stranger to judge. The general tendency of the referendum is to rebuke the assembly; more than half the questions submitted are lost on popular vote, and more than half of all the ballots cast have been adverse. Certain cantons, notably Uri and Appenzel (Inner Rhode), are almost always against the proposition without much reference to its purport. The records of the assembly rarely show test votes on any question, but there is a remarkable divergence between the temper of judgment of that body and of the people. The constitutional amendment of 1881, on the slaughtering of animals, commanded less than a third of the members of either house, but was carried on popular vote by about three to two. The amendment of 1894 on the practice of professions had every vote in its favor in the council of states, but was lost in referendum. An eminent publicist, member of the assembly and an upholder of the referendum, explains this divergence by the public spirit of the members, who vote according to their convictions and not in subservience to their constituents. If this be true, it is an indictment of the system; if the people are wiser than their representatives on questions of legislation, the latter ought to bend beforehand, without waiting for the pressure of the referendum. Public opinion on such matters is so uncertain that the members cannot understand or predict it.

On the recent proposition to assert the right of every Swiss to employment only two mem-

bers out of 110 voted for it, but out of doors received 75,000 votes against it. Certainly the referendum is especially fatal on complicated questions of commerce and finance, the least suited to such a system. It was only on the third attempt that a bank-note system could be arranged. Another interesting example is the bill for the purchase of the Swiss Central railroad. The executive council, in May, 1880, desired to negotiate on the subject, and the assembly passed a resolution granting the necessary authority. No referendum was laid against the resolution, and the council, believing that the principle was accepted, in March, 1881, made a provisional contract for the purchase. The law ratifying this contract was duly passed, but 92,000 signatures were lodged against it, and it was defeated by a majority of 140,000. This might be accepted as a popular judgment against state railways; but, in fact, it seems to be only a protest against the terms of the contract, and it is expected that the work will soon be all done over again. In the cantons it is even worse. In some of them new money bills are almost invariably rejected on referendum, and humiliating devices have to be used in order to get the funds necessary for the support of the government. Most impartial observers who examine the list of bills lost in the national referendum will be inclined to think the judgment of the assembly better and more consistent than that of the people.

In the last two years three amendments have been introduced by initiative, which show that the referendum may become a powerful socialistic weapon. The slaughter amendment was in effect directed against a class, and was successful; the amendment assuring employment was in the interest of a class, and was lost; the pending amendment for a distribution of money to the cantons is directed by poor cantons against rich ones. Against all these propositions the assembly has set itself steadily. "I am a friend of the referendum," says an eminent member of the executive council, "but I do not like the initiative." The experience of Switzerland seems to show four things: that the Swiss voters are not deeply interested in the referendum; that the referendum is as likely to kill good as bad measures; that the initiative is more likely to suggest bad measures than good; that the referendum leads straight to the initiative. The referendum in the United States would therefore probably be an attempt to govern great communities by permanent town meetings.

PROPORTIONAL REPRESENTATION.

The term proportional representation is one which has come to be generally applied to a method of electing representatives whereby the representation shall be in proportion to the votes polled by the several parties, or groups of voters, as against the present method of electing them from single districts by a plurality vote. To effect this end numerous plans have been put forth at various times within the past fifty years, the more important ones being, the "cumulative vote," the "limited or restricted vote," the preferential vote, "the group list," or "Swiss vote," the "Gove system," and the "proxy," or "substitute vote."

The cumulative vote allows the voter as many votes as there are representatives to be elected and permits him to distribute them as he pleases among the candidates. This method is applied in a limited degree to the choice of members to the lower house of the Illinois legislature. Each district elects three

members, and the voter can cast three votes for one candidate, two and a half votes for two, or one vote each for three.

With the limited vote the voter has a less number of votes than the number of representatives to be elected. Thus in the city of Boston the new law allows the voter to vote for only seven aldermen on one ticket, and declares the twelve candidates receiving the highest vote elected.

The preferential, or, as it is commonly known, the Hare, vote allows the voter to cast one ballot upon which he has named as many candidates as he sees fit, the candidates named being understood to represent the first, second, third, etc., choice. The whole number of ballots cast is divided by the number of representatives to be chosen, and the quotient is the quota, or number of votes required to elect one candidate. In counting the ballots the first choices are read first; the candidate who receives a quota is declared elected, and

the remaining votes cast for him are counted for the next name on the ballot who is the second choice of the voters.

The free list, or Swiss, vote allows the voter to vote for a list or ticket as we do in this country, and to designate preferences on the list. The total vote is divided as in the Hare system to get the quota, and the several parties are apportioned representatives according to the number of quotas they have. The successful candidates are those standing highest on their respective lists. This method is now in use in Switzerland for the election of representatives.

The Gove system is a modified form of the Hare method. Instead of the voter naming the candidates whom he prefers, the candidates themselves before election announce to whom they will give their surplus votes. In practice it would simply amount to the party presenting a ticket upon which the quota would be effective as determined by the nominating convention, instead of following the individual chief of the ticket.

The proxy vote is simply an introduction of the corporation vote into legislative bodies. The candidates who are elected in the legislative assembly, cast not their individual votes, as at present, but the number of proxies they hold.

It will be seen that there are three principles involved in these several methods, the election by cumulation of votes, the election by quotas, and the vote by proxies. The cumulative vote was the first to be put into actual service, being used in England for the election of members of school boards, etc., and in this country in the so-called three-cornered districts for the election of members of the legislature. It still has the support of quite a number of persons but its limitations are now coming to be recognized. John Stuart Mill, who was an advocate of the cumulative vote, declared it to be merely a makeshift in comparison with the Gove system of Hare. The objection to the cumulative vote lies in the fact that if the districts are small only two parties can obtain representation, and these in an arbitrary way, while if the districts be larger, that is if the number of representatives in the district be made greater, the waste and uncertainty is apparent. A party may decide to vote for four candidates when it has votes enough to elect six; or it may try for six when it has votes for only four. In either case it is deprived of a part of its just share in the representation. The proxy system contains some theoretical merits, but it is feared that in practice it would not work well at present. The tendency to hero-worship would prompt so many voters to give their proxies to a few favorites that the real voting strength of the assembly would be in the hands of two or three men, thus destroying its value as a deliberative body.

The real strength of proportional representation lies in some form of the quota principle, and the tendency in this country as in Switzerland and Belgium is toward the free list. The main points of the law now in operation in the Swiss canton of Geneva are embodied in an outline of a bill for the election of representatives to the United States congress, based upon the bill proposed in the Lild congress by the Hon. Tom L. Johnson, of Ohio, one of the two systems indorsed by the proportional representative congress in Chicago, Aug. 12, 1893:

1. The members of the house of representatives shall be voted for at large in their respective states.

2. Any body of electors in any state, which polled at the last preceding congressional election 1 per cent of the total vote of the

state, or which is indorsed by a petition of voters amounting to 1 per cent of such total vote, may nominate any number of candidates, not to exceed the number of seats to any which such state is entitled in the house, and cause their names to be printed on the official ballot.

3. Each elector has as many votes as there are representatives to be elected, which he may distribute as he pleases among the candidates, not to exceed the number of seats to any one candidate. Should he not use the entire number of votes to which he is entitled, his unexpressed votes are to be counted for the ticket which he shall designate by title. The votes given to candidates shall count individually for the candidates as well as for the tickets to which the candidates belong.

4. The sum of all the votes cast in any state shall be divided by the number of seats to which such state is entitled and the quotient to the nearest unit shall be known as the quota of representation.

5. The sum of all the votes cast for the tickets of each party or political body nominating candidates shall be severally divided by the quota of representation, and the units of the quotients thus obtained will show the number of representatives to which each such body is entitled, and if the sum of such quotients be less than the number of seats to be filled the body of electors having the largest remainder after division of the sums of the votes cast by the quota of representation, as herein specified, shall be entitled to the first vacancy, and so on until all the vacancies are filled.

6. The candidates of each body of electors nominating candidates and found entitled to representation under the foregoing rules, shall receive certificates of election in the order of the votes received, a candidate receiving the highest number of votes the first certificate, and so on; but in case of a tie, with but one vacancy to be filled, the matter shall be determined by lot between the candidates.

7. If a member of the house of representatives shall die or resign, or his seat become vacant for any reason, the remainder of his term shall be served by the candidate having the next highest vote of the body of electors to which such member belongs.

The chief merit of the free list as embodied in the above proposed law is the fact that so great a principle can be introduced with so slight a change of present laws and customs. Thus, to take as an illustration the election of the ten Cook county commissioners in November, 1894, the total vote polled for the ten democratic candidates was 69,657; for the ten republicans, 72,776; for the populists, 7,390, and for the socialists 15,154, making a total vote of 144,357. Dividing this total by ten, the number of candidates to be elected, the quotient or quota is found to be 14,435.67, the number of votes necessary to elect one commissioner. The 69,657 democratic votes divided by 14,435.67 gives four full quotas and a remainder of 121,821. The republicans, by the same process, are found to have four full quotas and a remainder of 143,340. As neither the populists nor the socialists had a full quota, and there being two more commissioners to be chosen they are taken from the parties having the largest unfilled quotas, the republican and the democratic. This gives the democrats five commissioners and the republicans five, which is as nearly even as that number of votes cast in those proportions can be made. It having been found that the democrats are entitled to five commissioners, the five are declared elected who stand highest on the ticket; the same is done with the republicans. This result may be contrasted with the result which actually did take place when

the republicans got nine of the commissioners and the democrats one.

The advantages of such a system are obvious. By destroying the district and ward boundaries all temptation to gerrymandering is done away with. And by apportioning the representatives among the several parties in proportion to the votes polled, all can secure their just share. Not only is the minority given a voice in the making of the laws, but the very fact that it is so easy for independent candidates to be elected will compel the managers of the regular parties to put forth their very best men. Men of mediocrity who now contrive to secure control of the politics of a ward or district will have to make way for men of enough character to command the respect of the whole city or state. As every vote will bear directly upon the final result, those voters who now stay away from the polls because they belong to a hopeless minority, or because they know it is unnecessary to vote at all, will have every inducement to vote; and the re-entrance of this class of men into politics will do much to restore a healthy moral tone.

THE GOTHENBURG SYSTEM.

The proposal in Massachusetts last spring to try the famous Gothenburg system of liquor traffic brought this method of dealing with intoxicating liquors prominently into notice in this country. The facts given are taken from Dr. Gould's report to the United States commissioner of labor.

In 1857 Dr. P. Wieselgren, who was known as one of the most staunch and earnest advocates of temperance in Sweden, was appointed dean of Gothenburg. With a population of 35,000 there were 136 licensed saloons doing a large business, with the most deplorable results. The greatest misery prevailed among the working people, and during his pastoral visits Dr. Wieselgren saw the wretched condition into which this class was brought by their drunk habits. In 1852 he secured a petition signed by 8,800 people, principally of the lower classes, urging the magistrates to prohibit all sales of brandy, which was the chief intoxicant used by the people, at the bar on Sundays and holidays, or at least to limit it in those days to two or three hours during meal time. The magistrates answered curtly that they did not think it incumbent to take any steps in the matter in question. The next year the question was brought up again in a new form.

In 1864 it was proposed to the town council to appoint a committee to examine into the condition of the liquor traffic in the town, which was accepted. The committee was appointed, and in their report in April, 1865, they depicted in strong language the misery and ruin brought about by brandy, especially among the poorer classes, and expressed in the strongest and most urgent terms their conviction that the community would be benefited by "exerting its most energy to overcome an enemy sure to bring poverty, destitution and crime in its train."

The measures proposed by the committee with a view to remedy this state of things were as follows: That the authorities, making use of the right accorded them by the existing law, should hand over the licenses, hitherto disposed of at auction, to a company consisting of persons engaged in the undertaking, not for the sake of profit, but solely for the good of the working classes; that the shareholders should not derive the slightest profit from the concern, beyond the ordinary rate of interest on the capital invested; but that all profits accruing therefrom be devoted to the welfare of the working classes or

Proportional representation has made more friends in Europe than in this country. There are active societies for the propagation of the idea in England, Belgium, France and Switzerland. The English society has some 180 members of parliament on its roll. The Swiss society has already secured a practical application of the principle, and the Belgian association has committed the ministry to it, and will doubtless soon see its labors crowned with success.

In the United States a few advocates scattered over the country have labored for the reform for the past twenty-five years, but no attempt was made to form a society until 1885. At the time of the world's congress on suffrage in Chicago, the friends of proportional representation met and organized the American Proportional Representation league. The following are the officers of the league: President, William Dudley Foulke, Richmond, Ind.; vice-presidents, Charles Francis Adams, Boston, Mass.; Tom L. Stanton, Cleveland, O.; William Lloyd Garrison, Boston, Mass.; secretary-treasurer, Stoughton Cooley, 25 1/2th avenue, Chicago.

paid over to the town treasury; that the premises hired by the company should be clean, light and roomy, and at the same time serve as eating-houses for the working classes, therefore the food department and sale of beer, ale and coffee, with the profits arising from them, should be put in the hands of a manager, who would have to account for the sale of all spirituous liquors; and, lastly, that no such liquors should be sold on credit or pawn ticket.

This was the Gothenburg system—a scheme for regulating the brandy traffic which has been the object of so much praise as well as abuse.

But the committee had not only drawn up a plan they had also made a start for putting it into execution. Their report certified that their efforts to form a company with the aforesaid object had been crowned with success, twenty highly respected firms and private individuals in the town having agreed to enter into it. Their offer to assume all the public-house licenses was accepted by the authorities, and on Oct. 1, 1865, the company began its operations, which still continue in full activity.

The importance of the new system for promoting temperance must be apparent to every one. It was so closely connected with the existing law that every great step for putting it into execution was made, namely, that by which the company relinquished all claims on the profits derived from the brandy traffic. But this was a clause of the utmost importance. By applying the income of the traffic to the benefit of the working classes or of the community, the company proved its sincerity, and desired to promote the cause of morality, while it urgently called on the towns to take advantage of those special regulations laid down in the liquor laws of 1855 in favor of temperance which had hitherto been so deplorably neglected. The system put a stop to the illegal practice of selling brandy on credit, left it to the customer's own option to use the public house as an eating-house; made drinking on the premises more difficult, limited the hours of sale, without the dealers being able to elude said measure or raise complaints against it. There was no fear of drunkenness being encouraged by too many or too few licenses being given, for the term of three years, as the board had the right of either using or leaving unused as many licenses as they considered desirable;

no competition with other vendors would oblige the company to put down their prices; and as they disclaimed all profits from the traffic, that greed of gain which forms such a strong motive power in the dealings of most tradesmen could offer them no inducement to deviate from the principle on which the whole system was built; "not for individual gain, but for the welfare of the working classes."

Everyone who is aware of the importance of an organization, the operations of which are conducted by individuals acknowledging the constant control of the public, and their responsibility before its tribunal, must be convinced of the improvement introduced by the Gothenburg system, both from an economic and moral point of view. The system can not fail to exercise a beneficial influence wherever public spirit favors the cause of philanthropy and morality, and where this is not the case the state of society must be low indeed. As soon as there is any improvement in this respect it will speedily become apparent in the more efficient working of the company; for where the company's trade is undertaken by members of a community in the interests of morality it will entail very peculiar obligations, by which no private dealer would consider himself bound.

As an example of these peculiar obligations we will mention some of the measures which the Gothenburg company has taken.

The magistrates annually place sixty-one licenses at the disposal of the company. Before the company had been established seventy-two such licenses existed in the town; but though the population has been steadily increasing and is now more than twice as large as it was then the company has never made use of all its licenses, but generally left one-third unused.

Another instance will be found in the four eating-houses, where no spirituous liquors are served except the usual dram at meals. These have been started in order that the workmen who do most with to frequent the public houses may still be supplied with food on the premises of the company, and the large number of customers testifies to the success of this arrangement. The company has, moreover, fitted up several reading-rooms, five to begin with, where no spirituous liquors—only coffee, tea, chocolate, milk and small beer—may be served, besides light food at a low

price fixed by the company. Books, newspapers and periodicals are provided for the use of visitors in the reading rooms, as well as newspapers in the public houses and eating-houses, while at all these places temperance tracts are occasionally distributed gratis; thousands of the latter have in this manner been distributed among the laboring classes. On the wall of every public house is posted a printed card showing how much money can be saved every day, week, month and year by abstaining from so many drinks and what sums may by this means be laid by for the future.

In regard to Sunday drinking the company has likewise recognized its obligations. Eleven years ago it made a regulation, now adopted in great measure by the legislative powers of the country, that all selling of brandy and other spirituous liquors over the bar, either for home consumption or to be drunk on the premises, excepting the dram served at meals, should be prohibited on Sundays and holidays, as well as after 6 p. m. on the day preceding such days at the public houses belonging to the company. The company has also curtailed the time of selling over the bar on week days. While the law permits such selling until 10 p. m., the company closes at 7 p. m. in autumn and winter and at 8 p. m. during the rest of the year. The law forbids selling brandy over the bar to persons under age, i. e., who are not yet 16, while the company includes all under 18 as under age, thus excluding adolescents from the public houses three years longer than prescribed by law. By constant supervision, exercised by specially appointed inspectors and by the right of dismissing the managers at any time, the company offers far greater security for the observance of the above-mentioned rules than can be given from private barkeepers, who must in the first place study their own interests, and who dare not offend their customers by a too strict observance of the law.

Among the more important results of the Gothenburg system is the fact that it prevents the growth of a class of wealthy public-house magnates, who, by their wealth and widespread influence over the ranks of men, act as the most powerful opponents of temperance efforts to influence general legislation in regard to morality.

The adoption of this system has taken the saloon out of politics, which is of itself greatly to be desired.

SALES OF SPIRITUOUS LIQUORS, ETC., FROM 1874-75 TO 1891-92.

MEN OF THE YEAR.

Brief Sketches of Men Prominent in 1894.

COL. MOONLIGHT.

Col. Thomas Moonlight of Kansas, the new Bolivian minister, was born in Fortarshire, Scotland, Nov. 10, 1833, and emigrated to America in 1856. He started in life as a farmer, subsequently worked in a glass factory and then in a brickyard until 1883, when he was nominated for secretary of state in Kansas. He became a member of the state senate in 1873-74, served as adjutant-general in 1883 and 1884. He was a soldier in 1861 and served through the war, rising from a private to a colonel of cavalry and brevet brigadier general. In 1888 he was nominated by the democrats for governor, but was defeated by John A. Martin. He was appointed by President Cleveland governor of Wyoming in 1888, and in 1894 again appointed to represent the government at the capital of Bolivia.

WAYNE MACVEAGH.

Wayne MacVeagh, the Italian minister, was born in Phoenixville, Pa., April 10, 1833, and graduated from Yale university in 1853. He studied law and was admitted to the bar in 1854 and served as district attorney for Chester county from 1859 to 1864. In 1863 he was a captain of a cavalry company when the invasion of the state was threatened, and in 1863 he was chairman of the Republican state committee of Pennsylvania. In 1870-71 he was United States minister to Turkey, and in 1872-73 he was member of the Pennsylvania constitutional convention. In 1881 he was appointed by President Garfield United States attorney-general but resigned upon the accession of Mr. Arthur to the presidency and resumed the practice of law in Philadelphia. Since 1884 he has acted with the democratic party.

JOHN M. B. SILL.

John M. B. Sill, the new minister to Korea, was born at Black Rock, N. Y., Nov. 23, 1831, and was educated at Jonesville and at the Michigan state normal school, completing his course in 1854. In 1874 he received the honorary degree of A. M. from Michigan university. Until 1863 he was professor of English and literature in the Michigan state normal school, when he became superintendent of public schools in Detroit, where he remained two years. In 1865 he became principal of the Detroit female seminary, which place he held until 1875, when he became again superintendent of the public schools of Detroit, which post he resigned in 1888, since which time he was principal of the Michigan state normal school. In January, 1894, he was appointed minister to Korea by the president.

CLIFTON R. BRECKINRIDGE.

Clifton R. Breckinridge, the minister to Russia, of Pine Bluff, Ark., was born at Lexington, Ky., Nov. 22, 1846; received a common-school education; served in the confederate army as a private soldier, and at the close of the war was a midshipman on duty below Richmond, Va.; was clerk in a commercial house for two years; attended Washington college (now Washington and Lee university), Virginia, three years; became a cotton planter in Arkansas in 1870, and was engaged in planting and in the commission business for thirteen years; was an alderman of his town one term; was elected to the XLVIIIth congress from the state at large; was elected to the XLIXth and Lth congresses, and was re-elected to the L1st congress as a democrat, but was unsent by action of the house and the seat declared vacant; was nominated for

the second session of the L1st congress and elected, and re-elected to the L1d congress. Upon the resignation of Andrew D. White as minister to Russia Mr. Breckinridge was appointed to succeed him.

JOHN PATTON, JR.

John Patton, Jr., the new Michigan senator, was born at Curwensville, Pa., Oct. 30, 1850, and graduated from Yale in 1875. In 1878, after a two years' course in Columbia law school and a brief trip in Europe, he came to Grand Rapids, Mich., to practice his profession. In politics Mr. Patton has always been an active republican. He was a member of the state central committee in 1884. For two years he was president of the Michigan League of Republican Clubs and became a potent factor in state politics. He has never sought a public office. On the 5th of May he was appointed by Gov. Rich to fill the vacancy in the United States senate caused by the death of Senator Stockbridge.

JOHN H. GEAR.

John Henry Gear, senator from Iowa, of Burlington, Ia., was born in Ithaca, N. Y., April 7, 1826; received a common-school education; removed to Galena, Ill., in 1838, to Ft. Snelling, Iowa territory, in 1838, and to Burlington in 1843, where he engaged in merchandising; was elected mayor of the city of Burlington in 1853; was a member of the Iowa house of representatives of the XLVth, and XLVth general assemblies of the state, serving as speaker for the last two terms; was elected governor of Iowa in 1878-79, and again in 1880-81; was elected to the Lth congress, and was re-elected to the L1st congress as a republican. He was appointed by President Harrison assistant secretary of the treasury. In 1884 he was elected to the senate to succeed James H. Wilson, whose term of office will expire March 4, 1895.

THOMAS J. JARVIS.

Thomas Jorden Jarvis, senator from North Carolina, was born in Jarvisville, N. C., Jan. 18, 1836. His youth was spent on a farm, laboring for the support of his family. He was graduated from Randolph-Macon in 1860, and the following year entered the confederate army as a private. He was soon promoted to be a captain, but in 1864 his right arm was shattered by a bullet and he was obliged to leave the service. He was a member of the state constitutional convention in 1865, became a merchant, studied law, was admitted to the bar and began practice in 1872. In that year he was a presidential elector, and was elected to the legislature, was re-elected and became speaker in 1870. He was a presidential elector in 1872 and 1875, and the following year was elected lieutenant-governor. In 1879 the governor, Vance, was elected to the United States senate, and Mr. Jarvis became governor. In 1885 he was appointed United States minister to Brazil, and upon the death of Senator Vance in 1894, Mr. Jarvis was appointed to fill the vacancy in the United States senate.

N. C. BLANCHARD.

Newton Crain Blanchard, senator from Louisiana, of Shreveport, was born in Rapides parish, La., Jan. 29, 1849; received an academic education, commenced the study of law at Alexandria, La., in 1869; entered the law department of the University of Louisiana, at New Orleans, in the winter of 1869, and graduated with the degree of bachelor of laws in 1870; commenced the practice of law at Shreveport in 1871, and still continues the

practice there; in 1876 was made chairman of the democratic committee of Caddo parish; took an active part in the politics of the state, looking to the restoration of the government of the state to the hands of her own people; was nominated by the democracy of Caddo parish for the position of representative delegate to the state constitutional convention of 1879, and elected by a large majority; served in that body as chairman of the committee on federal relations; was appointed by Gov. Wiltz of Louisiana to the position of aid-de-camp on his staff, with the rank of major. In the Louisiana state militia, and subsequently held a similar position with similar rank on the staff of Gov. S. D. McNery of Louisiana; was appointed member for Louisiana on the board of trustees of the University of the South at Sewanee, Tenn.; was elected to the XLVllth, XLVlllth, XLlXth, Lth, Llst and Lllth congresses as a democrat. Upon the resignation of Senator White Mr. Blanchard was appointed to fill his place in the United States senate.

PATRICK WALSH.

Mr. Walsh, the new Georgia senator who succeeds Mr. Colquitt, has had a conspicuously successful career. He was born in Ballygarry, county of Limerick, Ireland, on Jan. 1, 1840, and moved to Charleston, S. C., at the age of 13. He is essentially a newspaper man, having served in every department from the case to the position he now holds as editor and proprietor of the Augusta Chronicle, a paper which is nearly 110 years old. As a boy he pursued his studies at night, setting type during the day. When the war broke out he left Georgetown college, where he was studying, and entered the confederate service. He continued in the Emerald light infantry with the rank of lieutenant until the company was disbanded. After the war he came to Augusta, and entering the office of the Daily Constitutionalist again worked at the case. In 1872 he purchased the Chronicle and Sentinel, now called the Chronicle, and has brought the paper to its present prosperity and importance.

He is a forcible and fluent writer and his editorials did much to redeem South Carolina from scalawag rule in 1876. In 1872 he was elected to the general assembly of Georgia as representative from Richmond county, re-elected in 1874 and again in 1876. In August, 1880, Mr. Walsh was a delegate from his county to the state democratic convention, where he worked for Gov. Colquitt's nomination, even repelling all overtures for his own nomination. In 1880 he was elected a delegate from the old 8th, now the 10th, district to the Cincinnati convention which nominated Gen. Hancock for president. In 1884 he was one of the delegates from the state at large to the Chicago convention which nominated President Cleveland. He urged his nomination three years before the convention met, believing that he was the only man the party could elect president. The delegation to the Chicago convention elected him as the representative of Georgia on the national democratic executive committee, where he served four years. He was opposed to the last nomination of Mr. Cleveland, because he did not regard him at the time as an available man.

Mr. Walsh is a striking personage. Thick set, well knit, with a bearing, he possesses a kind, friendly face, a clear, blue eye, and his countenance is often illuminated with a genial glow.

MR. JUSTICE WHITE.

Edward Douglas White took his seat on the Supreme bench as the youngest of the justices, and with the exception of Justices Field and Harlan he entered at an earlier period of

life than any of the other justices, and has the exceptionally long term of twenty-one years to serve before retirement. He was born in the parish of La Fourche, La., and was 48 years of age last November. He was educated at Mount St. Mary's, near Emmetsburg, Md.; at the Jesuit college in New Orleans, and finally at Georgetown college, D. C. He entered the confederate army and after the war was admitted to the bar by the Louisiana Supreme court and practiced his profession during the troublous years of the reconstruction period. In 1874 he began his political experience as a state senator. Upon stepping into the law again he became associate justice of the Supreme court of Louisiana in 1878, but again turning to political pursuits he was elected to the United States senate to succeed Senator Eustis, at present minister to France, taking his seat March 4, 1891. By his appointment he left a vacancy of full two years in his senatorial term.

Justice White comes of an historic family. Gov. Edward D. White, who presided over the destinies of Louisiana in the prosperous anti-bellum days, was his father. His family are all men of fortune and high social position. Justice White is regarded at the local bar as one of the most powerful forensic orators of the South, as well as one of the ablest civil law jurists in the country. He was head of the firm of White, Parlanze & Saunders. Mr. Saunders is the author of the Revised Civil Code of Louisiana, a noted work. Mr. Parlanze was lieutenant-governor, then justice of the state Supreme court, and recently ascended the bench of the United States District court for his district. Justice White was mentioned for a seat on the Supreme bench upon the death of Justice Lamar, when Justice Jackson of Tennessee was named. Justice White is more than six feet in height, has a correspondingly fine physique, and his habitually smooth-shaven face lends him the appearance of an even younger man than he is in fact. He is a devout Roman Catholic.

GEN. G. D. RUGGLES.

George David Ruggles, new adjutant-general of the United States army, was born in Newburg, N. Y., Sept. 11, 1838; entered the West Point military academy in 1851, and was graduated there in 1855. He was on frontier duty for some years, served in three Indian expeditions, and in 1858 was stationed at St. Louis, Mo., as acting adjutant-general of the department of the west. He became assistant adjutant-general in 1861, engaged in the organization of volunteer companies, and commenced active field service in 1862. He was in many important battles, including Antietam and South Mountain, and at the close of the war was adjutant-general of the Army of the Potomac. He was promoted colonel in 1862, brevetted brigadier general in 1865, and became lieutenant colonel in 1880. Since the close of the war he has been adjutant-general of various departments; was assistant in the adjutant-general's office in Washington from 1880 to 1886, and from 1892 until his recent promotion as adjutant-general, with the rank of brigadier general.

MAJ.-GEN. MCCOOK.

Gen. A. McD. McCook was born in Columbiana county, Ohio, April 22, 1831; has been an officer of the army since June, 1852, when he was graduated from the United States military academy at West Point, N. Y., and commissioned a second lieutenant in the 3d United States infantry. His early life as an officer was passed on the Indian frontier of New Mexico. In 1856 he was promoted to a first lieutenancy and assigned to duty at the United States military academy, where the outbreak of the civil war found him. A mem-

ber of a distinguished Ohio family, which subsequently became historically famed as "The Fighting McCooks," owing to the number who went to the front; he was given the colonelcy of the first Regular Cavalry, Ohio Infantry, Lincoln's call over 75,000 men in 1861. He was at the battle of Bull Run, was commissioned a brigadier general of volunteers in September, 1861, and became a major general of volunteers in July, 1862, and commanded the 20th army corps and participated as its commander in the memorable battles of Perryville, Stone River and Chickamauga. At the close of the civil war he was commissioned lieutenant colonel of the 36th United States infantry, and was promoted to the colonelcy of the 6th United States Infantry Dec. 15, 1880. He was commissioned a brigadier general July 11, 1889, and upon the retirement of Gen. Howard in November, 1894, Gen. McCook was promoted to fill the vacancy. Gen. McCook had nine brothers in the army, all generals, during the civil war, and his father, aged 62, also volunteered, and was mortally wounded during Morgan's raid into Ohio. General McCook also had five cousins, all of whom participated with distinguished gallantry in the war of the rebellion.

J. D. YEOMANS.

James D. Yeomans, appointed interstate commerce commissioner, was born in Cattaraugus county, New York, forty-eight years ago. He had the advantage of a fair common and high school education. His first experience in the railroad business was as office-boy when he was 18 years old. He rapidly advanced to the position of superintendent, serving as brakeman, conductor and all intermediate grades. For several years he was superintendent of the Buffalo, New York & Philadelphia railroad company. During the war he served in important railway positions in military operations, his abilities in operative work being highly valued. In 1870 he became a member of the railroad contracting firm of Crook, Rafter & Yeomans of Buffalo, N. Y., which built many lines of road in Michigan, the ore docks at Marquette and other important works in the northwest. He came to Sioux City in 1889 in order to look personally

after his property interests in the west. He is an extensive farmer and stock-raiser. He is a life-long democrat and was prominent in New York politics, having been an intimate personal and political friend of former Cleveland and Postmaster-General Bissell.

COL. T. G. LAWLER.

Thomas G. Lawler, the new commander-in-chief of the G. A. R., was born in Liverpool, England, April 7, 1844. His parents came to Illinois when he was a child and have since resided here. He was one of the first to respond when the war broke out, enlisting as a private in company E, 19th Illinois volunteer infantry, in June, 1861. He was then 17 years of age. His war record is a most honorable one. He was with his company and regiment in every battle in which they were engaged, and with the colors of his regiment was the first man of his command over the Confederate works at the battle of Missionary Ridge. He served as a private and sergeant and was elected first lieutenant, but was not mustered. He commanded his company for two months during the Atlanta campaign and was placed upon the roll of honor by order of Maj. Gen. Rosecrans, commanding the army of the Cumberland. In 1876 he organized the Rockford Rifles. He was elected colonel and commanded the 3d regiment for seven years, when he resigned to give the younger officers a chance for promotion. He was appointed postmaster during the Hayes administration and served until he was removed by President Cleveland. He was again appointed in the succeeding Harrison administration and was replaced by a democrat. He was one of the first members of G. L. Nevius post, No. 1, which has a membership of 400 and is the third largest post in the department of Illinois. He has been its commander for twenty-six consecutive years. He served for five years as a member of the deputy council of administration, one year each as junior and senior vice department commander, and was unanimously elected department commander in 1884. Nevius post refusing to accept his resignation as its commander during that year. Col. Lawler is engaged in the coal and lumber business at Rockford, Ill.

FOREIGN COIN TABLE.

The following table gives the nominal value of the unit of the monetary system of each country of the world that has a coinage of its own. As these coins are not legal tenders in the United States they have here only a bullion value, which is far from being a fixed one.

THE NEW CHINESE TREATY.

The following is a copy of the new Chinese treaty which was adopted by the senate March 9 and ratified Aug. 13, 1894:

WHEREAS, On the 17th day of November, A. D. 1860, and of Kwangshai the sixth year, the tenth moon, fifteenth day, a treaty was concluded between the United States and China for the purpose of regulating, limiting, or suspending the coming of Chinese laborers to and their residence in the United States; and,

WHEREAS, The government of China, in view of the antagonism and much-deprecated and serious disorders to which the presence of Chinese laborers has given rise in certain parts of the United States desires to prohibit the immigration of such laborers from China to the United States; and,

WHEREAS, The two governments desire to co-operate in prohibiting such immigration and to strengthen in other ways the bonds of friendship between the two countries; and,

WHEREAS, The two governments are desirous of adopting reciprocal measures for the better protection of the citizens or subjects of each within the jurisdiction of the other.

Now, therefore, the president of the United States has appointed Walter G. Gresham, secretary of state, as his plenipotentiary, and his imperial majesty, the emperor of China, has appointed Yang Yu, officer of the second rank, subdirector of the court of sacrificial worship, and envoy extraordinary and minister plenipotentiary, and the said plenipotentiaries having exhibited the respective full powers found to be in due form and good form, have agreed upon the following articles:

Article 1. The high-contracting parties agree that for a period of ten years, beginning with the date of exchange of ratification of this convention, the coming, except under the conditions hereinafter specified, of Chinese laborers shall be absolutely prohibited.

Art. 2. The articles shall not apply to the return to the United States of any registered Chinese laborer who has a lawful wife, child, or parent in the United States, or property therein of the value of \$1,000 or of debts of like amount due him and pending settlement; nevertheless, every such Chinese laborer shall, before leaving the United States, deposit, as a condition of his return, with the collector of customs of the district from which he departs, a full description in writing of his family, or property, or debts, as aforesaid, and shall be furnished by said collector with such certificate of his right to return under this treaty as the laws of the United States may now or hereafter prescribe, and not inconsistent with the provisions of this treaty; and should the written description aforesaid be proved to be false, the right of return thereunder or of continued residence shall in each case be forfeited. And such right of return to the United States shall be exercised within one year from the date of leaving the United States, but such right of return to the United States may be extended for an additional period, not to exceed one year, in cases where by reason of sickness or other cause of disability beyond his control such Chinese laborer shall be rendered unable sooner to return, which facts shall be fully reported to the Chinese consul at the port of departure and by him certified to the satisfaction of the collector of the port at which such Chinese subject shall land in the United States; and no such Chinese laborer shall be

permitted to enter the United States by land or sea without producing to the proper officer of the customs the return certificate herein required.

Art. 3. The provisions of this convention shall not affect the right at present enjoyed of Chinese subjects being officials, teachers, students, merchants, or travelers for curiosity or pleasure, but not laborers, of coming to the United States and residing therein. To entitle such Chinese subjects, as are above described, to admission to the United States they may produce a certificate from their government or the government where they last resided, signed by the diplomats or consular representative of the United States in the country or port whence they depart. It is also agreed that Chinese laborers shall continue to enjoy the privilege of transit across the territory of the United States in the course of their journey to or from other countries, subject to such regulations by the government of the United States as may be necessary to prevent said privilege of transit from being abused.

Art. 4. In pursuance of article 3 of the immigration treaty between the United States and China, signed at Peking on the 17th day of November, 1880, it is hereby understood and agreed that Chinese laborers or Chinese of any other class, either permanently or temporarily residing in the United States, shall have for the protection of their persons and property all rights that are given by the laws of the United States to citizens of the most favored nation, excepting the right to become naturalized citizens. And the government of the United States reaffirms its obligation, as stated in said article 3, to exert all its power to secure protection to the persons and property of all Chinese subjects in the United States.

Art. 5. The government of the United States having by act of congress, approved May 1, 1892, as amended by the act approved May 5, 1893, required all Chinese laborers lawfully within the limits of the United States by the first-named act to be registered, as in said acts provided, with a view of affording them better protection, the Chinese government will not object to the enforcement of such acts, and reciprocally the government of the United States recognizes the right of the government of China to enact and enforce similar laws or regulations for the registration, free of charge, of laborers, skilled or unskilled (not merchants, as defined by said acts of congress), citizens of the United States in China, whether residing within or without treaty ports. And the government of the United States agrees that within twelve months of the date of the exchange and ratification of this convention and annually thereafter, it will furnish to the government of China registers and reports showing, for each name, age, occupation and number of the place of residence of all of its citizens of the United States, including missionaries, residing both within and without the treaty ports of China, not including, however, diplomatic and other officers of the United States residing in China upon official business, together with their body and household servants.

Art. 6. This convention shall remain in force for a period of ten years beginning with the date of the exchange of ratifications, and if, six months before the expiration of the said period of ten years, neither government shall formally have given notice of its termination to the other, it shall remain in full force and effect for another like period of ten years.

UTTERANCES OF PRESIDENT CLEVELAND.

MESSAGE TO CONGRESS.

The message of the president to the last session of the Lillid congress was as follows:

To the Congress of the United States: The assemblage within the nation's legislative halls of those charged with the duty of making laws for the benefit of a generous and free people impressively suggests the exacting obligation and inexorable responsibility involved in their task. At the threshold of such labor now to be undertaken by the congress of the United States and the discharge of an executive duty enjoined by the constitution, I submit this communication, containing a brief statement of the condition of our national affairs and recommending such legislation as seems to me necessary and expedient.

The history of our recent dealings with other nations, and our peaceful relations with them at this time, additionally demonstrate the advantage of consistently adhering to a firm but just foreign policy, free from envious or ambitious and irrational schemes and characterized by entire honesty and sincerity.

During the past year, pursuant to a law of congress, commissioners were appointed to the Antwerp Industrial exposition. Though the participation of American exhibitors fell far short of completely illustrating our national ingenuity and industrial achievements, yet it was quite creditable in view of the brief time allowed for preparation.

I have endeavored to impress upon the Belgian government the needlessness and positive harmfulness of its restrictions upon the importation of certain of our food products, and have persistently urged that the rigid supervision and inspection under our laws are amply sufficient to prevent the exportation from this country of diseased cattle and unwholesome meat.

SOUTH AMERICAN COUNTRIES.

The termination of the civil war in Brazil has been followed by the general prevalence of peace and order. It appearing at an early stage of the insurrection that its course would call for unusual watchfulness on the part of this government, our naval force in the harbor of Rio de Janeiro was strengthened. This precaution, I am satisfied, tended to restrict the issue to a simple trial of strength between the Brazilian government and the insurgents, and to avert complications which at times seemed imminent. Our firm attitude of neutrality was maintained to the end. The insurgents received no encouragement of eventual asylum from our commanders, and such opposition as they encountered was for the protection of our commerce and was clearly justified by public law. A serious tension of relations having arisen at the close of the war between Brazil and Portugal by reason of the escape of the insurgent admiral, De Gama, and his followers, the friendly offices of our representatives to those countries were exerted for the protection of the subjects of either within the territory of the other.

Although the government of Brazil was duly notified that the commercial agreements existing between the United States and that country based on the third section of the tariff act of 1890 was abrogated on Aug. 28, 1894, by the taking effect of the tariff law now in force, that government subsequently notified us of its intention to terminate such arrangement on the 1st day of January, 1895, in the exercise of the right reserved in the agreement between the two countries. I invite attention to the correspondence between the secretary of state and the Brazilian minister on this subject.

The commission organized under the convention which we had entered into with Chili for the settlement of the outstanding claims of each government against the other adjourned at the end of the period stipulated for its continuance, leaving undetermined a number of American claims which had been duly presented. These claims are not barred, and negotiations are in progress for their submission to a tribunal.

FRIENDLY TO JAPAN AND CHINA.

March 17 last the new treaty with China in further regulation was signed at Washington, and on Aug. 13 it received the sanction of the senate. Ratification on the part of China and formal exchange are awaited to give effect to this mutually beneficial convention.

A gratifying recognition of the uniform impartiality of this country toward all foreign states was manifested by the coincident request of the Chinese and Japanese governments that the agents of the United States should, within proper limits, afford protection to the subjects of the other during the suspension of diplomatic relations due to a state of war. This delicate office was accepted, and a misapprehension, which gave rise to the belief that in affording this kindly unofficial protection our agents would exercise the same authority which the withdrawn agents of the belligerents had exercised, was promptly corrected. Although the war between China and Japan endangers no policy of the United States, it deserves our gravest consideration, by reason of its disturbance of our general commercial interests in the two countries and the increased dangers which may result to our citizens domiciled or sojourning in the interior of China.

Acting under a stipulation in our treaty with Korea (the first concluded with a western power) I felt constrained at the beginning of the controversy to tender our good offices to induce an amicable arrangement of the initial difficulty growing out of the Japanese demands for administrative reforms in Korea; but the unhappy precipitation of actual hostilities defeated this kindly purpose. Deploping the destructive war between the two most powerful of the eastern nations, and anxious that our commercial interests in those countries may be preserved and that the safety of our citizens there shall not be jeopardized, I would not hesitate to heed any intimation that our friendly aid for the honorable termination of hostilities would be acceptable to both belligerents.

A convention has been finally concluded for the settlement by arbitration of the prolonged dispute with Ecuador, growing out of the proceedings against Emilio Santos, a naturalized citizen of the United States.

Our relations with the republic of France continue to be such as should exist between nations so long bound together by friendly sympathy and similarity in their form of government. The recent cruel assassination of the president of this sister republic called forth such universal expressions of sorrow and condolence from our people and government as to leave no doubt of the depth and sincerity of our attachment. The resolutions passed by the senate and house of representatives on the occasion have been communicated to the widow of President Carnot.

Acting on the reported discovery of Texas fever in cargoes of American cattle, the German prohibition against importations of live stock and fresh meats from this country has been revived. It is hoped that Germany will soon become convinced that the inhibi-

tion is as needless as it is harmful to mutual interests. The German government has protested against that provision of the customs-tariff act which imposes a discriminating duty of one-tenth of 1 cent a pound on sugars coming from countries paying an export bounty thereon, claiming that the exaction of such duty is in contravention of articles 5 and 9 of the treaty of 1828 with Prussia. In the interests of the commerce of both countries and to avoid even the accusation of treaty violation I recommend the repeal of so much of the statute as imposes that duty, and I invite attention to the accompanying report of the secretary of state, containing a discussion of the questions raised by the German protests.

BERING SEA AFFAIRS.

Early in the present year an agreement was reached with Great Britain concerning instructions to be given to the naval commanders of the two governments in Bering sea and the contiguous North Pacific ocean for their guidance in the execution of the award of the Paris tribunal of arbitration and the enforcement of the regulations therein prescribed for the protection of seal life in the waters mentioned. An understanding has also been reached for the payment by the United States of \$425,000 in full satisfaction of all claims which may be made by Great Britain for damages growing out of the controversy as to fur seals in Bering Sea, or the seizure of British vessels engaged in taking seal in those waters. The award and findings of the Paris tribunal to a great extent determined the facts and the principles upon which these claims should be adjusted, and they have been submitted by both governments to a thorough examination upon the principles as well as the facts which they involve. I am convinced that a settlement upon the terms mentioned would be an equitable and advantageous one, and I recommend that provision be made for the prompt payment of the stated sum.

Thus far only France and Portugal have signified their willingness to adhere to the regulations established under the award of the Paris tribunal of arbitration.

Preliminary surveys of the Alaskan boundary and a preparatory examination of the question of protection of food fish in the contiguous waters of the United States and the dominion of Canada are in progress.

The boundary of British Guiana still remains in dispute between Great Britain and Venezuela. Believing that its early settlement on some just basis alike honorable to both parties is in the line of our established policy to remove from this hemisphere all cause of difference with powers beyond the sea, I shall renew the efforts heretofore made to bring about a restoration of diplomatic relations between the disputants and to induce a reference to arbitration, a resort which Great Britain so conspicuously favors in principle and respects in practice, and which is earnestly sought by her weaker adversary.

HAWAII AND MEXICO.

Since communicating the voluminous correspondence in this matter to the action taken by the senate and house of representatives on certain questions submitted to the judgment and wider discretion of congress, the organization of a government in place of the provisional arrangement which followed the deposition of the queen has been announced, with the exception of its effectual operation. The recognition usual in such cases has been accorded the new government.

Under our present treaties of extradition with Italy miscarriages of justice have occurred, owing to the refusal of that govern-

ment to surrender its own subjects. Thus far our efforts to negotiate an amended convention obviating this difficulty have been unavailing.

Apart from the war in which the island empire is engaged, Japan has been increasing attention in this country by her evident desire to cultivate more liberal intercourse with us and to seek our kindly aid in furtherance of her laudable desire for complete autonomy in her domestic affairs and full equality in the family of nations. The Japanese empire of to-day is no longer the Japan of the past, and our relations with this progressive nation should not be less broad and liberal than those with other powers.

Good will, fostered by many interests in common, has marked our relations with our nearest southern neighbor. Peace being restored along her northern frontier, Mexico has asked the punishment of the late disturbers of her tranquillity. There ought to be a new treaty of commerce and navigation with that country to take the place of the one that terminated thirteen years ago. The friendliness of the intercourse between the two countries is attested by the fact that during this long period the commerce of each has steadily increased under the rule of mutual consideration, being neither stimulated by conventional arrangements nor retarded by jealousies or selfish distrust. An indemnity tendered by Mexico, as a gracious act, for the murder in 1881 of Leon Baldwin, an American citizen, by a band of marauders in Durango has been accepted and is being paid in installments.

The problem of the storage and use of the waters of the Rio Grande for irrigation should be solved by appropriate concurrent action of the two interested countries. Rising in the Colorado heights, the stream flows intermittently, yielding little water during the dry months to the irrigating channels already constructed along its course. This scarcity is often severely felt in the regions where the river forms a common boundary. Moreover, the frequent changes in its course through level sands often raise embarrassing questions of territorial jurisdiction.

THE BLUEFIELDS TROUBLE.

Prominent among the questions of the year were the Bluefields incidents, in what is known as the Mosquito Indian strip, bordering on the Atlantic ocean, and within the jurisdiction of Nicaragua. By the treaty of 1860 between Great Britain and Nicaragua the former government expressly recognized the sovereignty of the latter over the strip, and a limited form of self-government was guaranteed to the Mosquito Indians, to be exercised according to their customs, for themselves and other dwellers within its limits. The so-called native government, which grew to be largely made up of aliens, for many years disputed the sovereignty of Nicaragua over the strip, and claimed the right to maintain therein a practically independent municipal government. Efforts of Nicaragua to maintain sovereignty over the Mosquito territory led to serious disturbances, culminating in the suppression of the native government and the attempted substitution of an impracticable composite administration in which Nicaragua and alien residents were to participate. Failure was followed by an insurrection, which for a time subverted Nicaraguan rule, expelling her officers and restoring the old organization. This, in turn, gave place to the existing local government, established and upheld by Nicaragua. Although the alien interests arrayed against Nicaragua in these transactions have been largely American, and the commerce of that region for some time has been and still is chiefly controlled by our

citizens, we cannot for that reason challenge the rightful sovereignty of Nicaragua over this important part of her domain.

For some months on and during part of the time two of our naval ships have been stationed at Bluefields for the protection of all legitimate interests of our citizens. In September last the government at Managua expelled from its territory twelve or more foreigners, including two Americans, for alleged participation in the seditious or revolutionary movements of the republic at Bluefields, already mentioned; but through the earnest remonstrance of this government the two Americans have been permitted to return to the peaceful management of their business. Our naval commanders at the scene of these disturbances, by their constant exhibition of firmness and good judgment, contributed largely to the prevention of more serious consequences and to the restoration of quiet and order.

I regret that in the midst of these occurrences there happened a most grave and irritating failure of Nicaraguan justice. An American citizen named Wilson, residing at Rama, in the department of Mosquitia, was murdered by one Arguello, the acting governor of the town. After some delay the murderer was arrested, but so insecurely confined or guarded that he escaped, and, notwithstanding our repeated demands, it is claimed that his recapture has been impossible by reason of his flight beyond Nicaraguan jurisdiction.

The Nicaraguan authorities, having given notice of forfeiture of their concession to the canal company on grounds purely technical and not embraced in the contract, have receded from that position.

Pern, I regret to say, shows symptoms of domestic discontent, and probably to the slowness of her recuperation from the distresses of the war of 1881. Weakened in resources, her difficulties in facing international obligations invite our kindly sympathy and justify our forbearance in pressing long-pending claims. I have felt constrained to testify this sympathy in connection with certain demands urgently preferred by other powers.

The recent death of the czar of Russia called forth appropriate expressions of sorrow and sympathy on the part of our government with his bereaved family and the Russian people. As a further demonstration of respect and friendship, our minister at St. Petersburg was directed to represent our government at the funeral ceremonies.

OTHER FOREIGN AFFAIRS.

The sealing interests of Russia in Bering sea are second only to our own. A most arduous and hazardous campaign has been conducted with the imperial government restrictive of poaching on the Russian rookeries and of sealing in waters which were not comprehended in the protected area defined in the Paris award.

Occasion has been found to urge upon the Russian government equality of treatment for our great insurance companies in their operations have been extended throughout Europe. Admitting, as we do, foreign corporations to transact business in the United States, we naturally expect no less tolerance for our own in the ample fields of competition abroad.

But few cases of interference with naturalized citizens returning to Russia have been reported during the current year. One Kizeminski was arrested last summer in a Polish province on a reported charge of unpermitted renunciation of Russian allegiance, but it transpired that the proceedings originated in alleged malfeasance committed by Kizeminski while an imperial official a number of years

ago. Efforts for his release, which promised to be successful, were in progress when his death was reported.

The government of Salvador having been overthrown by an abrupt popular outbreak, certain of its military and civil officers, while hotly pursued by infuriated insurgents, sought refuge on board the United States warship Bennington, then lying in a Salvadoran port. Although the practice of asylum is not favored by this government, yet in view of the imminent peril which threatened the fugitives, and solely from considerations of humanity, they were afforded shelter by our naval commander and when afterward demanded under our treaty of extradition with Salvador for trial on charges of murder, arson and robbery, I directed that such of them as had not voluntarily left the ship be conveyed to one of our nearest ports, where a hearing could be had before a judicial officer in compliance with the terms of the treaty. On their arrival at San Francisco such a proceeding was promptly instituted before the United States district judge, who held that the acts constituting the alleged offenses were political and discharged all the accused except one, Cienfuegos, who was held for an attempt to murder. Thereupon I was constrained to direct his release, for the reason that an attempt to murder was not one of the crimes charged against him and upon which his surrender to the Salvadoran authorities had been demanded.

Unreasonable and unjust fines imposed by Spain on the vessels and commerce of the United States have demanded from time to time during the last twenty years earnest remonstrance on the part of our government. In the immediate past exorbitant penalties have been imposed upon our vessels and commerce by customs authorities of Cuba and Porto Rico for clerical errors of the most trivial character in the manifests or bills of lading. In some cases fines amounting to thousands of dollars have been levied upon cargoes of the carrying vessels when the goods in question were entitled to free entry. Fines have been exacted even when the goods had been detected and the Spanish authorities notified before the arrival of the goods in port. This conduct is in strange contrast with the considerate and liberal treatment extended to Spanish vessels and cargoes in our ports in like cases. No satisfactory settlement of these vexatious questions has yet been reached.

The Mora case, referred to in my last annual message, remains unsettled. From the diplomatic correspondence on this subject, which has been laid before the senate, it will be seen that the government has offered to conclude a convention with Spain for disposal by arbitration of outstanding claims between the two countries, except the Mora claim, which, having been long ago adjusted, now only awaits payment as stipulated, and of course it could not be included in the proposed convention. It is hoped that this offer could remove parliamentary obstacles encountered by the Spanish government in providing payment of the Mora indemnity. I regret to say that no definite reply to this offer has yet been made, and all efforts to secure payment of this settled claim has been unavailing.

In my last annual message I alluded to the claim on the part of Turkey of the right to expel, as persons undesirable and dangerous, Armenians naturalized in the United States and returning to Turkish jurisdiction. Numerous questions in this relation have arisen. While this government acquiesces in the asserted right of expulsion, it will not consent that Armenians be persecuted or otherwise punished for no other reason than having

acquired without imperial consent American citizenship.

Three of the assailants of Miss Melton, an American teacher in Mosul, have been convicted by a court-martial, and I am advised that an appeal against the acquittal of the remaining five has been taken by the Turkish prosecuting officer.

A convention has been concluded with Venezuela for the arbitration of a long-disputed claim growing out of the seizure of certain vessels, the pretensions of citizens of the United States. Although signed, the treaty of extradition with Venezuela is not yet in force, owing to the insistence of that government that when surrendered its citizens shall in no case be liable to capital punishment.

The rules for the prevention of collisions at sea, which were framed by the maritime conference held in this city in 1889, having been concurrently incorporated in the statutes of the United States and Great Britain, have been announced to take effect March 1, 1895, and invitations have been extended to all maritime nations to adhere to them. Favorable responses have thus far been received from Austria, France, Portugal, Spain and Sweden.

In my last message I referred briefly to the unsatisfactory state of affairs in Samoa under the operation of the Berlin treaty as signally illustrating the policy of entangling alliances with foreign powers, and on May 9, 1894, in response to a resolution of the senate, I sent a special message and documents to that body on the same subject, which emphasized my previously expressed opinions. Later occurrences, the correspondence in regard to which will be laid before congress, further demonstrate that the government was dissatisfied by the three powers and forced upon the Samoans against their inveterate hostility can be maintained only by the continued presence of foreign military force and at no small sacrifice of life and treasure.

NO PEACE IN SAMOA.

The suppression of the Mataafa insurrection by the powers and the subsequent banishment of the leader and eleven other chiefs, as recited in my last message, did not bring lasting peace to the islands. Formidable uprisings continued, and finally a rebellion broke out in the capital island, Upolu, headed in Aana, the western district, by the younger Tamasese, and in Atua, the eastern district, by other leaders. The insurgents ravaged the country and fought the government's troops up to the very doors of Apia. The king again appealed to the powers for help and the combined British and German naval force reduced the Atuaans to apparent subjection, not, however, without considerable loss to the natives. A few days later Tamasese and his adherents, fearing the ships and the marines, professed submission.

Reports received from our agents at Apia do not justify the belief that the peace thus brought about will be of long duration. It is their conviction that the natives are at heart hostile to the present government; that such of them as profess loyalty do so from fear of the powers, and that it would speedily go to pieces if the warships were withdrawn.

In reporting to his government on the unsatisfactory situation since the suppression of the late revolt by foreign and armed forces, the German consul at Apia stated:

"That peace will be lasting is hardly to be presumed. The lesson given by firing on Atua was not sufficiently sharp and incisive to leave a lasting impression on the forgetful Samoan temperament. In fact, conditions are existing which show that peace will not last and is not seriously intended. Maletoa, the

king, and his chiefs are convinced that the departure of the warships will be a signal for a renewal of war. The circumstance that the representatives of the villages of all the districts which were opposed to the government have already withdrawn to Atua to hold meetings, and that both Atua and Aana have forbidden inhabitants of those districts which fought on the side of the government to return to their villages, and have already partly burned down the latter, indicates that a real condition of the parties is still far off.

And in a note of the 10th ultimo, enclosing a copy of that report for the information of this government, the German ambassador said:

"The contents of the report awakened the imperial government's apprehension that under existing circumstances the peace concluded with the rebels will afford no assurance of the lasting restoration of tranquillity in the islands."

The present government has utterly failed to correct, if, indeed, it has not aggravated, the very evils it was intended to prevent. It has not stimulated our commerce with the islands, nor our participation in its establishment against the wishes of the natives, nor in plain defiance of the conservative teachings and warnings of the wise and patriotic men who laid the foundations of free institutions, and I invite an expression of the judgment of congress on the propriety of steps being taken by this government looking to the withdrawal from its engagements with the other powers on some reasonable terms not prejudicial to any of our existing rights.

DEFICIT IN THE TREASURY.

The secretary of the treasury reports that the receipts of the government from all sources of revenue during the fiscal year ended June 30, 1894, amounted to \$72,802,496.29 and its expenditures to \$142,605,758.87, leaving a deficit of \$69,803,262.58. There was a decrease of \$15,362,674.66 in the ordinary expenses of the government, as compared with the fiscal year 1893. There was collected from customs \$131,818,530.62 and from internal revenue \$17,168,449.70. The balance of the income for the year, amounting to \$93,615,517.97, was derived from the sales of lands and from other sources. The value of our total dutiable imports amounted to \$275,150,098, being \$146,657,225 less than during the preceding year, and the importations free of duty amounted to \$59,716,531, being \$84,748,075 less than during the preceding year. The receipts from customs were \$73,536,156.11 less and from internal revenue \$18,345,363.57 less than 1893. The total tax collected from distilled spirits was \$85,250,250.25, on manufactured tobacco, \$8,617,388.63, and on fermented liquors, \$31,414,788.01. Our exports of merchandise, domestic and foreign, amounted during the year to \$892,140,572, being an increase over the preceding year of \$4,855,378. The total amount of gold exported during the fiscal year was \$76,888.04, as against \$108,630,444 during the fiscal year 1893. The amount imported was \$72,449,119, as against \$21,174,381 during the previous year. The imports of silver were \$13,236,552 and the exports were \$50,431,255.

The total bounty paid upon the production of sugar in the United States for the fiscal year was \$12,100,208.89, being an increase of \$2,725,078.01 over the payments made during the preceding year. The amount of bounty paid from July 1, 1894 to Aug. 28, 1894, the time when further payments ceased by operation of law, was \$365,155.84. The total expenses incurred in the payment of the bounty upon sugar during the fiscal year was \$130,140.85.

It is estimated that upon the basis of our present revenue laws the receipts of the government during the current fiscal year ending June 30, 1895, will be \$24,427,748.44 and its ex-

penditures \$444,427,784.44, resulting in a deficit of \$20,000,000.

On Nov. 1, 1894, the total stock of money of all kinds in the country was \$2,240,773,888, as against \$2,204,651,000 on Nov. 1, 1893, and the money of all kinds, in circulation or not, included in the treasury holdings, was \$1,572,483,422, or \$24,767,000 more upon an estimated population of 68,887,000. At the same date there was held in the treasury gold bullion amounting to \$44,815,177.55 and silver bullion which was purchased at a cost of \$127,779,968. The purchase of silver bullion under the act of July 14, 1890, ceased on Nov. 1, 1893, and up to that time there had been purchased during the fiscal year 11,917,458.75 fine ounces, at a cost of \$8,715,521.52, an average cost of \$0.7313 per fine ounce. The total amount of silver purchased from the time that law took effect until the repeal of its purchasing clause, on the date last mentioned, was 158,674,982.58 fine ounces, which cost \$15,391,402.55, the average price per fine ounce being \$0.9244.

The total amount of standard silver dollars coined at the mints of the United States since the passage of the act of Feb. 23, 1878, is \$421,776,408, of which \$28,146,793 were coined under the provisions of that act, \$38,531,431 under the provisions of the act of July 14, 1890, and \$5,478,472 under the act providing for the coinage of trade-dollar bullion. The total coinage of all metals at our mints during the last fiscal year consisted of 63,483,220 pieces, valued at \$106,216,730.04, of which there were \$96,474,912.50 in gold coin, \$758 in standard silver dollars, \$6,024,140.40 in subsidiary silver coin and \$716,919.26 in minor coin.

During the calendar year 1893 the production of precious metals in the United States was estimated at 1,739,323 fine ounces of gold of the commercial and coinage value of \$36,955,000 and 61,000,000 fine ounces of silver of the bullion or market value of \$46,800,000 and of the coinage value of \$77,576,000. It is estimated that on the last day of July, 1894, the stock of metallic money in the United States, consisting of coin and bullion, amounted to \$1,251,540,568, of which \$627,923,201 was gold and \$623,617,367 was silver.

THE DEPARTMENTS.

Fifty national banks were organized during the year ended Oct. 31, 1894, with a capital of \$5,285,000, and seventy-nine, with a capital of \$10,475,000, went into voluntary liquidation. Twenty-one banks, with a capital of \$2,770,000, were placed in the hands of receivers. The total number of national banks at the close of the thirty-first day of October last was 3,757, being forty less than on the thirty-first day of October, 1893. The capital stock paid in was \$672,671,365, being \$9,678,491 less than at the same time in the previous year, and the surplus fund and undivided profits, less expenses and taxes paid, amounted to \$394,121,082.10, which was \$16,089,730 less than on Oct. 31, 1893. The circulation was decreased \$1,741,563. The obligations of the banks to each other were increased \$117,238,331, and the individual deposits were \$277,294,489 less than at the corresponding date in the previous year. Loans and discounts were \$161,204,363 more than at the same time in the previous year, and checks and other cash items were \$80,349,973 more. The total resources of the banks at the date mentioned amounted to \$3,473,922,055, as against \$3,109,563,284.96 in 1893.

From the report of the secretary of war it appears that the strength of the army on Sept. 30, 1894, was 2,135 officers and 25,765 enlisted men. Although this is apparently a very slight decrease compared with the previous year, the actual effective force has been increased to the equivalent of nearly two regiments through the reorganization of the

system of recruiting and the consequent release to regimental duty of the large force of men hitherto serving at the recruiting depots. The abolition of these depots, it is predicted, will furthermore effect an annual reduction approximating \$250,000 in the direct expenditures, besides promoting generally the health, moral and discipline of the service.

The execution of the policy of concentrating the army at important centers of population and transportation, foreshadowed in the last annual report of the secretary, has resulted in the abandonment of fifteen of the smaller posts which was effected under a plan which assembles organizations of the same regiments hitherto widely separated. This renders our small forces more readily effective for any service which they may be called upon to perform, increases the extent of the territory under protection without diminishing the security heretofore afforded to any locality, improves the discipline, training and cast of the corps of the army, besides considerably decreasing the cost of its maintenance.

Though the forces of the department of the east have been somewhat increased, more than three-fourths of the army is still stationed west of the Mississippi. This carefully matured policy, which secures the best and greatest service in the interests of the general welfare from the small force comprising our regular army, should not be thoughtlessly embarrassed by the creation of new and unnecessary posts through acts of congress to gratify the ambitions or interests of localities.

STRENGTH OF THE ARMY.

While the maximum legal strength of the army is 25,000 men, the effective strength, through various causes, is but little over 20,000 men. The purpose of congress does not, therefore, seem to be fully attained by the existing condition. While no considerable increase in the army is, in my judgment, demanded by recent events, the policy of seasons fortification, in the prosecution of which we have been steadily engaged for some years, has so far developed as to suggest that the effective strength of the army be now made at least equal to the legal strength. Measures taken by the department during the year, as indicated, have already considerably augmented the effective force, and the secretary of war presents a plan which I recommend to the consideration of congress to attain the desired end. Economies effected in the department in other lines of the work will offset to a great extent the expenditure involved in the proposition submitted. The present fortification, this contemplates the adoption of the three-battalion formation of regiments, which for several years has been indorsed by the secretaries of war and the generals commanding the army. Compact in itself, it provides a skeleton organization, ready to be filled out in the event of war, which is particularly adapted to our strength and requirements, and the fact that every other nation, with a single exception, has adopted this formation to meet the conditions of modern warfare should alone secure for the recommendation an early consideration.

It is hardly necessary to recall the fact that, in obedience to the commands of the constitution and the laws, and for the purpose of protecting the property of the United States, aiding the process of federal courts and removing lawless obstructions to the performance by the government of its legitimate functions, it became necessary in various localities during the year to employ a considerable portion of regular troops. The duty was discharged promptly, courageously and with marked discretion by the officers and men, and the most gratifying proof was thus afforded

that the army deserves that complete confidence in its efficacy and discipline which the country has at all times manifested.

The year has been free from disturbances by Indians, and the chances of further depredations on their part are constantly becoming more remote and improbable.

The total expenditure for the war department for the year ended June 30, 1894, amounted to \$56,139,009.24. Of this sum \$2,006,614.99 was for salaries and contingent expenses; \$23,655,156.18 for the support of the military establishment; \$5,001,882.23 for miscellaneous objects, and \$25,571,555.94 for public works. This latter sum includes \$19,494,057.49 for river and harbor improvements and \$3,947,863.56 for fortifications and other works of defense. The appropriations for the current year aggregate \$52,429,112.78, and the estimates submitted by the secretary of war for the next fiscal year call for appropriations amounting to \$52,518,225.

The skill and industry of our ordnance officers and inventors have, it is believed, overcome the mechanical obstacles which have heretofore delayed the armament of our coasts, and this great national undertaking upon which we have entered may now proceed as rapidly as congress shall determine. With a supply of finished guns of large caliber already on hand, to which additions should now rapidly follow, the wisdom of providing carriages and emplacements for their mount cannot be too strongly urged.

The total enrollment of the militia of the several states is 17,533 officers and enlisted men, an increase of 5,343 over the number reported at the close of the previous year. The reports of inspections by regular army officers show a marked increase in interest and efficiency among the state organizations, and I strongly recommend a continuance of the policy of a congress shall determine. With a supply of finished guns of large caliber already on hand, to which additions should now rapidly follow, the wisdom of providing carriages and emplacements for their mount cannot be too strongly urged.

The condition of the Apache Indians held as prisoners by the government for eight years at a cost of \$500,000 has been changed during the year from captivity to one which gives them an opportunity to demonstrate their capacity for self-support and at least partial civilization. Legislation enacted at the late session of congress gave the war department authority to transfer the survivors, numbering 346, from Mount Vernon barracks, in Alabama, to any suitable reservation. The department selected as their future home the military lands near Fort Sill, I. T. where, under military surveillance, the former prisoners have been established in agriculture under conditions favorable to their advancement.

In recognition of the long and distinguished military services and faithful discharge of delicate and responsible civil duties by Maj.-Gen. John M. Schofield, now the general commanding the army, it is suggested to congress that the temporary revival of the grade of lieutenant general in his behalf would be a just and gracious act, and would permit his retirement, now near at hand, with rank befitting his merits.

LEGAL PROCEEDINGS.

The report of the attorney-general notes the gratifying progress made by the supreme court in overcoming the arrears of its business and in reaching a condition in which it will be able to dispose of cases as they arise without any unreasonable delay. The result is, of course, very largely due to the successful workings of the plan inaugurating circuit courts of appeal. In respect to these tribunals the suggestion is made in quarters entitled to the highest consideration that an additional circuit judge for each circuit would

greatly strengthen these courts and the confidence reposed in their adjudications, and that such an addition would not create a greater force of judges than the increasing business of such courts requires. I commend the suggestion to the careful consideration of the congress.

Other important topics are adverted to in the report, accompanied by recommendations, many of which have been treated at large in previous messages, and at this time, therefore, need only be named. I refer to the abolition of the fee system as a measure of compensation to federal officers; the enlargement of the powers of United States commissioners, at least in the territories; the allowance of writs of error in criminal cases on behalf of the United States, and the establishment of degrees in the crime of murder. A topic dealt with by the attorney-general of much importance is the condition of the administration of justice in the Indian territory. The permanent solution of what is called the Indian problem is probably not to be expected at once, but meanwhile such ameliorations of present conditions as the existing system will admit of ought not to be neglected. I am satisfied there should be a federal court established for the territory with sufficient judges, and that this court should sit within the territory and have the same jurisdiction as to territorial affairs as is now vested in the federal courts sitting in Arkansas and Texas.

UNION PACIFIC RAILWAY.

Another subject of pressing moment referred to by the attorney-general is the reorganization of the Union Pacific railway company on a basis equitable as regards all private interests and as favorable to the government as existing conditions will permit. The operation of a railroad by a court through a receiver is an anomalous state of things which should be terminated on all grounds, public and private, at the earliest possible moment. Besides, not to enact the laws enabling legislation at the present session postpones the whole matter until the assembling of a new congress, and inevitably increases all the complications of the situation and could not but be regarded as a signal failure to solve a problem which has practically been before the present congress ever since its organization.

Eight years ago, in my annual message, I urged upon the congress as strongly as I could the location and construction of two prisons for the confinement of United States prisoners. A similar recommendation has been made from time to time since, and a few years ago a law was passed providing for the selection of sites for three such institutions. No appropriation has, however, been made to carry the act into effect, and the old and discreditable condition still exists. It is not my purpose at this time to repeat the considerations which make an impregnable case in favor of the ownership and management by the government of the penal institutions in which federal prisoners are confined. I simply desire to again urge my former recommendations on the subject and to particularly call the attention of the congress to that part of the report of the secretary of war in which he states that the military prison at Fort Leavenworth, Kas., can be turned over to the government as a prison for federal convicts without the least difficulty and with an actual saving of money from every point of view. Fending a more complete reform I hope that by the adoption of the measures of the secretary of war this easy step may be taken in the direction of the proper care of its convicts by the government of the United States.

BUSINESS OF THE POSTAL DEPARTMENT.

The report of the postmaster-general presents a comprehensive statement of the operations of the postoffice department for the fiscal year. The receipts of the department during the year amounted to \$75,080,479.01 and the expenditures to \$64,324,414.15. The transactions of the postal service indicate with barometric certainty the fluctuations in the business of the country. Inasmuch, therefore, as business complications continue to exist throughout the last year to an unforeseen extent it is not surprising that the deficiency of the revenue to meet the expenditures of the postoffice department, which was estimated in advance at about \$8,000,000, should be exceeded by nearly \$1,250,000. The ascertained revenues of the last year, which were the basis of calculation for the current year, being less than estimated, the deficiency for the current year will be correspondingly greater, though the postmaster states that the latest indications are so favorable that he confidently predicts an increase of at least 8 per cent in the revenues of the current year over those of the last year. The expenditures increase steadily and necessarily with the growth and needs of the country, so that the deficiency is greater or less in any year depending upon the volume of receipts.

The postmaster-general states that this deficiency is unnecessary and might be obviated at once if the law regulating rates upon mail matter of the second class was modified. The rate received for the transmission of this second-class matter is 1 cent per pound, while the cost of such transmission to the government is eight times that amount. In the general terms of the law the rates covering newspapers and periodicals are the extensions of the meaning of the terms from time to time have admitted to the privilege intended for legitimate newspapers and periodicals a surprising range of publications, and created abuses the cost of which amount in the aggregate to the total deficiency of the postal department. Pretended newspapers are started by business houses for the mere purpose of advertising goods, complying with the law in form only and discontinuing the publication as soon as the period of advertising is over. "Sample copies" of pretended newspapers are issued in great numbers for a like purpose only. The result is a great loss of revenue to the government, besides its humiliating use as an agency to aid in carrying out the scheme of a business house to advertise its goods by means of a trick upon both its rival houses and the regular and legitimate newspapers. Paper-covered literature, consisting mainly of trashy novels, to the extent of many thousands of tons, is sent through the mails at 1 cent per pound, while the publishers of standard works are required to pay eight times that amount in sending their publications. Another abuse consists in the free carriage through the mails of all legitimate newspapers and periodical magazines might be properly transmitted through the mails to their subscribers free of cost. I invite your prompt consideration of this subject, and fully indorse the views of the postmaster-general.

The total number of postoffices in the United States on the 30th day of June, 1894, was 69,805 an increase of 1,408 over the preceding year. Of these 3,428 were presidential, an increase in that class of sixty-eight over

the preceding year. Six hundred and ten cities and towns are provided with free delivery. Ninety-three other cities and towns are entitled to this service under the law have not been accorded it on account of insufficient funds. The expense of free delivery for the current fiscal year will be more than \$12,300,000, and under existing legislation this item of expenditure is subject to constant increase. The estimated cost of free delivery generally is so very large that it ought not to be considered in the present condition of affairs.

During the year 830 additional domestic money-order offices were established. The total number of these offices at the close of the year was 19,264. There were 14,304 money orders issued during the year, being an increase over the preceding year of 934,308. The value of these orders amounted to \$138,733,579.49, an increase of \$11,217,145.84. There were also issued during the year postal notes amounting to \$12,648,094.55.

During the year 218 international money-order offices were added to those already established, making a total of 2,625 such offices in operation June 30, 1894. The number of international money orders issued during the year was 917,823, a decrease in number of 138,176, and their value was \$13,762,455.31, a decrease in amount of \$2,649,338. The number of orders paid was 361,180, an increase over the preceding year of 60,263, and their value was \$6,568,493.78, an increase of \$1,284,118.03.

From the foregoing statements it appears that the total issue of money orders and postal notes for the year amounted to \$165,235,129.85. The number of letters and packages mailed during the year for special delivery was 3,438,900. The special-delivery stamps used on these letters and packages amounted to \$343,637. The messengers' fees paid for their delivery amounted to \$261,209.70, leaving a balance in favor of the government of \$2,827.30.

The report shows most gratifying results in the reduction of economies working to the effecting the efficiency of the postal service. These consist in the abrogation of steamship subsidy contracts, reletting of mail transportation contracts and in the cost and amount of supplies used in the service, amounting in all to \$16,619,047.42.

This report also contains a valuable contribution to the history of the universal postal union, an arrangement which amounts practically to the establishment of one postal system for the entire civilized world. Special attention is directed to this subject at this time, in view of the fact that the next congress of the union will meet in Washington, 1897, and it is hoped that timely action will be taken in the direction of perfecting preparations for that event.

The postmaster-general renews the suggestion made in a previous report that the department organization be increased to the extent of creating a direct division of all postal affairs, and in this suggestion I fully concur.

There are now connected with the post-office establishment 32,661 employees who are in the classified service. This includes many who have been classified upon the suggestion of the postmaster-general. He states that another year's experience at the head of the department serves only to strengthen the conviction as to the excellent working of the civil-service law in this branch of the public service.

Attention has been called to the report of the secretary of the navy, which shows very gratifying progress in the construction of ships for our new navy. All the vessels now building including the three torpedo boats authorized at the last session of congress, and

excepting the first-class battleship Iowa, will probably be completed during the coming fiscal year. The estimates for the increase of the navy for the year ending June 30, 1896, are large, but they include practically the entire sum necessary to complete and equip all the new ships not now in commission, so that unless new ships are authorized the appropriations for naval service for the fiscal year ending June 30, 1897, should fall below the estimates for the coming year by at least \$12,000,000.

THE NAVY

The secretary presents with much earnestness a plea for the authorization of three additional battleships and ten or twelve torpedo boats. While the unarmored vessels heretofore authorized, including those now nearing completion, will constitute a fleet which, it is believed, is sufficient for ordinary cruising purposes in time of peace, we have now completed and in process of construction but four battleships and but few torpedo boats. If we are to have a navy for warlike operations, offensive and defensive, we certainly ought to increase both the numbers of battleships and torpedo boats. The manufacture of armor requires expensive plans and the aggregation of many skilled workmen. All the armor necessary to complete the vessels now building will be delivered before June 1 next. If no new contracts are given out contractors must disband their workmen and their plants must lie idle. Battleships authorized at this time would not be well under way until late in the coming fiscal year, and at least three years and a half from the date of the contract would be required for their completion. The secretary states that not more than 15 per cent of the cost of such ships need be included in the appropriation for the coming year. I recommend that provision be made for the construction of additional battleships and torpedo boats.

The secretary recommends the manufacture not only of reserve supply of ordnance and ordnance material for ships of the navy, but also a supply for the auxiliary fleet. Guns and their appurtenances should be provided and kept on hand for both these purposes. We have not to-day a single gun that could be put upon the ship Paris or New York of the International Navigation company or any other ship of our reserve navy. The manufacture of guns at the Washington navy yard is proceeding satisfactorily and none of our new ships will be required to wait for their guns or ordnance equipment.

An important order has been issued by the secretary of the navy co-ordinating the duties of the several bureaus concerned in the construction of ships. This order, it is believed, will secure to the navy more efficiency than has heretofore been possible the harmonious action of these several bureaus and make the attainment of the best results more certain.

During the past fiscal year there has been an unusual and pressing demand in many quarters of the world for the presence of vessels to guard American interests. In January last, during the Brazilian insurrection, a large fleet was concentrated in the harbor of Rio de Janeiro. The vigorous action of Rear-Admiral Benham in protecting the commercial and personal rights of our citizens during the disturbed conditions afforded results which will, it is believed, have a far-reaching and wholesome influence whenever in like circumstances it may become necessary for our naval commanders to interfere on behalf of our people in foreign ports. The war now in progress between China and Japan has rendered it necessary or expedient to dispatch eight vessels to those waters.

COAST SURVEY WORK.

Both the secretary of the navy and the secretary of the treasury recommend the transfer of the work of the coast survey proper to the navy department. I heartily concur in this recommendation. Excluding Alaska and a very small area besides, all the work of mapping and charting our coast has been completed. The hydrographic work which must be done over and over again by reason of the shifting and varying depths of water, consequent upon the action of streams and tides, has heretofore been done under the direction of naval officers in subordination to the superintendent of the coast survey. There seems to be no good reason why the navy should not have entire charge hereafter of such work, especially as the hydrographic office of the navy department is now and has been for many years engaged in making efficient maps entirely similar to those prepared by the coast survey.

I feel it my imperative duty to call attention to the recommendation of the secretary in regard to the personnel of the line of the navy. The stagnation of promotion in this, the vital branch of the service, is so great as to seriously impair its efficiency. I consider it of the utmost importance that the young and middle-aged officers should, before the eve of retirement, be permitted to reach a grade entitling them to active and important duty.

The system adopted a few years ago regulating the employment of labor at the navy yards is rigidly upheld and has fully demonstrated its usefulness. It is a system which is within the domain of civil-service reform inasmuch as workmen are employed through a board of labor selected at each navy yard and are given work without reference to politics and in the order of their application, preference, however, being given to army and navy veterans and to those with former navy yard experience. Amendments suggested by experience have been made to the rules regulating the system. Through its operation the work at our navy yards has been vastly improved in efficiency, and the opportunity to work has been honestly and fairly awarded to willing and competent applicants. It is hoped that if this system continues to be strictly adhered to there will soon be as a natural consequence such an equalization of party benefit as will remove all temptation to relax or abandon it.

The report of the secretary of the interior exhibits the situation of the numerous and interesting branches of the public service connected with this department. I commend this report and the valuable recommendations of the secretary to the careful attention of congress. The public land disposed of during the year amounted to 10,468,100.77 acres, including 28,875.05 of Indian lands. It is estimated that the public domain still remaining amounts to a little more than 600,000,000 acres, excluding, however, about 360,000,000 acres in Alaska, as well as military reservations and railroad and other selections of land yet undesignated. The total cash receipts from the sale of lands amounted to \$2,674,326.79, including \$1,981.08 received for sale of Indian lands. Thirty-five thousand patents were issued for agricultural lands and 100 patents were issued to Indians on allotments of their holdings in severalty, the land so allotted being inalienable by the Indian allottees for a period of twenty-five years after patent.

GRANTS OF LANDS.

There were certified and patented on account of railroad and wagon road grants during the year 855,556.46 acres of land, and at the close of the year 28,000,000 acres were em-

braced in the lists of selections made by railroad and wagon road companies and awaited settlement. The selections of swamp lands and that taken as indemnity therefor since the passage of the act providing for the same in 1849 amount to nearly or quite 80,500,000 acres, of which 59,000,000 have been patented to states. About 138,000 acres were patented during the last year. Nearly 820,000 acres of school and education grants were approved during the year, and at its close 1,250,353.81 acres remained unadjusted.

It appears that the appropriation for the current year on account of special service for the protection of the public lands and the timber thereon is much less than those for previous years and inadequate for an efficient performance of the work. A larger sum of money than has been appropriated during a number of years past on this account has been returned to the government as a result of the labors of those employed in the particular service mentioned, and I hope it will not be crippled by insufficient appropriation.

FOREST RESERVES.

I fully indorse the recommendations of the secretary that adequate protection be provided for our forest reserves and that a comprehensive forestry system be inaugurated, such keepers and superintendents as are necessary to protect the forests already reserved should be provided. I am of the opinion that there should be an abandonment of the policy sanctioned by present laws under which the government for a very small consideration is rapidly losing title to immense tracts of land covered with timber which should be properly reserved as permanent sources of timber supply.

The suggestion that a change be made in the manner of securing surveys of the public lands is especially worthy of consideration. I am satisfied that these surveys should be made by a corps of competent surveyors under the immediate control and direction of the commissioner of the general land office.

LITIGATED LAND CASES.

An exceedingly important recommendation of the secretary relates to the manner in which contests and litigated cases growing out of efforts to obtain government land are determined. The entire testimony upon which these controversies depend in all their stages is taken before the local registers and receivers, and yet these officers have no power to subpoena witnesses or to enforce their attendance to testify. These cases, numbering 3,000 or 4,000 annually, are sent by the local officers to the commissioner of the general land office for his action. The exigencies of his other duties oblige him to act upon the decisions of the registers and receivers without the opportunity of thorough personal examination. Nearly 2,000 of these cases are appealed annually from the commissioner to the secretary of the interior. Burdened with other important administrative duties, his determination of these appeals must be almost perfunctory, and he is often aided by a number of others, though this determination of the secretary operates as a final adjudication upon rights of very great importance.

I concur in the opinion that the commissioner of the general land office should be relieved from the duty of deciding litigated land cases, that a permanent court should be created to pass on such cases, and that the decisions of this court should be final, at least so far as the decisions of the department are now final. The proposed court might be given authority to certify questions of law in matters of especial importance to the Supreme court of the United States or the Court of Appeals for the District of Columbia for decision. The creation of such a tribunal would

expedite the disposal of cases and insure decisions of a more satisfactory character. The registers and receivers who originally hear and decide the disputes should be invested with authority to compel witnesses to attend and testify before them.

Though the condition of the Indians shows a steady and healthy progress, their situation is not satisfactory at all points. Some of them to whom allotments of land have been made are found to be unable or disinclined to follow agricultural pursuits and unable to beneficially manage their land. This is especially true of the Cheyennes and Arapahoes, who, as it appears by reports of their agent, have in many instances never been located upon their allotments, and in some cases do not even know where their allotments are. Their condition has deteriorated. They are not self-supporting and they live in camps and spend their time in idleness.

I have always believed that allotments of reservation lands to Indians in severalty should be made sparingly or at least slowly and with the utmost caution. In these days when white agriculturists and stockraisers of experience and intelligence find their lot a hard one we ought not to expect Indians, unless far advanced in civilization and habits of industry, to support themselves on the small tracts of land usually allotted to them. If the self-supporting scheme by allotment fails the wretched pauperism of the allottees which results is worse than their original condition of regulated dependence. It is evident that the evil consequences of ill-advised allotments are intensified in cases where the first step cannot be retraced on account of the purchase by the government of reservation lands remaining after allotments are made and the disposition of such remaining lands to settlers or purchasers from the government.

I am convinced that the proper solution of the Indian problem and the success of every step taken in that direction depend to a very large extent upon the intelligence and honesty of the reservation agents and the interest they have in their work. An agent fitted for his place can do much toward preparing the Indians under his charge for citizenship and allotment of their lands, and his advice as to any matter concerning their welfare will not mislead. An unfit agent will make no effort to advance the Indians on his reservation toward civilization or preparation for allotment of lands in severalty, and his opinion as to their condition in this and other regards is heedless and valueless. The indications are that the detail of army officers as Indian agents will result in improved management on the reservations.

Whenever allotments are made and any Indian on the reservation has previously settled upon a lot and cultivated it, or shown a disposition to improve it in any way, such lot should certainly be allotted to him, and this should be made plainly obligatory by statute. In the light of experience, and considering the uncertainty of the Indian situation from its exigencies in the future, I am not only disposed to be very cautious in making allotments, but I incline to agree with the secretary of the interior in the opinion that when allotments are made the balance of reservation land remaining after allotment, instead of being bought by the government from the Indian and then sold in allotment, with such scandals and unfair practices as seem unavoidable, should remain for a time at least as common land, or be sold by the government on behalf of the Indians in an orderly way and at fixed prices to be determined by its location and desirability, and that the proceeds, less expenses, should be held in trust for the benefit of the Indian proprietors.

SCHOOLS FOR THE INDIANS.

The intelligent Indian-school management of the last year has been followed by the most gratifying results. Efforts have been made to advance the work in a sound and practical manner. Five institutes of Indian teachers have been held during the year and have proved very beneficial through the new exchanges and methods discussed particularly applicable to Indian education. Efforts are being made in the direction of a gradual reduction in the number of Indian contract schools, so that in a comparatively short time they may give way altogether to government schools, and it is hoped that the change may be so gradual as to be perfected without too great expense to the government or undue disregard of investments made by those who have establishments and are maintaining such contract schools.

The appropriation for the current year ending June 30, 1895, applicable to the ordinary expenses of the Indian service amounts to \$1,733,003.18, being less by \$653,240.64 than the sum appropriated on the same account for the previous year.

PENSIONS AND PENSION CLAIMS.

At the close of the last fiscal year, on the 30th day of June, 1894, there were 949,544 persons on our pension rolls, being a net increase of 3,332 over the number reported at the end of the previous year. These pensioners may be classified as follows: Soldiers and sailors, survivors of all wars, 753,938; widows and relatives of deceased soldiers, 215,162; army nurses in the war of the rebellion, 414. Of these pensioners 32,499 are surviving soldiers of Indian and other wars up to the late civil war, and the widows or relatives of such soldiers. The remainder, numbering 937,555, are receiving pensions on account of the war of the rebellion, and of these 469,344 are on the rolls under the authority of the act of June 27, 1890, sometimes called the dependent pension law. The total amount expended for pensions during the year was \$139,904,461.05, leaving an unexpended balance from the sum appropriated of \$25,205,712.05. The sum necessary to meet pension expenditures for the year ending June 30, 1894, is estimated at \$140,000,000.

The commissioner of pensions is of the opinion that the year 1895, being the thirtieth after the close of the war of the rebellion, must, according to all sensible human calculations, see the highest limit of the pension roll, and that after that year it must begin to decline.

The claims pending in the bureau have decreased more than 90,000 during the year. A large proportion of the new claims filed are for increase of pension by those now on the rolls. The number of certificates issued was 80,213. The names dropped from the rolls for all causes during the year numbered 37,551. Among our pensioners are nine widows and three daughters of soldiers of the rebellion and forty-five survivors of the war of 1812.

The barefaced and extensive pension frauds exposed under the direction of the courageous and generous veteran soldier now at the head of the bureau leave no room for the claim that no pretense of pension rule was needed or that continued vigilance and prompt action are not necessary to the same end. The accusation that an effort to detect pension frauds is evidence of unfriendliness toward our worthy veterans and a denial of their claims to the generosity of the government suggests an unfortunate indifference to the commission of an offense which has for motive the securing of a pension and indicates a willingness to be blind to the existence of mean and treacherous crimes which play upon demagogic fears and make sport of the patriotic impulse of a grateful people.

ANALYSIS OF CENSUS STATISTICS.

The completion of the eleventh census is now in charge of the commissioner of labor. The total disbursements on account of the work for the fiscal year ended June 30, 1894, amounted to \$10,353,575.81. At the close of the year the number of persons employed in the census office was 679. At present there are about four hundred. The whole number of volumes necessary to comprehend the eleventh census will be twenty-five, and they will contain 22,270 printed pages. The assurance is confidently made that before the close of the present calendar year the material still incomplete will be practically in hand and the census can certainly be closed by the 4th of March, 1895. After that the revision and proofreading necessary to bring out the volumes will still be required.

The text of the census volumes has been limited as far as possible, to the analysis of the statistics presented. This method, which is in accordance with the desire of the public for less friction, and in some instances individual disappointment, for when the commissioner of labor took charge of the work he found much matter on hand which, according to this rule, he was compelled to discard. The census is being prepared according to the theory that it is designed to collect and certify them to the public—not to elaborate arguments or to present personal views.

AGRICULTURAL MATTERS.

The secretary of agriculture in his report reviews the operations of his department for the last fiscal year, and makes recommendations for the further extension of the war business. He reports a saving in expenditures during the year of \$600,000, which is covered back into the treasury. This sum is 23 per cent of the entire appropriation.

A special study has been made of the demand for American farm products in all foreign markets, especially in Europe. The country received from the United States during the nine months ended Sept. 30, 1894, 305,910 live beef cattle, valued at \$25,500,000, as against 182,611 cattle, valued at \$15,634,000, during the same period of 1893. During the first six months of 1894 the United Kingdom took also 112,000 pounds of dressed beef from the United States, valued at nearly \$10,000,000. The report shows that during the nine months immediately preceding Sept. 30, 1894, the United States exported to Great Britain 222,676,000 pounds of pork; of apples, 1,800,000 barrels, valued at \$2,500,000; and of horses, 2,811, at an average value of \$130 per head. There was a falling off in American wheat exports of 13,500,000 bushels, and the secretary is inclined to believe that wheat may not, in the future, be the staple export cereal product of our country, but that corn will continue to advance in importance as an export on account of the new uses to which it is constantly being appropriated. The exports of agricultural products from the United States for the fiscal year ended June 30, 1894, amounted to \$628,363,038, being 72.28 per cent of American exports of every description, and the United Kingdom took more than 54 per cent of all farm products finding foreign markets.

The department of agriculture has undertaken during the year two new and important lines of research. The first relates to grasses and forage plants, with the purpose of instructing and familiarizing the people as to the distinctive grasses of the United States and teaching them how to introduce valuable foreign forage plants which may be adapted to this country. The second relates to agricultural soils and crop production, involving the analyses of samples of soils from all sections of the American union, to demonstrate

their adaptability to particular plants and crops. Mechanical analyses of soils may be of such inestimable utility that it is foremost in the new line of agricultural research, and the secretary therefore recommends that a division having it in charge be permanently established in the department.

The amount appropriated for the weather bureau was \$851,100. Of that sum \$138,500, or 11 per cent, has been saved and returned to the treasury. As a result of the usefulness of this service it may be here stated that the warnings which were very generally given of two tropical storms occurring in September and October of the present year, resulted in detaining safely in port 2,35 vessels, valued at \$36,383,513, laden with cargoes of probably still greater value. What is much more important and gratifying, many human lives on these ships were also undoubtedly saved.

THE MEAT INDUSTRY.

The appropriation to the bureau of animal industry was \$560,000, and the expenditures for the year were only \$493,429.24, thus leaving unexpended \$66,570.76. The inspection of beef animals for export and interstate trade has been continued and 12,941,056 head were inspected during the year at a cost of 1 1/4 cents per head, against 1 1/2 cents for 1893. The amount of pork microscopically examined was 35,437,367 pounds, against 20,677,410 pounds in the preceding year. The cost of this inspection has been diminished from 8 1/2 cents per head in 1893 to 6 1/2 cents in 1894. The expense of inspecting the pork sold in 1891 to Germany and France by the United States was \$88,322.10. The quality inspected was greater by 15,000,000 pounds than during the preceding year, when the cost of such inspection was \$12,367,685. The secretary of agriculture recommends that the law providing for the microscopic inspection of export and interstate meat be so amended as to compel owners of the meat inspected to pay the cost of such inspection, and call attention to the arguments presented in his report in support of this recommendation.

The live animals exported and tagged during the year numbered 363,535. This is an increase of 69,533 head over the previous year. The sanitary inspection of cattle shipped to Europe has cost an average of 10 1/4 cents for each animal and the cost of inspecting southern cattle and the disinfection of cars and stockyards average 2.7 cents per animal.

The scientific inquiries of the bureau of animal industry have progressed steadily during the year. Much tuberculin and mallein have been furnished to state authorities for use in the agricultural colleges and experiment stations for the treatment of tuberculosis and its sequelae. Quite recently this department has published the results of its investigations of bovine tuberculosis, and its researches will be vigorously continued. Certain herds in the District of Columbia will be thoroughly inspected and will probably supply adequate scope for the department to intelligently prosecute its scientific work and furnish sufficient material for purposes of illustration, description and definition. The sterilization of milk suspected of containing the bacilli of tuberculosis has been during the year very thoroughly explained in a leaflet by Dr. D. E. Salmon, the chief of the bureau, and given general circulation throughout the country.

The office of experiment stations, which is a part of the United States department of agriculture, has during the past year engaged itself almost wholly in preparing for publication works based upon the reports of agricultural experiment stations and other institutions for agricultural inquiry in the United States and foreign countries. The secretary

in his report for 1893 called attention to the fact that the appropriations made for the support of the experiment stations throughout the union were the only moneys taken out of the national treasury by act of congress for which no accounting to federal authorities was required. Responding to this suggestion, the 11st congress, in making the appropriation for the department for the fiscal year, provided that:

"The secretary of agriculture shall prescribe the form of annual financial statement required by section 3 of said act of March 2, 1887; shall ascertain whether the expenditures under the appropriation hereby made are in accordance with the provisions of said act, and shall make report thereon to congress." The best service of the statistician of the department of agriculture is the ascertainment, by diligence and care, of the actual and real conditions, favorable or unfavorable, of the farmers and farms of the country and to see the causes which produce these conditions, to the end that the facts ascertained may guide their intelligent conduct, in obedience to this law the agriculture department immediately sent out blank forms of expense accounts to each station and proposes in addition to make, through trusted experts, systematic examination of the several stations during each year for the purpose of acquiring by personal investigation the detailed information necessary to enable the secretary of agriculture to make, as the statute provides, a satisfactory report to congress. The boards of management of the several stations, with great alacrity and cordiality, have approved the amendment to the law providing for this supervision of their expenditures, anticipating that it will increase the efficiency of the stations and protect their directors and managers from loose charges concerning their use of public funds, besides bringing the department of agriculture into closer and more confidential relations with the experiment stations, and through their joint service largely increasing their usefulness to the agriculture of the country.

PURE FOOD ENCOURAGED.

Acting upon a recommendation contained in the report of 1893, congress appropriated \$10,000 "to enable the secretary of agriculture to investigate and report upon the nutritive value of various articles and commodities used for human food, with special suggestions of full, wholesome and edible rations less wasteful and more economical than those in common use." Under this appropriation the department has prepared and now has nearly ready for distribution an elementary discussion of the nutritive value and pecuniary economy of foods, and has estimated that fully one-half of all the money earned by the wage-earners of the civilized world is expended by them for food, the importance and utility of such investigation is apparent.

The department expended in the fiscal year 1894 \$2,454,839.56, and out of that sum the total amount of its expenditure in scientific work was 45.6 per cent. But in the year ended June 30, 1894, out of a total expenditure of \$1,948,883.88 the department applied 51.8 per cent of that sum to scientific work and investigation. It is, therefore, very plainly observable that the economies which have been practiced in the administration of the department have not been at the expense of scientific research.

The recommendation contained in the report of the secretary for 1893 that the vicious system of promiscuous free distribution of its departmental documents be abandoned is again urged. These publications may well be distributed without cost without cost without cost to educational institutions and the officers libraries of states and of the federal government.

ment, but from all individuals applying for them a price covering the cost of the document asked for should be required. Thus the publications and documents would be secured by those who really desire them for proper purposes. Half a million of copies of the report of the secretary of agriculture are printed for distribution at an annual cost of about \$300,000. Large numbers of them are cumbering storerooms at the capitol, and the shelves of second-hand bookstores throughout the country. All this labor and waste might be avoided if the recommendations of the secretary were adopted.

The secretary also again recommends that the gratuitous distribution of seeds cease and that no money be appropriated for that purpose except to experiment stations. He reiterates the reasons given in his report for 1893 for discontinuing this unjustifiable gratuity and I fully concur in the conclusions which he has reached.

A further important utility in agricultural statistics is found in their elucidation of the relation of the supply of farm products to the demand for them in the markets of the United States and of the world.

It is deemed possible that an agricultural census may be taken each year through the agents of the statistical division of the department. Such a course is commended for trial by the chief of that division. Its scope would be:

1. The area under each of the more important crops.
2. The aggregate products of each of such crops.
3. The quantity of wheat and corn in the hands of farmers at a date after the spring sowings and plantings, and before the beginning of harvest; and also the quantity of cotton and tobacco remaining in the hands of planters, either at the same date or at some other designated time.

The cost of the work is estimated at \$500,000. Owing to the peculiar quality of the statistician's work, and the natural and acquired fitness necessary to its successful prosecution, the secretary of agriculture expresses the opinion that every person employed in gathering statistics under the chief of that division should be admitted to that service only after a thorough, exhaustive and successful examination at the hands of the United States civil service-commission. This has led him to call for such examination of candidates for the position of assistant statisticians, and also of candidates for chiefs of sections in that division.

The work done by the department of agriculture is superficially dealt with in this communication, and I commend the work of the secretary and the very important interests with which it deals to the careful attention of congress.

CIVIL SERVICE REFORM.

The advantages to the public service of an adherence to the principles of civil-service reform are constantly more apparent, and nothing is so encouraging to those in official life who honestly desire good government as the increasing appreciation by our people of these advantages. A vast majority of the voters of the land are ready to insist that the time and attention of those they select to perform for them important public duties should not be distracted by doing out minor offices, and they are growing to be unanimous in regarding party organization as something that should be used in establishing party principles instead of dictating the distribution of public places as rewards of partisan activity.

Numerous additional offices and places have lately been brought within civil-service rules

and regulations, and some others will probably soon be included. The report of the commissioners will be submitted to congress, and I invite careful attention to the recommendations it contains.

NATIONAL BOARD OF HEALTH.

I am entirely convinced that we ought not to be longer without a national board of health or national health officer charged with no other duties than such as pertain to the protection of our country from the invasion of pestilence and disease. This would involve the establishment by such board or officer of proper quarantine precautions or the necessary aid and counsel to local authorities on the subject, prompt advice and assistance to local boards of health or health officers in the suppression of contagious diseases, and in cases where there are no such local boards or officers the immediate direction by the national board or officer of measures of suppression, constant and authentic information concerning the health of foreign countries and all parts of our own country, as related to contagious diseases, and the enforcement of regulations to be enforced in foreign ports to prevent the introduction of contagion into our cities and the measures which should be adopted to secure their enforcement.

There seems to be at this time a decided inclination to discuss measures of protection against contagious diseases in international conference with a view to adopting means of mutual assistance. The creation of such a national health establishment would greatly aid our standing in such conferences and improve our opportunities to avail ourselves of their benefits. I earnestly recommend the inauguration of a national board of health, similar national instrumentality, believing the same to be a needed precaution against contagious disease and in the interest of the safety and health of our people.

THE STRIKE COMMISSION.

By virtue of a statute of the United States passed in 1881 appointed in July last John D. Kernan of the state of New York, and Nicholas E. Worthington, of the state of Illinois, to form with Carroll D. Wright, commissioner of labor, who was designated by said statute, a commission for the purpose of making inquiry into the causes of the controversies between certain railroads and their employees, which had resulted in an extensive and destructive strike, accompanied by much violence and dangerous disturbance, with considerable loss of life and great destruction of property. The report of the commissioners has been submitted to me and will be transmitted to the congress with the evidence taken upon their investigation. Their work has been well done, and their standing and intelligence give assurance that the report and suggestions they make are worthy of careful consideration.

TARIFF BILL SHOULD BE AMENDED.

The tariff act passed at the last session of congress needs important amendments if it is to be executed effectively and with certainty. In addition to such necessary amendments as will not change rates of duty, I am still very decidedly in favor of putting coal and iron upon the free list. So far as the sugar schedule is concerned I would be glad, under existing aggravations, to see every particle of differential duty in favor of refined sugar stricken out of our tariff law. If, with all the favors now accorded the sugar-refining interests in our tariff laws, it still languishes to the extent of closing refineries and thousands of discharged workmen, it would seem to present a hopeless case for reasonable legislative aid. Whatever else is done or omitted I earnestly

repeat here the recommendation I have made in another portion of this communication, that the additional duty of one-tenth of a cent per pound laid upon sugar imported from countries paying a bounty on its export be abrogated. It seems to me that exceedingly important considerations point to the propriety of this amendment.

OUR MERCHANT MARINE.

With the advent of a new tariff policy, not only calculated to relieve the consumers of our land in the cost of their daily life, but invite a better development of American thrift and create for us closer and more profitable commercial relations with the rest of the world, it follows as a logical and imperative necessity that we should at once remove the chief, if not the only, obstacle which has so long prevented our participation in the foreign-carrying trade of the sea. A tariff built upon the theory that it is well to check imports, and that a home market should bound the industry and effort of American producers, was fitly supplemented by a refusal to allow American registry to vessels built abroad, though owned and navigated by our people, thus exhibiting a willingness to abandon all contest for the advantages of American transoceanic carriage. Our new tariff policy, built upon the theory that it is well to encourage such importations as our people need and that our products and manufactures should find markets in every part of the habitable globe, is consistently supplemented by the greatest possible liberty to our citizens in the ownership and navigation of ships in which our products and manufactures may be transported. The millions now paid to foreigners for carrying American passengers and products across the sea should be turned into American hands. Shipbuilding, which has been protected to stranguation, should be revived by the prospect of profitable employment for ships when built, and the American sailor should be resurrected and again take his place—a sturdy and industrious citizen in time of peace and a patriotic and safe defender of American interests in the day of conflict.

The ancient provision in our law denying American registry to ships built abroad and owned by Americans appears, in the light of present conditions, not only to be a failure for good at every point, but to be nearer a relic of barbarism than anything that exists under the permission of a statute of the United States. I earnestly recommend its prompt repeal.

WHY BONDS WERE NECESSARY.

During the last month the gold reserve in the treasury for the purpose of redeeming the notes of the government circulating now in the hands of the people became so reduced, and its further depletion in the near future seemed so certain, that in the exercise of proper care for the public welfare it became necessary to replenish the reserve and thus maintain popular faith in the ability and determination of the government to meet, as agreed, its pecuniary obligations. It would have been well if in this emergency authority had existed to issue the bonds of the government bearing a low rate of interest and maturing within a short period, but the congress having failed to confer such authority, resort was necessarily had to the resumption act of 1875, and pursuant to its provisions bonds were issued drawing interest at the rate of 5 per cent per annum, and maturing in three years after their issue, that being the shortest time authorized by the act. I am glad to say, however, that on the sale of these bonds the premium received operated to reduce the rate of

interest to be paid by the government to less than 3 per cent.

Nothing could be worse or further removed from sensible finance than the relations existing between the currency the government has issued, the gold held for its redemption and the means which must be resorted to for the purpose of replenishing such redemption fund when impaired. Even if the claims upon this fund were confined to the obligations originally intended and if the redemption of these obligations meant their cancellation the fund would be very small. But these obligations, when received and redeemed in gold, are not canceled, but are released and may do duty many times by way of drawing gold from the treasury. Thus we have an endless chain in operation constantly depleting the treasury's gold and never near a final rest.

As if this was not bad enough, we have, by a statutory declaration that it is the policy of the government to maintain the parity between gold and silver, aided the force and momentum of this exhausting process, and added largely to the currency obligations claiming this peculiar gold redemption. Our small gold reserve is thus subject to drain from every side. The demands that increase our danger also increase the necessity of protecting this reserve against depletion, and it is most unsatisfactory to know that the protection afforded is only a temporary palliation. It is perfectly and palpably plain that the only way under present conditions by which this reserve, when dangerously depleted, can be replenished is by the issue and sale of the bonds of the government for gold; and yet congress has not only thus far declined to authorize the issue of bonds best suited to such a purpose, but there seems a disposition in some quarters to deny both the necessity and the power for the issue of bonds at all.

I cannot for a moment believe that any of our citizens are deliberately willing that their government should default in its pecuniary obligations or that its financial operations should be reduced to a silver basis. At any rate, I should not feel that my duty was done if I omitted any effort I could make to avert such a calamity. As long, therefore, as no provision is made for the final redemption or the putting aside of the currency obligation now used to repeatedly and constantly draw from the government its gold, and as long as no better authority for bond issues is allowed than at present exists, such authority will be utilized whenever and as often as it becomes necessary to maintain a sufficient gold reserve and in abundant time to save the credit of our country and make good the financial declarations of our government.

CURRENCY REFORM NECESSARY.

Questions relating to our banks and currency are closely connected with the subject just referred to, and they also present some important features. Prominent among them are the lack of elasticity in our currency circulation, and its frequent concentration in financial centers when it is most needed in other parts of the country. The absolute divorce of the government from the business of banking is the real cause of this condition, and presents in his report a scheme modifying present banking laws and providing for the issue of circulating notes by state banks free from taxation under certain limitations.

The secretary explains his plan so plainly and its advantages are developed by him with such remarkable clearness that any effort on my part to present argument in its support would be superfluous. I shall therefore content myself with an unqualified indorsement of the secretary's proposed changes in the law, and a few remarks on the imperfect statement of their prominent features.

NATIONAL AND STATE BANKS.

It is proposed to repeal all laws providing for the deposit of United States bonds as security for circulation; to permit national banks to issue circulating notes not exceeding in amount 75 per cent of their paid-up and unimpaired capital, provided they deposit with the government as a guaranty fund, in United States legal-tender notes, including treasury notes of 1890, a sum equal in amount to 30 per cent of the notes they desire to issue, this deposit to be maintained at all times, but whenever any bank reserves any part of its circulation a proportional part of its guaranty fund shall be returned to it to permit the secretary of the treasury to prepare and keep on hand and ready for issue in case an increase in circulation is desired blank national bank notes for each bank having circulation, and to repeal the provisions of the present law imposing limitations and restrictions upon banks desiring to reduce or increase their circulation—thus permitting such increase or reduction within the limit of 75 per cent of capital to be quickly made as emergencies arise.

In addition to the guaranty fund required it is proposed to establish a safety fund for the immediate redemption of the circulating notes of failed banks by imposing a small annual tax, say one-half of 1 per cent, upon the average circulation of each bank until the fund amounts to 5 per cent of the total circulation outstanding. When a bank fails its guaranty fund is to be retained and the safety fund and its notes are to be redeemed in the first instance from such safety fund thus augmented—any impairment of such fund caused thereby to be made good from the immediately available cash assets of said bank, and if these should be insufficient such impairment to be made good by pro rata assessment among the other banks, their contributions constituting a first lien upon the assets of the failed bank in favor of the contributing banks.

As a further security it is contemplated that the existing provision fixing the individual liability of stockholders to be retained and the bank's indebtedness on account of its circulating notes is to be made a first lien on all its assets.

For the purpose of meeting the expense of printing notes, official supervision, cancellation and other like charges there shall be paid a tax say one-half of 1 per cent per annum on the average amount of notes in circulation.

It is further provided that there shall be no national bank notes issued of less denomination than \$10; that each national bank, except in case of a failed bank, shall redeem or retire its notes in the first instance at its own office or at an agent there designated by it, and that no free reserve need be maintained on account of deposits.

Another very important feature of this plan is the exemption of state banks from taxation by the United States in cash where it is shown to the satisfaction of the secretary of the treasury and comptroller of the currency by banks claiming such exemption that they have not had outstanding their circulating notes exceeding 75 per cent of their paid-up and unimpaired capital; that their stockholders are individually liable for the redemption of their circulating notes to the full extent of

their ownership of stock; that the liability of said banks upon their circulating notes constitutes under their state law a first lien upon their assets; that such banks have kept and maintained a guaranty fund in United States legal-tender notes, including treasury notes of 1890, equal to 30 per cent of their outstanding circulating notes, and that such banks have promptly redeemed their circulating notes when presented at their principal or branch offices.

It is quite likely that this scheme may be usefully amended in some of its details, but I am satisfied it furnishes a basis for a very great improvement in our present banking and currency system.

I conclude this communication fully appreciating that the responsibility for all legislation affecting the people of the United States rests upon their representatives in the congress, and assuring them that, whether in accordance with recommendation here made or not, I shall be glad to co-operate in perfecting any legislation that tends to the prosperity and welfare of our country.

GROVER CLEVELAND.

Executive Mansion, Dec. 3, 1894.

VETO OF THE SEIGNIORAGE BILL.

To the House of Representatives:—I return without my approval house bill numbered 4586, entitled "an act directing the coinage of the silver bullion held in the treasury and for other purposes."

My strong desire to avoid disagreement with those in both houses of congress who have supported this bill would lead me to approve it if I could believe that the public good would not be thereby endangered and that such action on my part would be a proper discharge of official duty. Inasmuch, however, as I am unable to satisfy myself that the proposed legislation is either wise or opportune, my conception of the obligations and responsibilities attached to the great office I hold forbids the indulgence of my personal desire and inexorably confines me to that course which is dictated by my reason and judgment and pointed out by a sincere purpose to protect and promote the general interests of our people.

The financial disturbance which swept over the country during the last year was unparalleled in its severity and disastrous consequences. There seemed to be almost an entire displacement of faith in our financial ability and a loss of confidence in our fiscal policy. Among those who attempted to assign causes for our distress it was very generally conceded that the operation of a provision of law then in force which required the government to purchase monthly a large amount of silver bullion and issue its notes in payment therefor was either entirely or to a large extent responsible for our condition. This led to the repeal on the 1st day of November, 1893, of this statutory provision. We had, however, fallen so low in the depths of depression and timidity, apprehension had been so completely gained control in financial circles that our rapid recuperation could not be reasonably expected. Our recovery has, nevertheless steadily progressed, and though less than five months have elapsed since the repeal of the mischievous silver-purchase requirement, a wholesome improvement is unmistakably apparent. Confidence in our absolute solvency is to such an extent reinstated and faith in our disposition to adhere to sound financial methods is so far restored as to produce the most encouraging results both at home and abroad.

The wheels of domestic industry have been slowly set in motion and the tide of foreign investment has again started in our direction. Our recovery being so well under way, nothing should be done to check our convalescence nor should we forget that a relapse at this time would almost surely reduce us to a lower stage of financial distress than that from which we are just emerging.

WOULD BE A BACKWARD STEP.

I believe that if the bill under consideration should become a law it would be regarded as a retrogression from the financial intentions indulged by our recent repeal of the provision forcing silver bullion purchases; that it would weaken, if it did not destroy, returning faith and confidence in our sound financial tendencies, and that as a consequence our progress to renewed business health would be unfortunately checked and a return to our recent distressing plight seriously threatened.

This proposed legislation is so related to the currency conditions growing out of the law compelling the purchase of silver by the government that, a glance at such conditions and a partial review of the law referred to may not be unprofitable. Between the 14th day of August, 1890, when the law became operative, and the 1st day of November, 1893, when the clause it contained directing the purchase of silver was repealed, there were purchased by the secretary of the treasury more than 168,000,000 ounces of silver bullion. In payment for this bullion the government issued its treasury notes of various denominations, amounting to nearly \$156,000,000, which notes were immediately added to the currency in circulation among our people. Such notes were by the law made legal tender in payment of all debts, public and private, except when otherwise expressly stipulated, and were made receivable for customs, taxes and all public dues, and when so received might be reissued. They were also permitted to be held by banking associations as a part of their lawful reserves. On the demand of the holders these treasury notes were to be redeemed in gold or silver coin, in the discretion of the secretary of the treasury; but it was declared as a part of the redemption provision that it was "the established policy of the United States to maintain the two metals on a parity with each other upon the present legal ratio or such ratio as may be provided by law."

REDEMPTION OF TREASURY NOTES.

The money coined from such bullion was to be standard silver dollars, and after directing the immediate coinage of a little less than 28,000,000 ounces the law provided that as much of the remaining bullion should be thereafter coined as might be necessary to provide for the redemption of the treasury notes issued on its purchase, and that "any gain or seigniorage arising from such coinage shall be accounted for and paid into the treasury." This gain or seigniorage evidently indicates so much of the bullion owned by the government as should remain after using a sufficient amount to coin as many standard silver dollars as should equal in number the dollars represented by the treasury notes issued in payment of the entire quantity of bullion. These treasury notes now outstanding and in circulation amount to \$152,561,280, and although there has been thus far but a comparatively small amount of silver bullion coined yet the so-called gain, or seigniorage, as above defined, which would arise from the coinage of the entire mass, has been easily ascertained to be a quantity of bullion sufficient to make when coined 55,156,681 standard silver dollars.

PARITY MUST BE MAINTAINED.

Considering the present intrinsic relation between gold and silver the maintenance of the parity between the two metals, as mentioned in this law, can mean nothing less than the maintenance of such a parity in the estimation and confidence of the people who use our money in their daily transactions. Manifestly, the maintenance of this parity can only be accomplished, so far as it is affected by these treasury notes and in the estimation of the holders of the same, by giving to such holders on their redemption the coin, whether it is gold or silver, which they prefer. It follows that while in terms the law leaves the choice of coin to be paid on such redemption to the discretion of the secretary of the treasury, the exercise of this discretion, if opposed to the demands of the holder, is entirely inconsistent with the effective and beneficial maintenance of the parity between the two metals.

If both gold and silver are to serve as money, and if they together are to supply to our people a safe and stable currency, the necessity of preserving this parity is obvious. Such necessity has been repeatedly conceded in the platforms of both political parties and in our federal statutes. It is nowhere more emphatically recognized than in the recent law which repealed the provision under which the bullion now on hand was purchased. This law insists upon the "maintenance of the parity in value of the coins of the two metals and the equal power of every dollar at all times in the markets and in the payment of debts."

The secretary of the treasury has, therefore, for the best of reasons, not only complied with every demand for the redemption of these treasury notes in gold, but the present situation, as well as the letter and spirit of the law, appear plainly to justify, if they do not enjoin upon him, a continuance of such redemption.

The conditions I have endeavored to present may be thus summarized:

1. The government has purchased and now has on hand sufficient silver bullion to permit the coinage of all the silver dollars necessary to redeem, in such dollars, the treasury notes issued for the purchase of said silver bullion and enough besides to coin, as gain or seigniorage, 55,156,681 additional standard silver dollars.
2. There are outstanding and now in circulation treasury notes issued in payment of the bullion purchased amounting to \$152,561,280. These notes are legal tender in payment of all debts, public and private, except when otherwise expressly stipulated. They are receivable for customs, taxes and all public dues. When held by banking associations they may be counted as part of their lawful reserves and they are redeemed by the government in gold at the option of the holders. These advantageous attributes were deliberately attached to these notes at the time of their issue, they are fully understood by our people to whom such notes have been distributed as currency, and have inspired confidence in their safety and value, and have undoubtedly thus induced their continued and contented use as money instead of anxiety for their redemption.

PURPORT OF THE BILL.

Having referred to some incidents which I deem it relevant to the subject to remain for me to submit a specific statement of my objections to the bill now under consideration. This bill consists of two sections, excluding one which merely appropriates a sum sufficient to carry the act into effect. The first section

provides for the immediate coinage of the silver bullion in the treasury which represents the so-called gain or seigniorage which would arise from the coining of all the bullion on hand, which gain or seigniorage this section declares to be \$55,156,381. It directs that the money so coined, or the certificates issued thereon, shall be used in the payment of public expenditures, and provides that if the needs of the treasury demand it the secretary of the treasury may, in his discretion, issue silver certificates in excess of such coinage not exceeding the amount of seigniorage in said section authorized to be coined.

The second section directs that, as soon as possible after the coinage of this seigniorage the remainder of the bullion held by the government shall be coined into legal-tender standard silver dollars, and that they shall be held in the treasury for the redemption of the treasury notes issued in the purchase of said bullion. It provides that as fast as the bullion shall be coined for the redemption of said notes they shall be reissued, but shall be canceled and destroyed in amounts equal to the coin held at any time in the treasury derived from the coinage provided for, and that silver certificates shall be issued on such coin in the manner now provided by law. It is, however, especially declared in said section that the act shall not be construed to change existing laws relating to the legal-tender character or mode of redemption of the treasury notes issued for the purchase of the silver bullion to be coined.

FIRST SECTION FAULTY.

The entire bill is most unfortunately constructed. Nearly every sentence presents uncertainty and invites controversy as to its meaning and intent. The first section is especially faulty in this respect, and it is extremely doubtful whether its language will permit the consummation of its supposed purposes. I am led to believe that the promoters of the bill intended in this section to provide for the coinage of the bullion constituting the gain or seigniorage, as it is called, into standard silver dollars, and yet there is positively nothing in the section to prevent its coinage into any description of silver coins now authorized under any existing law. I suppose this section was also intended, in case the needs of the treasury called for money faster than the seigniorage bullion could actually be coined, to permit the issue of silver certificates in advance of such coinage; but its language would seem to permit the issuance of such certificates to double the amount of the seigniorage, as stated, one-half of which would not represent an ounce of silver in the treasury. The debates upon this section in the congress developed an earnest and positive difference of opinion as to its object and meaning. In any event I am clear that the present perplexities and embarrassments of the secretary of the treasury ought not to be augmented by devolving upon him the execution of a law so uncertain and confused.

I am not willing, however, to rest my objection to this section solely on these grounds. In my judgment sound finance does not commend a further infusion of silver into our currency and that to be accompanied by further adequate provision for the maintenance in our treasury of a safe gold reserve.

SECOND SECTION UNCERTAIN.

Doubts also arise as to the meaning and construction of the second section of the bill. If the silver dollars therein directed to be coined are, as the section provides, to be held in the treasury for the redemption of treasury notes, it is suggested that, strictly speaking,

certificates cannot be issued on such coin "in the manner now provided by law" because these dollars are money held in the treasury for the express purpose of redeeming treasury notes on demand, which would ordinarily mean that they were set apart for the purpose of substituting them for these treasury notes. They are not, therefore, held in such a way as to furnish a basis for certificates according to any provision of existing law. If, however, silver certificates can properly be issued upon these dollars there is nothing in the section to indicate the characteristics and functions of these certificates. If they were to be of the same character as silver certificates in circulation under existing laws they would at best be receivable only for customs, taxes and all public dues, and under the language of this section it is, to say the least, extremely doubtful whether the certificates it contemplated would be lawfully received even for such purposes.

Whatever else may be said of the uncertainties of expression in this bill, they certainly ought not to be found in the legislation affecting subjects so important and so far-reaching as our finances and currency. In stating other and more important reasons for my disapproval of this section I shall, however, assume that under its provisions the treasury notes issued in payment for silver bullion will continue to be redeemed as heretofore in silver or gold, at the option of the holders, and that if, when they are presented for redemption or reach the treasury in any other manner, there are in the treasury coined silver dollars equal in nominal value to such treasury notes, then and in that case the notes will be destroyed and silver certificates to an equal amount substituted.

I am convinced that this scheme is ill-advised and dangerous. An immediate reversal of its operation treasury notes which are legal tender for all debts, public and private, and which are redeemable in gold or silver, at the option of the holder, will be replaced by silver certificates which, whatever may be their character and description, will have none of these qualities. In anticipation of this result and as an immediate effect the treasury notes will naturally appreciate in value and desirability. The fact that gold can be realized upon them and the further fact that their destruction has been decreed when they reach the treasury, must tend to their withdrawal from general circulation to be immediately presented for gold redemption or to be hoarded for presentation at a more convenient season. The sequel of both operations will be a large addition to the silver currency in our circulation and a corresponding reduction of gold in the treasury. The argument has been made that these things must occur at once, because a long time must elapse before the coinage of anything but the seigniorage can be entered upon. If the physical effects of the execution of the second section of this bill are not to be realized until far in the future this may furnish a strong reason why it should not be passed so much in advance; but the postponement of its actual operation cannot prevent the fear and loss of confidence and nervous prostration which would immediately follow its passage and bring about its worst consequences.

REVERSAL OF A SAFE POLICY.

I regard this section of the bill as embodying a plan by which the government will be obliged to pay out its scanty store of gold for no other purpose than to force an unnatural addition of silver money into the hands of our people. This is an exact reversal of the policy which safe finance dictates if we are to preserve parity between gold and silver and maintain sensible bimetalism.

We have now outstanding more than \$38,000,000 in silver certificates issued under existing laws. They are serving the purpose of money usefully and without question. Our gold reserve, amounting to only a little more than \$100,000,000, is directly charged with the redemption of \$46,000,000 of United States notes. When it is proposed to inflate our silver currency at this time for strengthening our gold reserve instead of depleting it, I cannot conceive of a longer step toward silver monometallism than we take when we spend our gold to buy silver certificates for circulation, especially in view of the practical difficulties surrounding the replenishment of our gold.

ASKS MORE POWER FOR MR. CARLISLE

This leads me to earnestly present the desirability of granting to the secretary of the treasury a better power than now exists to issue bonds to protect our gold reserve when for any reason it should be necessary. Our currency is in such a confused condition and our financial affairs are apt to assume at any time so critical a position that it seems to me such a course is indicated by ordinary prudence. I am not insensible to the arguments in favor of coining the bullion seigniorage now in the treasury, and I believe it could be done safely and with advantage if the secretary of the treasury had the power to issue bonds at a low rate of interest under authority in substitution of that now existing and better suited to the protection of the treasury.

I hope a way will present itself in the near future for the adjustment of our monetary affairs in such a comprehensive and conservative manner as will afford to silver its proper place in our currency, but in the meantime I am extremely solicitous that whatever action we take on this subject may be such as to prevent loss and discouragement to our people at home and the destruction of confidence in our financial management abroad.

GROVER CLEVELAND.

Executive Mansion, March 29, 1894.

THE PRESIDENT TO MR. WILSON.

EXECUTIVE MANSION, WASHINGTON, July 2, 1894.—To the Hon. William L. Wilson—My

DEAR SIR: The certainty that a conference will be ordered between the two houses of congress for the purpose of adjusting differences on the subject of tariff legislation makes it also certain that you will be again called upon to do hard service in the cause of tariff reform. My public life has been so closely related to the subject, I have so longed for its accomplishment and I have so often promised its realization to my fellow-countrymen as a result of their trust and confidence in the democratic party I hope no excuse is necessary for my earnest appeal to you that in this crisis of our democracy insist upon plain honesty and good faith and a sturdy adherence to democratic principles. I believe these are absolutely necessary conditions to the continuation of democratic existence.

I cannot rid myself of the feeling that this conference will present the best if not the only hope of true democracy. In this point to its action as the reliance of those who desire the genuine fruition of democratic effort, the fulfillment of democratic pledges and the redemption of democratic promises to the people. To reconcile differences in the details comprised within the fixed and well-defined lines of principle must be the sole task of the conference, but, as it seems to me, its members will also have in charge the question whether democratic principles themselves are to be saved or abandoned.

DEMOCRATS ARE DOWNCAST.

There is no excuse for mistaking or misapprehending the feeling and the temper of the rank and file of the democracy. They are downcast under the assertion that their party fails in ability to manage the government and they are apprehensive that efforts to bring about tariff reform may fail; but they are much more downcast and apprehensive in their fear that democratic principles may be surrendered.

In these circumstances they cannot do otherwise than to look with confidence to you and those who with you have patriotically and sincerely championed the cause of tariff reform within democratic lines and guided by democratic principles. This confidence is vastly augmented by the action under your leadership of the house of representatives upon the bill now pending. Every true democrat and every sincere tariff-reformer knows that this bill, in its present form and as it will be submitted to the conference, falls far short of the consummation for which we have long labored, for which we have suffered defeat without discouragement; which, in its anticipation, gave us a rallying cry in our day of triumph and which in its promise of accomplishment is so interwoven with democratic pledges and democratic success that our abandonment of the cause or the principles upon which it rests means party peridy and party dishonor.

MUST HAVE FREE RAW MATERIALS.

One topic will be submitted to the conference which embodies democratic principle so directly that it can not be compromised. We have in our platforms and in every way possibly declared in favor of the free importation of raw materials. We have again and again promised that this should be accorded to our people and our manufacturer as soon as the democratic party was invested with the power to determine the tariff policy of the country. The party has now the power. We are as certain to-day as we have ever been of the great benefit that would accrue to the country from the inauguration of this policy, and nothing has occurred to release us from our obligation to secure this advantage to our people. It must be admitted that no tariff measure can accord with democratic principles and promises or bear a genuine democratic badge that does not provide for free raw materials.

In these circumstances it may well excite our wonder that democrats are willing to depart from this, the most democratic of all tariff principles, and thus to incur the absurdity of such a proposed departure should be emphasized by the suggestion that the wool of the farmer be put on the free list and the protection of tariff taxation be placed around the iron ore and coal of corporations and capitalists. How can we face the people after indulging in such outrageous discriminations and violations of principle? It is quite apparent that this question of free raw materials does not admit of adjustment on any middle ground since their subjection to any rate of tariff taxation, great or small, is alike violative of democratic principle and democratic good faith.

SUGAR A DELICATE SUBJECT.

I hope you will not consider it intrusive if I say something in relation to another subject which can hardly fail to be troublesome to the conference. I refer to the adjustment of tariff taxation on sugar. Under our party platform and in accordance with our declared party purposes sugar is a legitimate subject of article of revenue taxation. Unfortunately, however, incidents have accompanied certain stages of the legislation which will be sub-

mitted to the conference that have aroused in connection with this subject a natural democratic animosity to the methods and manipulations of trusts and combinations. I confess to sharing in this feeling; and yet it seems to me we ought, if possible, to sufficiently free ourselves from prejudice to enable us coolly to weigh the considerations which, in formulating tariff legislation, ought to guide our treatment of sugar as a taxable article.

While no tenderness should be entertained for trusts, and while I am decidedly opposed to granting them, under the guise of tariff taxation, any opportunity to further their peculiar methods, I suggest that we ought not to be driven away from the democratic principle and policy which lead to the taxation of sugar, by the fear, quite likely exaggerated, that in carrying out this principle and policy we may indirectly and inordinately encourage a combination of sugar-refining interests.

I know that in present conditions this is a delicate subject and I appreciate the depth and strength of the feeling which its treatment has aroused. I do not believe that we should do evil that good may come, but it seems to me that we should not forget that our aim is the completion of the tariff, and in taxing sugar for proper purposes and within reasonable bounds, whatever else may be said of our action, we are in no danger of running counter to democratic principles. With all there is at stake there must be in the treatment of this article some ground upon which we are willing to stand, where toleration and conciliation may be allowed to solve the problem, without demanding the entire surrender of fixed and conscientious convictions.

MUST TAKE THE INCOME TAX, TOO.

I ought not to prolong this letter. If what I have written is unwelcome I beg you to believe in my good intentions. In the conclusions of the conference touching the numerous items which will be considered the people are not afraid that their interests will be neglected. They know that the general result, so far as they are concerned, will be to place home necessities and comforts more easily within their reach and to insure better and surer compensation to those who toil. We all know that a tariff law covering all the varied interests and conditions of a country as vast as ours must of necessity be largely the result of honorable adjustment and compromise.

I expect very few of us can say, when our measure is perfected, that all its features are entirely as we would prefer. You know how much I deprecated the incorporation in the proposed bill of the income-tax feature. In matters of this kind, however, which do not violate a fixed and recognized democratic doctrine, we are willing to defer to the judgment of a majority of our democratic brethren. I think there is a general agreement that this is party duty.

This is more palpably apparent when we realize that the business of our country timidly stands and watches for the result of our efforts to perfect tariff legislation, that a quick and certain return of prosperity waits upon a wise adjustment, and that a confiding people still trust in our hands their prosperity and well being.

The democracy of the land pleads most earnestly for the speedy completion of the tariff legislation which their representatives have undertaken, but they demand not less earnestly that no stress or necessity shall tempt those they trust to the abandonment of democratic principles. Yours, very truly,

GROVER CLEVELAND.

THE PRESIDENT TO MR. CATCHINGS.

EXECUTIVE MANSION, WASHINGTON, D. C., Aug. 27, 1894.—*The Hon. T. C. Catchings*—MY DEAR SIR: Since the conversation I had with you and Mr. Clark of Alabama a few days ago in regard to my action upon the tariff bill now before me I have given the subject further and most serious consideration. The result is I am more settled than ever in the determination to allow the bill to become a law without my signature.

When the formulation of legislation which it was hoped would embody democratic ideas of tariff reform was lately entered upon by the congress nothing was further from my anticipation than a result which I could not promptly and enthusiastically indorse.

It is therefore with a feeling of the utmost disappointment that I submit to a denial of this privilege.

I do not claim to be better than the masses of my party nor do I wish to avoid any responsibility which on account of the passage of this law I ought to bear as a member of the democratic organization, neither will I permit myself to be separated from my party to such an extent as might be implied by my veto of tariff legislation which, though disappointing, is still chargeable to democratic effort. But there are provisions in this bill which are not in line with honest tariff reform and it contains inconsistencies and crudities which ought not to appear in tariff laws or laws of any kind. Besides, there were, as you and I well know, incidents accompanying the passage of the bill through congress which made every sincere reformer unhappy, while influences surrounded it in its latter stages and interfered with its final construction which ought not to be recognized or tolerated in democratic tariff reform councils.

IMPROVES EXISTING CONDITIONS.

And yet, notwithstanding all its vicissitudes and all the bad treatment it received at the hands of pretended friends, it presents a vast improvement to existing conditions. It will certainly lighten many tariff burdens that now rest heavily upon the people. It is not only a barrier against the return of mad protection, but it furnishes a vantage ground from which must be waged further aggressive operations against protected monopoly and governmental favoritism.

I take my place with the rank and file of the democratic party who believe in tariff reform and who know what it is, who refuse to accept the results embodied in this bill as the close of the war; who are not blinded to the fact that the livery of democratic tariff reform has been stolen and worn in the service of republican protection, and who have marked the places where the deadly blight of treason has blasted the councils of the brave in their hour of might.

The trusts and combinations—the communism of self—whose machinations have prevented us from reaching the success we deserve, should not be forgotten or forgiven. We shall recover from our astonishment at their exhibition of power, and if then the question is forced upon us whether they shall submit to the free legislative will of the people's representatives or shall dictate to the laws which the people must obey, we will accept and settle that issue as one involving the integrity and safety of American institutions.

I love the principles of true democracy because they are founded in patriotism and upon justice and fairness toward all interests. I am proud of my party organization because it is conservatively sturdy and persistent in the enforcement of its principles. Therefore I do not despair of the efforts made by the

house of representatives to supplement the bill already passed by further legislation and to have engrained upon it such modifications as will more nearly meet democratic hopes and aspirations.

I can't be mistaken as to the necessity of free raw materials as the foundation of logical and sensible tariff reform. The extent to which this is recognized in the legislation already secured is one of its encouraging and redeeming features, but it is vexatious to recall that while free coal and iron ore have been denied, a letter of the secretary of the treasury discloses the fact that both might have been made free by the annual surrender of only about \$700,000 of unnecessary revenue. I am sure that there is a common habit of underestimating the importance of free raw materials in tariff legislation and of regarding them as only related to concessions to be made to our manufacturers. The truth is, their influence is so far-reaching that, if disregarded, a complete and beneficent scheme of tariff reform cannot be successfully inaugurated.

When we give to our manufacturers free raw materials we unshackle American enterprise and ingenuity and these will open the doors of foreign markets to the reception of our wares and give opportunity for the con-

tinuous and remunerative employment of American labor.

With materials cheapened by their freedom from tariff charges the cost of their product must be correspondingly cheapened. Thereupon justice and fairness to the consumer would demand that the manufacturers be obliged to submit to such a readjustment and modification of the tariff upon their finished goods as would secure to the people the benefit of the reduced cost of their manufacture and shield the consumer against the exactions of inordinate profits.

It will thus be seen that free raw materials and a just and fearless regulation and reduction of the tariff to meet the changed conditions would carry to every humble home in the land the blessings of increased comfort and cheaper living.

The millions of our countrymen who have fought bravely and well for tariff reform should be exhorted to continue the struggle, boldly challenging to open warfare and constant guarding against treachery and half-heartedness in their camp.

Tariff reform will not be settled until it is honestly and fairly settled in the interest and to the benefit of a patient and long-suffering people. Yours, very truly,

GROVER CLEVELAND.

Military Societies of the United States.

SOCIETY OF THE CINCINNATI.

The Order of Cincinnati was instituted at the cantonments of the continental army on the Hudson river May 10, 1783. Membership is restricted to the eldest male descendant of an original member or to the eldest male descendant of any continental or French officer of the revolution who was qualified by his service to become an original member. There are seven state societies, there having been originally thirteen. Gen. Washington was the first president-general and Alexander Hamilton was the second. Ex-Secretary of State Fish is the ninth. The number of members May, 1890, was 439. Among the honorary members are ex-President Harrison, President Cleveland, Maj.-Gen. Howard and Maj.-Gen. Schofield.

General Officers.

President-General, Vacant.

Acting President-General and Vice-President-General, Hon. Robert M. McLane of Maryland, Baltimore.

Treasurer-General, Mr. John Schuyler, of New York, New York city.

Secretary-General, Hon. Asa Bird Gardiner, LL. D., of Rhode Island, Garden City, N. Y.

Assistant Secretary-General, Thos. P. Lowndes, Charleston, S. C.

State Societies.

Massachusetts—Organized June 9, 1783; Winslow Warren, president.

New York—Organized June 9, 1778; Hon. John Cochrane, president, New York city.

Pennsylvania—Organized Oct. 4, 1783; Hon. William Wayne, president, Paoli, Chester county, Pa.

Maryland—Organized Nov. 21, 1783; Hon. Robert Milligan McLane, president, Baltimore, Md.

Rhode Island—Organized June 24, 1783; Hon. Nathaniel Greene, president, Newport, R. I.

New Jersey—Organized June 11, 1783; Hon. Clifford Stanley Sims, president, Mount Holly, N. J.

Connecticut (revived 1893)—George B. Sanford, acting president.

South Carolina—Organized Aug. 29, 1783; Rev. Charles Cotesworth Pinckney, D. D., president, Charleston, S. C.

France—Organized at Paris Jan. 7, 1784; re-instituted July 1, 1887; Marquis de Rochambeau, president, 51 Rue de Naples, Paris.

SONS OF THE REVOLUTION.

[Organized 1875.]

General Officers.

General President, John Lee Carroll, Md.

General Vice-President, G. D. W. Vroom, N. J.

Second Vice-President, Col. J. Screven, Ga.

General Treasurer, R. M. Cadwalader, Pa.

General Secretary, J. M. Montgomery, N. Y.

General Asst.-Secretary, W. H. Harris, Md.

General Register, J. W. Jordan, Pa.

General Historian, T. B. M. Mason, U. S. A.

General Chaplain, Rev. Morgan Dix, D. D., N. Y.

State Societies.

Alabama, James Edward Webb; California, Holdridge O. Collins; Colorado, Rt. Rev. John F. Spalding, D. D.; Connecticut, Daniel Nash Morgan; District of Columbia, Lewis Johnson Davis; Florida, Joseph Gaston Bullock; Georgia, John Screven; Illinois, Rev. Walter Delafield; Iowa, Rt. Rev. Wm. S. Perry, D. D.; Maryland, John Lee Carroll; Massachusetts, William Leverett Chase; Minnesota, Charles Phelps Noyes; Missouri, Rt. Rev. Daniel S. Tuttle, D. D.; New Hampshire, Rev. Henry

E. Hovey; New Jersey, S. Meredith Dickinson; New York, Frederick Samuel Tallmadge; North Carolina, Gov. Elias Carr; Ohio, Edward Lowell Anderson; Pennsylvania, William Wayne; South Carolina, Christopher S. Gadsden; West Virginia, John Marshall Hays.

[The two societies (Sons of the American Revolution and Sons of the Revolution) are alike in their aims and objects. These are fostering among themselves and their descendants the patriotic spirit of the men who in the naval, military or civil service of the colonies assisted in advancing the independence of the United States, and to collect and preserve the history of the revolutionary war and to promote intercourse and fraternal feeling among the members. Eligibility to membership in each is confined to male descendants from an ancestor who as a soldier, sailor or civil official assisted in establishing American independence during the war of the revolution.]

SOCIETY OF THE SONS OF THE AMERICAN REVOLUTION.

[Organized June 29, 1876.]

General Officers.

Elected April 30, 1894.

President-General—Gen. Horace Porter, LL. D., 15 Broad street, New York city.

Vice-Presidents-General—Gen. J. C. Breckinridge, U. S. A., Washington city; Col. T. M. Anderson, Vancouver Barracks, Wash.; W. R. Griffith, Baltimore, Md.; Edwin S. Barrett, Concord, N. H.; John Whitehead, Morris-town, N. J.

Secretary-General—Franklin Murphy, Newark, N. J.

DEATHS OF THE PRESIDENTS.

George Washington died from a cold which brought on laryngitis.

John Adams died at 91, from senile debility. James Madison lived to be 86, and died peacefully and painlessly of old age.

Thomas Jefferson died of chronic diarrhoea. James Monroe died of general debility.

John Quincy Adams died of paralysis, the fatal attack overtaking him at 81, in the hall of the house of representation.

Andrew Jackson's death was caused by consumption and dropsy at the age of 78.

Martin Van Buren's death took place at 80, caused by catarrh of the throat and lungs.

William Henry Harrison's death was occasioned by pleurisy induced by a cold taken on the day of his inauguration.

John Tyler died at 72, from a mysterious disorder like a bilious attack.

James K. Polk died at 54, from weakness caused by cholera.

Zachary Taylor died at the age of 66, from cholera morbus, induced by improper diet.

Millard Fillmore died at 74, from paralysis.

Franklin Pierce died at 66, from inflammation of the stomach.

James Buchanan's death was caused by rheumatism and gout, at 77.

Abraham Lincoln was assassinated by J. Wilkes Booth.

Andrew Johnson died from paralysis.

Ulysses S. Grant died of cancer of the throat.

Rutherford B. Hayes died at 70, from paralysis of the heart.

James A. Garfield was assassinated by Charles J. Guiteau.

Chester A. Arthur died at 56, from Bright's disease.

Seminole Indian war.....				3,087	3,087
Civil war.....					2,772,408

* Naval forces engaged. † The number of troops on the confederate side was about 600,000.

In the war of 1812-15 there were 10 battles, 8 combats and assaults, 52 actions and bombardments. In the Mexican war, there were 11 pitched battles and 35 actions, combats, sieges and skirmishes. In the civil war of 1861-65 there were 107 pitched battles, 102 combats and 362 actions, sieges and lesser affairs.

Since 1812 the United States army has had over 640 battles, fights and actions against Indians. Since 1793 there have been 912 garrisoned forts, arsenals and military posts in the United States. At the present time (1891) there are 144 garrisoned forts, arsenals and military posts.

Up to and including June, 1861, there were 1,937 graduates of the military academy, and of these there were living at the outbreak of

the civil war of 1861-65, 1,249. Of the 1,249, 428 were in civil life and 821 were in the military service of the United States. Of those in civil life 293 took sides with the union and 99 joined the confederacy, while 37 are unknown. Of the 821 in the army 627 sided with the union, 184 joined the confederacy and 10 took neither side. Of the 99 who joined the confederacy from civil life, all except one were either born and brought up or were residents of southern territory. On the other hand, of the 850 graduates born or appointed from southern states 162 remained loyal to the United States. Of the graduates who served in the civil war one-fifth were killed in battle, while one-half were wounded.—Lieut. W. R. Hamilton, U. S. A.

Party Platforms.

UTTERANCES OF STATE CONVENTIONS, 1894.

Illinois Republicans.

Adopted at Springfield, July 25.

The republican party of the state of Illinois reaffirms its belief in the great principles of civil and religious liberty upon which this government was founded and under which the people have enjoyed unexampled prosperity and happiness, and believing that the restoration of the republican party to power in the government of the country would promote the general welfare of the people and is the chief condition of renewed prosperity, this convention most respectfully and cordially invites all good citizens, irrespective of political antecedents, to unite in supporting the republican cause in the next election.

We earnestly maintain the right and justice of the American doctrine of protection to American industries. In raising the necessary revenue to maintain the government we are in favor of such duties on competing imports as will best tend to the development of the resources of our own country, of the labor of our own people, of performance of wages which put the comforts of life within easy reach and secure good prices for the products alike of our farms, our mines and our workshops, and we believe that articles that cannot be successfully produced in this country, except luxuries, should be placed upon the free list.

OPPOSE FREE RAW MATERIAL.

We further believe that without labor there is no such thing as raw material of any practical or marketable value and no tangible thing of value that it does not require labor to produce or utilize, and hence the importation of so-called raw material free of duty is an interference with the system of protection to American labor and should only be permitted when the raw material is obtainable in our own country.

We denounce as unwise and un-American the provisions of the so-called Wilson tariff bill, modified in the senate by the injection of weak and inconsistent attempts to protect special interests, as now pending in congress, and we charge the democratic party with the sole responsibility for the effort to destroy our tariff system, a system which has proven the greatest boon to the great mass of American citizens, and we further declare that the unusual and unnatural conditions now existing in this nation between capital and labor, which have led to lawlessness, bloodshed, interruption of business and brought misfortune to all, are the natural results of the false economic theories, vacillating policy and hopeless incompetency of the democratic party, and to remove the evil thus created, restore prosperity and bring health to the body of the people it is necessary that the republican party should be restored to power.

INDORSE BIMETALLISM.

We favor bimetallicism and believe in the use of gold and silver as money metals upon a parity of values, with complete intercconvertibility, under such legislative provisions as shall make the purchasing or debt-paying power of any dollar coined or issued by the United States the absolute equivalent of that of any other dollar so coined or issued.

We believe in the purity of the ballot and the freedom of elections and we hold that the true freedom of elections is obtained and secured only by and under the law.

The republicans of Illinois are in favor of the largest personal liberty consistent with law and order.

PENSIONS.

We favor the payment of liberal pensions to the soldiers and sailors of the union and to their surviving dependents as a sacred obligation due from the entire people, and we insist that in the allotment and distribution of pension funds technical and burdensome restrictions should not be imposed.

HAWAIIAN AFFAIRS.

We condemn in emphatic terms the course pursued by the present national administration toward the people of Hawaii in attempting to overthrow a friendly government, re-establish a corrupt monarchy and force upon them a barbarous queen.

We arraign the present democratic governor of Illinois as the most conspicuous case of misfit in official life. From the day which he began to debate the penal, reformatory and charitable institutions and public parks of the state into infirmaries and asylums for politicians to the present time he has shown such wonderful aptitude in doing the wrong thing at all times that the people of the state, irrespective of party, await with undisguised impatience the expiration of his term of office.

This convention approves with all cordiality the unswerving fidelity of the entire republican delegation in congress from Illinois in the maintenance of republicanism in the house of representatives, and it also returns thanks to Senator Cullum for his able, patriotic and unflinching opposition to the atrocity of trust legislation, the senate tariff bill.

Illinois Democrats.

Adopted at Springfield, June 27.

The representatives of the democratic party of Illinois in congress reaffirm their allegiance to the principles of Jefferson and Jackson as enunciated in the platforms adopted by the democratic state and national conventions in 1892, and they reiterate their adhesion to those fundamental principles of popular government through which the liberty of the individual and the prosperity and welfare of the entire people are secured.

They protest against the doctrine of their opponents that governments should take care of the rich and the rich will take care of the poor, and proclaim in the language of their founder their belief in a wise and frugal government, which shall restrain men from injuring one another, which shall leave them otherwise free to regulate their own pursuits of industry and improvement, and which shall not take from the mouths of labor the bread it has earned.

CLEVELAND INDORSED.

We indorse the action of President Cleveland and the public services of all democrats in executive and legislative stations in all things that they have done to give force and effect to the principles of that party as laid down by the Chicago convention of 1892, and we condemn the contemptible partisanship which seeks to prolong for party advantages that period of financial depression and unrest which has been the direct outcome of republican legislation and profligate expenditures and extravagant notions of the republican leaders, who have dissipated a surplus, plunged the treasury into a deficit, and now seeks to take advantage of their own wrong by blocking every measure of relief and whining over and resisting every effort to rehabilitate the country from the exhaustion at-

tributable to their own misconduct. And we confidently look to the success of the democratic party of the union for the return of public prosper and the removal of the burdens now resting upon the people.

TARIFF REFORM.

We demand that congress shall carry out the will of the people of the United States as expressed in the last presidential election by passing an efficient bill to reform the tariff taxations that the country shall enjoy the beneficent results of that action without further delay.

The remarkable growth of trusts and combinations in the United States within the last few years is the direct and logical result of the protective system built up under republican rule, and that party must be held responsible for the manifold evils which these new devices to suppress competition, control production and prices and foster monopolies have entailed upon the American people. The democracy of Illinois reiterate their demand that the legislature and the courts do their full duty in tearing up these poisonous growths upon the commercial and industrial activity of the state, the existence of which constitutes a continuous scandal upon law and justice.

We heartily commend the fearless integrity and sturdy determination which have characterized the administration of Gov. Altgeld, and through which most important reforms have been achieved in all branches of the public service of the state, civil and military.

SECRET POLITICAL SOCIETIES.

Hostility to secret political societies is a tenet of the democratic faith which is fundamental, and standing by this doctrine now as in the days when the party presented an unbroken front to the cohorts of know-nothingism, and finally crushed that detestable organization, the democracy of Illinois denounces as cowardly, unpatriotic and dangerous to the peace and happiness of this country the American Protective association, which seeks to proscribe men on account of their religion or birthplace.

GOLD AND SILVER.

We declare our loyalty to that time-honored principle of the democratic party which favors honest money, the gold and silver coinage provided by the constitution of the United States, and a currency convertible in such coinage without loss to the holder. We insist that justice to all citizens requires a strict adherence to this democratic principle, and they demand that the government shall spare no effort to bring about a proper ratio between the values of gold and silver so that parity may be maintained between the two metals and all mints thrown open to free coinage. We declare that this has for years been a cardinal doctrine of the democratic party, and they denounce the republican party for its constant and persistent efforts to demonetize silver and thus increase all public and private debts.

We hail with pleasure the action of the democratic house of representatives in favor of an income tax as a step in the direction of justice and reform and as a blow at that infamous system which burdens the poor with the necessities of government while monopolists, trusts and cart combines escape their just responsibilities.

Sumptuary laws infringing upon the individual rights of the citizens are not to be countenanced by the democratic party, and we pledge ourselves at all times to secure for the people the widest degree of personal liberty compatible with the public welfare.

We believe that the senators of the United

States should be elected by the direct vote of the people.

Illinois Prohibitionists.

Adopted at Bloomington, May 4.

We, the prohibitionists of Illinois, in convention assembled, acknowledging Almighty God as the source of all power in government, do adopt the following principles:

1. The liquor traffic—We demand the suppression of the manufacture, sale, importation, exportation and transportation of alcoholic liquors as a beverage by federal and state legislation.

2. Suffrage—No citizen should be denied the right to vote on account of sex, and equal labor should receive equal wages without regard to sex. We demand that the legislature shall give township and municipal suffrage to women and the right to be candidates for any office not forbidden to them by the constitution. We demand that an amendment to the constitution giving women the full rights of suffrage and to hold office be submitted to a vote of the people.

3. Tariff—We favor the collection of a sum of money sufficient to meet the wants of the government economically administered. To the end that calamitous results, caused by the frequent partisan agitation and changes of our tariff may be avoided, we favor the appointment of a non-partisan commission on revenue, whose duty it shall be to annually recommend to congress such changes in tariff laws and other methods of collecting revenue as may from time to time become necessary.

IN FAVOR OF FREE SILVER.

4. Finance—We declare that all money should be issued by the government to the people without the intervention of any private individual or corporation, and to be a full legal tender for all debts, both public and private, contracts to the contrary notwithstanding. To this end we favor the free and unlimited coinage of gold and silver, the products of the mines of the United States. No more government bonds should be issued in times of peace, but a system of postal savings banks should provide for the safe deposit of the savings of the people on which a low rate of interest should be paid. Any surplus which may accrue from these deposits should be loaned directly to the people on ample security at a low rate of interest.

5. Civil service—We favor the extension of the civil-service reform system to all grades of the service to which it is applicable; fitness and not party service should be the essential test, and fidelity and efficiency the only sure tenure of office. Unnecessary absence from attendance upon public duties on the part of members of congress or the state legislature should work a corresponding reduction of compensation.

6. Pensions—We favor granting just pensions to disabled veterans of the United States army and navy, their widows and orphans, and that the laws for pensioning the soldiers of the Mexican war be extended to the soldiers of the war of the rebellion.

7. Caneen system—We demand the abolition of the caneen system in the army and the saloon system in the soldiers' homes.

OPPOSED TO IMMIGRATION.

8. Immigration—We declare in favor of immigration laws so framed as to exclude the pauper, the criminal, the insane, the anarchist.

9. Land—We are opposed to alien ownership of lands or mines and the unlimited acquisition thereof by any individuals or corporations. We favor the forfeiture of all unoccupied land grants in the hands of railroad corporations.

10. Trusts—We demand the suppression of all trusts and combinations which are designed to enrich the few at the expense of the many.

11. Public schools—We declare for a compulsory school law which shall guarantee to every child between the ages of 8 and 14 years the benefit of at least four months' attendance in each year at some school where the rudiments of the English language are taught. We hold it to be a direct violation of our constitution to devote any of the public funds to the use of any parochial or sectarian schools. Custodians of public school funds should be held personally liable for any public money paid for the support of any sectarian or parochial schools. Free textbooks—We further declare in favor of the state furnishing all textbooks free of cost.

12. Interest on public funds—The interest carried on public funds should be turned into the public treasury.

13. Rest days—All men should be protected by law in their right to one day of rest in seven.

14. We cordially invite the co-operation of all our fellow-citizens to the end that these declarations may be made triumphant in state and nation where there are other organizations which stand for any or all of these positions. We shall regard with special favor any efforts wisely directed toward securing such a union of forces as shall in any way hasten the overthrow of saloon rule, reinforced as it is by the monopolists on the one hand and outworn and vicious political organizations on the other. All means of public transportation and communication should be managed for the benefit of all the people and not for the profit of private corporations only. To this end they should be controlled by the government.

Illinois Populists.

Adopted at Springfield, May 29.

The people's party of the state of Illinois, in convention assembled, affirms its allegiance to the pure principles of human government as embodied in that second declaration of independence, the Omaha platform, and declares in the presence of corrupt officialism and an impoverished and desperate people that the supreme question of the hour is the securing of a system of finance that will assist the energies of the people to their most bountiful, beneficent manifestations instead of threatening and stifling our production and commercial vitality by the infamous complicity of the legislative and executive departments of government with the money-monsters of New York and London; that the appeal for the adjudicating of industrial and political wrongs should always be to the ballot and never to the bullet; that the call to arms is unjustifiable in a government whose every citizen may derelict his opinion at the polls; that we invite the support of the wronged and impoverished citizens of our commonwealth to the principles and resolutions herein embodied.

Resolved, That house joint resolution number 14, proposing an amendment to the state constitution that the general assembly shall have power and it shall be its duty to enact and provide for the enforcement of all laws that it shall deem necessary to regulate and control contracts, conditions and relations existing or arising from time to time between corporations and their employees be indorsed.

THE LICENSE SYSTEM.

Resolved, That we denounce the license system of dealing with the liquor traffic as fostering one of the most corrupt monopolies of our times, and the saloon system, as sup-

ported by the republican and democratic parties, as one of the chief means by which the money power oppresses the producers, and we demand that wherever a majority of the people petition for the sale of intoxicating liquors, such sale shall be conducted by the state as a matter of police regulation without profit.

Resolved, That all mortgages and notes corresponding with the same, and all other notes and bonds shall bear the assessor's stamp, and unless so stamped one-half shall be forfeited to the school fund of the state when judgment is rendered for its collection.

Resolved, That women shall have equal pay with men for the same labor and should have an equal chance to make the laws.

Resolved, That the school books for public schools should be printed by the state and furnished the schools at net cost.

Resolved, That we indorse the industrial and political platform adopted by the Federation of Labor at its annual convention, held in Chicago in December, 1888, except plank 10, and rely upon the operation of the initiative and referendum for its practical operation.

Indiana Republicans.

Adopted at Indianapolis, April 25.

We, the republicans of Indiana, in delegate convention assembled, reaffirm our faith in the progressive principles of the republican party. We believe its policies, past and present, best calculated to promote the happiness and prosperity of the people. The administration of President Harrison and the congressional legislation of that party were wise, pure and patriotic, and we point to the marked contrast between the home and foreign policies of that administration and the present treasury on government inflicted on the whole people.

PROTECTION AND RECIPROCITY.

We believe in the republican doctrine of protection and reciprocity, which furnishes a home market for the productions of our factories and our farms and protects the American laborer against the competition of the pauper labor of Europe. We denounce the unwise and unpatriotic action of the democratic party in attempting to eliminate the reciprocity principle from our tariff system, thereby closing a large foreign market to products of American farmers and depressing agricultural interests. We denounce the present attempt of a democratic congress to overthrow and destroy the American industrial system, a course, that with the general fear of a violent readjustment of the country's business to a free-trade basis, has increased the national debt and has plunged the country into the most disastrous business depression of its history, has closed large numbers of banks and factories throughout the country, has thrown an unprecedented number of American citizens out of employment, has compelled thousands of able-bodied and industrious men to humiliate themselves by asking for charity, and has filled our broad land with free soup-houses and food markets.

DECLARE FOR SOUND MONEY.

We believe in currency composed of gold, silver and paper, readily convertible at a fixed standard of value and entirely under national control; and we favor the imposition of increased tariff duties upon the imports from all countries which oppose the policy of silver upon a basis to be determined by an international congress for such purpose. We denounce the avowed purpose of the democratic party to restore the era of "wildcat" money.

We believe in a liberal construction of our pension laws, and we condemn the unjust

policy of the present administration of depriving ex-soldiers of their pensions without a hearing—a policy intended to cast odium upon loyalty and patriotism. We believe it to be the duty of the state, as well as the nation, to make suitable provision for the care and maintenance of all indigent soldiers, their wives and widows. We therefore, favor the establishment by the state of a suitable soldiers' home for the reception of such soldiers, their wives, and widows, as may be overtaken by adversity.

We demand a rigid enforcement of all existing immigration laws by the national government, and demand such further legislation as will protect our people and institutions against the influx of the criminal and vicious classes.

We denounce the unpatriotic action of the Cleveland administration in hauling down the American flag at Hawaii, and condemn the arrogant assumption of power displayed in the effort to restore a tyrannical queen over a free people who had thrown off the yoke of despotism.

SALE OF PATRONAGE CONDEMNED.

We condemn the outrageous bargain and sale of federal patronage by the Cleveland administration, in its unblushing efforts to usurp the prerogatives of the legislative branch of the government to force a favorite measure through congress and compel the confirmation of presidential appointments by the senate.

We condemn the reckless and extravagant administration of the financial affairs of this state whereby the people are subjected to unjust and unnecessary burdens of taxation by an increased assessment of property and increased rate of taxation and by a multiplication of offices to be supported by the taxpayers of the state.

We believe that the benevolent, educational and correctional institutions of the state should be placed under non-partisan control.

We believe in such legislation, state and national, as will protect the lives and limbs of employees of railways, mines and factories.

We condemn the policy steadily pursued by the democratic legislature of Indiana in so gerrymandering the state as to deny the people a fair representation of their views in the state legislature and national congress, thus imperiling the foundations of our institutions.

Indiana Democrats.

Adopted at Indianapolis, Aug. 15.

The democratic party of Indiana takes just pride in the strength of the record it has made in the legislative and executive departments of this commonwealth by the enactment and enforcement of wise and beneficent laws in the interest of the people and in the fulfillment of its pledges.

STATE ISSUES.

It passed the mechanic lien laws and the law giving laborers a lien upon the product of their labor for wages and material furnished, the law protecting labor organizations, the law providing for the safety of miners and proper ventilation of mines, constituting eight hours a day's labor in public employment, prohibiting the hoarding of rents of educators, prohibiting "pluck-me" stores, the employees' liability law, forbidding the employment and importation of Pinkerton detectives, against the importation of alien or foreign labor. It enacted the school-book law, saving large sums to the people, breaking down an oppressive monopoly and placing the instructing of education within the reach of the poorest and humblest citizens; it enacted our existing laws purifying elections, giving an untrammelled ballot to the voter, and by the Australian ballot suc-

cessfully preventing fraud and the intimidation of employes and others at the polls. It framed and passed our present tax law, thus adding millions of property to our tax duplicates; it passed the present fee and salary law; it enacted the Barrett improvement law, which has proven a blessing wherever used; it also passed the state board of charities law, which has insured honest, humane and intelligent administration of our public institutions.

All this has been accomplished, almost in every instance, in spite of the determined objection and opposition of the republican party. By this course of legislation, in fulfillment of pledges to the people, Indiana has been placed at the forefront of all the states in matters of this kind and kindred reform legislation, and we pledge ourselves to the maintenance and enforcement of these measures, while the republican party stands pledged, at the first opportunity, to destroy, either by repeal or amendment, the most important of these wise laws.

THE TAX LAW.

We congratulate the people of Indiana upon the upholding of the tax law of 1891, under which more than a hundred millions of dollars of corporate property has been added to the tax duplicate. And we especially commend the action of the state officers in charge in prosecuting and enforcing to a successful conclusion the provisions of said laws.

TARIFF REFORM.

We reaffirm our opposition to the vicious system of class legislation, misnamed protection, and pledge ourselves to continue the battle against it until every species of extortion and robbery fostered by the McKinley act shall be obliterated from our revenue system and the people enjoy all the blessings of commercial liberty. The protective system which control absolutely so many industries and have done so much to debase the politics of the country and corrupt the legislative department of the government. We denounce tariff protection of every kind as a fraud and a robbery of the great majority of the American people for the benefit of the few. We maintain that no tariff taxes should be levied except for the purpose of revenue only and that such taxes should be limited to the necessities of the government, when honestly and economically administered.

We denounce the McKinley tariff law enacted by the List congress as the culminating atrocity of class legislation. We approve the efforts of President Cleveland and his administration and the democratic party of representatives and of the large majority of democratic senators, and particularly our distinguished senators from Indiana, the Hon. Daniel W. Voorhees and the Hon. David Turple, and our entire democratic delegation in congress, to redeem the pledges made to the country by the last democratic national convention, and to execute the will of the American people, as expressed so emphatically at the ballot box in November, 1892. We condemn the republican party for its persistent efforts to prevent the execution of this unmistakable popular verdict, and we especially condemn a small group of senators who, masquerading as democrats, by threats to defeat all tariff legislation, have temporarily prevented the democratic party from carrying out all of its pledges to the people for tariff reform, as announced in the democratic national platform of 1892.

We congratulate the democratic party and the country upon the fact that, notwithstanding the open opposition of the republican party and the conduct of a few pretended democrats, a substantial measure of reform

has been enacted; that many important raw materials of our industries have been placed on the free list; that a material reduction has been made in the duties on iron ore and coal, and that the tariff tax on nearly all classes of manufactured goods, including woolens and on the necessities of daily life, have been largely reduced.

We approve the action of the house of representatives in following the enactment of this law with the passage of separate acts, placing sugar, coal, iron ore and barbed wire on the free list, and we demand that the senate shall concur in these righteous measures at the earliest possible moment. We especially indorse the income tax as a wise and equitable measure designed to place a fair share of the burdens of the government upon the property of the country, for the benefit of which the expenses of the government are so largely incurred.

TAXING GREENBACKS.

We indorse the law passed by a democratic congress authorizing the taxation of greenbacks as other money is taxed as a great measure of reform, and we take pride in the fact that the demand for such reform was first formulated by the democracy of Indiana, and that it is due to the persistent and intelligent efforts of a democratic representative from Indiana that this reform has been embodied into law. We favor the prompt enactment of a law by our next legislature for the taxation of that class of money.

FEDERAL ELECTION LAW.

We most heartily indorse the action of the democratic congress in repealing the odious election law.

ELECTION OF SENATORS.

We are in favor of a constitutional amendment providing for the election of United States senators by direct vote of the people. We are also in favor of such constitutional and other changes as may be necessary in order that congress may assemble as soon after its election as practicable, and to the end that the will of the people, as expressed at the polls, may receive prompt and full legislative expression.

A. P. A. DENOUNCED.

We believe and declare that the policy and principles of what is called the American Protective association are illiberal, unwise, unpatriotic, undemocratic and un-American. In the spirit of that religious freedom which characterizes our constitution and laws, and the spirit of that wise toleration and generous statesmanship which seeks to accord to all the rights and privileges of American citizenship, we call upon every man to do battle against such an organization.

THE LABOR QUESTION.

The democratic party of Indiana is, as it always has been, the friend of the laboring man, of whom its membership is so largely composed. It is in hearty sympathy with every lawful effort to secure for those who earn their livelihood by their daily toil full protection in their rights as American citizens, to better the condition of their lives, to secure for them full and fair compensation for their labor and to afford them every possible opportunity for moral, social and material advancement. We condemn the efforts that have been made, whether by the professed friends or the avowed enemies of our wage-workers, to identify their cause with the infamous conspiracies of lawlessness and anarchy which threaten the very foundations of social order and civilization. We are opposed to every manifestation of violence

and mob spirit and stand squarely for the maintenance of law and order upon all occasions and under all circumstances.

IMMIGRATION.

We favor the enactment and enforcement of such laws regulating immigration from other countries as shall exclude the pauper and vicious classes, who are unfitted to become American citizens and whose presence in the country will furnish a standing menace to the order and prosperity of our land.

THE PANIC OF 1894.

We denounce the unprincipled and cowardly effort of the republican party to escape the responsibility for the existing depressed condition of the business affairs of this country. This condition is the natural, logical and inevitable result of the infamously corrupt system of taxation known as McKinleyism, combined with other vicious legislation and the prodigal extravagance of the republican party.

We favor the establishment of a tribunal of arbitration in which there may be secured a peaceful settlement of all disputes between employers and employees.

The democratic party is, as it has ever been, opposed to all sumptuary laws as contrary to the principles of free government, and favor the largest individual liberty of the citizens consonant with good government.

THE SILVER QUESTION.

We indorse the repeal of the purchasing clause of that cowardly republican makeshift, the Sherman silver act of 1890. We reaffirm our belief that both gold and silver should be used as the money standard of the country, and that both should be coined without discriminating against either metal and without charge for mintage. We believe it absolutely necessary to the welfare and prosperity of the great producing masses that silver should be restored to the place it occupied in the currency systems of the world a quarter of a century ago, and we hail with delight the many signs of a resolution in public opinion in the great commercial nations in favor of a restoration of the bimetallic system. We pledge our hearty efforts to secure the adoption of every measure for the complete restoration of silver to its proper place in our monetary system, either through international agreement or by such safeguards of legislation as shall insure the maintenance of the parity of the two metals, and the equal power of every dollar at all times in the markets and in payment of debt; and we demand that all paper currency shall be kept at par and redeemable in such coin.

We declare that the present national administration has acted wisely and honorably in permitting the people of Hawaii, unawed by our naval or military forces, to manage their own domestic concerns and to place their country in the family of republics.

CLEVELAND AND MATTHEWS.

We heartily indorse the able, fearless and patriotic administration of Grover Cleveland and especially his course in maintaining law and order.

We heartily indorse the wise and patriotic administration of Gov. Matthews, whose conduct as a public servant has called forth the commendation of the people of every state in the union and placed our state in the foremost rank for good government, and cordially commend the action and conduct of our several state officers.

We remember with gratitude the patriotic services of the soldiers and sailors of the late war, and recognize the fact that, after the lapse of thirty years, by reason of the hard-

ships, privations and exposures of army life, many are passing away and others becoming more helpless. We therefore demand that congress, in the matter of pensions, shall not only deal generously, but bountifully, with those aged veterans.

We also reiterate the declaration of our convention in 1832, that the state should provide by liberal appropriation for the support of a home where our disabled veterans, with their wives, may be supported without sending them to almshouses.

Indiana Populists.

Adopted at Indianapolis, May 24.

In general terms we indorse the principles and declarations of the Omaha platform.

We demand a national currency of \$50 per capita, including the free coinage of silver, at the ratio of 16 to 1, issued by the general government only, a full legal tender for all debts, public and private, distributed to the people direct, without the intervention of banking corporations, in payment of all obligations of the government, and demand the issue of noninterest-bearing treasury notes of small denominations.

We declare our unalterable opposition, as a party, to banks of issue, state or national.

We also denounce the past and continued use of the government fiat by congress to create interest-bearing bonds.

We charge that the crime of demonetizing silver in 1873 by the republican party, further consummated by the joint action of both the old parties at the extra session of congress in 1893, has fully accomplished the purpose of the moneyed aristocracy of the United States and England in placing American producers of our great staple crops on a level with the poorest paid wage labor of the world under English control, by changing through this crime against American producers and laborers the pricing instrument for all products and wages to the single standard of gold only.

We demand a national graduated income tax on salaries or incomes in excess of reasonable expenditures for the comforts and necessities of life.

We pledge the people's party, when given control of the government, that the gunholders, who put up life to save the union from secession, shall be equalized with the bondholders, who speculated in human life and the blood of our people, and their pensions shall be treated as a vested right. We favor the election of United States senators and all postmasters by direct vote of the people.

We believe the people are yet capable of self-government and home rule, and demand of the next legislature the repeal of the metropolitan police law applied to cities. We also denounce the present unfair and unjust law that forbids minorities representation on election boards or witnesses to count ballots, as a violation of the natural rights of the people; the entering wedge to the destruction of free government; the very essence of party tyranny and taxation without representation laws that no honest man can defend.

We demand a constitutional convention to revise our state constitution and include therein reform in the methods of taxation and the initiative and referendum system of legislation, with the veto power of all the important laws in the hands of the people.

We demand such equitable adjustment of the statute for the listing of property for taxation that will permit the deduction of all bona fide indebtedness from sum total listed. We demand a reasonable homestead law that no process of any court can defeat. We demand a law taxing all inheritances coming to citizens of Indiana, both direct and collateral, at

5 percent above \$2,000, for the benefit of the state sinking fund.

PUBLIC SCHOOLS.

We demand the most liberal educational facilities for the masses within the power of the state to provide, and a more efficient administration of the public school fund. We demand that convict labor shall be taken, as far as possible, away from doing any dishonest, free labor in conduct of the state prisons, recommending that counties work their convicts building and improving public roads.

We demand a law at the hands of the next legislature that will make it optional with debtors in this state to pay any legal obligation in gold, silver or other lawful money of the United States. We demand that our state naturalization laws conform to our national laws upon the subject. We view with alarm the evil influences of the liquor traffic. We heartily indorse the initiative and referendum system of legislation, believing by this means that the people can suppress this and other evils more effectually than by any other mode.

CHILD LABOR.

We demand an effective enforcement of the laws prohibiting the employment of child labor. We demand that a system of arbitration be established whereby serious difficulties between employer and employes may be speedily and impartially adjusted, before either party resort to measures detrimental to one and to both. We favor a reduction of the working hours by law in mines and factories in conformity with the progress of industry.

We demand that cities be empowered to assume ownership and control of public water, transportation and lighting plants, in such manner as to operate wholly in the interest of the people without imposing burdensome taxation. We are against the giving out of public work under contract to the lowest bidder. The state and the communities should carry out such work themselves under the supervision of experienced officers.

We favor an efficient employers' liability law, and the inspection of mines and factories for the protection of life and limb of the workmen.

The right to vote is inherent in citizenship, irrespective of sex.

Indiana Prohibitionists.

Adopted at Indianapolis, March 15.

1. The traffic in alcoholic beverages should be declared a public crime, and as such should be adequately punished. The manufacture, importation, exportation, transportation and sale of such beverages should be suppressed by law, and the government should have absolute control of the manufacture and sale of alcoholic liquors for all other purposes.

2. We favor a national currency of gold, silver and treasury notes, issued only by the United States government, which shall be a legal tender for the payment of all debts, public and private. All such money should be subject to taxation and its volume should be increased to meet the natural demands of trade and for the employment of labor.

3. All limitation to suffrage should apply alike to both men and women and equal labor should receive equal wages, without regard to sex.

4. Realizing how detrimental to the business interests of the country are the frequent changes made in our tariff legislation by the republican and democratic parties for partisan purposes, we demand that the tariff question be raised above party politics and placed

in the hands of a nonpartisan tariff commission, and the tariff regulated according to the needs of the whole people.

5. We favor surmounting the deficiency that would be caused in the nation's revenue from suppressing the liquor traffic by a judiciously conducted income tax.

6. We favor the establishment of government savings banks.

7. There should be a general reduction in official salaries and more economy should be practiced in public expenditures. All official fees should be covered into the public treasuries and officers allowed reasonable salaries for services satisfactorily rendered.

8. The contract system of employing convict labor should be abolished and all convicts should be employed in the construction and repair of the public highways.

9. As a matter of right and justice we ask the amendment of the election laws in Iowa so that all parties having places on the legal ballot shall be allowed watchmen at the polls and during the counting of the votes.

10. We pledge the prohibition party, if elected to power, will ever grant just pensions to disabled veterans of the union army and navy, their widows and orphans.

11. We stand unequivocally for the American public schools and are opposed to any appropriation of public money for sectarian schools.

Iowa Republicans.

Adopted at Des Moines, July 25.

The republican party comes again before the people of Iowa with every promise performed and every prophecy fulfilled. The history of the last year has again demonstrated the unfitness and incompetency of the democratic party to administer the affairs of the nation, and has again vindicated the eternal truth of republican principles. From the universal disaster that has accompanied democratic supremacy we turn with confident hope to the sacred duty of restoring peace to a distracted and disordered country.

PROTECTIVE DUTIES.

We again declare for a system of protective duties so adjusted that every American resource can be developed by American labor, receiving American wages, and we insist upon a tariff that will accomplish these ends. We have but to mention the disastrous results which have followed the mere menace of free trade as conclusive evidence of the wisdom of republican policy in the past upon this subject.

We adhere to the declaration of the national republican party in 1892 upon its monetary policy. We reaffirm our belief that "the interests of the country, its farmers and workmen, demand that every dollar, paper or coin, issued by the government, shall be as good as any other dollar." We favor the largest possible use of silver as money that is consistent with the permanent maintenance of equal values of all dollars in circulation. We do not want monometallism, either of gold or silver, and we pledge ourselves to continue to work for bimetalism, to be brought about by all fit means within the power of the government.

WELFARE OF THE LABORER.

The welfare of the laborer and the maintenance of the dignity of labor have been the constant care of the republican party from its birth. Its whole history is an effort to secure to the wage-worker his just share of the fruits of toil, and it now renews its pledge to defend the workman not only against the assaults of foreign competition but against the attacks of domestic avarice.

That the honest and industrious immigrant who comes to our land with the intent to become in good faith an American citizen is always welcomed. No one else should be permitted to come. We favor the amendment and more stringent enforcement of the immigration laws so as to exclude criminal, pauper and all other undesirable classes whose presence tends to degrade American labor and incite disorder.

The republican party, ever mindful of the patriotic services and sacrifices of the veteran soldiers of the republic, reaffirms its position in favor of liberality to the nation's defenders. We favor the granting of pensions to all honorably discharged union soldiers and sailors whose disabilities or necessities justly entitle them thereto.

Iowa Democrats.

Adopted at Des Moines, May

1. The democratic party of the state of Iowa, in state convention assembled, declare the following platform of principles: We reaffirm the platform of the national democratic convention of 1892, and demand of our representatives in congress that they carry out the same in good faith, by giving us a tariff law that will lay the duties on imports for revenue alone and thereby destroy trusts, combines and organizations that have been robbing the people and depleting the treasury of the nation, and that will revert a policy that has destroyed our commerce with the world at large, driven our ships from the high seas, that has filled our country to overflowing with the pauper labor of Europe, that has bred anarchy, confusion, unrest and disloyalty throughout the land, made war between capital and labor, that has sowed the seed of war and rebellion among the people, that has brought ruin to the business interests of the country and want to millions of our people who seek to earn an honest living by industry; again we say to our congress, redeem the pledges made to the people and for all time make an end of paternal and class legislation.

CLEVELAND AND HIS POLICY.

2. We commend the administration of President Cleveland for the ability, wisdom and patriotism shown in dealing with matters of public interest. In the treatment of great public questions it has been marked by a comprehensive understanding of the necessities of the people, and a sincere desire to, as far as practicable, meet every just and proper demand. We especially approve of the present administration in its efforts to reduce the expenditures of the government by the lopping off of many useless officeholders, for its firm and wise policy toward the other nations and countries of the world. And especially do we commend President Cleveland in his efforts for tariff reform. His letter to Representative Wilson is a manly, outspoken document, and meets our most hearty approval, and we condemn any and all efforts made to impede the passage of real tariff reform.

3. The present unfortunate financial stringency and its disastrous effect upon labor is the direct legacy of a republican administration. It is the result of McKinley tariff, of the Sherman silver law, of the fostering of trusts, of legislation for the avowed benefit of the classes against the masses, of the preference of the rich over the poor in legislation, and of corrupt combinations and trusts. It is these things which have combined to shake credit, paralyze business and create panic. The attempt to shift the responsibility upon the democratic administration is futile and absurd. Five years ago a democratic administration left to its successor a depression, a condition and a surplus of \$4,500,000. The republican

administration left as a legacy a panic and an empty treasury.

4. With the national democratic convention of 1882 we hold to the use of both gold and silver as the standard money of the country and the coinage of both gold and silver without discriminating against either metal or charge for mintage, but the dollar unit of coinage of both metals must be of equal intrinsic and exchangeable value, and we demand that all paper currency shall be kept at par with and redeemable in such coin. And we favor such legislation as will faithfully carry out these pledges to the people.

5. We demand such changes in our national legislation as will authorize the election of United States senators by direct vote of the people, and we commend the house of representatives in congress for the passage of a bill for this purpose by the requisite two-thirds majority.

6. We favor just and liberal pensions to deserving veterans, and we congratulate the democratic congress and president upon the passage of a law declaring a pension to be a vested right.

7. We condemn the deceptive republican state legislation known as "the mulct law" as hypocritical legislation the sale and at the same time prohibiting the manufacture of intoxicating liquor within the state, discriminating as to the will of the majority in cities and rural communities and suspending the operation of a penal statute for a money consideration. We favor the repeal of the present prohibitory law, and the democratic party of Iowa still adheres to its position that in the interest of true temperance license with local option in townships, incorporated towns and cities is the best solution of the liquor question, and that in such local option there should be no request that more than a majority of voters shall be necessary to place the traffic under the control of law and police regulations in municipalities. We condemn the cowardice of the republican party for the failure in its recent convention to make an expression on this most important subject.

8. We again demand that our state institutions be left to the management of a single nonpartisan board of control. That the present trustee system be abolished; that until this is done we can expect no relief from the reckless expenditure of money in behalf of the several institutions, the corruption they cause in our state legislature, the corruption and mismanagement of the institutions themselves, and the disgraceful and partisan quarrels constantly arising among the officials, thereby destroying in a great measure the benefits we should derive therefrom.

9. We denounce as un-American any society or organization that is pledged to deprive any citizen of his right to vote or hold office on account of his religious beliefs or nationality.

10. We condemn the extravagance of the last republican legislature of this state, whereby the tax levy of the state will unnecessarily be increased by nearly \$500,000.

Iowa People's Party.

Adopted at Des Moines, Sept. 4.

The people's party of the state of Iowa in convention assembled reaffirms its devotion to the true principles of human government declared in that second declaration of independence, the Omaha platform of 1882, and especially to that party which declares:

1. For the immediate free and unlimited coinage of silver at the ratio of 16 to 1.

2. We oppose the issue of United States bonds under any pretext whatever. In the midst of a monetary contraction and a panic we are opposed to an increase of railroad rates in Iowa, and demand a maximum 2-cent

passenger rate and a mileage book good on all railroads.

3. On the payment of pensions to disabled union veterans there should be no discrimination on account of rank.

4. We believe the people should have the power to propose legislation as well as vote direct upon all general laws passed by legislative bodies, and upon the foregoing political propositions, which we believe to be eminently just, we invite the active co-operation of all good citizens.

Iowa Prohibitionists.

Adopted at Des Moines, June 27.

Recognizing Almighty God as the source of all authority and his word as the supreme law and the state as under divine obligation to promote the well being of its citizens by laws, just and equal to all, the prohibition party in delegate convention assembled this 27th day of June declares:

1. The federal government should immediately repeal the internal revenue laws and prohibit the manufacture and sale of alcoholic liquors in the territories and the District of Columbia and should forbid their importation, exportation and transportation.

2. The so-called mulct law enacted at the demand of the liquor power is an outrage upon the moral citizenship of the state and the proposition to resubmit the prohibitory amendment a mendacious political trick to palliate that outrage. The mulct and pharmacy laws should be repealed. The governor should be given the requisite authority for the full enforcement of the prohibitory law and the state should undertake the manufacture and sale of alcoholic liquors for medicinal and mechanical purposes.

3. We believe that intelligence should be the test of citizenship but that all limitations of the privilege of the franchise on account of sex should be removed.

THE TARIFF.

4. The tariff should be levied only as a defense against foreign governments which levy tariff upon or bar out our products from their markets, revenue being incidental. The residue of means necessary to an economical administration of the government should be raised by levying the burden on what the people possess instead of upon what they consume.

5. The money of the country should consist of gold, silver and paper to be issued by the general government only and in sufficient quantities to meet the demands of business and give full opportunity for the employment of labor. To this end an increase in the volume of money is demanded. No individual or corporation should be allowed to make profit through its issue. It should be made a legal tender for the payment of all debts, public and private. Its volume could be fixed at a definite sum per capita and made to increase with our increase in population.

6. There should be such legislation, federal and state, as will make it impossible for common carriers to give one shipper an advantage over another and will reduce earnings to a fair profit upon the actual cost of constructing and operating carrier systems.

7. The government should immediately resume possession of all unearned grants of land made to corporations or individuals and in the future the public domain should be reserved for those who are to become settlers thereon.

8. Such constitutional changes should be made as will provide for the election of senators of the United States by popular vote.

9. Public office is a public trust. Fitness and not party service should be the condition

of holding it. Offices under appointment and which do not demand the ploy of administration should be vacated only upon cause shown before a court of inquiry. Political assessments of public officials and solicitations of such political campaign funds should be prohibited by law.

10. Public funds should be used to maintain only such institutions as belong to and are conducted by the state.

11. The nation should ever remember with gratitude those who periled their lives in its defense and provide with generous hand for their support and the support of those dependent upon them.

12. We defend the divine right of all to one day's rest in seven and we demand the enforcement of existing Sabbath laws against all forms of Sabbath desecration.

13. Believing that these declarations are in accord with wholesome legislation for the promotion of the moral, industrial and commercial interests of the nation and for the abolition of class distinction, we earnestly invite our fellow-citizens to unite their ballots with ours in giving them effect, to the end that we may be a free and equal and a prosperous people.

Michigan Republicans.

Adopted at Grand Rapids, July 31.

We, the representatives of the republican party of Michigan, in convention assembled, hereby affirm and renew our faith and hope in the cardinal principles and purposes of the republican party, the principles which have made our country great and prosperous, and the purposes which will lead it from the present most unhappy and demoralized era of democratic misrule out again through night to light, into an era of hope and happiness and prosperity for our country and our state.

We heartily approve of the administration of the duties of his office by Governor John T. Rich, and unreservedly commend his attention to public interests and his prompt and fearless performance of every duty devolving upon him.

PROTECTION.

We reaffirm our adherence and increased devotion to the American doctrine of protection. We believe that the present unhappy industrial condition of our country is in great part due to the threat and purpose of the democratic party to destroy the American system of protection. We believe that all articles which cannot be produced in the United States, except luxuries, should be admitted free, and that on all imports coming in competition with the products of American labor there should be duties levied equal to the difference between wages abroad and wages at home. We believe that the doctrine of reciprocity, as advocated by that matchless statesman, James G. Blaine, should under our protective system be the policy of our government and applied in our trade relations with other nations.

ARBITRATION FOR LABOR DISPUTES.

We recognize that the employment of both capital and labor is necessary for the peace and prosperity of our people, and that the enactment of such laws as will properly and widely avoid and settle labor difficulties is one of the duties of the republican party, which has always been and still is the friend of the humblest toiler. While we believe that government was instituted to protect the weak against the strong and to substitute right for might, and that it is, therefore, the duty of the state to regulate all corporations and combinations so as to protect every right and liberty of the laborer, we insist that law and

order must be maintained, and that the ballot-box and court of justice should not be sword and torch must settle economic differences. We believe in arbitration as one of the means to solve labor disputes, and favor the enactment by the legislature of laws to carry out the provisions of section 23, article 6, of the constitution of the state of Michigan, which provides for establishing courts of conciliation with such powers and duties as shall be prescribed by law.

While we recognize the value and worth of the great body of naturalized citizens and people who have sought with a patriotic heart and adopted this as their home and country, we believe in protecting American wage-earners and the peace and prosperity of this nation against the evil effects of indiscriminate immigration, from the pauper and criminal classes of Europe, by wise laws that shall properly restrict and regulate immigration.

We believe in the protection and elevation of the standard of American citizenship and that the safety of this republic depends upon the intelligence and loyalty of its supporters; that it should be sustained for the welfare and happiness of its people, and that for the preservation thereof the right of suffrage should be limited to those who have fully acquired American citizenship.

We believe that the security of life, the free exercise of personal rights, and the enjoyment of equal opportunities before the law are the essence of liberty and should be the first care of all governments; that as there can be no liberty without free speech and the free exercise of the personal and political rights of the citizen, we denounce the republican democratic party in the repeal of election laws, and declare that such action is an invitation to falsify by fraud and violence the will of the people, and we demand the enactment and enforcement of laws that shall protect the citizen of the republic at home as well as abroad.

We believe in the use of gold and silver as money metals, to be maintained in circulation on a perfect equality and interconvertibility. We recognize the so-called silver question as one of the paramount issues of the day and believe that the people of this state and country can and do look to the republican party, the party of ability and progress, as the only party that can give a wise and adequate solution of this problem. We therefore pledge the republican party of Michigan to use every effort in its power to restore silver to its historic position in the United States as a money metal. We pledge this in the belief that permanent prosperity will not be assured or justice done until silver takes its place side by side with gold as one of the two great money metals of the world.

Intelligence from authentic sources and through authentic channels having reached this country that the people of the Hawaiian Islands, after a peaceful revolution, did on the 4th day of last July, the natal day of this great republic, issue through their constituted authorities their proclamation of independence and announce to the nations of the earth their establishment of a free and independent republic among the nations of the world, we, delegates of the republican state convention of Michigan, representing a large majority of the liberty-loving people of one of the brightest stars in this sisterhood of states, send a hearty greeting and welcome to our young sister republic of the seas, and assure her of our most earnest sympathy and best wishes for a glorious future.

We recognize the republican press of this state as one of the most important and influential factors in the success of the republican party, and that a closer relationship between

the party organizations of the state and counties and the republican press, to the end that the latter may receive the recognition to which it is entitled in the conduct and management of the campaign. We believe in the honesty and integrity of the republican press of Michigan and desire to take advantage of this occasion to give formal expression of our high appreciation of the invaluable services rendered the party in the past and to be rendered in the future.

Michigan Democrats.

Adopted at Grand Rapids, June 28.

The democratic party of the state of Michigan, in convention assembled, declare that we believe there are at this time certain principles to be settled by the people, through their government, and that such principles are important and should be approached and considered with courage, candor and deliberation. Therefore, with malice toward none and with charity for all, we resolve as follows:

1. We congratulate the people of this country upon the successful election of an administration pledged to a system of government which has among its cardinal principles the expenditure of public money only for the actual necessities of such government, when administered with the strictest economy.

TARIFF.

2. We denounce as undemocratic and opposed to the constitution of the United States the system of taxation upon consumption, as advocated by the republican party, by which the money of the poor is wrested from them to enrich private individuals and corporations, thereby benefiting one class at the expense of another. We therefore reaffirm the principles upon tariff taxation that were adopted by the democratic national convention at Chicago in 1892, and repudiate any departure therefrom. We declare in favor of the free, untrammelled and universal tariff that will permit the debtors to pay their debts upon the same basis in which they were contracted.

4. We demand that, henceforth, the issuing of all circulating medium be made under the acts of congress, through the national treasury in such amounts as the business wants of the country may require and it shall be full legal tender.

5. We favor home rule and the adoption of laws providing that changes in municipal charters shall be submitted to the approval of the people of the city to be affected thereby and we condemn in the strongest manner the local gerrymanders and partisan changes made in municipal charters by the republican legislature.

6. We declare in favor of the time-honored principle of democracy, in favor of religious liberty, and oppose any effort on the part of any one that would make any man's religion a test to hold office in this country.

WHEREAS, It is charged that certain corporations in the upper peninsula dominated by English and eastern capital have maintained possession of many thousands of acres of valuable timber and mineral lands, the equitable title whereof is in the United States;

Resolved, That we call upon the present administration and our senators and representatives to take such measures as will bring about a speedy restoration of all such lands to the public domain for the benefit of actual settlers, that carry out in full the policy inaugurated by President Cleveland during his first administration, which stood in striking contrast to the perfidy of past republican administrations on this important question. We deem it incumbent upon the democratic

party to denounce the lavish distribution of our public lands by the republican party among alien corporations, to the detriment of our own citizens, who should alone acquire title to them.

8. We want no more makeshifts and ineffective legislation, in form merely, agricultural trusts and monopolies. We demand practical and direct laws which will put an end to schemes which take honest dollars from the people by combination without return in value of any kind. We believe that the practice of investments in watered stock, which do not represent an honest return for every dollar offered to the people, should be forbidden by law and the scheme for such robberies punished.

9. The senate of the United States, largely through the influence governing the selections of its members during the past decade, degenerated and fell far from the high place it was intended by the constitution to occupy as a cardinal branch of the federal government into a retreat for protected millionaires, who are unmindful of the interests of the mass of the people, with a view of improving and elevating the character and influence of that body, we recommend the nomination of candidates for senator by the representatives of the people in state convention.

10. We denounce all fraudulent alterations of election returns on amendments and demand that all state officers who may have been guilty of the same shall receive criminal punishment. There is no politics in committing of crime and criminals should be punished as the laws provide.

11. New laws should be passed by the next legislature of the state of Michigan providing better safeguards against such fraudulent election returns.

12. In these days when outside the cost of mere transportation to the seaboard the products of the west and south are taxed by corporate rings, in terminal charges, in their effort to get their products to the markets of the world, more than one-fourth per annum of the total ultimate cost of a free canal to tidewater from the lakes, we of the northwest demand an open waterway for shipment to the ocean. The highest estimate of such cost is \$400,000,000, and that work of necessary public improvement will give work to an army of unemployed. In this position we reaffirm the principles of that great democrat, DeWitt Clinton, when he successfully carried through the most popular and beneficial enterprise of his age, the Erie canal.

13. We indorse Grover Cleveland as our leader and as president of the United States, and as ever, since 1894, we are unfaltering in our faith in his patriotism, his far-seeing statesmanship, his unswerving honesty of intellect and of heart, and his splendid courage and sterling democracy. We pledge to him and to his entire administration our undoubting and devoted support.

14. We declare in favor of legislation which will bring about a fair system of arbitration to settle difficulties that may arise between capital and labor.

15. We declare in favor of liberal pensions to soldiers of the United States army, and believe the per diem pension bill before congress will fully cover all claims.

PROTECTION DENOUNCED.

16. We denounce the system of protection, a system born and kept in operation because of promises that it would benefit our farmers, mechanics and laborers, and by the very men making these promises, while insisting that duties on foreign goods should virtually be prohibitive, have constantly had emissaries in foreign lands charged with the commission of having and shipping cargoes of cheap

laborers free of duty to our shores, thus driving American workmen from employment, including those foreigners who came to our country, not as chattels, but to make it their home and their country, and to-day, after a trial of a third of a century, this system has resulted in princely fortunes and palatial homes for the favored few; but on the other hand the masses are in distress, our poor-houses are filled to overflowing and our roads and rivers are being paraded by soldier and sailor Coxeyites. We denounce the attempt of republican managers to hold the democratic party responsible for the recent panic, and we appeal to the good sense and the manhood of our workmen not to be deterred from insisting on cheaper and better clothes and better food by the unpatriotic and inhuman acts of closing mills and factories for the express and only purpose of forcing congress to permit these favorites to continue their system of extortion, greed and robbery. For thirty years the tariff of a republican authority, our farmers and laborers have been afforded unusual advantages by the system of protection in our own state and under laws made by a republican congress, starvation has been the lot of men, women and children in protected districts. With democratic legislation upon the tariff question of the character pointed out in our national convention, our laborers would have remunerative employment, mills would run night and day to supply the markets of the world, monopolies and trusts would be creatures of the past, manufacturers would no longer be able to manufacture poverty enough in six months to supply the demand for twelve and make more money with closed mills and idle men than if they had run a year; farmers and manufacturers alike would prosper and every industry would meet its fair reward.

If. We invite the attention of the voters of this state to the provision of the lavish appropriations and expenditure of the republican administration of this state with the strict economy of the democratic administration of Gov. Winans.

18. We deeply deplore the recent assassination of that good man, President Carnot, of France, and as representatives of one of the greatest states of the republic of America we send our condolence to the republic of France. We emphatically declare against the republican methods of unlawfully converting the state public school lands into a public debt.

Michigan Populists.

Adopted at Lansing, July 4.

The people's party of the state of Michigan, in convention assembled on this anniversary of American liberty and independence, affirms its allegiance to the Omaha platform, and to those pure principles of government found in the Declaration of Independence—that all men are created free and equal, that they have the right to life, liberty and the pursuit of happiness, the right to labor and to enjoy the fruits of their labor.

To secure these rights governments are instituted among men deriving their just powers from the consent of the governed. But when a long train of abuses and usurpations, pursuing invariably the same object, evinces a design to reduce them under absolute despotism, it is their right and their duty to throw off such government for their future security.

The history of the United States for the past thirty years is a history of repeated wrongs, injuries and usurpations on the part of plutocracy, having as a direct object the concentration of all wealth in the hands of the few, and the impoverishment and enslaving of our people.

To prove this we submit the following facts: They created two kinds of money during the war, one for the banks and the broker and the other for the soldier, laborer and farmer.

They created the national banking system and a bonded debt, thereby enslaving the people to the money power.

They have given away to railroads and sold to aliens every foot of arable land that should have been held as homes for our people.

They have contracted and destroyed the money of our country and depreciated and degraded silver, shrinking the value of labor and the products of our farms, thereby increasing the burden of debt.

In the interest of capital they established emigration bureaus in every country of the old world, urging and inviting underpaid and pauper labor to come to America in order to depress the price of labor in the United States.

They have enacted laws, both state and national, that give shameful advantages to corporations, syndicates, and trusts, who are favored with legal license to rob the people; our presidents, senators, members of congress and state legislators are but creatures of the money power, bought outright with money given as campaign funds, blocks of stock, etc. Our government has degenerated to a conspiracy of the rich, who, under the sign of state, only do whatsoever pleases themselves and seek through deceit and all attainable means to secure to themselves all the wealth, and to misuse to their own advantage the persons of the poor, and to obtain for the lowest possible price their work and the product of their labor.

They have enacted unequal and unjust laws that tax the poor and permit \$42,000,000,000 of wealth to escape taxation.

They use our courts of justice, the army and navy, the state militia and hired thugs, and called deputies to imprison and shoot down the laboring man, but never against capital in its aggressions.

We denounce the republican party for its subservency to Wall street and the moneyed interest of this country and England. For the past thirty years all laws enacted by that party have been against the interests of the common people. It is directly responsible for the concentration of the wealth in the hands of the few.

It has made 4,047 millionaires and 8,000,000 American freemen paupers. It has given into the hands of less than one-ninetieth of our people over three-fifths of our \$65,000,000,000 of wealth.

It is the father of the tenant farmer, the scab workman and the tramp.

It has made the temple of liberty erected by Abraham Lincoln, but an abiding place of knaves who chatter of party greatness and party heroes; of protection to infant industries and American labor.

We denounce the democratic party for its insincerity and imbecility; its leaders, like those of the republican party, are the property of the plutocracy of America.

Democracy is a political sham. Its followers live upon gases exhaled from the tombs of its statesmen, its Jeffersons and Jacksons, upon hopes of office, upon false promises, upon means which it has not earned and upon theories which it does not practice. It advocates the cause of the people before election, yet when placed in power it is against them.

We denounce both republican and democratic parties as being directly responsible for the deplorable conditions existing to-day that threaten the individual with untold suffering and the government with revolution.

Lines must be drawn, and all men must get on one side or the other. They must cease fly-

ing from one evil to a greater each succeeding four years. They must unite with the ballot.

Special advantages to none, equal opportunities to all. Under this banner we fight this fight. There must be no masters and no serfs in America. Oppression and outrage must cease.

Michigan Prohibitionists.

Adopted at Kalamazoo, Aug. 8.

The prohibition party of Michigan, assembled in state convention at Kalamazoo, Aug. 8, 1894, recognizing Almighty God as the primal source of all just political authority and gratefully acknowledging His good providence in the organization and growth of our party, hereby renew our declarations of fealty to the national party and formulate the following summary of principles:

1. The licensed liquor traffic debauches the citizen, creates the slums, corrupts the legislator, defies the law and breeds anarchy. The liquor power is the tyrant of politics and parties, the foe of municipal reform, the ally and support of kindred evils, and a menace to the well being and perpetuity of the government. We therefore insist upon the complete outlawry of the whole business of manufacturing, transporting and vending of alcoholic beverages in municipality, state and nation by statutes suitably framed and faithfully enforced through the legitimate channels of government. We declare all legal methods of treating this monstrous public evil, which are not strictly prohibitory, to be erroneous, vicious in principle, evasive, misleading, powerless for good and to merit the unqualified condemnation of all candid citizens.

2. There can be no greater peril to the nation than the existing democratic and republican competition for the liquor vote; moreover, all experience shows that any party not openly opposed to the liquor traffic will engage in this competition and will court the favor of the corrupt and criminal classes and thus barter away the purity of the ballot, public morals and almost every object of good government, for party success. Therefore all who in any way contribute to the success of such a party must, regardless of their personal character, be held responsible for the evil consequences.

The money of the country should be issued by the United States government only, and should be a full legal tender for the payment of all debts, public and private. It should consist of gold and silver, with free and unlimited coinage of each at the ratio of 16 to 1, supplemented by a full legal tender greenback and fractional currency in sufficient amount to maintain a uniform circulation of \$50 per capita.

4. Intelligence should be the test of citizenship and civil and political rights should not be abridged because of sex. Ten years bona fide residence should be required for naturalization, and none should be allowed to vote until fully naturalized.

5. We favor per diem service pensions for all honorably discharged union soldiers and sailors without reference to rank and to their widows with adequate special compensation for injuries and diseases received in service.

6. We favor the establishment of postal savings banks.

LABOR AND CAPITAL.

7. Disputes between capital and labor should be adjusted by public boards of arbitration. Since corporations are created by law, compulsory arbitration of differences arising between them and their employees may properly be required as a condition of their existence. We favor the establishment of courts of

reconciliation with large powers for the amicable and inexpensive adjustment of disputes and controversies.

8. We declare ourselves in favor of placing the national, state and local government directly in the hands of the people and to this end favor the election of president, vice-president and United States senators by direct vote of the people and also the adoption of the methods of legislation known as the initiative and referendum, also proportional representation and such constitutional changes as may be necessary to this end.

TARIFF.

9. The tariff question is the source from which the republican and democratic parties draw sustenance and life. Without it and without sectional strife both must die. Its constant agitation and unsettled condition is a fruitful cause of business uncertainty and depression, hesitancy in investments, financial panics and lack of employment. It has caused the people directly and indirectly in the past two years enormous financial losses. To avoid these evils and enable our industries to return to and remain upon a secure basis and to furnish steady employment for labor, a certain and a constant market for our products of industry, we declare for the elimination of the tariff as a party question, demand its divorcement from politics and its permanent reference to a nonpartisan commission for gradual adjustment from time to time as the changing conditions of trade and revenue require.

10. We are in favor of honest and efficient civil-service reform and of its extension to all classes of government employees.

11. We demand the calling of a constitutional convention in Michigan and condemn the attempt of the legislature to thwart the will of the people expressed at the ballot-box in 1892 in favor of such convention.

12. We are opposed to trusts, artificial monopolies and other combinations to raise prices of articles of necessity. The railroads, telegraph, telephones and other institutions and industries of a public character and necessity when they become monopolies to the exclusion of competition, should be controlled by the government and should extend to government ownership if necessary for the protection of the public.

13. The fostering and extension of common schools under the care and support of the state to supply the want of a general and liberal education is the primary duty of good government. Furthermore such schools should be taught exclusively in the English language, and we are unqualifiedly opposed to the appropriation of public funds for the support of denominational institutions of any kind.

14. It may well go without saying, that the democratic and republican parties are both corrupt and untrustworthy, as the liquor trade, that prime cause of social vice and political depravity, has steadily increased in about equal ratio under the administration of each of them during the past quarter of a century. Besides, their charges of all kinds of malfeasance and venality perpetually made against each other are so sweeping, scathing, bitter and true and withal so notorious that we are spared the disagreeable task of repeating the villainous and numerous specifications.

15. We favor the immediate enforcement of the collection of the debt due the United States by the Pacific railroad company, the forfeiture of all unearned land grants and the limitation of the corporate and private ownership of land.

16. We declare for rigid restrictions of immigration, the absolute prevention of criminal and anarchistic immigration and the sanitary inspection of all immigrants.

17. While it is in the pleasure to commend the course of the present state administration regardless of motives, in seeking to unearth the certain election frauds alleged to have been committed by either incompetent or designing officials of the two old parties at the elections of 1891 and 1893, yet fidelity to truth and a proper regard for the public honor demand that we condemn in unequivocal terms the unmistakable trucking to the liquor power, which is manifested in failing to attempt to bring to justice the more guilty perpetrators of worse frauds which are believed to have defeated the prohibition amendment in 1897. We are therefore constrained to say to his excellency Governor Rich: "These ought ye to have done, and not to leave the other undone," and we solemnly point the people of the state to the peril of retaining such men in office.

Minnesota Republicans.

Adopted at St. Paul, July 11.

The representatives of the republican party of the state of Minnesota, in convention assembled, deplore the depressed conditions of American industries under democratic misrule by theorists and reckless and dishonest experimenters in statesmanship. Discredited in foreign diplomacy, our home industries prostrate and our people idle, there is no aspect of public affairs which the patriot can contemplate with satisfaction.

We contrast with our present distracted condition the decades when, under the guidance of the republicans, we were blessed with honorable consideration abroad and peace and plenty at home; when wages were high and all our people contented and happy because prosperous.

The republican party, which took labor from the auction block and made it honorable and which bases its great economic doctrines on the maintenance of an American standard of wages for American producers, is to-day, as always, the party of all working men. We pledge ourselves in the future, as in the past, to such care for the interests and rights of all classes of our people that law and order will be maintained; that labor will be assured of its just reward, unrobbed by monopolies and trusts, and industry, secure from danger, shall be again free to resume its activity, beneficent alike to employer and wage-earner.

TARIFF.

1. We favor a protective tariff under which, upon imports competing with the products of American labor, duties are levied equal to the differences between the wages and labor at home and abroad. And as to imports, other than luxuries not so competing, we believe that the same should be admitted free of duty, so far as the requirements of the government may permit. But the principles of reciprocity should be so incorporated in our tariff laws as to give new and enlarged markets for the products of this country.

2. The republican party believes in the use of both gold and silver as money, maintaining the substantial parity of value of every dollar in circulation with that of every other dollar. It believes in bimetallism and that the restoration of silver as ultimate money to the currency of the world is absolutely necessary for business prosperity, proper rates of wages and the welfare of the people.

Holding these views, we believe it should be the policy of the United States to do everything in its power to promote the restoration of silver to the world's currency.

3. We demand a free ballot and a fair count and for every citizen the right, unmolested, to cast one ballot in any election, and to have that ballot honestly counted as cast. The mission of the republican party will not be ended until in every state of the union all citizens, black or white, native or foreign-born, shall be equal in the courts and at the ballot-box.

The democratic party, united in nothing else, was unanimous in the repeal of the federal election laws, thus openly confessing itself the party of fraud.

4. We are opposed to all trusts and combinations seeking to control or unduly enhance the price of commodities, and we are in favor of eradicating or repressing the same by suitable and effective laws. The manufacture of twine at our state prison has been and still is a most effective means to protect our farmers against the monopoly of the twine trust.

LABOR QUESTION.

5. The laboring and industrial classes are entitled to all proper and necessary protection, and therefore we are and have been in favor of laws (1) to protect the health, the life and the limb of all employees of transportation, mining and manufacturing companies; (2) to establish and maintain boards or tribunals of conciliation or arbitration, whereby the disagreements and differences between employers and employees may be settled and adjusted by peaceful means without strikes or lockouts; (3) to reclaim and to preserve the public domain for actual settlers under homestead laws.

6. All proper and necessary measures should be adopted and enforced to exclude from our shores all paupers, criminals and other dangerous and undesirable classes of immigrants.

7. The farmer and the laboring and industrial classes are entitled to cheap and suitable facilities for storing, shipping and marketing their products, and therefore we are and have been in favor of such legislation as is requisite and essential to secure promptly and without discrimination and at reasonable rates convenient and ample elevator and warehouse accommodations and proper and speedy transportation to all accessible and appropriate markets.

8. Telegraph, telephone, railroad and all other transportation companies and all corporations or individuals performing any public service or employment are amenable and subject to public control; and we favor the enactment and enforcement of such laws as will compel them to render efficient and approved service at fair and reasonable rates without favor or discrimination as to persons or places.

9. The pensions awarded by a generous nation to the disabled and unfortunate veterans of our late war, their widows and orphans, should be given them with a fair and generous hand, and not grudgingly and with restraint. We deprecate the parsimonious, supercilious and harassing attitude of the present democratic administration in its treatment of the beneficiaries of our pension laws.

PRINCIPLE OF ARBITRATION.

10. The republican party has always advocated equal rights and privileges for all the people without any distinction whatever as to classes or individuals. We believe in the fullest rights of labor and of laboring men, and are opposed to class privileges of all kinds. The American workmen are the producers of our wealth and greatness and we are and should be solicitous for their welfare and happiness. We earnestly advocate such legislation as will secure the peaceful adjustment by arbitration of differences arising from time to time between employers and employees, and condemn unqualifiedly capitalists and others

who refuse to settle such differences along these peaceful lines. The wanton destruction of property, whether private, corporate or public, should be prevented and mob violence promptly suppressed at all hazards. We stand for law and order, for the punishment of crime and for the lawful redress of all wrongs.

11. There are now in this state about 4,000,000 acres of railroad lands which are not held or used for railroad purposes and do not contribute to the earnings tax or to any other state or local tax; we demand that said lands be taxed by the ordinary method of direct taxation, and that such tax be in addition to the present gross-earnings tax upon railroad property.

12. We earnestly and emphatically urge the adoption of an amendment to the national constitution extending the term of office of the president of the United States to six years; and providing that no person who has been president of the United States shall thereafter be eligible to the same office. We therefore respectfully request congress to propose an amendment to the national constitution that will speedily accomplish this end.

13. We commend and indorse the wise, economical and statesmanlike administration of the affairs of the state of Minnesota under Gov. Knute Nelson. We commend the wise and patriotic course of our senators, Cushman K. Davis and William D. Washburn, and our republican representatives, J. A. Tawney, J. T. McCleary, A. R. Kiefer and Loren Fletcher in the congress of the United States upon all questions appertaining to the public interests and the welfare of their constituents. They have at all times fully and fearlessly discharged their duty to the people, and we give them our hearty commendation.

Minnesota Democrats.

Adopted at St. Paul, Sept. 5.

The democrats of Minnesota, by their delegates in state convention, do declare our allegiance to the principles of our party as expressed in the platform of the national democratic convention in 1882.

We are in entire sympathy with the efforts of the democratic party to overthrow the oppressive republican protective tariff system.

We are proud of the splendid battle waged and won by the democratic party against the combined forces of monopolies and trusts, created by republican legislation.

We heartily commend the wise, able and patriotic administration of President Cleveland.

FREE COINAGE.

We are in favor of the free coinage of silver wherever it can be done consistently with the maintenance of a sound and safe currency.

We favor an amendment to the constitution providing for the election of United States senators by a direct vote of the people.

We demand the enactment of such laws as will permit the investment of public moneys in municipal and school securities of our own state.

We further demand the most rigid economy in the administration of public affairs.

We denounce the American Protective association and all secret political organizations as unpatriotic and un-American.

Resolved, that it is the purpose of the democratic party that every true soldier who served his country well in preserving the union is entitled to the gratitude of the American people and the support by the government, under generous pension laws.

We congratulate the workmen and women of the land on the dawn of a new day of promise by the passage of the democratic

tariff bill. We reassert the determination of the democracy of Minnesota to strive in every way to pass laws that will meet the approval and improve the opportunities of all who toil for bread.

We favor the taxation of railroad lands, provided the same can be done without the impairment of the present gross-earning system of taxation of railroads. That laws be enacted which will compel the owners of mines and mineral lands to bear a just proportion of taxation with other property in the state.

We believe in the principles of arbitration and conciliation in adjusting the disputes between labor and capital, and we condemn any individual or corporation who is unwilling to submit such disputes to a fair and honorable adjustment.

Minnesota Populists.

Adopted at St. Paul, July 11.

Being imbued with supreme faith in the righteousness of our cause, the people's party of Minnesota, in second state convention assembled, desirous of preserving to ourselves and posterity the blessings of peace, order, law and civilization do hereby put forth the following declaration of principles and ask the support of all persons therefor:

GOLD AND SILVER.

1. We reaffirm the great principles set forth in the platform of the national people's party, adopted at Omaha, July 4, 1882, to wit: We demand a national currency, as sound and flexible, a full legal tender for all debts, public and private, not less than \$50 per capita, issued by the general government only, direct to the people by payments in discharge of all its obligations and for public improvements. We demand a free and unlimited coinage of silver and gold at the present legal ratio of 16 to 1. We demand a graduated income and inheritance tax. We demand the establishment of government savings banks for the safe deposit of the savings of the people and to facilitate exchange. We demand the government ownership and operation of railroads, telegraphs and telephones. Land and all natural resources of wealth are the heritage of all the people, and should not be monopolized for speculative purposes nor owned by aliens, therefore we demand that all land now held by railroad and other corporations in excess of their actual needs, and all lands held by aliens be reclaimed by the government and held for actual settlers only. We demand the election of president and vice-president and United States senators by direct vote of the people.

2. Obedience to and enforcement of law is right; it embodies the best citizenship and the noblest patriotism. We demand nothing more and will be satisfied with nothing less, and we insist that this shall be required of all, regardless of their wealth or station in life, and we demand that our officials enforce all laws relating to and governing corporations, prohibitory trusts and other unlawful combinations and conspiracies against the public welfare.

3. We demand such legislation as will break up the great combinations which plundered the farmers for twenty-five years past, and secure to the agricultural population an absolutely free market for their cattle, wheat and other products.

TRUSTS AND SCHOOLS.

4. While we are ready to defend the general government in all its legitimate functions, nevertheless we regard its powers as limited by the terms of the constitution, and we are

opposed to the centralizing tendencies of the age, which are destroying the just powers of the several states

5. We arraign the republican party of Minnesota for the immense frauds committed upon the school and other lands of the state, aggregating probably millions of dollars, during the past thirty years, and we demand that a thorough investigation shall be made, and that the work already begun, which has returned \$30,000 in three cases alone into the treasury of the state, shall be continued until the last dollar has been recovered of the despoiled patrimony of our children.

6. We demand the most rigid economy in the administration of public affairs, together with such adjustment of taxation that the weight will be least on those who have least; that mortgaged land shall not be subject to double taxation; that concealed wealth shall be made to pay its just share for the support of government; that the ownership of real estate by nonresidents and aliens should be discouraged by proper legislation, and that the time of payment of taxes should be semi-annual.

7. We demand the taxation of the mining lands situated in this state, so that they will contribute equally with other property to the support of the state and local government.

8. Legislation has been attended with such venality, in the interests of corporations, that we demand that the people shall have the right to initiate needed measures of legislative reform, and that they shall have the right, by referendum, to veto, at the ballot-box, any law inimical to their interests.

9. That, inasmuch as the extension of the right of suffrage to women in school affairs has been productive of excellent results, we demand that there be no limitation upon suffrage dependent upon sex, believing in the doctrines of equal rights to representation should accompany taxation.

10. We demand the nationalization of the liquor traffic and its management by the state without profit.

11. That we affirm that we are opposed to the use of public revenue or funds for sectarian purposes of any kind whatever.

That we are in favor of establishing in our state a judicious management of our native forests, preventing their further monopolization, preventing fires and conserving our water systems for the benefit of the people at large.

That we recognize the injustice and wrong which monopoly has inflicted upon the workmen and women of this country, and we extend our sympathy to all who are endeavoring to prevent oppression, and to check the downward tendency of wages, already too small to sustain life and honor. We extend our sympathy to organized labor in its humane efforts to resist the aggressions of organized monopoly; and while we condemn violence and lawlessness, we believe that organized labor is in no sense responsible for the acts of the mob element with which a hiring press has sought to connect it. We therefore recommend to our suffering countrymen, especially those of the laboring classes, that peaceful and effective remedy for the wrongs which, in this country, the ballot gives to free men, and which destroys no property except watered stock, and injures no values except those of fiction and fraud.

That in the United States it is not a crime for the great mass of the people to unite to improve their material condition by peaceful and lawful means; and we cannot but regard the arrest of Mr. Debs and his associates as an unwise and unjust step, and a dangerous encroachment of the federal judiciary upon the rights and liberties of the people.

Minnesota Prohibitionists.

Adopted at St. Paul, July 17.

The prohibition party of Minnesota at state convention assembled, acknowledging Almighty God as the source of all true government, and His law as the standard to which human enactments must conform to secure the blessings of peace and prosperity, present the following declaration of principles:

1. We reaffirm our allegiance to the national prohibition party and the great principles for which it contends, chiefly the abolition of the liquor traffic.

2. We therefore declare for the abolition of the liquor traffic, the manufacture, sale, transportation, exportation and importation of intoxicating liquors for beverage purposes, in army, state and nation, and as American patriots and Christian citizens, in the name of God, protest against the license system as vicious in principle and powerless as a remedy. In legalizing the traffic in alcoholic beverages, the state is bargaining away the public health and public morals, which no community has a right to do, according to the decisions of the United States supreme court, and makes itself partner and participant in the debauchery of its citizens and the devastation of the home instead of establishing justice and insuring domestic tranquility. We believe that the sale of alcoholic liquor for mechanical and other legitimate purposes should be regulated as the sale of other poisons is regulated in the interest of public welfare.

THE TARIFF.

3. Tariff should be levied only as a defense against foreign governments which levy tariff upon, or bar out, our products from their markets; revenue being incidental. The residue of means necessary to an economical administration of the government should be raised by levying the burden on what the people possess instead of upon what they consume; and we favor a nonpartisan tariff commission of experts that shall be empowered to revise the tariff from time to time in accordance with these principles and for the protection of American labor.

4. The money and currency of the nation should be issued by the federal government alone, and should not be delegated to private individuals or corporations. Every dollar, whether gold, silver or paper, should be legal tender for the payment of all debts and taxes.

We demand the remonetization of silver in accordance with the laws of the nation as they existed prior to 1872.

In our judgment the recent increase of \$50,000,000 in the bonded indebtedness of the nation was unwise. We at the same time are positive in our belief that to turn into the legitimate channels of trade the enormous sum of \$1,700,000,000 per annum, which is worse than wasted, in the drink bill of the nation, and which amount exceeds the entire circulating medium of gold, silver and paper now in use in the nation, and the partial release of the nation from the direct cost of jails, asylums, etc., which of necessities, would solve the money question more rapidly than any other method offered to the American people.

5. No citizen should be denied the right to vote on account of sex, and equal labor should receive equal wages, without regard to sex.

FOREIGN IMMIGRATION.

6. Foreign immigration has become a burden upon industry and one of the factors in depressing wages and causing discontent, and we declare in favor of immigration laws so framed as to exclude the insane, pauper and anarchistic classes.

7. We demand the enactment and enforcement of more rigid laws which will prohibit child labor.

8. Arbitration is wise and Christian, and the most economical and humane method of adjusting differences between nations and between capital and labor, and compulsory laws to that end should be enacted as far as possible.

9. We demand liberal provision for public instruction in the English language, and are opposed to the appropriation of public funds for any sectarian purposes in the state or nation.

10. Recognizing the value of the services of our patriotic citizens who bravely defended the government and preserved the union, we favor the liberal pensioning of all needy veterans.

11. We demand greater economy in the administration of public affairs; the lopping off of useless officials and the cutting down of exorbitant salaries, and the payment of all official fees into the public treasury.

12. We favor the election of the president and vice-president of the United States and the United States senators by the direct vote of the people.

13. All persons should be protected by law in their rights to one day's rest in seven.

14. Speculations in margins, the cornering of grain, money and products and the formation of pools, trusts and combinations for the arbitrary advancement of prices, and the watering of stocks should be prohibited.

15. The recent "strike" on the part of the railroad conductors and their combined employes confirms us in the belief that all railroad, telegraph and other public corporations should be under the entire control of the government, and that as soon as practicable the government should own and operate these great lines of commerce of the country in the interest of the people, and without discrimination, under civil-service rules.

16. We insist that in this state the railroads should be required by statute to resume their common-law duties as common carriers, and especially to provide warehouses and elevators for the handling of all kinds of grain and produce for all persons, upon equal terms and without discrimination, and thus open to all people a free market for grain and produce.

17. Nonresident aliens should not be allowed to acquire land or real-estate interests in this country, and we favor the limitation of individual and corporate ownership of land. All unearned grants of land to railroad companies or other corporations should be reclaimed and held as homesteads for the people.

18. That we favor an amendment to the Australian ballot law of this state, striking out the fee required of candidates for office, as unconstitutional; and, if that cannot be done, we insist that the fee shall be reduced at least 75 per cent.

We declare in favor of the system known as initiative and referendum. We also favor such constitutional changes or legislation as will secure to political parties proportional representation.

19. We insist that all laws of this country should be observed and obeyed, not only by the laboring men, but by all men, including saloon-keepers and corporation managers, and we unreservedly condemn, at all times, the wanton destruction of property, whether private or corporate, and insist that riot and mob violence shall be promptly suppressed and punished. No party has the right to ask the vote of law-abiding citizens to help put it in power to make laws that when in power refuses or neglects to enforce the laws. We

arraign the managers of the republican and democratic parties of the past fifteen years as the agents and servile tools of trusts and railroad corporations, of the gold bondocracy and the saloon combine, and denounce them as a cause of the recent financial disasters, labor riots and disturbances. Their collusion with the lawless, vicious and immoral (for the sake of votes) and their refusal to enforce the laws against vice, crime and immorality, especially in the cities, has bred disrespect for all law and brought reproach upon the whole nation. Their protest against the admission of moral issues into politics is a confession of their moral degeneracy; and we renew our protest against these perils to tendencies, and invite all patriotic citizens to help us build a party that stands for law, order, justice and decency.

The government should establish postal savings banks, so that small deposits can be made without risk to depositors, as has proved beneficial in countries where tried.

Nebraska Republicans.

Adopted at Omaha, Aug. 22.

The republicans of Nebraska, in convention represented, deplore the disastrous results of the "chance" in the policies of the national government, decreed by the people at a time when the mental balance of the country was temporarily disturbed by the exhilaration of a long course of peace, progress and material prosperity and the clamor of demagogues and political quacks, and confidently appeal to the people of the state for a return to the conditions that existed prior to the elections of 1882.

THE TARIFF.

Dismayed by the financial revulsion that paralyzed the business centers of the country, when the results of the national and state elections made it certain that the policy of protection of home industries and the guaranty of public credit and a sound currency were about to be overthrown by a democratic president and a congress democratic in both branches, the leaders of the party wholly in power for the first time in thirty years, have had neither the courage to embody the principles set forth in their national convention at Chicago in legislation, or the wisdom to abandon their threatened raid on the industries of the country.

But they have kept the business interests of the people in suspense and uncertainty during twelve months of unprofitable debate over the work of framing a revenue bill founded on no definite or recognizable economical system, corrupt on its face, discriminating against northern industries for the benefit of the south, openly denounced by a majority of those whose votes carried it to its passage, and not only fraught with disaster to the people, but confessedly stamped with "party peridy and party dishonor," as an abandonment of the cause of a "tariff for revenue only," and the principles and pledges upon which they were placed in power. "How can they face the people after indulging in such base and dishonorable conduct in violation of principle," as are found in almost every paragraph of the sugar trust tariff bill.

In view of the practical results of a year and a half of democratic rule, we reaffirm with renewed faith and fervor the platform of the national republican convention at Minneapolis. We demand the restoration of the American policy of protection, and commercial reciprocity with our sister republics of Mexico, Central and South America and the governments of the West India Islands.

The republican party of Nebraska has always been the consistent friend and aggress-

sive champion of honest money, and it now takes no step backward. While we favor bimetallicism, and demand the use of both gold and silver standard money, we insist that the parity of the value of the two metals be maintained, so that every dollar, paper or coin, issued by the government shall be as good as any other.

We adhere to the doctrine that all railway lines are subject to regulation and control by the state, and demand the regulation of railway and transportation lines to such extent, and in such a manner as will insure fair and reasonable rates to the producers and consumers of the country. To that end we insist that the laws shall be enforced forbidding the fictitious capitalization of such corporations and that the constitution of the state shall be rigidly enforced wherein it is provided: "No railroad corporation shall issue any stock or bonds except for money, labor or property actually received and applied to the purpose for which such corporation was created, and all stock dividends and other fictitious increase of the capital stock or indebtedness of any such corporation shall be void."

We are in favor of the enforcement of all laws, whether they affect the individual or the corporation, and therefore demand the enforcement of the maximum rate bill passed by the last legislature, until the same is declared void by the courts or is repealed.

We are in favor of the enactment of laws by congress that will provide for the supervision, regulation and control of corporations engaged in interstate commerce, with a view of preventing the fictitious capitalization and excessive bonding of such corporations.

TRUSTS AND COMBINES.

We denounce all combinations of capital organized in trusts or otherwise to control arbitrarily the conditions of trade, and arraign as criminal legislation the manifest concessions of the tariff bill, now in the hands of the president, to the sugar and whisky trusts.

We recognize the rights of laborers to organize, using all honorable measures for the purpose of dignifying their condition and placing them on an equal footing with capital to the end that they may both fully understand that they are necessary to the prosperity of the country. Arbitration should take the place of strikes and lock-outs for settling labor disputes.

The extinction of anarchy is essential to the self-preservation of the nation, and we therefore favor the pending bill in congress for the exclusion of anarchists.

We recommend that the ensuing legislature submit an amendment to the constitution, to be voted upon by the people at the next general election, providing for the investment of the permanent school fund in state, county and school district bonds.

We believe that the industries of our state should be diversified, to relieve the masses of the people from dependence upon one class of agricultural products, subject to crop failures, and it being demonstrated that the soil of this state is adapted to the production of sugar beets even in dry seasons, a source of incalculable wealth, we favor legislation that shall bring to our people its full realization.

Ever mindful of the services and sacrifices of the men who saved the life of the nation, we protest against the illiberal and unjust policy of the pension department under the present administration and pledge anew to the veteran soldiers of the republic a recognition of their just claims upon a grateful people.

Nebraska Democrats.

Adopted at Omaha, Sept. 26.

We, the rank and file of the democracy of Nebraska, at last in convention assembled, send greeting to the common people, who constitute the strength of the democracy of the nation.

We renew our allegiance to the principles taught by Thomas Jefferson and courageously defended by Andrew Jackson, and we demand that the great political problems of the day be solved by the application of these principles to present conditions.

Believing that a public official is a public servant and deserving of praise or censure according to his acts, we commend President Cleveland for his honest and economical administration of the government, and dissent from such of his financial views as are repugnant to the teachings of the fathers and opposed to the welfare of the people.

• THE TARIFF.

Believing that "all men are created equal," and that all are alike entitled to the consideration of government, we denounce as unjust and unjustifiable the protective tariff system which, through the instrumentality of class legislation, robs the many for the benefit of the few. We demand a tariff for revenue only, and point to the Wilson bill as it passed the house of representatives as a reasonable fulfillment of the promises made by the democratic party in the campaign of 1892. While we do not condone the acts of those democratic senators who modified the Wilson bill in the senate, we accept the bill as it finally passed as the best measure attainable under the circumstances, and as a great improvement over the McKinley law.

We especially approve of the income tax and favor its retention as a permanent part of our revenue system.

We indorse the language used by the Hon. John G. Carlisle in 1878, when he denounced the "conspiracy" to destroy silver money as "the most gigantic crime of this or any other age," and we agree with him that "the consummation of such a scheme would ultimately entail more misery upon the human race than all the wars, pestilences and famines that ever occurred in the history of the world." We are not willing to be parties to such a crime, and in order to undo the wrong already done, and to prevent the further appreciation of money, we favor the immediate restoration of the free and unlimited coinage of silver and gold at the present ratio of 16 to 1, without waiting for the aid or consent of any other nation on earth.

We regard the right to issue money as an attribute of sovereignty and believe that money needed to supplement the gold and silver coinage of the constitution, and to make the dollar so stable in its purchasing power that it will defraud neither debtor nor creditor, should be issued by the general government as the greenbacks were issued; that such money should be redeemable in coin, the government to exercise the option by redeeming them in gold or silver, whichever is most convenient for the government. We believe that all money issued by the government, whether gold, silver or paper, should be made a full legal tender for all debts, public and private, and that no citizen should be permitted to demonetize by contract that which the government makes money by law.

We are in favor of the election of United States senators by direct vote of the people, and in case the senate refuses to allow an amendment which will secure the direct election of senators we are in favor of calling a convention of states to submit such an amendment for ratification by the states.

We are in favor of a constitutional amendment making the president ineligible for re-election.

We are in favor of the operation of the telegraph in connection with the postal system.

We are in favor of a liberal pension policy.

We are in favor of the arbitration of differences between corporate employers and their numerous employees.

We are in favor of the foreclosure as soon as due of the liens of the government against the Union Pacific and other Pacific railroads.

Believing that the duty of the representative is to represent the will and interests of his constituents we condemn as undemocratic any attempt by caucus dictation to prevent the representative from voicing the sentiments of his people on public questions.

We believe in the right of every individual to worship God according to the dictates of his own conscience, and we condemn as un-American and contrary to the spirit of our institutions any attempt to apply a religious test to the citizen or to the official. We appeal to all democrats who have been led into political hostility, to the members of any church to remember the principles of religious liberty promulgated by Thomas Jefferson and defended by the party which he organized.

We approve of the maximum rate bill passed by the last legislature and favor its re-enactment if it is declared void by the court on account of irregularities which can be remedied.

Nebraska Populists.

Adopted at Grand Island, Aug. 24.

We, the people's independent party of the state of Nebraska, reaffirm the principles laid down in the national platform adopted at Omaha, July 4, 1892. We emphasize the demand for the free and unlimited coinage of silver and gold at the present ratio of 16 to 1. We brand as treason to labor in every field and to the best interest of the whole country the unconditional repeal by congress of the purchasing clause of the Sherman act. We demand both state and national laws for the encouragement and promotion of irrigation of our arid and semi-arid lands. We demand that congress shall speedily pass a law by which the federal courts will be prevented from suspending operation of a state law at the dictation of corporations. We demand a liberal service pension to all honorably discharged union soldiers and sailors of the late war.

OWNERSHIP OF PUBLIC WORKS.

We declare for municipal ownership of street cars, gas and electric light plants and waterworks. We demand compulsory arbitration of all controversies between employers and employees. We heartily approve the course of Senator W. V. Allen and Congressman W. A. McKelghan and O. M. Kem for their fidelity and loyalty to our entire interests and we compliment Congressman W. J. Bryan who, elected as a democrat, has given strong support to many of our reform measures. We demand a more efficient administration of our state government and more strict accountability of money appropriated and expended. We reiterate our demand for a maximum freight-rate law or the enforcement of the one now on our statute books. We demand the enforcement of the present law for investment for our public school fund as directed and not through "bond investment companies" at a profit to speculators and money sharks.

We demand that all officers, both state and county, be paid a reasonable salary in accordance with labor to be performed and the amount of skill required, and that all fees be

turned into a general fund for state and county purposes. We commend to the favorable consideration of the state the building of what is known as the Gulf & Interstate railroad, now under process of construction. We demand that immediate steps be taken for relief of the drought sufferers of the state, and that some means be devised to give them employment and wages. Having stated our demands we cordially invite all persons who are in sympathy with them to co-operate with us regardless of former party affiliations.

Nebraska Prohibitionists.

Adopted at Lincoln, July 4.

The prohibitionists of Nebraska, in convention assembled, realizing that God's laws are the standard to which human enactments must conform to secure the blessings of peace and prosperity; and that the objects of government are to protect every citizen in the enjoyment of the legitimate fruits of his industry and the homes of the nation from whatever tends to destroy the family and render unfit for citizenship the coming generation; and to secure the most honest and faithful administration of the affairs of the government, declare:

1. The traffic in alcoholic liquors for beverage purposes is a public nuisance and should be suppressed by law. All laws attempting to regulate the traffic are contrary to the bill of rights and unconstitutional.

2. Woman should have the same means of protecting herself, her home, her children, her property and her happiness that man has. She is entitled to an equal voice in the government with man, and therefore the right to vote should not be withheld from her. No person should be allowed to vote who is not a citizen of the United States, and the general government should protect every citizen in the right to vote and have that vote counted.

3. The money of the country should be issued by the general government only. No individual or corporation should be allowed to make any profit through the issue. It should be made a legal tender for the payment of all debts, public and private, without exceptions in favor of contract stipulations. Justice and commercial prosperity demand an increase in its volume which should be fixed at a definite sum per capita. As a method of applying these principles we propose that the money of the nation consist of treasury certificates exchangeable for the purpose of foreign exchange only for gold bars of a given weight or for silver bars of equal commercial value, coin being used for subsidiary purposes only.

4. To secure depositors and regulate circulation of money we favor the establishment of banks owned and operated by the government.

TARIFF.

5. Tariff should be levied only as a defense against foreign governments which levy tariffs upon or bar out our products from their markets, looking to the ultimate repeal of all tariff laws as fast as agreement can be effected with other nations. As soon as possible the means necessary to an economic administration of the government should be raised by levying a direct proportionate tax on the accumulated wealth of the people instead of on the necessities of life which they consume, leaving all encouragement for new industries with the government and the generous contributions of the individuals or locations to be benefited thereby.

6. Trusts and combinations for the purpose of preventing competition, restraining production, arbitrarily advancing or depressing prices and interfering with the legitimate

laws of business are conspiracies against the government, and those participating in such practices should be punished as conspirators.

7. We stand unequivocally for the American public schools, taught in the English language, and are opposed to any appropriation of moneys from either the national, state or municipal treasuries for sectarian schools or other sectarian purposes.

8. The public means of transportation and communication have become a common necessity and should be operated in the interest of the people. To this end governmental postal telegraph and telephone systems should be established and the government should own and operate the railways.

PUBLIC LANDS.

9. The land, with its natural resources, is the heritage of the people and should be preserved from public, private or corporate speculation; to this end the government should own the coal lands in the United States. All unearned grants of land subject to forfeit should be reclaimed by the government.

10. All persons should be protected by law in their right to one day of rest in seven.

11. The contract convict labor system, through which free labor is discriminated against and speculators enriched at the expense of the state, should be abolished.

12. We believe that free expression of the popular will is essential in a representative government. Therefore we favor the adoption of the initiative and referendum.

North Dakota Republicans.

Adopted at Grand Forks, July 19.

Under the banner of the republican party the people of the United States, after a devastating war, took up the march of progress and for thirty years enjoyed peace and unexampled prosperity, now interrupted by the results of the last presidential election. To that party we again pledge allegiance and reaffirm our faith in the beneficence of its principles.

PROTECTION.

We especially assert our belief in this cardinal principle of the party. The safety of the republic, the prosperity of its people, the happiness of its homes depend upon the maintenance of American interests against foreign interests. Therefore, we earnestly, emphatically oppose the free-trade policy and single gold standard of Great Britain. On the contrary, we demand adequate protection for all home industries, north, south, east and west, so as to maintain the American standard of wages. To this end we favor a tariff on foreign goods competing with domestic goods equal to the difference between foreign and American wages. With the exception of articles of luxury, goods which by reason of climatic or other conditions cannot be profitably produced in this country should be admitted free.

By adherence to the republican principle of reciprocity, new and larger markets for our farm products can and ought to be secured.

We are opposed to the fiat paper-money doctrine of the populist party and believe in a metallic basis for our currency consisting of both gold and silver; the republican party of North Dakota demands the use of both these metals as standard money. We also demand that the mints be opened to the coinage of silver mined in the United States with such restrictions and under such provisions, to be determined by legislation, as will maintain the parity of values of the two metals. The purchasing and debt paying power of every dollar, must be always kept equal to that of

every other dollar. Congress should levy a tax on importation of silver sufficient to protect fully the products of our own mines.

We are opposed to the repeal of the state bank tax, believing that a return to wildcat money would lower the country's credit, flood the land with worthless currency and bring confusion, loss of confidence and national disaster.

LABOR.

Believing in the dignity of labor and the right of the workmen peacefully to contend for their full share of the product of their toil, we favor a code of arbitration or conciliation, state and national, by which both employee and employer shall be bound, and we recommend that congress so amend the interstate-commerce law as to provide for the orderly settlement of disputes between capital and labor.

By the enactment of the interstate commerce law a republican congress established the right of the federal government to regulate and control railroads engaged in interstate commerce. Such control should be freely exercised to the end that the people shall not be compelled to pay interest on watered stock and fictitious values, but that rates may be fair and equal for equal services.

The coal beds underlying the western half of our state will be an important factor in the development of this commonwealth; therefore, we recommend such legislation as will, by regulating freight rates, encourage the use of North Dakota coal and cause to be spent among our own people the millions now yearly sent east for fuel.

For the protection of depositors in national and state banks and to prevent the withdrawal of money from circulation, we believe that the federal and state governments should guarantee such depositors against loss, reimbursing itself by a tax on the bank.

We condemn the present democratic administration for opposing the reciprocity clause of the act of 1890. We condemn it for placing wool and other of our farm products on the free list. We condemn its disgraceful surrender to the rapacious sugar trust, the coal trust, the lead trust and other monopolies. We condemn it for its unpatriotic interpretation of the pension laws for the hardships which it persists in imposing on the feeble veterans. We condemn it for lowering the stars and stripes at Hawaii and for its attempt to replace a republican government by a re-elected monarchy.

In the Young Men's Republican league we welcome an efficient aid for political education and party success.

We recommend that at its next session the legislature enact a law requiring state, county and municipal treasurers to account for and cover into the treasury all interest and earnings of the public funds.

Realizing now, as heretofore, the evils of the public saloon, we favor the enforcement of our laws controlling the liquor traffic.

We commend to the favorable consideration of the next legislative assembly the question of granting suffrage to women.

North Dakota Democrats.

Adopted at Grand Forks, July 26.

We, the democracy of North Dakota, in convention assembled, reaffirm our faith in and adherence to the national democratic party and the platform adopted at the Chicago convention in 1892.

That we recognize labor as the foundation of all our prosperity, we pledge our hearty support to every lawful effort of the laboring classes to better their condition.

That the democratic party of North Dakota,

In convention assembled, indorse the national administration and that our chief executive, Grover Cleveland, is entitled to the aid and support of every loyal citizen of the United States in sustaining the principles of the government as he did in his letters and proclamations.

That we heartily approve of and indorse the official acts of our representative in the United States senate, the Hon. W. N. Roach, and commend the manly stand he has taken in all matters affecting the interests of our state.

That we indorse the official acts of the state executive, Hon. E. C. D. Shortridge, and approve of the conservative course pursued by him in state affairs.

TARIFF FOR REVENUE.

We are in favor of tariff for revenue only and urge the prompt enactment of a reform tariff bill.

We demand the free bimetallic coinage of both gold and silver, and the restoration of the bimetallic standard as it existed for over eighty years prior to the demonetization of the standard silver dollar in 1873, and should it become necessary, in order to maintain the two metals in circulation, to readjust the ratio, it should be determined whether gold has risen or silver fallen, and whether there should be a change of a gold or silver dollar, or both, to the end that whatever ratio is adopted, the rights of both creditor and debtor should be preserved alike. Having in view the demands of the people for an adequate circulating medium, we declare that we are not in favor of gold monometallism, but that both should be coined in such a ratio as will maintain the two metals in circulation.

We insist upon the democratic doctrine of Jackson and Benton, that all money issued by the authority of congress shall be issued and its value maintained by the government.

That this convention is in favor of resubmission of the prohibition clause of the state constitution to the people at the earliest possible time.

North Dakota Independents.

Adopted at Jamestown, June 15.

The independent party, in state convention, invite the aid and co-operation of all good citizens, regardless of former political beliefs, to further the following principles of government:

1. We reaffirm the national platform adopted by the national convention at Omaha in 1892.

FREE COINAGE.

2. We favor the free, unlimited, coinage of gold and silver at the ratio of 16 to 1, supplemented by full legal tender paper money exclusively controlled by the government, issued until the sum total of money in actual circulation shall reach \$50 per capita.

3. We favor the government ownership of telegraph and railroads.

4. We favor retrenchment in state expenses in every department.

5. We favor the initiative and referendum, allowing the people to introduce or veto all laws.

6. As the party of reform we do not favor a backward movement along any line, and believe in a rigid enforcement of all statutory laws without discrimination.

That recognizing the ability of women in the state we favor equal suffrage.

That as the party of reform, we earnestly thank Senators Roach and Hansbrough for their labors on behalf of the people's money, despite the pressure brought to bear upon them.

That we are opposed to the repeal of the penalty clause of our present prohibition law. That we are in favor of a heavy revenue tax on all option deals in farm produce.

North Dakota Prohibition.

Adopted at Fargo, July 31.

We, the undersigned prohibitionists of North Dakota, believing that the absolute prohibition of the manufacture, transportation and sale of intoxicating liquors to be used as a beverage is the paramount issue before the people of the United States, do hereby promise to support the national prohibition party and use our influence for the extension of the principles for which it contends.

1. The independent prohibition party of North Dakota, acknowledging Jehovah as the source of all just power, civil as well as moral, and His laws as the constitution to which all human enactments and conduct should conform, calls upon all citizens to consider the following declarations and upon those having the right of suffrage to exercise it for nobler ends than the mere perpetuation of party.

2. The independent prohibition party has been made a necessity by the refusal and failure of other parties to uphold the great principles for which it contends. A political party is a machine; if it fails to do the work that needs to be done, it should be discarded for one that will.

3. We are enduring a period of business depression and industrial distress. The leaders of the party in power, purposely blind to the real cause of our trouble, are playing with the tariff (diddling while Rome burns).

4. We demand the strict enforcement of all laws upon our statute books and call upon all law-abiding citizens to demand that our prohibition laws shall be enforced without fear or favor. If this law is to be enforced, it is absolutely necessary that officers be elected who are in sympathy with its enforcement and not in sympathy with those who would violate the law.

5. We favor suffrage without condition of sex. The great mass of our women are far more intelligent and patriotic than thousands of male voters.

6. We pledge our aid to laboring men to better their condition, and we favor a wise system of arbitration when disputes arise between employers and employed, but believe that no permanent improvement of the labor class is possible until the liquor power of the land is overthrown.

7. The deficiency of our state revenues at the present time ought to be a warning to the next legislature, and men should be elected who have some higher aim or ends than that of obtaining appropriations for their respective localities regardless of the burdensome taxation which now afflicts the taxpayers of our state.

South Dakota Republicans.

Adopted at Yankton, Aug. 23.

The republican party of the state of South Dakota, in convention assembled, declares anew its allegiance to those great principles to which republicanism has stood ever since its formal organization, and which have been from time to time declared in its platforms.

TARIFF.

In the interest of the country at large, and particularly in the interest of the people of this great agricultural northwest, it affirms its conviction that this nation owes to its citizens and their industries all reasonable protection against competition with foreign labor; and it believes that this can be best and most certainly afforded by the friends of pro.

tection rather than by those who declare, as did the last democratic national convention, that protection is unconstitutional and fraudulent, and which declaration has smitten this whole country with a blight that has withered its manufacturing industries, shriveled its commerce and dried up the fountains of its finances.

The policy of a democratic congress, which levies upon this country the tribute of millions in behalf of the sugar trust, and robs this country's woolgrowers of millions in behalf of Australian flock owners, has been fitly characterized by a democratic president as perfidy and dishonor; and we declare our preference for the reciprocity policy of the republican party, which got something for the country at large in exchange for whatever advantage was accorded foreign nations and their commercial interests.

Republicanism had its birth as a movement to emancipate America from the curse of slave labor, and profound concern ever since has been and is now the promotion of whatever would guarantee to labor its due share in the product to which it has contributed, as well as to guarantee to capital such inducements as would inspire its investors with confidence. We deplore the occurrence of any conflicts between labor and capital. We denounce the agitation of demagogues designed to foment and intensify these conflicts, and most earnestly disapprove of the use of private armed forces in any attempt to settle them. We believe that an appeal to the law and its officers is amply sufficient to protect property and preserve the peace, and a reference to legally created or amicably chosen boards of arbitration the best method of adjusting all disagreements out of which these conflicts have arisen.

Feeling that American citizenship should be protected against the importation of pauper and criminal classes from abroad, we favor such modification of our immigration laws as will more fully effect such protection.

We favor the use of both silver and gold as money, at a ratio of 16 to 1, confining the coinage of silver to the American product, at the net cost of the actual expense of coinage; and we demand that silver, as well as gold, shall be a legal tender for the payment of all debts, both public and private; and we pledge the congressional nominees of this convention to support the principles herein contained.

The abnormal development of the idea of corporation capital has resulted, in modern times, in immense aggregations of money in certain classes of private enterprise—in corporations of corporations; and we therefore declare ourselves in favor of such legislation as will thwart the dangerous power of trusts and combine, and prevent so far as possible the aggressions of these tremendous accumulations of capital.

We consider it the duty of every patriotic citizen to foster, patronize and encourage the home interests of our young state—agriculture, mining, manufacturing and commercial—and it is the duty of the state government to throw around them such laws as will insure fair and reasonable protection. The transportation companies and these interests are so interlocked that we demand of our legislature that the railway commission shall be dignified with sufficient authority to properly protect such interests against unjust discriminations by such transportation companies.

An overwhelming majority of the old soldiers of the union know upon which party to depend for due recognition of their patriotic sacrifice and valorous service in crushing rebellion, and the republicans of South Da-

kota only need assure them of the same justice and liberality in their behalf that has been declared heretofore, and which has been so industriously promoted by South Dakota's representatives of that party in congress.

We congratulate South Dakota upon the admirable manner in which the present administration has conducted the affairs of the state, maintaining the public credit at all times, and conducting the affairs of the commonwealth at an expense per capita amounting to only about one-half of that of states surrounded by conditions similar to ours.

Feeling assured that the principles of the republican party afford the best possible basis of government, we cordially invite all good citizens to rally to the support thereof, guaranteeing to them that it is our purpose to promote every interest which is calculated to secure the greatest good to the greatest number, and also to oppose whatever may be detrimental to the best interests of the people of this state and nation as a whole.

South Dakota Democrats.

Adopted at Sioux Falls, Sept. 6.

The democratic party of South Dakota, in state convention assembled, reaffirms its allegiance to the time honored principles of individual liberty, local self-government, restriction of governmental functions to public ends, and reduction of taxation to the lowest limits which public interests admit.

We denounce the republicans for increasing the taxes of the already overburdened people, for the grossly extravagant appropriation of \$100,000 for the state expenses, an increase of \$200,000 over that of any previous year, and for the levy of a heavy deficiency tax in flagrant violation of the spirit of the constitution.

We denounce the republicans for the multiplication of sinecures and exorbitant salaries, the use of public funds to reward political favorites, the letting of public work at extortionate rates and the deposit of public money in favorite banks without interest to the state. And we promise if entrusted with the power to administer state, county and town governments with rigid economy and solely in the interest of the whole people.

We denounce the republicans for their long neglect to relieve the people of this state from railroad extortions, discriminations and refusal of conveniences. And we promise to quickly and rigidly reform these abuses and to impose a maximum rate law for freight and passengers.

We denounce the republicans for allowing railroad, express and sleeping car companies and other corporations, monied men and favored classes great and unjustifiable exemptions from taxation while the debt-burdened farmers and working men are forced to pay not only for their actual holdings but also for their debts.

We denounce the republicans for operating the state educational and charitable institutions with great extravagance and loose expenditures and for using them as political engines and infirmaries. We promise to free these institutions from political abuses and to administer them with far greater efficiency and at far less cost.

We denounce the republicans for truckling to the prohibitionists by refusing to resubmit the prohibitory amendment, thus violating their solemn pledges and contravening all principles of popular government, while codifying the liquor interests by refusing to enforce the law. And we promise to resubmit the amendment to another vote of the people.

We heartily indorse the courageous, honest and statesmanlike administration of Grover Cleveland.

We heartily indorse the administration and the democratic house for their earnest efforts to redeem democratic pledges.

FREE TRADE.

We declare ourselves in favor of free trade, believing that as long as we have any tariff legislation, so long shall we have the heads of trusts, their attorneys and witnesses at Washington, and so long shall we have men in official positions who are too weak to rise above a handful of their constituents and vote for the great mass of the people and for their country's good.

We view with apprehension the growth of trusts and monopolies in this country, and we demand the enactment and enforcement of laws which will curb their extension and their power.

We demand the coinage of both silver and gold under such conditions and at such a ratio as will maintain the parity of the two metals.

INCOME TAX.

We congratulate the people on the establishment of the income tax by the democratic party.

We demand that the government treat with liberality and with full appreciation of their heroism the old soldiers who offered their lives in the nation's defense.

We demand the election of United States senators by a direct vote of the people.

We promise all aid in the power of the state to the promotion of irrigation.

We favor a law that will prohibit the holding of the office of congressman, United States senator or any cabinet position by one who shall be the owner of any stocks, shares or any interests of any kind whatever, either in whole or in part, directly or indirectly, in any corporation, trust or combination to be affected by national legislation, or who shall hold any official position in such bodies.

We favor also a law that will prohibit government officials, either national or state, from accepting any sleeping car or railway pass.

South Dakota Populists.

Adopted at Mitchell, June 13.

We, the people's party of South Dakota, hereby affirm our allegiance to the Omaha platform, which platform we hereby adopt as our platform of principles and further resolve:

That in the future the government should dispose of no more coal land and that since the coal beneath the ground is as much the inheritance of humanity as sunlight and air, therefore the government of the United States should by the right of eminent domain take possession of all coal lands within its boundaries, paying the true value for such lands as the pretended owners may have acquired, and that the mines shall be operated by the government in the interest of the people.

1. We demand that our state educational institutions be divorced from partisan politics.

2. We oppose the further sale of school lands.

3. We favor the assessment of mortgages to the holders thereof and the exemption of a like amount from the assessment of the mortgagee.

4. We favor the enactment of legislation for the protection of mining, railroad and manufacturing employees, and for their indemnification for injuries.

5. We favor the nationalization of the liquor traffic, beginning with state control under our present constitution without profit to the state.

6. Believing that all laws should emanate from the people and that they and they alone should have the veto power, we demand that the voters of South Dakota be given absolute control of all legislation by means of the initiative and referendum at the earliest possible date.

7. That the time has arrived when every honorably discharged soldier or sailor who served in defense of the nation between the years 1861 and 1865 should receive (1) a pension, (2) a pension in accordance with the degree of his wounds or disability, and that widows of deceased pensioners should receive not less than \$12 per month.

8. That we condemn the reckless and extravagant mismanagement and misadministration of the present state government, which was compelled in order to meet running expenses, to authorize an unconstitutional tax levy of 2½ mills upon the already overburdened taxpayers of the state.

South Dakota Prohibitionists.

Adopted at Madison, July 19.

We, the prohibitionists of South Dakota, in convention assembled, acknowledge Almighty God as the source of all true government and God the supreme ruler of the nations of the earth, in order to secure the blessings of peace and prosperity, make the following declaration of principles:

We affirm our allegiance to the national prohibition party and the great principles for which it contends, chief among which is the suppression of the liquor traffic.

We therefore declare for the utter prohibition of the manufacture, sale, importation, transportation and exportation of intoxicating liquors as a beverage in state and nation, believing that the only way to secure this is by the election to power of a party that can and will make and enforce such laws.

We demand the suppression of joints, dives, lotteries, policy shops and gambling dens, and declare that the political party lacking the courage to antagonize these evils is unworthy the support of the people.

We demand that the United States government shall not grant United States licenses indiscriminately in prohibition states for the sale of liquor.

We believe that intelligence should be the test of citizenship, but that all limitations of the privilege of the franchise on account of sex should be removed.

We favor the defense of American labor by restriction of immigration to actual settlers who come to be real Americans and by the exclusion of all paupers and criminal classes.

All persons should be protected by law to their one day of rest in seven.

We declare unequivocally for the American public schools and for instructions to be given in the English language only.

We declare that all money should be issued by the government directly to the people, without the intervention of any private individual or corporation, and be a full legal tender for all debts, both public and private, contracts to the contrary notwithstanding. To this end we favor the free and unlimited coinage of gold and silver, the products of the mines of the United States, on equal terms. No more government bonds should be issued in times of peace, but a system of postal say-

ings banks should provide for the safe deposit of the savings of the people, on which a low rate of interest should be paid.

We favor the appointment of a nonpartisan commission on revenue, whose duty it shall be to annually recommend to congress such changes in the tariff laws and the methods of collecting revenue as may from time to time become necessary.

We are opposed to alien ownership of lands or mines, and the unalienability thereof by individuals or corporations. We favor the forfeiture of all unearned land grants in the hands of railroad corporations.

The public means of transportation and communication have become a common necessity and should be operated in the interests of the people. To this end governmental postal, telegraph and telephone systems should be established and the government should own and operate the railroads.

We favor the extension of the civil-service reform system to all grades of the service to which it is applied. Fitness and not party service should be the essential test, and efficiency the only sure measure of office.

We favor granting just pensions to disabled veterans of the union army and navy and their widows and orphans.

We cordially invite the co-operation of all our fellow-citizens to the end that these declarations may be made triumphant in state and nation.

Wisconsin Republicans.

Adopted at Milwaukee, July 24.

We reaffirm the platform adopted at the national republican convention and also the platform adopted by the state republican convention in 1882 and renew our pledges to the people as set forth therein.

THE TARIFF.

The present condition of the country resulting from the threatened change in the tariff policy by the democratic party, the hundreds of factories and workshops closed down, the thousands of men out of employment, are the best witnesses which can be brought to testify to the wisdom of the policy of protection to home industries, which has always been sustained and fostered by the republican party.

The republican party is a friend to both labor and capital; each is indispensable to the other. The party had its origin in opposition to the enslavement and degradation of labor, and under its policy the workmen of the United States have secured a high rate of wages and attained a degree of comfort and affluence such as they had never previously enjoyed. It will employ whatever authority it possesses to promote all just demands of the wage worker and support whatever practical measures can be devised for the amelioration of his condition.

We recognize the right of laborers to organize, using all honorable means for the purpose of dignifying their condition and placing them on an equal footing with capital, to the end that both fully understand that they are friends and are equally essential to each other and to the prosperity of the people.

The republican party is in favor of honest money. We are unalterably opposed to any scheme that will give to this country a debased or a depreciated currency. We favor the use of silver as a currency to the extent only that it can be circulated on a parity with gold.

The republican party is a party of religious liberty and absolute nonsectarianism,

of entire separation of church and state, of free common schools, and of the utmost independence of individual thought, speech and action within the law.

Wisconsin Democrats.

Adopted at Milwaukee, Sept. 6.

1. We, the democrats of Wisconsin, in convention assembled, reaffirm the principles of the national democratic platform of 1882.

2. The present financial distress under which the country has suffered and is still suffering is the logical and necessary consequence of republican class legislation and mismanagement.

TARIFF.

3. The new tariff law affords the country substantial relief and is a broad stride in the direction of accomplishing the results that the democratic party has so long contended for.

4. By the repeal of the republican measure known as the Sherman silver law, the money of the country is restored to a sound basis and no proposed legislation should be entertained which does not provide that every dollar issued by the government should be of equal intrinsic and interchangeable value.

5. The constitution forbids discrimination based on religious tests. The American Protective association and like societies violating this fundamental principle find their natural place in the ranks of republicans who are careless of constitutional rights and will meet with the same rebuke at the hands of the people as the kindred movement which found expression in the Bennett law, and the democratic party is unalterably opposed to the principles of the so-called American Protective association and kindred un-American organizations.

LABOR'S RIGHTS.

6. We emphasize the fact that labor has the same right to legal organization and protection as capital, and that provisions should be made by arbitration or other equitable and peaceable adjustment of the differences between the wage-earner and his employer.

7. We denounce as unjust and oppressive the system of maintaining Pullman stores practiced by many employers of labor and recommend the enactment of stringent prohibitory laws calculated to prevent a continuance thereof.

8. The income-tax feature of the tariff bill meets our approval.

9. The administration of President Cleveland has been wise, patriotic and courageous, and commands itself to the democracy of this state.

10. The action of the democratic senators and representatives of Wisconsin has our heartiest approbation.

11. The democracy of Wisconsin has completely fulfilled its pledges to the people in its business-like management of the affairs of the state. It has returned to the treasury of the state the sum of \$482,422.53 of the money unlawfully taken by republican ex-treasurers, and has put into judgment the further sum of \$181,015.58, making a total of \$663,438.23, evidencing its intention that no rights of the people will be relinquished. It has reduced the state tax for the present year in the sum of \$742,570, or over 75 per cent, an accomplishment heretofore unheard of in the history of any state, and doubly welcome in these hard times induced by republican misrule. It has paid into the treasury interest received on public funds deposited in bank the sum of \$100,000. By wise and judicious investments and permitting no sel-

fish interest to come in conflict with duty, it has increased the earnings upon the school funds since it has been in power in the sum of \$161,364 over the earnings of the preceding four years or republican mismanagement. It has shown its devotion to the little school-house by expending in the advancement of our educational interests \$1,174,765 more than the republican administration expended for the same purpose in the preceding four years. It has levied by way of taxes \$447,335 less than the republicans from 1887 to 1890. Of this magnificent record every democrat of the state may feel justly proud.

TREASONABLE SENATORS.

We brand as treasonable to democratic pledges the action of those senators who were elected as tariff reformers, but who deserted the principles of our party and allied themselves with our enemies to thwart the express will of the people demanding wholesome and effective tariff legislation.

Wisconsin Populists.

Adopted at Milwaukee, July 4.

Our country, blessed with an abundance of natural wealth and all products needed to maintain life, presents the strange anomaly of widespread misery and destitution in the midst of plenty.

When men, women and children starve during bountiful harvests it furnishes positive evidence that our system of law and society must be radically wrong to permit such barbarous conditions, and that it is the imperative duty of every humane and progressive person to study the cause of the evil and apply the proper remedy.

When the people's party in national convention in Omaha declared that the nation had "been brought to the verge of moral, political and material ruin," and that "corruption dominates the ballot-box, the legislatures, the congress, and touches even the ermine of the bench," the declaration was met with shouts of "calamity howlers." But after two short years events have justified our statement and demonstrated also what was said at that time, that the two old parties in their struggle for power and plunder "have permitted the existing dreadful conditions to develop without serious effort to prevent or restrain them" and that "they propose to drown the outcries of a plundered people with the uproar of a sham battle over the tariff."

We assert that both the old parties are equally responsible for the existing state of affairs, as their leaders are of one mind on all public questions except the offices and the tariff; but, as the collections for customs duties in the last year show only \$200,355,017, or, estimating our population at 68,000,000, less than \$3 per capita per annum, the tariff discussion can have little bearing on the disturbed condition of the country.

A radical evolution into better conditions is absolutely necessary, and this can be brought about in a civilized state is thoroughly demonstrated in the judicious use of the ballot.

Strikes and boycotts, like wars and other violent methods of settling disputes, though often deemed necessary, always result in great harm and injury to all concerned, and could be entirely abolished under a system of universal co-operation as is thoroughly demonstrated in our postoffice system, in which neither strikes nor boycotts ever occurred. Neither would there be occasion for striking or boycotting on our railroads if they were owned by the government.

The people's party of Wisconsin demand equal rights and equal privileges for all the

men and women of the country and indorses the platform of the national convention adopted at Omaha, Neb., July 4, 1892.

This convention also indorses the demands proposed by the American Federation of Labor at its annual session in Chicago last December, as follows:

1. Compulsory education.
2. Direct legislation.
3. A legal eight-hour work day (in industrial pursuits).
4. Sanitary inspection of workshop, mine and home.
5. Liability of employers for injury to health, body and life.
6. Abolition of the contract system in all public work.
7. The abolition of the sweating system.
8. Municipal ownership of street cars, and gas and electric plants for public distribution of light, heat and power.
9. The nationalization of telegraphs, telephones, railroads and mines.
10. The collective ownership by the people of all means of production and distribution, by which we mean that when an industry becomes so centralized as to assume the form of a trust or a monopoly and hence a menace to the best interests of the people, such industry should be conducted by the government.
11. The principle of referendum in all legislation.

In addition we make the following demands:

1. The abolition of the system of taxing people on their debts by providing that all mortgages be deducted from the assessment for taxes.
2. The exemption of a reasonable amount of improvements on land, so that people be no longer punished for being industrious and economical.
3. That the state furnish a uniform system of text books to the pupils of the public schools at cost of production.
4. That public authorities should furnish employment to all who need it at reasonable wages.
5. That convict labor be utilized in the manufacture of binding twine to be furnished to consumers at cost.

Wisconsin Prohibitionists.

Adopted at Milwaukee, June 14.

Realizing that the greatest danger in American politics is the corrupt influence of the saloon, the prohibition party demands:

1. That the traffic in intoxicating liquors as a beverage be prohibited and suppressed, and that all laws making either federal, state or county governments parties in its profits be repealed.
2. That residence within the nation for such time and education to such an extent as will insure intelligent citizenship precede the right of franchise, which should not be denied on account of sex.
3. That all money necessary for the business of the country be issued directly by the federal government in such forms and upon such basis as will give us a ample circulating medium, and that the same be a legal tender for all debts.
4. That the government establish savings banks in connection with all important post-offices.
5. That our laws be so amended and enforced as to greatly restrict undesirable immigration.
6. That liberal public education in the English language be enforced by the state, and that no public funds be given for private schools.
7. That just pensions be given to our disabled veterans.

There is no law or regulation concerning titles to be applied to officials of the general government. On the contrary congress has expressly refused to authorize or recognize titles of any sort, and at its first session by resolution declared that the president of the United States should be addressed without any title whatever. By a formal vote it was also decided to address the vice-president and the speaker of the house of representatives in a similar manner.

On the 20th of May, 1789, congress passed a law forbidding the word "Honorable" to be prefixed to names of members of the senate and house of representatives, but custom and usage have established certain distinctions and forms which people are expected to ob-

serve, and failure to do so is usually attributed to ignorance and inexperience. The following forms show the manner in which the chief officers of the government should be addressed in writing:

The President.

The Vice-President.

The Speaker of the House of Representatives.

The Honorable, the Secretary of State.

The Honorable, the Secretary of the Treas.

The Honorable, the Secretary of War.

The Honorable, the Secretary of War.
The Honorable, the Attorney-General.

The Honorable, the Attorney-General.
The Honorable, the Postmaster-General.

The Honorable, the Postmaster-General.
The Honorable, the Secretary of the Navy

The Honorable, the Secretary of the Navy.
The Honorable, the Secretary of the In-
terior.

The Honorable, the Secretary of Agriculture.

The Honorable, the Commissioner of Labor.

The commissioners or heads of bureaus should be addressed in a similar manner. The assistant secretaries of the several departments should be addressed by name if there is more than one, as follows: The Honorable William E. Curtis, Assistant-Secretary of the Treasury, Washington, D. C.

The Chief Justice. (The associate justices should be addressed by name, viz: The Honorable John M. Harlan, Associate Justice of the Supreme Court, Washington, D. C.)

The General of the Army, or Major-General John M. Schofield, U. S. A.

Officers of the navy should be addressed by name, as Rear-Admiral E. A. K. Benham, U. S. N. (Military and naval officers should always be addressed by the highest brevet or

actual rank they ever held.) The titles used in conversation should be:

Mr. President. Mr. Vice-President.

Mr. Speaker.

The term Mr. Secretary should be addressed to all the members of the cabinet, including the attorney-general and the postmaster-general.

The heads of bureaus should be addressed as Mr. Commissioner, and the assistant secretaries of the several departments are called Mr. Secretary by courtesy.

Mr. Chief Justice. (The associate justices should be addressed as Mr. Justice.)

The officers of the army and navy should be addressed by the highest brevet or actual rank they have ever held. If a former general of volunteers now holds a commission in the army as captain, as is the case with several, he should be addressed as "General" in conversation.

BANK CLEARANCES.

For eleven months ending with November of 1892-3-4, as reported by Bradstreet's Journal.

IMPORTANT LEGISLATION.

The following are the more important acts of last half of the second session of the Lild congress:

THE INCOME TAX LAW.

The following are the eleven sections of the customs law of 1894 which contain the provisions as to the income tax and its collection: Section 27. That from and after the 1st day of January, 1895, and until the 1st day of January, 1900 there shall be assessed, levied, collected, and paid annually upon the gains, profits and income received in the preceding calendar year by every citizen of the United States, whether residing at home or abroad, and every person residing therein, whether said gains, profits, or income be derived from any kind of property, rents, interest, dividends, or salaries, or from any profession, trade, employment, or vocation carried on in the United States or elsewhere, or from any source whatever, a tax of 2 per centum on the amount so derived over and above \$4,000, and a like tax shall be levied, collected, and paid annually upon the gains, profits, and income from all property owned and of every business, trade or profession carried on in the United States by persons residing without the United States. And the tax herein provided for shall be assessed by the commissioner of internal revenue and collected, and paid upon the gains, profits, and income for the year ending the 31st day of December next preceding the time for levying, collecting and paying said tax.

Sec. 28. That in estimating the gains, profits and income of any person there shall be included all income derived from interest upon notes, bonds and other securities, except such bonds of the United States the principal and interest of which are by the law of their issuance exempt from all federal taxation; profits realized within the year from sales of real estate purchased within two years previous to the close of the year for which income is estimated; interest received or accrued upon all notes, bonds, mortgages or other forms of indebtedness bearing interest, whether paid or not, if good and collectible, less the interest which has become due from said person or which has been paid by him during the year; the amount of all premium on bonds, notes or coupons; the amount of sales of live stock, sugar, cotton, wool, butter, cheese, pork, beef, mutton or other meats, hay and grain, or other vegetable or other productions, being the growth or produce of the estate of such person, less the amount expended in the purchase or production of said stock or produce, and not including any part thereof consumed directly by the family; money and the value of all personal property acquired by gift or inheritance, all other gains, profits and income derived from any source whatever, except that portion of the salary, compensation or pay received for services in the civil, military, naval or other service of the United States, including senators, representatives and delegates in congress, from which the tax has been deducted, and also all interest due or paid within the year by such person on existing indebtedness. And all national, state, county, school and municipal taxes, not including those assessed against local benefits, paid within the year shall be deducted from the gains, profits or income of the person who has actually paid the same,

whether such person be owner, tenant or mortgagor; also losses actually sustained during the year, incurred in trade or arising from fires, storms or shipwreck, and not compensated for by insurance or otherwise, and debts ascertained to be worthless, but excluding all estimated depreciation of values and losses within the year on sales of real estate purchased within two years previous to the year for which income is estimated: Provided, That no deduction shall be made for any amount paid out for new buildings, permanent improvements or betterments made to increase the value of any property or estate: Provided further, That only one deduction of \$4,000 shall be made from the aggregate income of all the members of any family, composed of one or both parents, and one or more minor children, or husband and wife; that guardians shall be allowed to make a deduction in favor of each and every ward, except that in case where two or more wards are comprised in one family and have joint property interests, the aggregate deduction in their favor shall not exceed \$4,000: And provided, further, That in cases where the salary or other compensation paid to any person in the employment or service of the United States shall not exceed the rate of \$4,000 per annum, or shall be by fees, or uncertain or irregular in the amount or in the time during which the same shall have accrued or been earned, such salary or other compensation shall be included in estimating the annual gains, profits or income of the person to whom the same shall have been paid, and shall include that portion of any income or salary upon which a tax has not been paid by the employer, where the employer is required by law to pay on the excess over \$4,000: Provided also, That in computing the income of any person, corporation, company or association there shall not be included the amount received from any corporation, company or association as dividends upon the stock of such corporation, company or association if the tax of 2 per centum has been paid upon its net profits by said corporation, company or association as required by this act.

Sec. 29. That it shall be the duty of all persons of lawful age having an income of more than \$3,500 for the taxable year, computed on the basis herein prescribed, to make and render a list or return, on or before the day provided by law, in such form and manner as may be directed by the commissioner of internal revenue, with the approval of the secretary of the treasury, to the collector or a deputy collector of the district in which they reside, of the amount of their income, gains, and profits, as aforesaid; and all guardians and trustees, executors, administrators, agents, receivers, and all persons or corporations acting in any fiduciary capacity, shall make and render a list or return, as aforesaid, to the collector or a deputy collector of the district in which such person or corporation acting in a fiduciary capacity resides or does business, of the amount of income, gains, and profits of any minor or person for whom the same persons having less than \$3,500 income are not required to make such report; and the collector or deputy collector shall require every list or return to be verified by the oath or affirmation of the party rendering it, and may increase the amount of any list or return if he has reason to believe that the same is understated; and in case any such person having a taxable income shall neglect or refuse to make and render such list and return, or shall render a willfully false or fraudulent list or return, it shall be the duty of the collector or deputy collector to make such list,

according to the best information he can obtain, by the examination of such person, or any other evidence, and to add 50 per centum as a penalty to the amount of the tax due on such list in all cases of willful neglect or refusal to make and render a list or return; and in all cases of a willfully false or fraudulent list or return having been rendered to add 100 per centum as a penalty to the amount of tax ascertained to be due, the tax and the additions thereto as a penalty to be assessed and collected in the manner provided for in other cases of willful neglect or refusal to render a list or return, or of rendering a false or fraudulent return: Provided, That any person, or corporation in his, her, or its own behalf, or as such fiduciary, shall be permitted to declare, under oath or affirmation, the form and manner of which shall be prescribed by the commissioner of internal revenue, with the approval of the secretary of the treasury, that he, she, or his or her, or its ward or beneficiary, was not possessed of an income of \$4,000, liable to be assessed according to the provisions of this act; or may declare that he, she, or it, or his, her, or its ward or beneficiary has been assessed and has paid an income tax elsewhere in the same year, under authority of the United States, upon all his, her, or its income, gains, or profits, and upon all the income, gains, or profits for which he, she, or it is liable as such declarant, as prescribed by law; and if the collector or deputy collector shall be satisfied of the truth of the declaration, such person or corporation shall thereupon be exempt from income tax in the said district for that year; or if the list or return of any person or corporation, company, or association has been increased by the collector or deputy collector, such person or corporation, company or association may be permitted to prove the amount of income liable to be assessed; but such proof shall not be considered as conclusive of the facts, and no deductions claimed in such cases shall be made or allowed until approved by the collector or deputy collector. Any person or company, corporation or association feeling aggrieved by the decision of the deputy collector, in such cases may appeal to the collector of the district, and his decision thereon, unless reversed by the commissioner of internal revenue, shall be final. If dissatisfied with the decision of the collector such person, or corporation, company, or association may submit the case, with all the papers, to the commissioner of internal revenue for his decision, and may furnish the testimony of witnesses to prove any relevant facts having served notice to that effect upon the commissioner of internal revenue, as herein prescribed.

Such notice shall state the time and place at which, and the officer before whom, the testimony will be taken; the name, age, residence and business of the proposed witness, with the question to be propounded to the witness, or a brief statement of the substance of the testimony he is expected to give: Provided, That the government may at the same time and place take testimony upon like notice to rebut the testimony of the witnesses examined by the person taxed.

The notice shall be delivered or mailed to the commissioner of internal revenue a sufficient number of days previous to the day fixed for taking the testimony, to allow him, after its receipt, at least five days, exclusive of the period required for mail communication with the place at which the testimony is to be taken, in which to give, should he so desire, instructions as to the cross-examination of the proposed witness.

Whenever practicable, the affidavit or deposition shall be taken before a collector or

deputy collector of internal revenue, in which case reasonable notice shall be given to the collector or deputy collector of the time fixed for the deposition or affidavit.

Provided further, That no penalty shall be assessed upon any person or corporation, company or association for such neglect or refusal or for making or rendering a willfully false or fraudulent return, except after reasonable notice of the time and place of hearing, to be prescribed by the commissioner of internal revenue so as to give the person charged an opportunity to be heard.

Sec. 30. The taxes on incomes herein imposed shall be due and payable on or before the 1st day of July in each year; and to any sum or sums annually due and unpaid after the 1st day of July as aforesaid, and for ten days after notice and demand thereof by the collector, there shall be levied, in addition thereto, the sum of 5 per centum on the amount of taxes unpaid, and interest at the rate of 1 per centum per month upon said tax from the time the same becomes due, as a penalty, except from the estates of deceased, insane or insolvent persons.

Sec. 31. Any nonresident may receive the benefit of the exemptions hereinbefore provided for by filing with the deputy collector of any district a true list of all his property and sources of income in the United States and complying with the provisions of section 29 of this act as if a resident. In computing income he shall include all income from every source, but unless he be a citizen of the United States he shall only pay on that part of the income which is derived from any source in the United States. In case such nonresident fails to submit a statement, the collector of each district shall collect the tax on the income derived from property situated in his district, subject to income tax, making no allowance for exemptions, and all property belonging to such nonresident shall be liable to distraint for tax: Provided, That nonresident corporations shall be taxed under the laws as to tax as resident corporations, and the collection of the tax shall be made in the same manner as provided for collections of taxes against nonresident persons.

Sec. 32. That there shall be assessed, levied and collected, except as herein otherwise provided, a tax of 2 per centum annually on the net profits or income above actual operating and business expenses, including expenses for materials purchased for manufacture or bought for resale, losses and interest on bonded and other indebtedness of all banks, banking institutions, trust companies, saving institutions, fire, marine, life and other insurance companies, railroad, canal, turnpike, canal navigation, slack water, telephone, telegraph, express, electric light, gas, water, street railway companies and all other corporations, companies or associations doing business for profit in the United States, no matter how created and organized, but not including partnerships.

That said tax shall be paid on or before the 1st day of July in each year; and if the president or other chief officer of any corporation, company or association, or in the case of any foreign corporation, company or association, the resident manager or agent shall neglect or refuse to file with the collector of the internal revenue district in which said corporation, company or association shall be located or be engaged in business, a statement verified by his oath or affirmation, in such form as shall be prescribed by the commissioner of internal revenue, with the approval of the secretary of the treasury, showing the amount of net profits or income received by said corporation, company or association during the whole calendar year last preceding the date of

filing said statement as hereinafter required, the corporation, company or association making default shall forfeit as a penalty the sum of \$4,000 and 2 per centum on the amount of taxes due for each month until the same is paid, the payment of said penalty to be enforced as provided in other cases of neglect and refusal to make return of taxes under the internal revenue laws.

The net profits or income of all corporations, companies or associations shall include the amounts paid to shareholders, or carried to the account of any fund, or used for construction, enlargement of plant, or any other expenditure or investment paid from the net annual profits made or acquired by said corporations, companies or associations.

That nothing herein contained shall apply to states, counties or municipalities; nor to corporations, companies or associations organized and conducted solely for charitable, religious or educational purposes, including fraternal beneficiary societies, orders or associations operating upon the lodge system and providing for the relief of life sick, accident and other benefits to the members of such societies, orders or associations and dependents of such members; nor to the stocks, shares, funds or securities held by any fiduciary or trustee for charitable, religious or educational purposes; nor to building and loan associations or companies which make loans only to their shareholders; nor to such savings banks, savings institutions or societies as shall, first, have no stockholders or members except depositors and no capital except deposits; secondly, shall not receive deposits to an aggregate amount, in any one year, of more than \$10,000 from any one depositor; thirdly, shall not allow an accumulation or total of deposits, by any one depositor, exceeding \$10,000; fourthly, shall actually divide and distribute to its depositors, ratably to deposits, all the earnings over the necessary and proper expenses of such bank, institution or society, except such as shall be applied to surplus; fifthly, shall not possess, in any form, a surplus fund exceeding 10 per centum of its aggregate deposits; nor to such savings banks, savings institutions or societies composed of members who do not participate in the profits thereof and which pay interest or dividends only to their depositors; nor to that part of the business of any savings bank, institution or other similar association having a capital stock, that is conducted on the mutual plan solely for the benefit of its depositors on such plan, and which shall keep its accounts of its business conducted on such mutual plan separate and apart from its other accounts.

Nor to any insurance company or association which conducts all its business solely upon the mutual plan, and only for the benefit of its policy holders or members, and having no capital stock and no stock or shareholders, and holding all its property in trust and in reserve for its policy holders or members; nor to that part of the business of any insurance company having a capital stock and stock and shareholders, which is conducted on the mutual plan separate from its stock plan of insurance and solely for the benefit of the policy holders and members insured on said mutual plan and holding all the property belonging to and derived from said mutual part of its business in trust and reserve for the benefit of its policy holders and members insured on said mutual plan.

That all state, county, municipal and town taxes paid by corporations, companies or associations shall include in the operating and business expenses of such corporations, companies or associations.

Sec. 33. That there shall be levied, collected and paid on all salaries of officers, or pay-

ments for services to persons in the civil, military, naval or other employment or service of the United States, including senators and representatives and delegates in congress, when exceeding the rate of \$4,000 per annum a tax of 2 per centum on the excess above the said \$4,000; and it shall be the duty of all paymasters and all disbursing officers under the government of the United States, or persons in the employ thereof, when making any payment to any officers or persons as aforesaid, whose compensation is determined by a fixed salary, or upon settling or adjusting the accounts of such officers or persons, to deduct and withhold the aforesaid tax of 2 per centum; and the pay-roll, receipts or account of officers or persons paying such tax as aforesaid shall be made to exhibit the fact of such payment. And it shall be the duty of the accounting officers of the treasury department, when auditing the accounts of any paymaster or disbursing officer, or any officer withholding his salary from moneys received by him, or when settling or adjusting the accounts of such officer or officers, to certify that the taxes mentioned in this section have been deducted and paid over to the treasurer of the United States, or other officer authorized to receive the same. Every corporation which pays to any employee a salary or compensation exceeding \$4,000 per annum shall report the same to the collector or deputy collector of his district and said employee shall pay thereon, subject to the exemptions herein provided for, the tax of 2 per centum on the excess of his salary over \$4,000. Provided, That salaries due to state, county or municipal officers shall be exempt from the income tax herein levied.

Sec. 34. That sections 3167, 3172, 3173, and 3176 of the Revised Statutes of the United States as amended are hereby amended so as to read as follows:

"Sec. 3167. That it shall be unlawful for any collector, deputy collector, agent, clerk or other officer or employee of the treasury to divulge or to make known in any manner whatever not provided by law to any person the operations, style of work or apparatus of any manufacturer or producer visited by him in the discharge of his official duties, or the amount or source of income, profits, losses, expenditures, or any particular thereof, set forth or disclosed in any income return by any person or corporation, or to permit any income return or copy thereof or any book containing any abstract or particulars thereof, to be seen or examined by any person except as provided by law; and it shall be unlawful for any person to print or publish in any manner whatever not provided by law, any income return or any part thereof or the amount or source of income, profits, losses, or expenditures appearing in any income return; and any offense against the foregoing provision shall be a misdemeanor and be punished by a fine not exceeding \$1,000 or by imprisonment not exceeding one year, or both, at the discretion of the court; and if the offender be an officer or employee of the United States he shall be dismissed from office and be incapable thereafter of holding any office under the government."

"Sec. 3172. That every collector shall, from time to time, cause his deputies to proceed through every part of his district and inquire after and concerning all persons therein who are liable to pay any internal revenue tax, and all persons owning or having the care and management of any objects liable to pay any tax, and to make a list of such persons and enumerate said objects."

"Sec. 3173. That it shall be the duty of any person, partnership, firm, association, or corporation, made liable to any duty, special tax,

or other tax imposed by law, when not otherwise provided for, in case of a special tax, on or before the first day of July in each year, in case of income tax on or before the first Monday of March in each year, and in other cases before the day on which the taxes accrue, to make a list or return, verified by oath or affirmation to the collector or a deputy collector of the district where located, of the articles or objects, including the amount of annual income, charged with a duty or tax, the quantity of goods, wares and merchandise made or sold, and charged with a tax, the several rates and aggregate amount, according to the forms and regulations to be prescribed by the commissioner of internal revenue, with the approval of the secretary of the treasury, for which such person, partnership, firm, association or corporation is liable: Provided, That if any person liable to pay any duty or tax, or owning, possessing or having the care or management of property, goods, wares and merchandise, articles or objects liable to pay any duty, tax or license, shall fail to make and exhibit a list or return required by law, but shall consent to disclose the particulars of any and all the property, goods, wares and merchandise, articles and objects liable to pay any duty or tax, or any business or occupation liable to pay any tax as aforesaid, then and in that case he shall be the duty of the collector or deputy collector to make such list or return, which, being distinctly read, consented to and signed and verified by oath or affirmation by the person so owning, possessing or having the care and management as aforesaid, may be received as the list of such person: Provided further, That in case no annual list or return has been rendered by such person to the collector or deputy collector as required by law, and the person shall be absent from his or her residence or place of business at the time the collector or deputy collector shall call for the annual list or return, it shall be the duty of the collector or deputy collector to leave at such place of residence or business, with some one of suitable age and discretion, if such be present, otherwise to deposit in the nearest postoffice a note or memorandum addressed to such person, requiring him or her to render to such collector or deputy collector the list or return required by law, within ten days from the date of such note or memorandum, verified by oath or affirmation. And if any person, on being notified or required as aforesaid, shall refuse or neglect to render such list or return within the time required as aforesaid or whenever any person who is required to deliver a monthly or other return of objects subject to tax fails to do so at the time required, or delivers any return which, in the opinion of the collector, is false or fraudulent, or contains any undervaluation or understatement, it shall be lawful for the collector to summon such person or any other person having possession, custody or care of books or account containing entries relating to the business of such person, or any other person he may deem proper, to appear before him and produce such books at a time and place named in the summons, and to give testimony or answer interrogatories under oath, respecting any objects liable to tax or the returns thereof. The collector may summon any person residing or found within the state in which his district lies; and when the person intended to be summoned does not reside and cannot be found within such state, he may enter any collection district where such person may be found, and there make the examination herein authorized. And to this end he may there exercise all the authority which he might lawfully exercise in the district for which he was commissioned.

"Sec. 3176. When any person, corporation, company, or association refuses or neglects to render any return as last required by law, or renders a false or fraudulent return, or if the collector or any deputy collector shall make, according to the best information which he can obtain, including that derived from the evidence elicited by the examination of the collector, and on his own view and information, such list or return, according to the form prescribed, of the income, property and objects liable to tax owned or possessed or under the care or management of such person, or corporation, company, or association and the commissioner of internal revenue shall assess all taxes not paid by stamps, including the amount, if any, due for special tax, income or other tax, and in case of any return of a false or fraudulent list or valuation intentionally he shall add 100 per centum to such tax; and in case of a refusal or neglect, except in cases of sickness or absence, to make a list or return, or to verify the same as aforesaid, he shall add 50 per centum to such tax. In case of neglect or absence by sickness or absence as aforesaid the collector may allow such further time for making and delivering such list or return as he may deem necessary, not exceeding thirty days. The amount so added to the tax shall be collected at the same time and in the same manner as the tax unless the neglect or falsity is discovered after the tax has been paid, in which case the amount so added shall be collected in the same manner as the tax; and the list or return so made and subscribed by such collector or deputy collector shall be held prima facie good and sufficient for all legal purposes.

Sec. 35. That every corporation, company or association during business for profit shall make and render to the collector of its collection district, on or before the first Monday of March in every year, beginning with the year 1885, a full return, verified by oath or affirmation, in such form as the commissioner of internal revenue may prescribe, of all the following matters for the whole calendar year last preceding the date of such return:

1. The gross profits of such corporation, company or association from all kinds of business of every name and nature.

2. The expenses of such corporation, company or association, exclusive of interest, annuities and dividends.

3. The net profits of such corporation, company or association, without allowance for interest, annuities or dividends.

4. The amount paid on account of interest, annuities and dividends stated separately.

5. The amount paid in salaries of \$4,000 or less to each person employed.

6. The amount paid in salaries of more than \$4,000 to each person employed and the name and address of each of such persons and the amount paid to each.

Sec. 35. That it shall be the duty of every corporation, company or association doing business for profit to keep full, regular and accurate books of account, upon which all its transactions shall be entered from day to day, in regular order, and whenever a collector or deputy collector of the district in which any corporation, company or association is assessable shall believe that a true and correct return of the income of such corporation, company or association has not been made, he shall make an affidavit of such belief and on the grounds on which it is founded, and file the same with the commissioner of internal revenue, and if said commissioner shall, on examination thereof, and after full hearing upon notice given to all parties, conclude there is good ground for such belief he shall issue a request in writing to such corporation,

company or association to permit an inspection of the books of such corporation, company, or association to be made; and if such corporation, company or association shall refuse to comply with such request, then the collector or deputy collector of the district shall make from such information as he can obtain an estimate of the amount of such income and then add 50 per centum thereto, which said assessment so made shall then be the lawful assessment of such income.

Sec. 37. That it shall be the duty of every collector or deputy collector of the district to pay of any taxes other than the tax represented by an adhesive stamp or other engraved stamp is made, under the provisions of this act, to give to the person making such payment a full written or printed receipt, expressing the amount paid and the particular account for which such payment was made; and whenever such payment is made such col-

lector shall, if required, give a separate receipt for each tax paid by any debtor, on account of payments made to or to be made by him to separate creditors in such form that such debtor can conveniently produce the same separately to his several creditors in satisfaction of their respective demands to the amounts specified in such receipts; and such receipts shall be sufficient evidence in favor of such debtor, to justify him in withholding the amount therein expressed from his next payment to such creditor; but such creditor, before giving to his debtor a full written receipt, acknowledging the payment to him of whatever sum may be actually paid, and accepting the amount of tax paid as aforesaid (specifying the same) as a further satisfaction of the debt to that amount, require the surrender to him of such collector's receipt.

JAPANESE TREATY.

The following is the text of the new treaty negotiated between the United States and Japan. The document was signed Nov. 22, 1894, and was transmitted to the United States senate Dec. 6, 1894. The new Chinese treaty will be found at page 108 in this volume.

The president of the United States of America and his majesty, the emperor of Japan, being equally desirous of maintaining the relations of good understanding which happily exist between them by extending and increasing the intercourse between their respective states, and being convinced this object cannot better be accomplished than by revising the treaties hitherto existing between the two countries, have resolved to complete a new revision, based upon the principles of equity and mutual benefit and for the purpose have named as their plenipotentiaries, that is to say: The president of the United States of America Walter Q. Gresham, secretary of state of the United States; and his majesty, the emperor of Japan, Shintchiro Marino, of the Order of the Sacred Treasure and of the fourth class, who, having communicated to each other the full powers found to be in full and due form, have agreed and concluded the following articles:

The citizens and subjects of each of the two high-contracting parties shall have full liberties to travel or reside in any part of the territories of either contracting party and shall enjoy full and perfect protection for their persons and property. They shall have free access to the courts of justice in pursuit and defense of their rights; they shall be at liberty equally with native citizens or subjects to choose and employ lawyers, advocates and representatives to pursue and defend their rights before such courts, and in other matters connected with the administration of justice they shall enjoy all the rights and privileges enjoyed by native citizens or subjects in whatever relates to rights to residence and travel, to the possession of goods and effects of any kind, to the succession to personal estate by will or otherwise, and the disposal of property of any sort and in any manner whatsoever, which they may lawfully acquire. The citizens or subjects of each contracting party shall enjoy in the territories of the other the same privileges, liberties and rights and shall be subject to no higher imposts or charges in these respects than native citizens or subjects or citizens or subjects of the most favored nation.

The citizens or subjects of each of the contracting parties shall enjoy in the territories of the other entire liberty of conscience and

subject to the laws, ordinances and regulations shall enjoy the right of private or public exercise of their worship, and also the right of burying their respective countrymen according to their religious customs in such suitable and convenient places as may be established and maintained for that purpose. They shall not be compelled, under any pretext whatever, to pay any charges or taxes other or higher than those that are or may be paid by native citizens or subjects or citizens or subjects of the most favored nation. The citizens or subjects of either of the contracting parties residing in the territories of the other shall be exempted from all compulsory military service, whatsoever; whether in the army, navy, national guard or militia, and from all forced loans or military exactions or contributions.

There shall be reciprocal freedom of commerce and navigation between the territories of the two high contracting parties. They shall have liberty freely to come with their ships and cargoes to all places, ports and rivers in the territory of the other which are or may be open to foreign commerce, and shall enjoy, respectively, the same treatment in matters of commerce and navigation as native citizens or subjects or citizens or subjects of the most favored nation without having to pay taxes, imports or duties of whatever nature or under whatever denomination levied in the name or for the profit of the government, public functionaries, private individuals, corporations or establishments of any kind, or greater than those paid by native citizens or subjects or citizens or subjects of the most favored nation. It is, however, understood that the stipulations contained in this and the preceding article do not in any way affect the laws, ordinances and regulations with regard to the trade, immigration of laborers, police and public security which are in force or which may hereafter be enacted in either of the two countries.

No other or higher duties shall be imposed on importations into the territory of the United States of any article, the produce or manufacture of the territory of his majesty, the emperor of Japan, from whatever place arriving, and no other or higher duties shall be imposed on the importations into the territories of his majesty, the emperor of Japan, of any article, the produce or manufacture of territories of the United States, from whatever place arriving, than on the like articles produced or manufactured in any foreign country; nor shall any prohibition be maintained or imposed on the importation of any

article. No other or higher duties or charges shall be imposed in the territories of either of the high-contracting parties on the exportation of any article to the territories of the other than such as are or may be payable on the exportation of the like article to any other foreign country.

The citizens or subjects of the high-contracting parties shall enjoy in the territories of the other exemption from all transit duties and a perfect equality of treatment with native citizens or subjects in all that relates to warehousing, bounties and drawbacks. All articles which are or may be legally imported into the ports of the territories of his majesty, the emperor of Japan, in Japanese vessels, may likewise be imported into those ports in vessels of the United States without being liable to any other or higher duties or charges of whatever denomination than if such articles were imported in Japanese vessels. In the same manner there shall be perfect equality of treatment in regard to exportations, so that the same export duties shall be paid and the same bounties and drawbacks allowed, in the territories of either of the high-contracting parties on the exportation of any article which is or may be legally exported therefrom, whether such exportation shall take place in Japanese vessels or in vessels of the United States, and whatever may be the place of destination, whether a port of either of the high-contracting parties or of any third power.

The coasting trade of both the high-contracting parties is excepted from the provisions of the present treaty and shall be regulated according to the laws, ordinances and regulations of the United States and Japanese governments respectively. The Japanese government agrees to allow vessels of the United States to continue, as heretofore, for the period of the duration of the present treaty to carry cargoes between the existing open ports of the empire excepting to or from the ports of Osaka, Nijita and Ebusumino.

Any ship of war or merchant vessel of either of the high-contracting parties which may be compelled by stress of weather or by reason of any other distress to take shelter in a port of the other shall be at liberty to refit therein, to procure all necessary supplies, and to put to sea again without paying any dues other than such as would be payable by national vessels. In case, however, the master of a merchant vessel should be under the necessity of disposing of a part of his cargo in order to defray expenses, he shall be bound to conform to the regulations and tariffs of the place to which he may come. Stranded or wrecked ships or vessels, and all parts thereof, and all furniture and appurtenances belonging thereto and all goods and merchandise saved therefrom, including those which may have been cast into the sea or the proceeds thereof, if sold, as well as all papers found on board such stranded or wrecked ship or vessel, shall be given up to the owners or their agents when claimed by them. The goods and merchandise saved from the wreck shall be exempt from all the duties of customs unless cleared for consumption, in which case they shall pay the ordinary duties.

When a vessel belonging to the citizens or subjects of one of the high-contracting parties is stranded or wrecked in the territories of the other the respective consul-general, consuls, vice-consuls and consular agents shall be authorized, in case the owner or master, or other agent if the owner is not present, to lend their official assistance in order to afford the necessary assistance to the citizens or subjects of the respective states. The same rule shall apply in case the owner, master or other agent is present, but requires such assistance to be given.

The high-contracting parties agree that in all that concerns commerce and navigation any privilege, favor, or immunity which either high-contracting party has actually granted, or may hereafter grant, to the government, ships, citizens, or subjects of any other state, shall be extended to the government, ships, citizens, or subjects of the other high-contracting party gratuitously if the concession in favor of that other state shall have been gratuitous, and on the same or equivalent conditions if the concessions shall have been conditional; it being their intention that the trade and navigation of each country shall be placed in all respects by the other on the footing of the most favored nation. The consular general, consuls, vice-consuls, proconsuls and consular agents may exercise all functions and shall enjoy all privileges, exemptions, and immunities which are or may hereafter be granted to the consular officers of the most favored nation.

The citizens or subjects of each of the high-contracting parties shall enjoy in the territories of the other the same protection as native citizens or subjects in regard to patents, trade-marks and designs upon the fulfillment of the formalities prescribed by law. The several foreign settlements in Japan shall, from the date this treaty comes into force, be incorporated with the respective Japanese communes and shall henceforth form part of the general municipal system of Japan. The most competent Japanese authorities shall thereupon assume all municipal obligations and duties in respect thereof, and the common funds and property, if any, belonging to such settlements shall at the same time be transferred to the said Japanese authorities. When such incorporation takes place, existing leases in perpetuity upon which property is now held in the said settlements shall be confirmed, and no conditions whatsoever other than those contained in such existing leases shall be imposed in respect of such property. It is, however, understood that the consular authorities mentioned in the same are in all cases to be replaced by the Japanese authorities. All lands which may previously have been granted by the Japanese government free of rent for the public purpose of the said settlements shall, subject to the right of eminent domain, be permanently reserved free of all taxes and charges for the public purposes for which they were originally set apart.

This treaty shall, from the date it comes into force, be substituted in place of the four treaties of peace and amity previously concluded, and shall go into operation July 17, 1896, and shall remain in force for the period of twelve years from that date. Either high-contracting party shall have the right at any time after eleven years shall have elapsed from the date it goes into operation to give notice to the other of its intention to terminate the same, and at the expiration of twelve months after such notice is given this treaty shall wholly cease and determine.

The protocol of the treaty provides that the import tariff now in operation in Japan in respect of goods and merchandise imported into Japan by citizens of the United States shall cease to be binding. From the same date the general statutory law of Japan shall, subject to previous conventions, be applicable to goods and merchandise being the growth, produce or manufacture of the territories of the United States upon importation into Japan. But nothing contained in this protocol shall be held to limit or qualify the right of the Japanese government to restrict or prohibit the importation of adulterated medicines, foods or beverages; indecent or obscene prints, paintings, books, cards, lithographic or other engravings, photographs or any other indecent or obscene articles; articles

in violation of the patent of the trade-mark or copyright laws of Japan, or any other article which for sanitary reasons, or in view of public morals, might offer any danger.

The Japanese government, pending the opening of the country to citizens of the United States, agrees to the existing trade and consular system in such a manner as to allow citizens of the United States on the production of a certificate of recommendation from the rep-

resentatives of the United States at Tokio, or from any of the consuls of the United States at the open ports of Japan, to obtain upon application passports available for any part of the country or for any period not exceeding twelve months, it being understood that the existing rules and regulations governing citizens of the United States who visit the interior of the empire are to be maintained.

MOSQUITO COAST INCIDENT.

The difficulties that have extended through most of the year, involving disputes with Nicaragua, have been somewhat lost sight of in the more exciting incidents in various portions of our own country. Early in January the American consul at Greytown, Nicaragua, called the attention of the government to the very peculiar condition of things existing at Bluefields, a city of about 4,500 people, which is the headquarters of some important interests of American residents at the coast. What is known as the Mosquito reservation, or country lies along the coast between Cape Gracias and Greytown, the inhabitants being chiefly negroes, with some Indians and a few whites. The trade and commerce of the region is carried on mostly by Americans, who have valuable grants of land and concessions of various kinds from the Nicaraguan government. The government of the Mosquito country has been very unstable for many years, the ruler being a chief, or king, who is an Indian, while most of the officials have been negroes. The executive was an Indian, named Robert Henry Clarence, who was chosen in 1891. For more than a century there have been difficulties regarding this region, growing out of the efforts of Great Britain to secure some portion of it. In 1740 Great Britain secured a foothold on the coast. In 1825 a protectorate was established by England, and in 1848, as the result of disputes with Nicaragua, the British seized San Juan with a military and naval force. This action was condemned both by our own government and those of the various Central American states, and the Clayton-Bulwer treaty of 1850 was made to put an end to further and menacing quarrels. Great Britain has never observed the spirit of this treaty, while keeping usually within its letter. Under this treaty Great Britain was permitted to maintain a naval station at Bluefields, but it enlarged it and established other posts in the vicinity. In 1880 a treaty was made between Great Britain and Nicaragua, under which the former surrendered to the latter all its claimed rights in the Mosquito coast, and under this treaty Nicaragua assumed the nominal sovereignty over the Mosquito reservation, while Great Britain guaranteed its autonomy. Under this treaty American energy and American capital developed Bluefields from an insignificant village—"The Pirates' Nest"—into a beautiful, thriving business center, having a population of 4,500 happy, active and industrious inhabitants. And up to Feb. 12 last, everything within the Mosquito reservation was progressing in a most satisfactory manner.

Ever since the treaty of 1880 the Nicaraguan government has been anxious to bring the Mosquito coast under the actual control of the state, and this has been a constant source of trouble between the two people, and Nicaraguan troops have often entered the territory with a view to its subjugation. The last of these forays brought on the present trouble. About the middle of February the Nicaraguan officer, Cabasas, took Bluefields, removed the

officers of the reservation and raised the Nicaraguan flag over the place. The white residents were alarmed and distrusted the Nicaraguan government. They united in an appeal to the British consul for protection, who placed a force of fifty men from the British cruiser *Cleopatra* near the town for the protection of the people. The Nicaraguans, getting the treaty of 1880, complained of this act as a violation of the Clayton-Bulwer treaty of 1850. Upon instructions from London the *Cleopatra* landed a larger force and the result was that a conference was held in which the Mosquitos, Nicaraguans and British took part. The conclusion reached was that the Nicaraguan troops should withdraw from the country and that an attempt to form a provisional government for the coast should be made. The British troops withdrew to Greytown. The failure of the effort to form a provisional government led the Nicaraguan government to dominate affairs once more, but this was prevented by the British. For a time riots and disturbances were frequent.

In the latter part of March the coast was thrown into great excitement by the reported murder of William Wilson, an American, who was killed by the governor of a Nicaraguan town. A change was made in the reservation. A change was made in the British vessels on the coast, and after the departure of the *Cleopatra* and before the arrival of the *Canada*, Lacayo, the Nicaraguan officers, procured arms and ammunition and proposed to take Bluefields. Against this action the American residents protested.

In the meantime our own government undertook to protect its citizens in the reservation and the Kearsarge was ordered to Bluefields for this purpose. The wreck of that vessel on Roncador reef ended its mission. The Mosquito coast affairs came up in the senate and Great Britain was asked to explain its position. That government very promptly declared that it had no desire or design to establish a protectorate over the reservation, and that the landing of troops had no other significance than the protection of the lives and property of the residents. Admiral Benham was ordered to Bluefields with the *San Francisco*, and to return and make a report upon the affairs of the coast.

Early in April the exequaturs of both the American and British consuls at Bluefields were withdrawn by the government of Nicaragua. In April a special commissioner was sent by the Nicaraguan government to Bluefields to establish a temporary government until the parties to the treaty of 1880 could settle their disputes and establish a government on a permanent basis. The result of this was that by the consent of the British he issued a proclamation in the name of his government providing for a provisional council of government which should guarantee all private rights and personal safety and the commercial treaty between Nicaragua and the United States. Shortly after Chief Clarence returned to the coast but remained only a short time and de-

parted. About the middle of May he returned again on a British vessel and claimed his rights as ruler of the reservation. Previous to this the governor of Rama, who had murdered Mr. Wilson, was arrested and locked up. On the 9th of May he escaped, and was hidden in the house of Commissioner Lacayo, who sent him to Greytown. In June most of the troops had been withdrawn from Bluefields, the United States vessel Marblehead was sent to the coast to check the Nicaraguan government in its unjust acts against the Americans. It is charged that our government has been singularly remiss in protecting the rights, property and lives of its citizens at Bluefields. An American, Capt. John McCafferty, from Bluefields gave the following particulars in an interview in a Chicago paper in October:

"For several months the belligerent Nicaraguans have insulted, imprisoned, deported and pillaged American citizens doing business and carrying on industrial enterprises within the Mosquito reserve without a suitable protest having been made thereto by our secretary of war. It looks, indeed, as if the government of the United States had entirely abandoned our countrymen who have been for many years settled in the Mosquito reserve, and who have made Bluefields an important trade center. And, of course, the longer the United States government allows its citizens located in the reservation to be oppressed by such representatives of Nicaragua as Lacayo, Cabezas and Madriz the more intolerable does that oppression become. These officials began by insulting American citizens, and when that was not resented by the American government robbery was added to insult."

"The incarceration and banishment of Americans, and that without any sort of trial, being also submitted to without an American protest from our state department, we may expect to hear that these Nicaragua officials, in order to get possession of the industrial enterprises built up and carried on by our progressive countrymen, have brutally assassinated the remaining American residents. That the gravity of the situation may be more fully comprehended, after the brutal murder of poor Wilson at Rama, by Acting Governor Aguero, and previous to the arrival of the United States warship San Francisco, the Americans, on March 11, instructed United States Consul Bralda to present the following ultimatum to General C. A. Lacayo, the Nicaraguan commissioner at Bluefields:

"WHEREAS, We, the American residents of the reservation, do not consider ourselves parties to the local troubles and disputes at this time prevailing, but having extensive interests in the reservation, and desiring security for life and property and for the promotion of public tranquillity, are willing to accept the invitation of the two powers attempting to treat concerning affairs in the reservation upon the following terms and conditions and no others:

"A provisional executive council of ten members, composed of two Englishmen, two Nicaraguans, two Americans, two natives, one Indian and one German.

"That the council appoint all officials.

"That it have full power to organize a police force, make laws, create all necessary local courts and establish their jurisdiction.

"That the English language be the official language of the government.

"The Nicaraguan commissioner to be respected as the representative of the republic.

"All Nicaraguan military forces to evacuate the reservation.

"The reservation shall extend from 84 degrees 15 minutes west longitude, as recognized previous to the occupation.

"The complete autonomy of the reservation to be preserved and perpetuated.

"That Chief Henry Clarence be restored and recognized as the executive head of the government."

"This ultimatum being rejected by the Nicaraguans, the Americans then appealed again to the government of the United States for that protection which they were and are entitled to. But Hon. S. C. Bralda could only say in reply: 'I have received no instructions from Washington, and without the co-operation of warships I am, gentlemen, quite as helpless as you are. I can only suggest to you the advisability of remaining neutral and of being organized for the protection of your lives and property pending the arrival of our warships.'

In June there was a serious outbreak at Bluefields, in which the natives and some Jamaica negroes, probably encouraged by Americans, were the aggressors. The Nicaraguan commissioner issued in June an order that no guns should be fired in the streets on the 4th of July. This irritated both the natives and the Americans, and the discontent was further aggravated by the failure to pay the negro police their June wages. An attack was made on a public building, which was perforated by shot, and on the 6th of July Chief Clarence issued a manifesto, in which he declared himself to be the hereditary chief of Mosquito and assumed his authority as ruler. The Nicaraguans fled to Rama when the natives made an attack upon and captured the military post of the Nicaraguans near the town, with its guns and munitions of war. Gen. Cabezas surrendered, but was permitted to remain as commissioner of the government, but the Mosquito flag was raised over the fort and town.

The United States vessel Marblehead was at Bluefields and the Columbia was dispatched from New York to join the Marblehead for the protection of our citizens at the coast. United States marines were landed in July by a force from a British vessel, to protect American interests. The position assumed by our government was the recognition of Nicaraguan sovereignty over the whole coast, demanding guarantees against unjust taxation and for the full freedom of religion and an observance of the grants and privileges held by American residents.

Nicaragua moved at once to take possession of the Mosquito coast, the whole coast being placed under martial law and Nicaragua assumed sovereignty. Bluefields was reoccupied Aug. 11, and the Mosquito troops, with Chief Clarence, left for Port Limon without being attacked. In response to the order of Gen. Cabezas the American and British forces returned to their vessels, against the protest of the American residents. These people feared they would be arrested for the July disturbances, but they were informed that if they had violated the laws of the country in which they lived by uniting with the rebels they were not entitled to protection. A few days after the withdrawal of the marines the English vice-consul, four Americans and an Englishman were arrested and placed in prison at Managua for complicity in the July riots. The president of Nicaragua issued a decree banishing the Englishmen and Americans from the country. The order of President Zelaya has not been executed through fear of British and American interference. As late as October, affairs at Mosquito had not become quieted. Colombia objects to the position Nicaragua has taken in absorbing the reservation and intimates that she herself may assume the government of the country. Not only Colombia, but Honduras, objects to the aggression of Nicaragua and insists that the people of

Mosquito shall continue to govern themselves without any interference from Nicaragua. Affairs are threatening that late in November the United States sent an additional naval force to Bluefields for the protection of

American interests in that quarter. The Americans on the coast disapprove the action of our government in recommending the flight of Nicaragua to the sovereignty of the Mosquito coast. Our record of events closed Dec. 1.

CHINA, JAPAN AND KOREA.

The affairs in eastern Asia have been of very grave interest to all Europe, as well as to the United States. While our trade with both China and Japan is large and increasing, our relations with both countries are peculiar. In 1880 our trade with China aggregated \$24,535,592, and with Japan \$30,648,711. This is carried on through treaty ports in both countries.

The five United States treaty ports in China are Kiangchow, Amoy, Foo-chow, Ningpo and Shanghai. Under the terms of our treaty with China, "the citizens of the United States are permitted to frequent these five ports, to reside with their families and trade there, and to proceed at pleasure with their vessels and merchandise to and from any foreign port and either of the five said ports, and from either of the five said ports to any other of them."

According to this treaty, it is stated at the state department that the United States would be justified, if occasion arose, to open up any blockade of these ports. Both China and Japan realize this, and it is therefore assumed that no hostilities will occur within these ports. The same is also to be expected of the ports to which other foreign countries have free entry. Altogether, there are twenty-one treaty ports in China. These are Wong-chow, Foo-chow, Amoy, Tamsin, Takow, Swatow, Canton, Pakhow, Lunchow, Mengtze, Whampoo, Newchang, Tien-Tsin, Chefoo, Shanghai, Chinkiang, Woohoo, Kinpiang, Hankow, Ichang and Nimpoo.

In view of the large foreign interests in these ports both Japan and China regard them as neutral, and the foreign countries concerned so regard them. The same conditions will prevail under the proposed treaty ports. There are five of these: Hakodate, Migita, Nagasaki, Kobe and Yokohama.

For many years Korea has acknowledged the suzerainty of China. In the seventeenth century renewed conditions of vassalage were accepted and in the trade regulations of 1822 China's right as suzerain were recapitulated and acknowledged by Korea. Annual missions with tribute are sent to China, and no important step in the relations of Korea with other countries is taken without China's consent.

The trouble between Japan and China grew out of the assassination of Kim-ok-Kiun at Shanghai, by the order of the king of Korea. Kim had been Korean minister to Japan just before the unsuccessful attempt to make himself dictator in 1884, and when he raised his rebellion he was supported by Japanese troops. After the failure of his conspiracy he fled to Japan, where he was protected by the government until he was lured away to China in March, 1885. The Japanese government was greatly incensed by the murder of its protégé, and its anger was increased by the line of conduct pursued by Mr. Yu, the Korean charge d'affaires at Tokio. For three days he refused to give up the two brothers Ken, who fled to his residence for protection after making an ineffectual attempt to kill Kim-ok-Kiun's fellow conspirator, Boku Eiko, at Tokio. When at last he did surrender them he himself took a hasty and undignified departure from the country without giving the government to which he was accredited any intimation that he was about to leave. It was freely rumored in Japan at the time that he had been implicated in the murder of Kim-ok-

Kiun and the attempt on Boku Eiko, and that he had fled to avoid awkward revelations when the brothers Ken came to be examined in the Japanese court.

All these circumstances led to a diplomatic conflict between the two countries, and eventually the Japanese foreign office addressed two questions to the Korean government. These questions were: 1. Why did the Korean charge d'affaires depart from Tokio after the failure of the attempt to kill Boku, without going through the usual formality of informing the Japanese government of his intention? 2. Did the king of Korea give instructions to any of his subjects or know that instructions were given to kill a Korean or Koreans who were living under Japanese protection? With these questions it is said a strong hint was given of unpleasant results that would follow unsatisfactory replies. The replies evidently were not to the Japanese taste and occupation of the country was the consequence.

About the 23d of May a revolution or rebellion was inaugurated in Korea against official extortion and the Chinese officials, to the number of some thirty-five or forty, were murdered at the capital by the insurgents, and by the 27th rebels had captured the chief province of the country. On the 6th of June a force of Chinese was sent to Korea, by request of the king, to suppress the rebels. On the 22d of June a strong force of Japanese troops were landed at Ninsun, in Korea. The number reported to have landed is 19,000, of which 15,000 were sent to Seoul, the capital, while 4,000 were stationed at Chemulpo, the chief port of entry to the country. To meet this force twenty battalions of Chinese troops were ordered to Korea on the 1st of July and on the 2d the Korean royal army was routed by the Japanese troops.

During this time a diplomatic correspondence had been carried on between the Japanese minister, Mr. Otori, at Seoul and the Korean foreign office in which Otori attempted to inaugurate reforms in Korea with the view of harmonizing the interests of the three powers. On the 3d of July Mr. Otori laid before the Korean government his plan, which was as follows:

1. The civil government in the capital and in the provinces to be thoroughly reformed, and the departments arranged on a new basis under proper responsible heads.
 2. The resources of the country to be developed, mines opened, railways constructed, etc.
 3. The laws of the country to be radically reformed.
 4. The military establishments to be reorganized and under competent instructors, so as to render the country secure alike from internal disorder and external attack.
 5. Education to be thoroughly reformed on modern lines.
- A commission was appointed for their consideration and some other proposals were presented, among which were some aimed at the dominant party in Korea. Japan insisted that the interests of the three nations demanded in Korea "personages of too great influence were to be removed; the foreign customs establishment to be abolished; all foreign advisers to be dispensed with; the resources of the country to be developed; railways, telegraphs, and a

mint to be established; the legal and judicial systems to be radically reformed; and a school system to be adopted, beginning with primary schools and culminating in universities, with provisions for sending pupils abroad." China was asked to join Japan and Korea in bringing these reforms about which was flatly refused by China, so long as Japanese troops remained in Korea. Mr. Otori then informed the Korean government that Japan would alone unite with Korea to carry out the reforms. July 23 Mr. Otori was fired upon by a party of soldiers acting under the orders of the dominant party in Korea, and the next day the king formerly declared his independence of China.

On the 24th of July the Korean forces attacked the Japanese garrison at Seoul and were repulsed. In the meantime a Chinese transport, the Kow-Shung, had been sunk by a Japanese war vessel, the king of Korea had been taken by them, and the Japanese and on the 28th of July the Koonan, another Chinese transport, was sunk. On the next day the Chinese war vessel Tsao-Khan was captured. July 31 the Chinese battleship Chen-Yuen was reported to be sunk, two cruisers were captured and another destroyed.

On the 1st day of August the Japanese government formally declared war against China in the following proclamation:

"We, by the grace of heaven, emperor of Japan, seated on a throne occupied by the same dynasty from time immemorial, do hereby make and proclaim to all our loyal and brave subjects the following: We hereby declare war against China and we commend each and all of our competent authorities in obedience to our wish, and with a view to the attainment of our national aim, to carry hostilities by sea and land against China with all the means at their disposal consistently with the law of nations."

"We were unprepared for such a conspicuous want of amity and good faith as has been manifested by China in her conduct toward this country in connection with the Korean affair. Korea is an independent state. She was first introduced into the family of nations by the advice and under the guidance of Japan. It has, however, been China's habit to designate Korea as her dependency and both openly and secretly to interfere with her domestic affairs. At the time of the recent civil insurrection in Korea China dispatched troops thither, alleging that her purpose was to afford succor to her dependent state."

"We, in virtue of this treaty concluded in 1882, and looking to possible emergencies, caused a military force to be sent to that country, wishing to procure for Korea freedom from the calamity of perpetual disturbance, and thereby to maintain the plan of the east in general. In view of China's cooperation for the accomplishment of that object, but China, advancing various pretexts, declined Japan's proposal."

"Thereupon Japan advised Korea to reform her administration so that order might be preserved at home, and so that the country might be able to discharge the responsibilities and duties of an independent state abroad."

"Korea has already consented to undertake the task, but China has secretly and insiduously endeavored to circumvent and thwart Japan's purpose. She has further procrastinated and endeavored to make warlike preparations both on land and at sea. When these preparations were completed, she not only sent large re-enforcements to Korea, with a view to the forcible attainment of her ambitious designs, but even carried her arbitrariness and insolence to the extent of opening fire upon our ships in Korean waters. China's plain object is to make us uncertain where the responsibility resides of preserving peace and

order in Korea, and not only to weaken the position of that state in the family of nations, but also to obscure the significance of the treaties recognizing and confirming that position. Such conduct on the part of China is not only a direct injury to the rights and interests of this empire, but also a menace to the permanent peace and tranquility of the orient."

"Judging from her actions it must be concluded that China from the beginning has been bent upon sacrificing peace to the attainment of her sinister objects. In this situation, ardent as our wish is to promote the prestige of the country abroad by strictly peaceful methods, we find it impossible to avoid a formal declaration of war against China. It is our earnest wish that, by the loyalty and valor of our faithful subjects, peace may soon be permanently restored and the glory of the empire augmented and completed."

China immediately assumed the arbitrament of war in the following declaration:

"Korea has been our tributary for the last two hundred odd years. She has given us tribute all this time, which is a matter known to the world. For the last dozen years or so Korea has been troubled by repeated insurrections; and we, in sympathy with our small tributary, have as repeatedly sent succor to her aid, eventually placing a resident in her capital to protect Korea's interests. In the fourth moon (May) of this year another rebellion was begun in Korea, and the king repeatedly asked again for aid from us to put down the rebellion. We then ordered our fleet, Chang to send troops to Korea, and, they having barely reached Asan, the rebels immediately scattered. But the 'wojen' (the ancient epithet for the Japanese, expressive of contempt, translated 'pigmy,' or, more strictly according to usage, 'pig') with any cause whatever, sent their troops to Korea and entered Seoul, the capital of Korea, re-enforcing them constantly until they have exceeded 10,000 men."

"In the meantime the Japanese forced the Korean king to change his system of government, showing a disposition in every way of bullying Koreans. It was found a difficult matter to reason with the 'wojen.' Although we have been in the habit of assisting our tributaries, we have never interfered with their internal government. Japan's treaty with Korea was as one country with another. There is no law for sending large armies to bully a country in this way and compel it to change its system of government. Various powers are united in condemning the conduct of the Japanese, and can give no reasonable name to the army she now has in Korea. Nor has Japan been amenable in reason, nor would she listen to an exhortation to withdraw her troops and confer amicably upon what should be done in Korea. On the contrary Japan has shown herself belligerent without regard to appearances and has been increasing her forces there. Her conduct against the people of Korea, as well as our merchants there, and so we sent more troops over to protect them. Judge of our surprise then, when, half-way to Korea, a number of the 'wojen' ships suddenly appeared and, taking advantage of our unpreparedness, opened fire on our transports at a spot on the southeast near Asan and damaged them, thus causing us to suffer from their treacherous conduct which could not be foretold by us."

"As Japan has violated the treaties and not observed international laws, and is now running rampant, with her false and treacherous actions, beginning hostilities herself and laying herself open to condemnation by the various powers, large, we, therefore, desire to make it known to the world that we have

always followed the paths of philanthropy and perfect justice throughout the whole compass of the world, the 'wojen' and others have broken all the laws of nations and treaties, which it passed our patience to bear with. Hence we command Li Hung Chang to give strict orders to our various armies to hasten with all speed to root the 'wojen' out of their lairs. He is to send successive armies of valiant men to Korea in order to have the Koreans freed from bondage. We also command Manchu generals, viceroys, and governors of the maritime provinces, as well as the commanders-in-chief of the various armies, to prepare for war and to make every effort to fire on the 'wojen' ships if they come into our ports and utterly destroy them. We exhort our generals to refrain from the least laxity in obeying our commands, in order to avoid severe punishment at our hands. Let all know this edict as if addressed to themselves personally."

Active war had begun previous to its formal declaration on July 25th. On the 26th of July the British ship Kow-Shung, loaded with Chinese troops, on their way to re-enforce the Chinese army at Asan, was sunk off Chemulpo by a Japanese war vessel and about 1,000 lives were reported to be lost. The sinking of this vessel led to some correspondence between Japan and Great Britain, and a suitable apology was given by Japan, but it resulted in the abandonment of Asan by the Chinese and its occupation by Japan.

Late in August a treaty was concluded between Korea and Japan, which is remarkable for its comprehensiveness as well as its brevity. It consisted of three articles as follows:

1. The object of the alliance is the strengthening and perpetuation of the independence of Korea as an autonomous state, and the promotion of the mutual interests of Korea and Japan by compelling the Chinese forces to withdraw from Korea and by obliging China to abandon its claim to the right to dominate the affairs of Korea.

2. Japan is to carry on warlike operations against China, both offensive and defensive; and the Korean government is bound to afford every possible facility to the Japanese forces in their movements, and to furnish supplies of provisions to them at a fair remuneration, so far as such supplies may be needed.

3. The treaty shall terminate when a treaty of peace is concluded by Japan with China.

The fall of Asan carried the war to the north of Korea. Ping Yang was taken by the Japanese about the middle of September, and the Chinese army at that place was destroyed. Hwang-Ju had already fallen, and in the two conflicts China had lost 2,000 killed and 21,000 prisoners and Japan was the master of Korea. The Japanese navy was rapidly coming into prominence in the war, and on the 17th of September a naval battle was fought in the gulf of Pe-Chi-Li, between twelve ironclads, cruisers and torpedo boats of the Chinese navy and eleven Japanese men-of-war, with torpedo boats. After a desperate battle of about six hours' duration, the Japanese, without the loss of a single vessel, destroyed seven of the Chinese vessels and put the others to flight. The escaping vessels of the Chinese made for Port Arthur. Competent American and British naval officers pronounce this one of the most remarkable naval battles of the century, giving the Japanese officers credit for handling their vessels and managing their guns with an ability and skill that would have done credit to the most accomplished naval officers in the world.

The disabling of the Chinese navy gave the Japanese the opportunity of landing at the gulf of Pe-Chi-Li and the preparation of a campaign from the mouth of the Yalu river was speedily begun. Starting from Wiju

the Japanese entered Chinese territory and took the city of Moukden. Preparations were also made for taking Port Arthur, across the gulf of Pe-Chi-Li, which is about two hundred miles from Tien-Tsin, at the mouth of the Taku river upon which the capital of China, Peking, is located and about seventy-five miles from the gulf. Regular siege was laid to the port with the result that on the 21st of November the city, with the war vessels that were in it, was captured. On the 18th of November the cavalry advance guard met 2,000 Chinese eight miles from Port Arthur, and fell back on the first brigade, leaving several wounded behind. They returned with one battalion of infantry and defeated the Chinese. The wounded Japanese were found with their heads, hands and feet cut off and their bodies awfully mutilated. On the 19th all the army had passed before these victims. At night the Japanese army was about four miles from the enemy, who held nine sea forts and eleven land forts. On the 20th, while the Japanese were looking for the best artillery positions, 6,000 Chinese made a sortie in three columns—on the left, the right and the center. All the forts were firing at the Japanese. A part of the army and artillery behind the advance guard and two battalions of Gen. Yamaji's division repulsed the Chinese after five hours' fighting.

On Nov. 21 the Japanese fleet made a demonstration at 6 in the morning, but did no fighting. At 6:30 the Japanese artillery, which had taken position during the night, opened fire on the three forts on the right and displayed magnificent marksmanship. The Chinese forts, on a table land, were 200 feet high, answered strongly. At 8 o'clock the forts were taken by assault by the infantry, who showed magnificent courage. At 9 o'clock the Japanese left brigade, commanded by General Saegawa, advanced upon the remaining eight forts. Fifty Chinese guns poured shot and shell upon them, but nothing stopped them. At 1 o'clock all the forts were taken by assault and the army advanced upon the city. The inhabitants, who had been armed with express rifles and explosive cartridges, resisted in the city, and the houses had to be taken by storm. Many Chinese were killed. The sea forts fell without fighting, and all was finished at 5 o'clock. The Chinese generals fled after the first fort was taken. Had they surrendered many Chinese lives would have been saved. Among the governor's papers were found letters from Chinese officers offering the heads, hands and feet of Japanese and asking for rewards. The barbarism and cruelty of the Chinese are indescribable. Many Chinese were killed during the battle, but the Japanese, however, treated kindly those remaining in the city. Some eighteen thousand men were engaged on each side. There were 250 Japanese killed and wounded. The Chinese killed number 1,500.

Japan is moving for a vigorous prosecution of the war, while China is anxious for peace and a conclusion of the war. At the time of closing this record it is reported that the American ministers to China and Japan are moving to secure an end of hostilities. It was reported on the 3d of December that Japan's proposal was that if terms of peace between Japan and China be concluded now, Japan will accept an indemnity of 400,000,000 yen, to be paid in installments, with the cession to her of the territory which she now occupies, but in the event of the failure of the present peace negotiations the demands upon China will be increased in proportion to the length of time during which operations shall be carried on. No armistice will be declared unless China sues for peace and gives pledges for the faithful performance of her agreement. Our record closed Dec. 15, 1894.

RAILWAY MILEAGE OF THE WORLD.

In a recent issue of the Archiv fur Eisenbahnwesen are printed a series of tables giving some interesting data regarding the railways of the world. The figures for the year ended Dec. 31, 1892, are as follows:

COUNTRY.	Length Miles.	Length Per 100 Sq. Miles.	Per 10,000 Inhab- itants.	COUNTRY.	Length Miles.	Length Per 100 Sq. Miles.	Per 10,000 Inhab- itants.

ILLINOIS COAL STATISTICS--1893.

The entire coal industry of this state for the year 1893 is comprehensively presented in the following summaries of totals and averages:

Number of counties in which coal has been mined.....	56	Average price paid per ton for hand-mining--winter.....	\$0.722
Number of mines and openings of all kinds.....	788	Number of tons of lump coal mined by hand.....	8,146,646
Number tons coal, all grades, mined.....	19,949,564	Number of tons mined by hand and paid for by the day.....	1,775,311
Number of tons lump coal (2,000 lbs).....	16,112,899	Number of tons mined by hand and paid gross weight.....	5,961,289
Number of tons other grades of coal in other grades.....	3,836,665	Number of mining machines in use.....	310
Number of acres worked out--estimated.....	576,965	Number of tons of all grades mined by machines.....	4,729,749
Number of employees of all kinds.....	3,109.07	Number of tons of lump coal mined by machines.....	3,631,029
Number of miners.....	35,390	Number of tons of other grades mined by machines.....	1,098,720
Number of other employees, including boys.....	26,145	Number of kegs of powder used.....	368,772
Number of boys over 14 years of age under ground.....	9,245	Number of men killed.....	69
Number of employees under ground.....	854	Number of wives made widows.....	32
Number of employees above ground.....	31,564	Number of children made fatherless.....	106
Average number of days of active operations, shipping mines.....	3,800	Number of men injured so as to lose time.....	406
Aggregate home value of total product.....	229.4	Number of tons of coal mined for each life lost.....	289,124
Aggregate home value of lump coal.....	\$17,827,595	Number of tons of coal mined for each man injured.....	49,508
Aggregate home value of other grades of coal.....	\$16,517,590	Number of employees for each life lost.....	513
Average value of lump coal per ton at the mines.....	\$1,314,635	Number of employees for each man injured.....	88
Average value of other grades of coal per ton at the mines.....	\$1.025	Number of new mines opened, and old mines reopened.....	70
Average price paid per ton for hand-mining.....	\$0.3427	Number of mines closed or abandoned.....	120
Average price paid for hand-mining--summer.....	\$0.7145		
	\$0.6739		

RANK OF COUNTIES.

Counties which have produced more than 200,000 tons of coal, arranged in order of their rank for years 1891, 1892 and 1893.

DOMESTIC.

FIRST CLASS.—Letters and all written matter, whether sealed or unsealed, and all other matter sealed, nailed, sewed, tied or fastened in any manner so that it cannot be easily examined, 2 cents per ounce or fraction thereof. A "special delivery" 10-cent stamp when attached to a letter, in addition to the lawful postage, shall entitle the letter to immediate delivery at or within one mile of any postoffice. Postal cards, 1 cent each.

SECOND CLASS.—All regular newspapers, magazines and other periodicals issued at intervals not exceeding three months; the postage is 1 cent for each pound. A special rate of 1 cent for four ounces is made for all second-class matter mailed by other than publishers or newsdealers.

THIRD CLASS.—Embraces printed books, pamphlets, circulars, engravings, lithographs, proof-sheets and manuscript accompanying the same, and all matter of the same general character, and not having the character of personal correspondence. Circulars produced by hectograph or similar process, or by electric pen, are rated as third class. The limit of weight for mail matter of the third class is four pounds, except in the case of single books exceeding that weight. The rate of postage on mail matter of the third class is 1 cent for each two ounces or fraction thereof.

FOURTH CLASS.—All mailable matter, like merchandise, not included in the three preceding classes, which is so prepared for mailing as to be easily taken from the wrapper and examined. Rate, 1 cent per ounce or fraction thereof, except seeds, roots, cuttings, bulbs, plants and scions, which are 1 cent per two ounces. Limit of weight, four pounds. Full prepayment compulsory. Liquids and other like injurious matter not admitted, except some under conditions which may be learned at any postoffice.

SUGGESTIONS.—Direct your mail matter to a postoffice, writing the name of the state plainly; and if to a city, add the street and number or postoffice box of the person addressed. Matter not addressed to a postoffice cannot be forwarded. Write or print your name and address, and the contents, if a package, upon the upper left-hand corner of all mail matter. This will insure its immediate return to you for correction, if improperly addressed or insufficiently paid; and if it is not called for at destination, it can be returned to you without going to the dead-letter office. If a letter, it will be returned free. Register all valuable letters and packages. Registry fee, 8 cents, which, with the postage, must be fully prepaid.

MONEY-ORDER FEES.—For money orders in denominations of \$100 or less, the following fees are charged:

For orders for sums not exceeding \$2.50.....	3c
For over \$2.50 and not exceeding \$5.....	5c
For over \$5 and not exceeding \$10.....	8c
For over \$10 and not exceeding \$20.....	10c
For over \$20 and not exceeding \$30.....	12c
For over \$30 and not exceeding \$40.....	15c
For over \$40 and not exceeding \$50.....	18c
For over \$50 and not exceeding \$60.....	20c
For over \$60 and not exceeding \$75.....	25c
For over \$75 and not exceeding \$100.....	30c

FOREIGN.

To all parts of the Universal Postal Union, embracing Argentine Republic, Australia, Austria and Hungary, Belgium, Bolivia, Brazil, Bulgaria, Ceylon, China via Hong Kong, Chili, Cuba, Denmark, Danish colonies, Ecuador, Egypt, Falkland Islands, France and French colonies, Germany, Great Britain and British West Indies, Greece, Greenland, Guatemala, Hayti, Holland or Netherlands and Nether-

RATES OF POSTAGE.

land colonies, Honduras, Hong Kong, India (British), Ireland, Italy, Japan, Liberia, Luxemburg, Malacca, Mauritius, Montenegro, Natal, Newfoundland, Norway, Paraguay, Patagonia, Penang, Persia, Peru, Portugal and Portuguese colonies, Roumania, Russia, St. Bartholomew, Salvador, Servia, Siam, Singapore, Spain and Spanish colonies, Straits settlements, Sweden, Switzerland, Transvaal, Trinidad, Turkey, United States of Colombia, Uruguay, Venezuela.

ON LETTERS.—Five cents for each half ounce or fraction thereof—prepayment optional. Double rates are collected on delivery of unpaid or short paid letters.

On newspapers, books, pamphlets, photographs, sheet music, maps, engravings and similar printed matter, 1 cent for each two ounces or fraction thereof.

TO CANADA.—(Including Nova Scotia, New Brunswick, Manitoba and Prince Edward Island): Letters, 2 cents for each ounce or fraction thereof; books, circulars and similar printed matter, 1 cent for each two ounces or fraction thereof; second-class matter, same as in the United States; samples and merchandise, 1 cent per ounce. Packages must not exceed four pounds six ounces in weight—prepayment compulsory.

TO MEXICO.—Letters, postal cards, and printed matter, same rates as in the United States; samples, 1 cent per ounce; merchandise other than samples can only be sent by parcel post.

TO AUSTRALIA.—(Except New South Wales, Queensland and Victoria) via San Francisco: On letters, 5 cents for each half ounce or fraction thereof; to places excepted above, 12 cents for each half ounce; on newspapers, 2 cents each—prepayment compulsory.

LIMITS OF SIZE AND WEIGHT.—Packages of samples of merchandise to the countries named above (except Great Britain, France, Belgium, and Switzerland) must not exceed eight and three-fourths ounces, nor measure more than eight inches in length, four in breadth and two in depth; and packages of printed matter must not exceed four pounds six ounces. Packages of merchandise samples to Great Britain, France, Belgium, Switzerland, and Argentine Republic are limited to twelve ounces in weight, twelve inches in length, eight in width and four in depth. Packages of printed matter to Germany and Great Britain are limited to two feet in length and one foot in each other dimension.

INTERNATIONAL MONEY-ORDER FEES.

On Algeria, Belgium, British India, Cape Colony, Constantinople, Denmark, Dominion of Canada, Egypt, England, France, German empire, Hong Kong, Ireland, Italy, Jamaica, Japan, Newfoundland, New South Wales, New Zealand, Portugal, Sandwich Islands, Scotland, Shanghai, Sweden, Switzerland, Tasmania, Victoria.

For sums not exceeding \$10.....	10c
Over \$10 and not exceeding \$20.....	20c
Over \$20 and not exceeding \$30.....	30c
Over \$30 and not exceeding \$40.....	40c
Over \$40 and not exceeding \$50.....	50c
Over \$50 and not exceeding \$60.....	60c
Over \$60 and not exceeding \$70.....	70c
Over \$70 and not exceeding \$80.....	80c
Over \$80 and not exceeding \$90.....	90c
Over \$90 and not exceeding \$100.....	\$1

Orders can also be obtained on Austria and East Indies, by remittance through the postal department of Switzerland, subject to the rates of the Swiss department to those countries. Also on Norway and the Netherlands, through the postal department of the German empire, subject to the rates of the German department to those countries.

POPULAR VOTE.

For presidential candidates from 1824 to and including 1892. Prior to 1824 electors were chosen by the legislatures of the different states.

1824—J. Q. Adams had 105,321 to 155,872 for Jackson, 44,282 for Crawford, and 46,587 for Clay. Jackson over Adams, 50,551. Adams less than combined vote of others, 140,831. Of the whole vote Adams had 32.92 per cent, Jackson 44.77, Clay 13.23, Crawford 13.23. Adams elected by House of Representatives.

1828—Jackson had 647,231 to 509,097 for J. Q. Adams. Jackson's majority, 138,134. Of the whole vote Jackson had 56.97 per cent, Adams 44.03.

1832—Jackson had 687,502 to 530,189 for Clay, and 33,108 for Floyd and Wirt combined. Jackson's majority, 124,305. Of the whole vote Jackson had 64.96 per cent, Clay 42.30, and the others combined 2.65.

1836—Van Buren had 761,549 to 736,656, the combined vote for Harrison, White, Webster, and Mangum. Van Buren's majority, 24,893. Of the whole vote Van Buren had 50.83 per cent, and the others combined 49.17.

1840—Harrison had 1,275,017 to 1,128,702 for Van Buren, and 7,059 for Birney. Harrison's majority, 138,266. Of the whole vote Harrison had 52.89 per cent, Van Buren 46.82, and Birney 23.

1844—Polk had 1,337,243 to 1,239,068 for Clay and 62,300 for Birney. Polk over Clay, 38,175. Polk less than others combined, 24,125. Of the whole vote Polk had 49.55 per cent, Clay 48.14, and Birney 2.21.

1848—Taylor had 1,391,101 to 1,220,544 for Cass, and 291,263 for Van Buren. Taylor over Cass, 139,577. Taylor less than others combined, 151,706. Of the whole vote Taylor had 47.36 per cent, Cass 42.50, and Van Buren 10.14.

1852—Pierce had 1,001,474 to 1,386,578 for Scott, and 156,119 for Hale. Pierce over all, 58,747. Of the whole vote Pierce had 50.90 per cent, Scott 44.10, and Hale 4.97.

1856—Buchanan had 1,838,169 to 1,341,264 for Fremont, and 874,534 for Fillmore. Buchanan over Fremont, 496,905. Buchanan less than combined vote of others, 377,629. Of the whole vote Buchanan had 45.34 per cent, Fremont 33.06, and Fillmore 21.57.

1860—Lincoln had 1,865,552 to 1,375,157 for Douglas, 845,763 for Breckinridge, and 589,581 for Bell. Lincoln over Breckinridge, 491,185. Lincoln less than Douglas and Breckinridge combined, 354,568. Lincoln less than combined vote of all others, 94,143. Of the whole vote Lincoln had 39.91 per cent, Douglas 22.40, Breckinridge 18.95, and Bell 12.61.

1864—Lincoln had 2,210,067 to 1,808,725 for McClellan (eleven states not voting, viz.: Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Texas, and Virginia). Lincoln's majority, 408,342. Of the whole vote

Lincoln had 55.06 per cent and McClellan 44.94.

1868—Grant had 3,015,071 to 2,709,613 for Seymour (three states not voting, viz.: Mississippi, Texas and Virginia). Grant's majority, 305,458. Of the whole vote Grant had 52.67 per cent and Seymour 47.33.

1872—Grant had 3,597,070 to 2,834,079 for Greeley, 29,408 for O'Connor, and 5,038 for Black. Grant's majority, 729,975. Of the whole vote Grant had 55.43 per cent, Greeley 43.83, O'Connor 15, Black 0.9.

1876—Hayes had 4,033,950 to 4,284,885 for Tilden, 81,740 for Cooper, 4,522 for Smith, and 2,336 scattering. Tilden's majority over Hayes, 250,935. Tilden's majority of the entire vote cast, 157,937. Hayes less than the combined vote of others, 344,833. Of the whole vote cast Hayes had 47.35 per cent, Tilden 50.94, Cooper 3.7, Smith 11, and scattering 4.045.

1880—Garfield had 4,449,033 to 4,442,035 for Hancock, 307,301 for Weaver, and 12,575 scattering. Garfield over Hancock, 7,018. Garfield less than the combined vote for others, 313,864. Of the popular vote Garfield had 48.26 per cent, Hancock 48.25, Weaver 3.33, scattering 13.

1884—Cleveland had 4,874,986 to 4,851,981 for Blaine, 150,369 for St. John, 173,570 for Butler. Cleveland had over Blaine 23,006. Cleveland had 48.48 per cent, Blaine 48.22, St. John 1.49, Butler 1.74.

1888—Harrison had 5,441,932 to 5,538,560 for Cleveland, 349,367 for Cass, 147,521 for Streeter, 3,073 for Cowdrey, 1,591 for Curtis, and 4,345 scattering. Harrison had 96,658 less than Cleveland. Of the whole vote Harrison had 47.83 per cent, Cleveland 48.63 per cent, Fisk 2.21 per cent, and Streeter 1.30 per cent.

1892—Cleveland had 5,555,562 to 5,162,874 for Harrison, 384,065 for Butler, 1,055,424 for Weaver, and 22,413 for Wing. Of the whole vote Cleveland had 45.73 per cent, Harrison 42.49 per cent, Bidwell 2.17 per cent, and Weaver 8.67 per cent.

Of the presidents, Adams, Federalist; Polk, Buchanan, and Cleveland, Democrats; Taylor, Whig; Lincoln, Hayes, Garfield, and Harrison, Republicans, did not, when elected, receive a majority of the popular vote. The highest percentage of popular vote received by any President was 55.97 for Jackson, Democrat, in 1828, and the lowest 39.91 for Lincoln, Republican, in 1860; Buchanan, Democrat, next lowest, with 45.34. Hayes and Harrison, with the exception of John Quincy Adams, who was chosen by the house of representatives, were the only Presidents ever elected who did not have a majority over their principal competitors, and Tilden and Cleveland the only defeated candidates who had a majority over the President-elect.

NATIONAL LEAGUE FOR THE PROTECTION OF AMERICAN INSTITUTIONS.

This absolutely nonpartisan and unsectarian organization was incorporated Dec. 24, 1889, and its objects are:

To secure constitutional and legislative safeguards for the protection of the common-school system and other American institutions and to promote public instruction in harmony with such institutions and to prevent all sectarian or denominational appropriations of public funds.

As a means of securing the foregoing objects, the following proposed sixteenth amendment to the United States constitution has been introduced into both houses of congress:

No state shall pass any law respecting an establishment of religion or prohibiting the free exercise thereof, or use its property or credit, or any money raised by taxation, or authorize either to be used, for the purpose of founding, maintaining or aiding, by appropriation, payment for services, expenses or otherwise, any church, religious denomination or religious society, or any institution, society or undertaking which is wholly or in part under sectarian or ecclesiastical control.

During its five years of judicious, educational and aggressive work the league has secured the withdrawal from the receipt of

government appropriations for the support of denominational education among the Indians of the Protestant Episcopal, Presbyterian, Methodist Episcopal and Congregational churches and the Orthodox Friends.

It has also received the indorsement of the proposed sixteenth amendment by these churches and by the Baptists, United Presbyterians, Methodist Protestants and the Methodist Episcopal church, South.

It has secured action on the part of the United States senate which promises a speedy settlement of the important question of sectarian appropriations for Indian education.

The constitution of twenty-four states now contain prohibitions against a division of the common-school fund and against sectarian appropriations.

In the constitutional convention of New York state a notable advance was secured in

the assertion of the principles advocated by the league.

The various American patriotic orders, representing over 4,000,000 of voters, have given the proposed sixteenth amendment hearty indorsement and have adopted the league's platform of principles.

The co-operation and aid of all thoughtful citizens are invited.

The offices of the league are at 1 Madison avenue, New York city, where all communications should be addressed to the general secretary.

Officers—President, William H. Parsons; vice-president, William Strong; general secretary, James M. King; treasurer, William Fellowes Morgan.

Law Committee—William Allen Butler, Dorman B. Eaton, Cephas Brainerd, Henry E. Howland, Wheeler H. Peckham.

PRODUCTION OF COAL.

ANTHRACITE.

The quantity of anthracite coal sent to market from its first beginning to the close of 1883, seventy-four years, as reported by the official accountants, has been as follows in tons of 2,240 pounds.

1820.....	365	1839.....	819,327	1858.....	5,491,187	1876.....	18,906,000

1838.....	739,293	1857.....	6,430,342				

Shipments commenced from the Lehigh region in 1820, the Schuylkill region in 1825, the Lackawanna region in 1829, the Pittston or Upper Lackawanna region in 1850 and the Scranton region in 1858. Outside of Pennsylvania there are three anthracite coal mines, one in Colorado, one in New Mexico and one in Rhode Island. The aggregate output of these three mines was, in 1890, only 65,517 tons. (Census of 1890)

BITUMINOUS.

In tons of 2,000 pounds. Product of the United States, as reported by the Engineering and Mining Journal, March 10, 1891.

Rank.	1893	1892	Rank.	1893	1892
1 Pennsylvania.....	42,942,532	46,576,576	22 Georgia.....	372,191	165,000

The Supreme Court.

The Supreme court consists of seven judges, elected for a term of nine years, one from each of the seven districts into which the state is divided. The election is held in June of the year in which any term expires.

The state is divided into three grand divisions, southern, central and northern, in which the terms of the court are held. One clerk for each of the three grand divisions is elected for a term of six years.

The court sits at Mount Vernon, Springfield and Ottawa.

POSTOFFICE DEPARTMENT.

FINANCIAL STATEMENT FOR THE YEAR 1894.

Railroad transportation of the mails.....	\$25,661,567.26	Miscellaneous items, including office furniture, under first assistant postmaster-general's office..	\$106,759.51
Compensation of postmasters.....	15,999,700.98	Expenditures under twenty other smaller items of appropriation..	510,681.18
Free-delivery service.....	11,249,251.37		
Compensation to clerks in post-offices.....	8,759,386.96	Total expenditure.....	\$84,324,414.15
Compensation to railway postoffice clerks.....	6,878,194.79		
Star transportation of the mails...	5,546,355.65	The revenue by items was as follows:	
Railway postoffice service.....	2,921,967.18	Sale of postage stamps, stamped envelopes, newspaper wrappers, letter sheets and postal cards.....	\$70,199,151.32
Mail-messenger service.....	1,208,972.71	Box rents at postoffices.....	2,463,179.02
Transportation of foreign mails...	1,250,154.47	Receipts from money-order business.....	960,341.26
Manufacture of stamped envelopes, newspaper wrappers, and letter sheets.....	901,549.36	Letter postage paid in money, consisting mainly of balances paid by foreign postal administrations	61,827.17
Rent, light and fuel in the first and second-class postoffices.....	739,412.05	Fines and penalties.....	19,235.42
Rent, light and fuel in third-class postoffices.....	573,265.44	Miscellaneous receipts.....	18,828.61
Inland mail transportation—steam-boat.....	418,679.26	Receipts from unclaimed dead letters.....	17,965.74
Manufacture of postage stamps...	338,745.35	Receipts from other sources.....	1,500,000.00
Special-delivery service.....	261,229.70		
Mail bags and mail-bag catchers...	236,854.32	Total revenue.....	\$75,090,479.04
Mail depredations and postoffice inspectors.....	197,339.19		
Manufacture of postal cards.....	177,327.21	Excess of expenditures over receipts.....	\$8,243,935.11
Necessary and special facilities on railroads.....	151,540.71		

USE OF THE MAILS.

Number of letters and other pieces of first-class matter mailed during the year at letter rates of postage.....	2,298,100,000	Number of newspapers and periodicals mailed by others than publishers and news agents.....	70,840,000
Number of letters and other first-class matter on official business, free.....	85,630,000	Total pieces of second-class matter.....	1,429,450,000
Total letters paid and free.....	2,383,730,000		
Number of postal cards mailed....	468,490,000	Number of pieces of third-class matter mailed—books, pamphlets, circulars, etc.....	569,180,000
Number of newspapers and periodicals mailed by publishers and news agents, paid.....	977,030,000	Number of pieces of fourth-class matter mailed—packages of merchandise, etc., including seeds, plants, etc.....	48,240,000
Number of newspapers and periodicals mailed free in the several "counties of publication".....	381,560,000	Aggregate of pieces of all classes mailed.....	4,919,090,000

PUBLIC DEBT STATEMENT.

Dec. 1, 1894.

INTEREST-BEARING DEBT.

Bonds at 4½ per cent.....	\$25,364,500.00
Bonds at 4 per cent.....	659,648,850.00
Refund'g certificates, 4 percent.....	56,890.00
Aggregate of interest-bearing debt exclusive of U. S. bonds issued to Pacific railroads.....	689,143,030.00
Debt on which interest has ceased since maturity.....	1,828,930.26

5 per cent.....	200
7 per cent.....	73,000
	148,000
Total.....	\$17,722,950

There are past-due bonds still outstanding, for which money is on deposit in the American Exchange national bank of New York city to meet payment when presented, as follows:

Water.....\$4,500

BONDED INDEBTEDNESS OF COOK COUNTY.

Dec. 1, 1894.

KIND OF BONDS.	Date of Bonds.	When Due.	Amount.
Five per cent Court-House Bonds.....	Feb. 1, 1879	Jan. 1, 1899	\$750,000
Four and one-half per cent Refunding Bonds.....	May 1, 1880	May 1, 1900	1,156,500
Four per cent Refunding Bonds.....	May 1, 1885	May 1, 1905	600,000
Four per cent Refunding Bonds, 1 to 20 years, \$50,000 each year.....	Mar. 1, 1888		700,000
Four per cent Refunding Bonds, 1 to 20 years, \$67,500 each year.....	May 1, 1892		1,215,000
Total.....			\$4,221,500

IRRIGATION CONVENTIONS.

In September, 1893, an Interstate Irrigation association was formed at Salina, Kas., and subsequently a meeting of the association was held at North Platte, Neb. On the 21st and 22d of March, 1894, a convention of the association was held at Omaha, Neb. The following is the list of officers of the association: E. R. Moses, president, Great Bend, Kas.; J. L. Bristow, secretary, Great Bend, Kas. Executive committee—J. E. Emery, Lawrence, Kas.; A. W. Stubbs, Garden City, Kas.; J. K. Wright, Junction City, Kas.; B. A. McAllister, Omaha, Neb.; J. E. Frost, Topeka, Kas.; R. Harding, Wichita, Kas.; Prof. Robert Hay, Junction City, Kas.; I. A. Fort, North Platte, Neb.; G. W. Clements, Wichita, Kas.; Thomas Knight, Kansas City, Mo.; Alston Ellis, Fort Collins, Colo.

Following resolutions were adopted:
WHEREAS, The government of the United States has platted and put upon the market as agricultural lands the vast territory known as the great plains; and,

WHEREAS, American citizens wishing to secure homes have moved on these plains, bought and paid the government for land and expended money in improving it; and,

WHEREAS, It has been demonstrated by the experience of these men and by the signal stations of the government that the amount of rainfall at proper seasons is insufficient to make agriculture successful; therefore, be it

Resolved, That it is the sense of this convention that it is the duty of congress to make an increased appropriation to test the practicability of the following methods of irrigation for these plains:

1. That the government should by experiments determine whether the underflow water is of sufficient volume and can be brought to the surface and come to make it available for general irrigation purposes.

2. That it should determine the extent to which reservoirs can be constructed for the purpose of storing storm water sufficient in quantity for irrigation purposes.

Resolved, That we fully endorse the following extract from the report of the special committee of the United States senate and the same be made a part of the resolutions of this convention:

If anything can be done to encourage the people of these great plains it is important that it should be done speedily. There are over 1,000,000 people in the arid and semi-arid belt, who have paid into the United States no less than \$40,000,000 for public lands. The government should demonstrate to them the practicability before they can have courage or can command the means to prosecute the work on any considerable scale.

Resolved, That such a forest culture can be made an effective agent in the reclamation of an arid region, we therefore recommend that every farmer on these prairies be urged to plant and cultivate the growth of forest trees.

Resolved, That we favor the creation of the office of state engineer in the various states, and legislation which shall encourage irrigation, construction and development.

Resolved, That as authoritative meteorological data is of great importance to irrigation interests, it is the sense of this convention that it is to the best interests of the people of western America that the meteorological stations in the arid and semi-arid sections of this country be maintained and their number be increased; and we respectfully urge the secretary of agriculture and the representatives in congress to use their best efforts to that end.

Resolved, That we ask the agricultural colleges in the various states to devote a portion of the funds received from the United States government for agricultural work, to be experimented with and demonstrate the agricultural possibilities with and without irrigation in the plains region and to settle the various irrigation problems.

Resolved, That we urge the people of each county to organize county irrigation associations, put themselves in communication with the officers of their state associations and where no state association exists with the officers of this association.

Resolved, That the executive committee of this association be instructed to co-operate with the executive committees of the various state organizations in sending able delegates from each state to Washington to urge congress to take immediate action upon the bills now pending in behalf of the irrigation of the great plains.

INTERNATIONAL CONVENTION.

The first week in September the International Irrigation association assembled at Denver, Colo., at which the following resolutions were adopted:

The national executive committee of the irrigation congress is hereby instructed to prepare a series of bills for presentation to the congress of the United States embodying the following propositions:
Repeal the desert land law.

WHEREAS, The public land states are already vested with power under the Carey law to undertake the reclamation and settlement of 1,000,000 acres each; and,

WHEREAS, There is wide diversity of opinion concerning the best policy to pursue with relation to the remaining irrigable lands; therefore, be it

Resolved, That the proposition contained in sections 4 and 5 of the report of the majority of the committee on resolutions is reported back to the several state irrigation commissions, with instructions to endeavor to report to the fourth national irrigation congress a more definite and satisfactory plan for the reclamation of arid public lands through the co-operation of national and state authorities.

That there shall be a national irrigation commission vested with the supervision of such irrigation works as may be constructed by the federal government. The national irrigation commission shall also be charged with the work of making an immediate investigation of the problem of interstate streams and to report to the congress of the United States as early as possible a measure providing a means for the speedy and final adjudication of questions between states and a plan for the division of streams on a basis of justice and equity.

That the several territories be included in the provisions of the Carey law and any other laws asked for to be provided for in these resolutions.

That sufficient appropriation be secured from the general government for carrying on the work of securing waters applicable to the reclamation of the arid lands, and for the prosecution of surveys necessary to determine the location of lands susceptible of irrigation, and the selection and segregation of reservoir sites.

That reservoir sites heretofore reserved by the government shall be released and made available upon application therefor by states and territories.

The following was adopted as a part of the

report, but not referred to the national executive committee.

Resolved, That it is the sense of this congress that the president of the United States immediately take such steps looking to the appointment of international commissions composed of representatives of the United States and Canada and of the United States and Mexico, whose duties it shall be to thoroughly examine into and determine questions arising between said nations because of the waters of rivers partly in each of the coun-

tries or serving as a boundary line between the two and settle upon a basis and method for the equitable division and use of the waters of such streams when required for irrigation.

The address to the American people adopted by the congress sets forth the importance of irrigation of arid and semi-arid lands, thanks congress for legislation already enacted, and urges the necessity for further legislation.

PRICES OF WOOL FOR SEVENTY YEARS.

A recent bulletin of the agricultural department contains the following table of prices of wools since 1824, the date of the first fair:

YEAR.	JAN.			APRIL.			JULY.			OCT.		
	Fine.	Med'm.	Coarse.	Fine.	Med'm.	Coarse.	Fine.	Med'm.	Coarse.	Fine.	Med'm.	Coarse.

* Unofficial. The entire state republican ticket was elected, the victory being so overwhelming that a compilation of the official vote is not possible. The vote will be canvassed by the legislature in January, and until that time it is impossible to secure official figures. The majorities range from 6,000 to 30,000.

STATE OFFICERS ELECTED IN 1894.

Governor—Albert W. McIntire.
Lieut.-Governor—Jared L. Brush.
Secretary of State—Albert B. McGaffey.
Treasurer—Harry Mulnix.
Auditor—Clifford C. Parks.
Justice of the Supreme Court—John Campbell.
Attorney-General—Byron L. Carr.
School Superintendent—Agennette Peavy.
Regents of the University—Sidney A. Griffin and Chas. Dudley.

There was no republican electoral ticket.

In October, 1894, the only candidate for a state office was B. S. Liddon, democrat, who was elected justice of the supreme court without opposition, receiving 24,519 votes.

In 1892 the republicans put no congressional or electoral ticket in the field, supporting in the main the populist candidates.

FOR GOVERNOR, 1892.

Mitchell, Dem..... 32,068
Baskin, Pro..... 8,379
Hawley, Pro..... 802

FOR REPRESENTATIVES IN CONGRESS, 1894.

(Estimated by the secretary of state.)

COST OF WAR AND EDUCATION.

There is no better proof, says the Journal of Education, of the essential barbarism of even the most civilized nations of the world than is afforded by a comparison of the money they expend for the maintenance of physical supremacy as against the expenditure for mental improvement. Though it be assumed that brain is better than brawn, there is no evidence that statesmen so regard it. In some tables recently compiled, the amount per capita expended by various governments for military and educational purpose is set down as follows:

	Military.	Education.
France.....	\$4.00	\$.70
England.....	3.72	.62
Holland.....	3.58	.64
Saxony.....	2.38	.38
Wurtemberg.....	2.38	.38
Bavaria.....	2.38	.40
Prussia.....	2.04	.50
Russia.....	2.04	.46
Denmark.....	1.76	.44
Italy.....	1.52	.36
Belgium.....	1.38	.46
Austria.....	1.36	.32
Switzerland.....	.82	.84
United States.....	30	1.85

ENLARGEMENT OF NEW YORK CITY.

The question of the enlargement of the area of New York city was submitted to the popular vote of the inhabitants interested at the recent November election, and the project was indorsed by a small majority. If satisfactory terms can be arranged it is probable the consolidation will be effected. The area and population of each of the cities and towns which it is proposed to consolidate are as follows:

	Area in sq. miles.	Pop'n.
New York city.....	38.85	1,501,739
Brooklyn.....	28.99	857,058
Flatbush.....	5.69	12,625
Flatlands.....	12.79	4,234
Gravesend.....	10.96	8,418
New Utrecht.....	7.96	9,421
Richmond county.....	57.19	58,452
West Chester.....	15.50	10,029
Part of the town of E. Chester.....	1.41	4,612
Part of the town of Pelham.....	2.83	3,541
Fishing.....	29.65	19,868
Part of the town of Hempstead.....	17.86	17,756
Jamaica.....	7.14	50,506
Long Island City.....	7.14	50,506
Newtown.....	21.32	17,549
Jamaica Bay.....	25.63	
Total.....	317.77	2,965,792

SUGAR AND BOUNTY.

387

SUGAR AND BOUNTY.

Licenses issued, the quantity of cane, beet, sorghum, and maple sugar officially returned, and the amount of bounty and number of claims paid on these four kinds of sugar during the fiscal year ended June 30, 1894.

KIND OF SUGAR.	Licenses Issued.	Sugar Officially Returned, Lbs.	Net Bounty Paid.	Claims Involved.
Cane	579	611,156.922	\$11,114,599.89	3,246
Beet	7	45,191.296	862,174.84	62
Sorghum	2	882,572	17,312.26	10
Maple	5,761	7,693,086	116,121.90	4,628
Total	6,349	664,863,826	12,100,208.89	7,946

Net amount of bounty paid, by fiscal years, on each kind of sugar during the existence of the bounty law.

KIND OF SUGAR ON WHICH BOUNTY WAS PAID.	Net Bounty Paid in Fiscal Year Ended June 30.			Net Bounty Paid from July 1 to Aug. 27, 1894.	Total Bounty Paid.
	1892.	1893.	1894.		
Cane	\$7,077,316.21	\$8,763,890.75	\$11,114,599.89	\$967,644.41	\$27,913,391.26
Beet	240,098.56	531,363.81	862,174.84	8,056.99	1,631,694.20

1891	26,547,641	114,178,977	2,368,171	1,784,319
1892	26,469,827	112,612,723	2,550,759	1,956,318
1893	29,030,409	126,545,017	2,775,752	2,106,765
1894	19,716,818	87,340,397	2,598,409	1,864,566
Total	218,921,129	932,123,452	24,418,556	18,470,498
Average	21,892,113	93,212,345	2,441,855	1,847,043

The quantity of grain used for the production of spirits during the fiscal year ended June 30, 1894 (19,716,818 bushels, including 447,706 bushels, which is the estimated equivalent of 2,878,112 gallons of molasses, used for the production of spirits), shows a decrease of 9,315,561 bushels from the amount used in the preceding fiscal year (29,030,409 bushels), and a 2,175,195 bushels less than the average (21,892,113 bushels), for the last ten years. The number of gallons of spirits produced from grain during the year (87,340,397 gallons) shows a decrease of 39,304,130 gallons from the product (126,545,017 gallons) for the year ended June 30, 1893, and is 5,571,448 gallons less than the average produced (93,212,345 gallons) for the last ten years.

The yield of spirits from each bushel of grain is 4.42+ gallons. The yield for the two preceding years was 4.24+ gallons for 1892 and 4.26+ gallons for 1893.

The quantity of molasses used for the production of rum during the fiscal year (2,598,409 gallons) shows a decrease of 177,343 gallons from the quantity used in the previous year (2,785,752 gallons), and is 156,554 gallons more than the average (2,441,855 gallons) for the last ten years.

The quantity of rum distilled from molasses during the fiscal year (1,864,566 gallons) shows a decrease of 32,170 gallons from the product of the previous year (2,106,765 gallons), and is 17,568 gallons more than the average product (1,847,043 gallons) for the last ten years.

VACANT PUBLIC LANDS.

Reports have been received from the various district land offices, giving an approximate estimate of the quantity of vacant public lands existing in the several land districts at the close of the fiscal year ended June 30, 1894, of which the following is a recapitulation:

STATE OR TERRITORY.	Surveyed Land.	Unsurveyed Land.	Total Area.
	<i>Acres.</i>	<i>Acres.</i>	<i>Acres.</i>
Alabama	805,002.19		805,002.19
Arizona	10,492,493.00	45,214,755.00	55,707,248.00
Arkansas	4,632,278.00	13,698,286.00	18,330,564.00
California	38,327,545.00		38,327,545.00
Colorado	36,220,651.00	4,630,973.00	40,851,624.00
Florida	1,845,815.00	164,810.00	2,010,625.00
Idaho	7,841,060.00	39,132,419.00	46,973,479.00
Kansas	846,987.47		846,987.47
Louisiana	967,405.00	65,016.00	1,032,421.00
Michigan	630,751.00		630,751.00
Minnesota	2,565,308.16	3,028,270.00	5,593,578.16
Mississippi	836,417.00		836,417.00
Missouri	896,113.00		896,113.00
Montana	14,535,826.00	58,169,481.00	72,705,307.00
Nebraska	10,869,696.00	121,000.00	11,020,696.00
Nevada	30,809,679.00	22,044,755.00	52,854,434.00
New Mexico	42,458,882.00	15,524,488.00	57,983,370.00
North Dakota	10,856,316.00	11,926,568.00	22,782,884.00
Oklahoma	7,002,888.00	403,200.00	7,406,088.00
Oregon	24,742,145.00	13,498,207.00	38,240,352.00
South Dakota	9,153,666.00	5,380,208.00	14,533,874.00
Utah	9,393,094.18	82,106,160.71	91,556,254.89
Washington	5,151,355.00	13,848,541.00	19,000,297.00
Wisconsin	628,315.00		628,315.00
Wyoming	41,967,995.00	12,428,177.00	54,396,172.00
Grand total	314,564,238.00	291,476,075.71	606,040,313.71

REGISTRATION OF CHINESE.

Statement of certificates of residence issued to Chinese.

Under the provisions of the amendatory act of Nov. 3, 1893, certificates of residence of Chinese laborers and other than laborers entitled to remain in the United States before the passage of the original act of May 6, 1892, are required to be issued by the internal revenue office. The total number of certificates so issued on applications received up to and including May 3, 1894, was 106,811.

Alabama	41	Montana (includes Idaho and Utah Ter.)	4,874
Arkansas	87	Nebraska (inc. North and South Dakota)	418
California (includes Nevada)	68,791	New Hampshire (includes Maine and Vermont)	176
Colorado (includes Wyoming)	1,583	New Jersey	697
Connecticut (includes Rhode Island)	571	New Mexico (includes Arizona)	1,513
Florida	127	New York	6,245
Georgia	184	North Carolina	12
Illinois	1,868	Ohio	214
Indiana	117	Oregon (inc. Washington and Alaska Ter.)	11,295
Iowa	101	Pennsylvania	1,785

Kentucky	36	Tennessee	70
Louisiana (includes Mississippi)	669	Texas	1,054
Maryland (includes Delaware and District of Columbia)	710	Virginia	111
Massachusetts	2,137	West Virginia	25
Michigan	124	Wisconsin	140
Minnesota	92		
Missouri	553	Total	106,811

ELECTIONS IN 1895.

Iowa elects, Nov. 5, a governor, auditor, clerk of Supreme court, superintendent of public instruction, railroad commissioners and legislature.

Kansas elects, Nov. 5, a chief justice of the Supreme court.

Kentucky elects, Aug. 5, a governor, other state officers and a legislature.

Maryland elects, Nov. 5, a governor, other state officers and a legislature.

Massachusetts elects, Nov. 5, governor, state officers and legislature.

Minnesota elects, Nov. 5, three railroad commissioners.

Mississippi elects, Nov. 5, governor, state officers and legislature.

New Jersey elects, Nov. 5, governor and legislature.

New York elects, Nov. 5, minor state officers and legislature.

Ohio elects, Nov. 5, governor, other state officers and legislature.

Rhode Island elects, April 3, a governor, state officers and legislature.

Utah votes, Nov. 5, on the adoption of a state constitution.

Virginia elects, Nov. 5, an attorney-general and an adjutant-general.

INTERNAL REVENUE.

The annual report of Joseph S. Miller, commissioner of internal revenue, shows the total receipts from all sources for the fiscal year ended June 30, 1894, to have been \$147,168,449, a decrease for the year of \$13,836,540. The following shows the receipts from the several sources during the fiscal year 1894 and the increase or decrease as compared with the next year preceding:

Spirits, \$85,259,252; decrease, \$9,461,008.
Tobacco, \$28,617,898; decrease, \$3,271,813.
Fermented liquors, \$31,414,788; decrease, \$1,134,195.
Oleomargarine, \$1,723,479; increase, \$52,836.

The quantities of spirits, etc., on which tax was paid during the last fiscal year, with the increase or decrease as compared with the fiscal year 1893, are given as follows: Spirits distilled from apples, peaches and grapes, 1,430,553 gallons; decrease, 256,908. Distilled from other materials, 87,346,834 gallons; decrease, 10,111,514. Fermented liquors, 33,334,783 barrels; decrease, 1,219,534.

Of the receipts by states Illinois is at the head of the list, with \$30,842,233, Kentucky next with \$24,308,630, New York next with \$18,922,111, Pennsylvania \$12,151,196. The cost of collecting the internal revenue during the last year was \$3,975,904, or 2.70 per cent of the collections. The estimated expenses of the internal-revenue service for the fiscal year ending June 30, 1895, are given as \$4,859,870. The report shows the work of the bureau is in excellent condition, both in the office of the commissioner and in the field; 2,729 violations of internal-revenue laws have been reported by bureau agents during the year; 632 persons were arrested, property to the value of \$246,191 was reported for seizure and \$40,271 for assessment for unpaid taxes and penalties. Of the 1,016 illicit stills seized 908 were destroyed and 108 removed, an increase for the year of 210. In each of

the Georgia and 5th North Carolina districts 231 stills were destroyed.

The actual number and class of special-tax payers in the United States on June 30, 1894, is given as follows: Retail liquor dealers, 215,419; refiners, 1,494; wholesale liquor dealers, 4,565; manufacturers of stills, 26; brewers, 1,805; retail dealers in malt liquors, 12,618; wholesale dealers in malt liquors, 5,518; manufacturers of oleomargarine, 21; retail dealers in oleomargarine, 7,400; wholesale dealers in oleomargarine, 271. Total, 249,137, which is a decrease for the fiscal year of 1,456.

The number of distilleries operated during the year was 5,148. Of this number 1,541 were for grain, 12 for molasses and 3,595 for fruit. The quantity of grain used for the production of spirits during the year was 19,716,818 bushels, a decrease for the year of 9,338,591 bushels. The yield of spirits for each bushel of grain was 4.42 gallons, as against 4.24 gallons for 1892 and 4.35 for 1893. The report shows that the number of cattle fed at grain distilleries during the year was 62,123; hogs, 25,554.

The kinds and quantities of spirits produced and deposited in distilling warehouses during the year is shown in gallons as follows: Bourbon whisky, 15,518,349; rye whisky, 10,026,544; alcohol, 10,570,070; rum, 1,864,597; gin, 1,287,977; highwines, 126,560; pure, natural or cologne spirits, 35,377,115; miscellaneous, 14,434,336.

The amounts of the leading kinds of spirits withdrawn from warehouses during the year are given in gallons as follows: Bourbon whisky, 20,782,798; rye, 9,512,038; alcohol, 10,034,826; cologne spirits, 31,474,235; miscellaneous, 13,474,235; total, 87,087,618. The amount of distilled spirits withdrawn for export during the year 1894 was 6,114,417 gallons, as against 3,762,231 exported in 1893. The amount of spirits in warehouses on June 30, 1894, was 137,993,078 gallons.

CHICAGO'S DEATH RATE.

Population, deaths and death rates, by years—1843-1893, inclusive.

Events of the Year 1894.

DOMESTIC.

JANUARY.

2. Globe theater, Boston, burned; loss \$250,000.
3. Great fire in Toledo, O.; loss \$850,000. Bank at Dixon, Ill., blown up with dynamite and \$15,000 stolen.
8. Fire among the World's Fair buildings at Jackson park, burning the peristyle and other buildings.
10. Starr piano factory, near Richmond, Ind., burned.
14. Three men lynched at Russell, Kas.
15. Eleven persons killed and thirty injured by a rear-end collision near Hackensack, N. J.
18. An express train held up and robbed in Missouri.
20. A hurricane at Dallas, Tex., destroyed \$100,000 worth of property.
23. A blizzard raged in Kansas and other western states.
24. The engineering laboratory of Purdue university, Lafayette, Ind., burned. Ten thousand miners in Ohio strike.
25. Prize-fight took place in Jacksonville, Fla., between Corbett and Mitchell in which the former won in three rounds lasting nine minutes.
27. The Midwinter Fair at San Francisco opened.

FEBRUARY.

2. Wreck of the Kearsarge in the Caribbean sea.
3. Serious fire in Omaha; loss \$350,000.
5. Fire in Savannah, Ga., destroys \$500,000 worth of property.
7. Seventeen stores and buildings burned at Montgomery, Mo. Sharp earthquake shock at San Jose, Cal.
9. Indian school building at Pine Ridge agency burned. Two train robberies, one in Texas and the other in Nevada.
11. Colt's firearms factory at Hartford, Conn., burned. A blizzard very general in the west.
12. Severe storms sweep over the country from Kansas to the Atlantic coast.
13. Terrible blizzard in Oklahoma, destroying many lives and thousands of head of cattle.
14. The colonnade between the agricultural and machinery buildings at Jackson park burned.
15. The state normal school building at Oneonta, N. Y., burned.
16. Main building and annex of Knox college, Knoxville, Tenn., burned. A Southern Pacific express train ditched and robbed in California.
19. John Y. McKane, political boss at Gravesend, N. Y., sentenced to six years at Sing Sing for election frauds.
24. Prendergast, murderer of Mayor Harrison, denied a new trial and sentenced to be hanged March 23. Indictments for felony found against several Michigan state officials. Dome of the agricultural building at Jackson park burned.

MARCH.

1. Z. T. White fined \$200 at Nebraska City, Neb., for hanging Secretary Morton in emphy.
5. Severe fire at Deadwood, S. D.
8. Dan Coughlin on his second trial was acquitted at Chicago of the charge of complicity in the Cronin murder May 4, 1889.
12. Lake navigation at Chicago was opened, being the earliest on record.

14. The American party for the Walter Wellman north pole expedition sailed from New York.
15. Gov. Waite of Colorado calls out the militia to enforce his order removing members of the Denver fire and police board. Pickwick clubhouse in New Orleans burned.
20. Great storm raged in the lower Mississippi valley.
21. Supreme court of Illinois granted a stay of execution in the Prendergast case.
22. Fierce blizzard raged in the west and northwest.
25. Coxey's "Army of the Commonwealth" moved from Massillon, O., to Canton.
26. The striking miners in the Kanawha valley resumed work.
27. Hotel Pullman at Hot Springs, Ark., burned.
30. Over fifty buildings, embracing the entire business portion of Barry, Ill., burned.
31. Gen. Fry's industrial army of 600 men reached Little Rock, Ark., on a freight train from Texas en route for Washington.

APRIL.

4. A further stay of execution to July 2 granted Prendergast.
8. World's Fair buildings at Jackson park sold to L. C. Garrett of St. Louis for \$75,500.
9. Davidson theater at Milwaukee burned; eight firemen perish.
11. United Mine Workers' convention at Columbus, O., ordered a general strike on the 21st inst.
14. The jury in the Pollard-Breckinridge case awarded a verdict of \$15,000 for the plaintiff.
15. The Great Northern and Montana Central railroads were tied up from the Red river to Spokane by order of the American Railway union.
19. South Carolina Supreme court decides the dispensary liquor law of that state to be unconstitutional. Many coal miners strike in Pennsylvania.
21. Great coal miners' strike is inaugurated.
24. Attorney-general of Illinois begins proceedings against the gas trust.
27. Sale of the World's Fair buildings to Garrett fell through and they were again sold to Graft & Co. of Chicago for \$87,500.
28. The St. Charles hotel at New Orleans burned.
30. Painters in Chicago strike. The Vaughn library building at Ashland, Wis., burned.

MAY.

1. Randall's contingent of Coxeyites started from Chicago to Washington. Coxey's army enters Washington.
2. Traffic resumed on the Great Northern line. Supreme council of the A. F. A. met at Des Moines, Iowa, 300 delegates in attendance. Mob of 6,000 men, mostly Italians and Poles, drive out workmen in the iron mills of Cleveland.
6. Hallstorms in many parts of the country. Reaper and mower works at Muncie, Ind., burned.
7. Strike of the coke burners in Pennsylvania closes the business.
10. Monument to the mother of Washington dedicated at Fredericksburg, Va. Two deputy marshals and several citizens shot in a conflict with tramps at Yakima, Wash.

11. Strike of the Pullman employes for restoration of wages. One hundred and twenty train-stealing Coxeyites captured at Yakima, Wash.
 13. The Brooklyn Tabernacle burned.
 14. Managers of the Union League club of Chicago expel Col. Breckinridge from honorary membership. Gen. Scheffer and 220 commonwealers arrested at Green River, Wyo.
 15. An area of twelve acres burned over in Boston; loss \$500,000.
 16. Severe fire at Pawtucket, R. I. Disastrous floods in Minnesota and Wisconsin.
 17. A great storm swept over Ohio, Michigan and states southwest, causing \$1,000,000 damage. The houses of Chinese laborers on California ranches looted by Coxeyites.
 18. Hillsboro college, Ohio, destroyed by fire. Fierce storm on Lake Michigan off Chicago.
 19. Coxeyites steal two trains on the Northern Pacific road.
 20. Heavy rains in Pennsylvania result in the most disastrous floods since 1859. Powderly, Wright and Quinn expelled from the Knights of Labor for disloyalty.
 21. Coxey, Browne and Jones sentenced at Washington to twenty days in jail.
 25. Militia ordered out in Illinois to prevent rioting by coal strikers.
 26. Presbyterian general assembly at Saratoga, N. Y., convict Prof. H. P. Smith of Lane seminary of heresy by a vote of 396 to 101. The French government begins a suit against the World's-Fair commissioners for \$1,000,000 damages for losses of French exhibits.
 27. Troops ordered to Minonk, Ill., where a mob of 300 strikers held an Illinois Central train.
 30. Five lives lost in a Wisconsin Central wreck.
 31. Disastrous floods in the west and north-west states
- JUNE.
2. The Field Columbian museum in Chicago dedicated.
 3. Severe fire in Ottumwa, Iowa; loss \$225,000.
 4. Striking miners burn bridges in Ohio and West Virginia.
 5. Strikers in Indiana burn bridges and attempt to blow up a trainload of troops. Coxey accepts a congressional nomination from the populists in Ohio.
 6. Gov. McKinley of Ohio orders out 1,200 troops to protect coal trains.
 9. Mills, lumber and houses to the value of \$200,000 burned at Dubuque, Iowa. Troops sent to Pana, Ill.
 10. Coxey, Browne and Jones released from jail in Washington.
 11. The conference of miners and operators at Columbus, O., agree on a scale of wages for coal miners.
 12. The first quadrennial convention of the American Railway union opened at Chicago.
 13. The new naval war college opened at Newport, R. I.
 15. Coxey and Browne appear before the senate committee on education. Two hundred train-stealing Coxeyites captured at Big Springs, Col.
 16. Great fire in Jersey City, N. J. Twenty-three Coxeyites sent to jail at Fairfield, Ill., for train-stealing.
 19. Gen. Cantwell's commonweal army captures a stock train in Wisconsin and ride 200 miles.
 21. Proceedings to determine the sanity of Prendergast begun at Chicago.
 22. The American Railway union declares a boycott on Pullman cars throughout the United States to go into effect June 26.
 23. Adj't.-Gen. Tarsney of Colorado is tarred and feathered by masked men at Colorado Springs.
 24. More than forty lives lost by the sinking of a tug off Sandy Hook near New York.
 25. Strike of Pullman operatives at St. Louis and Ludlow, Ky.
 26. The boycott declared by the American Railway union went into effect and extended to most of the roads entering Chicago.
 28. The railway boycott spread to twenty-nine roads in the west, paralyzing travel. Severe windstorms in Minnesota and South Dakota, destroying much property.
 30. Three passenger trains, equipped with Pullman sleepers, wrecked at Chicago by strikers.
 31. Federal government takes active steps to enforce the carriage and protection of the mails.
- JULY.
1. United States court in Chicago issued sweeping injunctions against the strikers. Seven strikers arrested in Chicago and nine at Hammond, Ind.
 3. Jury in the Prendergast case found him to be sane and he is sentenced to hang July 13.

CHAMPIONS OF ALL CLASSES NAMED.

Pacers are marked with asterisks(*)

1 MILE-RACE.

2:05¼—Alix, b. m., by Patronage (1894).
2:05¼—Directum, blk. s., by Director (1893).
2:07¾—Ryland T., b. g., by Ledger, Jr. (1894).
2:02½—Robert J., b. g., by Hartford (1894).
2:03¾—John R. Gentry, b. s., by Ashland Wilkes (1894).
2:09¼—May Marshall, b. m., by Billy Wilkes (1893).

1 MILE-TIME.

2:03¾—Alix, b. m., by Patronage (1894).
2:06¾—Directum, blk. s., by Director (1893).
2:10—Jay Eye See, blk. s., by Director (1894).
2:10—Cricket, b. m., by Steinway (1890).
2:04—Flying Jib, b. g., by Algona (1883).
2:04—Online, b. g. (4), by Shadeland Onward.

TO WAGON-RACE.

2:16¾—Alfred S., t. g., by Elmo (1890).
2:14¼—Johnston, b. g., by Joe Bassett (1897).

TO WAGON-TIME.

2:13—Guy, blk. g., by Kentucky Prince (1893).
2:13—Roy Wilkes, b. s., by Adrian Wilkes (1891).

TEAM-RACE.

2:18¼—Maxie Cobb and Neta Medium (1885).
2:20¾—Belle Button and Thomas Ryder (1892).

TEAM-TIME.

- 2:12½—Belle Hamlin and Honest George (1892).
2:18½—Daisy D. and Silvertail (1887).

WITH RUNNING MATE—RACE.

- 2:08½—Frank, b. s., by Abraham (1883).

WITH RUNNING MATE—TIME.

- 2:03½—Ayres P., ch. g., by Prosper Merrimee (1886).
1:58½—Flying Jib, b. g., by Algona (1894).

YEARLINES.

- 2:23½—Fanny McGregor, ch. m., by Fergus McGregor (1886).
2:23—Abell, b. s., by Advertiser.
2:20¾—Belle Acton, b. m., by Shadeland Onward (1892).
2:22—Rosedale, b. s., by Sidney (1893).
2:23½—Rollo, g. g., by Jerome Eddy (1891).

2-YEAR-OLDS.

- 2:15¾—Silicon, b. g., by Wilton (1892).
2:10¾—Arlon, b. s., by Electioneer (1891).
2:12¾—Lena Hill, b. m., by William M. Hill (1893).
2:07¾—Directly, blk. s., by Director (1894).

3-YEAR-OLDS.

- 2:06¾—Fantasy, b. m., by Chimes (1893).
2:10¾—Arlon, b. s., by Electioneer (1892).
2:10—Machel, A. g. m., by Adrian Wilkes (1894).
2:10—Whirligig, b. f., by Wilko (1894).
2:10—Sidmont, b. c., by Sidney (1894).
2:14¾—Adonis, b. g., by Sidney (1888).

4-YEAR-OLDS.

- 2:06—Fantasy, b. m., by Chimes (1894).
2:05½—Directum, blk. s., by Director (1893).
2:12¾—David B., ch. g., by Young Jim (1893).
2:10¾—Effie Powers, b. m., by Anderson Wilkes (1894).
2:09¾—Robert J., b. g., by Hartford (1892).
2:04—Online, b. s., by Shadeland Onward (1894).

WINNERS OF PROMINENT EVENTS.

Giving name, weight, time and value of the stake.

AMERICAN DERBY.

1½ miles—For 3-year-olds, Washington Park, Chicago.

- 1884—Modesty, 117lbs, 2:43½; \$10,700.

 4 hours—27 miles 440yds, W. Franks, London, Aug. 28, 1882.
 Greatest distance walked without a rest—122

miles in 25h. 53m., C. A. Harriman, Truckee, Cal., April 6 and 7, 1883.

JUMPING.

Running broad jump—29ft 7in, John Howard, with 5lb dumb-bells, England, 1884; 23ft 8 1/2in, Charles Biggar, Guelph, Ont., with weights, Oct. 13, 1879; *23ft 6 1/2in, C. S. Reber, without weights, Detroit, July 4, 1891; *C. B. Fry, England, March 4, 1890.
 Standing broad jump—With 22lb weights, 14ft 5 1/2in, G. W. Hamilton, Romeo, Mich., Oct. 3, 1879; with 16lb dumb-bells, *12ft 9 1/2in, Louis Helwig, Brooklyn, Nov. 20, 1884. Without weights, 10ft 10 1/2in, H. M. Johnson, New York, Sept. 4, 1884; *10ft 9 1/2in, A. P. Schwaner, Travers Island, N. Y., Oct. 8, 1892; *10ft 9 1/2in, M. W. Ford, New York, April 23, 1885.
 Running high jump—Without weights, *6ft 4 1/2in, M. F. Sweeny, Travers Island, N. Y., Oct. 8, 1892; *6ft 4in, William Byrd Page, Philadelphia, Oct. 7, 1887. With weights, 6ft 6in, C. H. Fitzpatrick, Oak Island, Mass., Aug. 13, 1888.
 Three standing jumps—With weights, 41ft 7in, J. Darby, London, England, Oct. 14, 1888; 40ft 9 1/2in, T. F. Kearney, Oak Island, Mass., July 25, 1889; *35ft 9in, W. S. Lawton, San Francisco, May 13, 1876. Without weights, *34ft 11 1/2in, M. W. Ford, Brooklyn, N. Y., April 10, 1885.
 Pole-vaulting—For height, *11ft 5 1/2in, W. S. Rodenbaugh, Philadelphia, Sept. 17, 1892. For distance, *27ft 5in, A. H. Green, Chicago, Sept. 16, 1893.
 Standing high jump—With weights, 5ft 9 1/2in, T. F. Kearney, Oak Island, Mass., July 25, 1889; without weights, *5ft 8 1/2in, A. F. Schwaner, Travers Island, N. Y., June 11, 1892.
 Standing hop, step and jump—With 15lb weights, 37ft 15in, John F. Bennett, 1891. Without weights, Mass., May 11, 1880. Without weights, *37ft 4in, J. Wall, Dublin, Ireland, Sept. 10, 1892; *31ft 10in, M. W. Ford, Brooklyn, N. Y., July 26, 1895.
 Running hop, step and jump—48ft 8 in, Thomas Burrows, Worcester, Mass., Oct. 13, 1884; *48ft 6in, E. B. Bloss, Chicago, Sept. 16, 1888; *48ft 3in, John Purcell, Limerick, Ireland, June 9, 1887.

FEATS OF STRENGTH.

Throwing 56lb weight—From a 7ft circle, 35ft 10in, J. S. Mitchell, Travers Island, N. Y., Sept. 22, 1892. With unlimited run and follow, 36ft 6in, J. S. Mitchell, Philadelphia, Oct. 25, 1889. For height, 15ft 4 1/2in, J. S. Mitchell, Chicago, Sept. 16, 1883.
 Putting the shot—24lbs, 33ft 8in, G. R. Gray, New York, Jan. 19, 1889; 16lbs, 47ft, G. R. Gray, Chicago, Sept. 16, 1883.
 Hammer-throwing—21lb hammer, 90ft 3in, C. A. J. Quickberner, Staten Island, Nov. 17, 1888; 16lb hammer (4ft handle), from 7ft circle, 145ft 3 1/2in, J. S. Mitchell, Travers Island, N. Y., June 8, 1893. With one hand, same conditions, 12ft 11 1/2in, W. L. Coudon, Elkton, Md., Oct. 19, 1883. 14lb hammer (exclusive of handle), length 4ft, thrown from a stand, with two hands, 115ft 4in, W. L. Coudon, Wilmington, Del., May 10, 1888. 12lb hammer (exclusive of handle), 4ft long, thrown from 7ft circle, without follow, two hands, 146ft 6in, J. S. Mitchell, New York, June 8, 1893; from 7ft circle, with one hand, without follow, 146ft 2in, W. L. Coudon, Elkton, Md., Nov. 5, 1892; from a stand, with one hand, 134ft 11in, W. L. Coudon, Wilmington, Del., May 10, 1888.
 Weight-lifting—Hands alone, *1,571 1/2lbs, Charles G. Jefferson, Clinton, Mass., Dec. 10, 1890; 1,442 1/2lbs, D. L. Dowd, Springfield, Mass., March 27, 1893. With harness, 3,281lbs, W. B. Curtis, New York, Dec. 20, 1893.

Dumb-bells—10lb dumb-bell put up 8,431 times in 4h 34m. H. Pennock, New York, Dec. 13, 1870; 12lb bell put up 14,000 times, A. Corcoran, Chicago, Oct. 4, 1873; 100lb bell put up 30 times, one hand, C. M. Robinson, San Francisco, Cal., Nov. 25, 1875; 20lb 5oz bell, using both hands to raise it to shoulder, then put up with one hand, R. A. Pennell, New York, Jan. 31, 1874; 250lb bell, both hands to shoulder, put up with one hand, Eugene Sandow, London, Feb. 11, 1891.

REMARKABLE PERFORMANCES.

Around the world—77d. 13h. 45m., George Francis Train, left Tacoma, Wash., at 5 a. m., March 13, 1890, embarked at San Francisco for Australia, returning via New York, arriving at Tacoma 6:45 a. m., May 24, 1890.

Mail-carrying—Yokohama, Japan, to Queens-town, Ireland, via Victoria, B. C., Brockville, Ont., Morristown, N. Y., and New York city, 20 days, Aug. 19 to Sept. 8, 1891.

BICYCLING.

Amateur performances designated by an *.

ORDINARY BICYCLE.

1/4 mile—America: 35.4-58. A. A. Zimmerman, flying start, Hartford, Conn., July 4, 1891; *23.5. A. E. Luusden, Providence, R. I., Aug. 30, 1890.

1/2 mile—1:10.3-5. A. A. Zimmerman, against time, Springfield, Mass., Aug. 30, 1891; 1:19.4-5. W. W. Windle, Peoria, Ill., Sept. 15, 1890.

3/4 mile—*1:43.1-5. W. W. Windle, Hartford, Conn., Sept. 9, 1891.

440 yards—America: 36.2-58. G. M. Hendee, against time, Springfield, Mass., July 5, 1886.

1 mile—America: *2:15.3-5. W. Windle, against time, Peoria, Ill., Sept. 15, 1890; 2:32.4-5. W. A. Rowe, Springfield, Mass., Oct. 22, 1885; England: 2:21.3-5. J. Oxbarrow, Paddington, Aug. 22, 1892; 2:31.1-5. R. Howell, against time, Grimsby, Sept. 3, 1889; 2:23.4-5. F. J. Osmond, against time, Paddington, July 15, 1890.

2 miles—America: 5:11. W. A. Rowe, against time, Springfield, Mass., Oct. 14, 1886; 5:21.3-5. W. A. Rowe, Springfield, Mass., Oct. 22, 1885; England: 5:12.1-5. W. A. Histon, against time, Coventry, May 21, 1889, and F. J. Osmond, against time, Paddington, July 15, 1890; 5:20.2-5. H. G. Crocker, Leicester, Aug. 10, 1888; Australia: 5:26.3-5. T. W. Busst, Adelaide Oval, N. S. W., Oct. 6, 1888.

3 miles—America: 7:48.4-5. W. A. Rowe, Springfield, Mass., Oct. 14, 1886; *8:07.2-5. W. A. Rowe, Springfield, Oct. 23, 1885; England: *8:14.2-5. F. J. Osmond, London, Sept. 8, 1887; 7:59.1-5. H. G. Crocker, Leicester, Aug. 10, 1888; Australia: 7:57.4-5. T. W. Busst, Adelaide Oval, N. S. W., Dec. 28, 1888.

4 miles—America: 10:41.2-5. W. A. Rowe, against time, Springfield, Mass., Oct. 25, 1886; *11:11.3-5. A. B. Rich, against time, Peoria, Ill., Sept. 15, 1890; England: 11:05.2-5. F. J. Osmond, London, Sept. 8, 1887; 11:05.2-5. H. G. Crocker, Leicester, Aug. 10, 1887.

5 miles—America: 13:23.4-5. W. A. Rowe, Springfield, Mass., Oct. 25, 1886; *13:51.3-5. A. B. Rich, against time, Peoria, Ill., Sept. 15, 1890; England: *13:53.4-5. F. J. B. Archer, against time, Paddington, Sept. 6, 1890; 13:37. H. G. Crocker, Leicester, Aug. 10, 1888.

10 miles—America: *Professional—10m., 27:07.1-5. W. A. Rowe, Springfield, Mass., Oct. 25, 1886; *Amateur—10m., 28:27.4-5. W. A. Rowe, against time, Springfield, Mass., Oct. 19, 1885; England: *Professional—10m., 27:08. H. G. Crocker, Leicester, Aug. 10, 1888. *Amateur—10m., 28:04.3-5. F. J. Osmond, London, Sept. 8, 1887; Australia: 10m., 28:45.1-5. J. Hogan, Adelaide, N. S. W., April 25, 1889; 28:53.3-5. E. Davis, Adelaide, Oct. 6, 1888.

25 miles—America: *Professional—25m.,

1:14:23.1-5. F. F. Ives, against time, Springfield, Oct. 9, 1886. *Amateur—25m., 1:19:56.3-5. F. F. Ives, against time, Springfield, Mass., Oct. 9, 1885; England: *Professional—25m., 1:10:34.4-5. J. Dubois, Coventry, Aug. 25, 1887. *Amateur—25m., 1:13:49.3-5. P. Farnvall, Surbiton, Sept. 22, 1887.

50 miles—America: *Professional—50m., 2:55:38.3-5. Samuel G. Whittaker, St. Louis, Mo., Nov. 26, 1885; England: *Amateur—50m., 2:33:37.2-5. J. H. Adams, July 25, 1889. *Professional—50m., 2:29:41. W. F. Knapp, against time, Leicester, Aug. 14, 1888.

100 miles—Great Britain: 5:27:38. T. A. Edger, pneumatic safety, Great North road, England, Oct. 20, 1890. *Amateur—100m., 5:50:05.2-5. F. R. Fry, London, England, July 27, 1883. *Professional—100m., 5:55:21. W. F. Knapp, against time, Leicester, England, July 17, 1888. In a race under cover in Edinburgh, Scotland, May 7, 1889, G. W. Waller beat the time going for each mile from 80 up, riding 100 miles in 5:51:07. America: *Professional—100m., 5:38:44.1-5. F. E. Dingley, Lynn, Mass., Sept. 22, 1887. *Amateur—100m., 6:25:30. F. F. Ives, Springfield, Mass., Oct. 10, 1885. June 7, 1890, F. Ed Spooner of Chicago established a new world's record, indoor, for 100 miles in 5:32:53.4-5.

105 to 350 1/2 miles—105m., 6:21:25; 120m., 7:22:48; 130m., 8:04:55; 140m., 8:44:37; 150m., 9:24:32; 160m., 10:06:45; 170m., 10:48:53; 180m., 11:28:08; 190m., 12:13:22; 200 m., 12:56:50; 220m., 14:38:52; 230m., 16:39:42; 250m., 17:25:57; 270 m., 18:05:16; 280m., 18:44:15; 290m., 19:32:35; 300m., 20:16:12; 310m., 21:03:10; 320 m., 21:45:25; 330m., 22:30:35; 340m., 23:15:25; 350m., 23:58:18; 350 1/2m., 23:50:58. Frank E. Dingley, Minneapolis, Minn., Dec. 9, 10, 1887.

DISTANCE BY HOURS.

Greatest distance ridden in one hour—America: 22m. 150yds. W. A. Rowe, against time, Springfield, Mass., Oct. 25, 1886. *20m. 101yds. W. A. Rowe, against time, Springfield, Mass., Oct. 19, 1885; England: 23m. 1,300yds. F. J. Osmond, Hill crest, July 15, 1891; *20m. 675yds. P. Farnvall, Surbiton, Sept. 22, 1887. Two hours—America: Over 39 1/2m., F. F. Ives, Springfield, Mass., Oct. 9, 1886; England: 40m. 360yds. W. F. Knapp, Aug. 16, 1888; *37m. 1,420yds. C. Potter, Surbiton, Sept. 24, 1887. Three hours: Over 54 1/2m., F. F. Ives, Springfield, Mass., Oct. 9, 1886; England: 54m. 58yds. J. H. Adams, Aug. 22, 1888. Twenty-four hours, 302m., F. E. Spooner, 1891. Seventy-two hours, 12hrs. daily—America: 1,042 1/2m., J. S. Prince, Minneapolis, Minn., May 10-15, 1889; 1,073 miles, J. S. Prince and Louise Armand, alternating hourly, San Francisco, Cal., April 15-20, 1894; England: 1,067m. 1,222 yds. F. Lees, Middlesbrough, Oct. 2, 1890. Eighty-four hours, 14hrs. daily—1,136m. 842 yds. George Edlin, Newcastle, England, June 22-26, 1890.

SAFETY BICYCLE RECORDS.

The fastest mile by a wheelman was that by John S. Johnson of Minneapolis made over a straight-away course, Tonawanda boulevard at Buffalo, N. Y., Oct. 25, 1891. The course was level and the ordinary brick pavement. The time was 1/4 mile, 21.25; 1/2 mile, 46.25; 3/4 mile, 1:11.4-5; mile, 1:35.2-5. Johnson had pacemakers and there is no dispute but that the time was correctly given. It is not, however, accepted as a record.

AMERICAN RECORDS.

1/4 mile—23. J. S. Johnson, Chillicothe, O., Nov. 5, 1894.
1/2 mile—28. J. S. Johnson, Independence, Iowa, Oct. 31, 1893.

1/4 mile—:32 2-5, J. S. Johnson, Chillicothe, O., Nov. 2, 1894.
 1/4 mile—:39, J. S. Johnson, Chillicothe, O., Nov. 6, 1894.
 1/4 mile—:55 2-5, J. S. Johnson, Chillicothe, O., Nov. 2, 1894.
 1/4 mile—:56 1-5, J. S. Johnson, Chillicothe, O., Nov. 6, 1894.
 3/4 mile—1:11 4-5, J. S. Johnson, Waltham, Mass., Sept. 21, 1894.
 3/4 mile—1:18 1-5, J. S. Johnson, Louisville, Ky., Nov. 23, 1894.
 3/4 mile—1:21, J. H. Johnson, Louisville, Ky., Nov. 23, 1894.

 5 miles, still, start—American, 10:22 3-5, Johnson; English, 10:57 5-5, Robertson.
 10 miles, standing start—American, 22:45, Titus; English, 22:10 2-5, Henle.
 50 miles, standing start—American, 2:11:06 4-5, McIntire; English, 1:56:45 3-5, Green; French, 1:51:40, Dubois.
 24 hours—American, 381 miles 1748 yards, Twyman; English, 400 miles, 1286 yards, Shoreland; French, 457 miles, 1615 yards, Huret.

MISCELLANEOUS RECORDS.

TANDEM BICYCLE.

- 1/2 kilometer, flying—21, Loste Brothers, Bordeaux.
 1/2 kilometer, flying—36, Mas-Vignaux, Paris.
 1 kilometer, flying—1:07 2-5, Lambrechts-Excoel, Bordeaux.
 50 miles—1:37:17 4-5, Rudeaux-Hildebrand, Bordeaux.

TRICYCLE.

- 1 mile, standing—2:13, Antony, Bordeaux.
 1 mile, flying, 2:08 2-5, Antony, Bordeaux.
 The foregoing bicycle statistics were furnished by Mr. J. M. Erwin, and are taken from his book, now in press, "Zimmerman Abroad."

TRAP-SHOOTING.

- 100 single pigeons killed in succession, E. D. Fulford, 30yds rise (12-gauge gun), Marion, N. J., Nov. 12, 1891. Al. Bandle, Hurlingham rules (except 10-gauge gun), 5 ground traps, 30yds rise, using fence (30yds) for boundary, Cincinnati, O., Dec. 25, 1888—99 pigeons killed out of 100 single, A. H. Bogardus, 30yds rise, 80yds fall, 6 ground traps, Coney Island, July 2, 1890. 99 killed out of 100 single, E. D. Fulford, Marion, N. J., Nov. 17; same manner and same time and place, J. L. Brown.
 94 pigeons killed out of 5) pairs, John Taylor, match, Greenville, N. J., Nov. 23, 1895.
 49 birds out of 50, single, 2yds, Miss Annie Oakley, Gloucester, N. J., July 30, 1888.
 223 pigeons killed out of 250, A. L. Fulford, Woodlawn Park, N. Y., Dec. 12, 1891.
 188 inanimate targets broken in succession, Bala O. Heikes, Corry, Pa., Aug. 20, 1890.
 300 glass balls broken in succession, A. H. Bogardus, Lincoln, Ill., July 4, 1877.
 500 glass balls broken in 24m. 2s. out of 514, J. C. Haskell, two traps, 12ft apart, Hyde-Lynn, Mass., May 30, 1881.
 500 blue rocks broken in 40m. 40s., R. O. Heikes, Dayton, O., April 9, 1884.
 501 clay pigeons broken in 34m. 7s. out of 543, A. H. Bogardus, loading his own guns, one bird sprung at a time and thrown far from three to ten feet above the ground; several traps; 444 pigeons in 30m.—Cincinnati, O., April 15, 1882.
 980 glass balls broken out of 1,000 shot at, A. H. Bogardus, 3 traps, Hyde-Bradford, Pa., Nov. 20, 1879.
 1,000 glass balls broken in 1h. 1m. 54s., A. H. Bogardus, loading himself, changing barrels at end of every hundred, 15yds, two traps, 12 ft apart—New York city, Dec. 20, 1879. In 1h. 58s., A. H. Bogardus, three guns, two traps, 15 yds—London, England, June 25, 1878.
 1,008 bats killed out of 1,200, in 1h. 11m., Dr. W. F. Carver, four guns, loading himself, bats thrown up in pairs—New Orleans, La., March 9, 1884.
 5,500 glass balls broken in 7h. 19m. 2s. out of 5,854 shot at—A. H. Bogardus, 15yds, two traps, 12 ft apart, changing barrels about 54 times. He broke 1,500 balls in 1h. 87m. 20s., 2,000 in 2h. 14m. 43s., 3,000 in 3h. 34m. 40s., 3,500 in 4h. 10m. 16s., 4,000 in 4h. 48m. 43s., 4,500 in 5h. 32m. 45s., and 5,000 in 6h. 22m. 30s.—New York city, Dec. 20, 1879. In 7h. 30m. 36s. out of 6,222 shot at—W. F. Carver, Winchester repeating rifles, assistants loading—Brooklyn, N. Y., July 13, 1878.
 64,017 balls broken with rifle between 6:30 a. m. Sept. 7 and 6:30 p. m. Sept. 12, 1889—B. A. Bartlett, International Fair, Buffalo, N. Y.
 60,000 wood balls hit out of 60,000, 30m. trap—W. F. Carver, Minneapolis, Minn., Dec. 24 to 30, 1888.

OCEAN STEAMSHIPS.

Liverpool and Queenstown to New York—5d. 12h., 47m., mean time, fastest westward passage; Lucania of the Cunard line; left Liverpool Saturday, Oct. 28; arrived New York Friday, Nov. 3, at 3:19 p. m.; average speed, 20.93 knots per hour; largest day's run, Oct. 5, Lucania, westward bound, 690 knots, equal to 645 $\frac{1}{2}$ statute miles; best day's run ever recorded.

New York to Queenstown—5d. 12h. 7m., mean time, fastest eastward passage; Campania of the Cunard line; left New York Saturday, Oct. 28; arrived Queenstown Friday, Nov. 3, at 11:52 a. m.; average speed, 21.28 knots per hour.

THE TRANSATLANTIC RECORD BY YEARS.

1819—Eastward, Savannah, 22d.
1829—Westward, Great Western, 18d.
1845—Westward, Britannia, 14d.
1851—Westward, Persia, 9d. 20h.
1852—Westward, Baltic, 9d. 19h.
1856—Westward, Scotia, 8d. 2h. 48m.
1858—Eastward, City of Brussels, 7d. 18h., 2m.
1873—Eastward, Baltic, 7d. 20h., 9m.
1875—Eastward, City of Berlin, 7d. 15h., 48m.
1876—Westward, Germanic, 7d. 11h., 34m.
1877—Westward, Britannic, 7d. 10h., 53m.
1879—Westward, Arizona, 7d. 9h., 23m.
1882—Westward, Alaska, 6d., 22h., 10m.
1883—Westward, Oregon, 6d., 10h., 10m.
1884—Westward, Umbria, 6d., 10h.
1885—Westward, Etruria, 6d., 5h., 31m.
1887—Westward, Umbria, 6d., 4h., 42m.
1888—Westward, Etruria, 6d., 1h., 55m.
1889—Westward, City of Paris, 6d., 23h., 7m.
1890—Westward, City of Paris, 6d., 19h., 18m.
1891—Westward, Teutonic, 6d., 19h., 5m.
1891—Eastward, Teutonic, 6d., 18h., 8m.
1891—Eastward, Teutonic, 6d., 18h., 31m.
1891—Eastward, Teutonic, 6d., 21h., 8m.
1892—Eastward, City of New York, 6d., 19h., 57m.
1892—Westward, City of Paris, 6d., 14h., 24m.
1893—Westward, Lucania, 5d., 12h., 47m.
1893—Eastward, Campania, 5d., 12h., 7m.
1894—Eastward, Lucania, 5d., 7h., 48m.
1894—Westward, Lucania, 5d., 7h., 23m.

ROWING.

Performances by amateurs are designated by an *.

$\frac{1}{4}$ mile—*0:57, Edwin Hedley, straightaway, Newark, N. J., July 19, 1891; *1:19, single-scutt, Iroquois Boat club, July 23, 1890.

$\frac{1}{2}$ mile—*4:27 $\frac{1}{2}$, six-oared barge, straightaway, Iroquois Boat club, Lake Calumet, Pullman, Ill., May 30, 1890.

1 mile—5:01, Ellis Ward, Savannah river, June 24, 1888.

$1\frac{1}{2}$ miles—*7:41, eight oars, straightaway, Atlanta Boat club, Lake Calumet, Pullman, Ill., Aug. 9, 1889. [The Cornell university crew rowed the distance in 7:03 at Philadelphia July 4, 1889, but the conditions were unfair, the current running very strong.] 8:01 $\frac{1}{2}$, four oars, straightaway, Fairmount Rowing association, Lake Carnegie, N. Y., July 2, 1888. [The Watkins crew rowed the distance in 7:46 $\frac{1}{2}$ at Detroit, Mich., Aug. 15, 1887, but the current was very strong.] *7:55, double scull, straightaway, J. Buckley and W. O'Connell, Portland Boat club, Lachine, Canada, Aug. 21, 1888. *8:35, single scull, straightaway, Joseph Laing, Lachine, Canada, Aug. 19, 1888. *8:36 $\frac{1}{2}$, four oars, turn, still water, Modoc Boat club, Salt Lake, Utah, Aug. 30, 1888. *8:41, pair-oared shell, straightaway, J. H. Clegg and F. D. Standish, Excelsior Boat club, Lachine, Canada, Aug. 19, 1882.

2 miles—*9:43 $\frac{1}{2}$, eight oars, straightaway, Columbia College, New London, Conn., June 25, 1884. *12:16, double-scutt, turn, F. E.

Yates and C. E. Courtney, Saratoga, N. Y., Aug. 8, 1876. *12:30 $\frac{1}{2}$, pair-oar, straightaway, J. H. Riley and J. A. Kennedy, Greenwood lake, N. Y., Oct. 9, 1876. *13:21 $\frac{1}{2}$, single scull, turn, J. H. Riley Saratoga, Aug. 9, 1876.

$2\frac{1}{2}$ miles—*12:57, eight oars, straightaway, Yale university crew, New London, Conn., June 29, 1888.

3 miles—*15:25, eight oars, straightaway, Yale university crew, New London, Conn., June 29, 1888. *15:37 $\frac{1}{2}$, four oars, straightaway, Argonaut R. A., Kill von Kull, N. J., Sept. 8, 1876. *16:32 $\frac{1}{2}$, six oars, straightaway, Amherst university, G. H. Brewer, E. L. Brown, L. Bradley, Jr., F. M. Wilkins, A. J. Benedict, W. Negley, Springfield, Mass., July 24, 1872. *17:34 $\frac{1}{2}$, eight oars, straightaway, Cornell university crew, Owascoo lake, N. Y., July 17, 1878.

BASE-BALL.

Largest number of innings played—24, Harvard vs. Manchester, Boston, Mass., May 11, 1877; Grand Forks, Dak. vs. Fargo, 25 innings, 0 to 0, Devil's Lake, S. D., July 18, 1891. Quickest played game, 47m., Dayton vs. Ironton, Dayton, O., Sept. 19, 1884. Greatest distance ball thrown, 133yds 1ft 7in., John Hatfield, Brooklyn, N. Y., Oct. 15, 1872. Largest number of games played by a club in any one season, 188, by the Detroit club, from March 11 to Oct. 26 inclusive, 1887. Largest number of games ever credited to a player in any one season, 184, by S. L. Thompson of the Detroit club in 1887.

FOOT-BALL.

The Inter-Collegiate Foot-Ball association was organized in 1877 with Yale, Princeton, Harvard and Columbia. The latter was

dropped in 1884 and the University of Pennsylvania and Wesleyan admitted. Harvard resigned in 1889, charging Princeton with playing professionals. Since that time Yale and Harvard have met annually at Springfield, Mass. In 1890 Harvard won by 12 to 6, since then Yale has won; in 1891, by 10 to 0; in 1892, by 6 to 0; in 1893, by 6 to 0; in 1894, by 12 to 4. In 1893 the now famous "undergraduate rule" was adopted, intended to shut out all but regular and bona fide students of the college with whose team the players appeared. This rule seriously crippled the University of Pennsylvania team and the Wesleyan team, both of which withdrew from the association, leaving Yale and Princeton. The University of Pennsylvania and Yale foot-ball teams went through the season of 1894 without a defeat. Yale declined to play Pennsylvania, so the championship was unfinished.

Pennsylvania beat Princeton Nov. 10, 12 to 0; Cornell, Nov. 17, 6 to 0; Harvard Nov. 29, 18 to 4; Yale beat Harvard Nov. 24, 12 to 4; Princeton Dec. 1, 24 to 0; Harvard did not play Princeton and was beaten by Pennsylvania and Yale.

YALE-PRINCETON GAMES.

1876—Yale, 2 goals; Princeton, 0.
1877—Yale, 2 touchdowns; Princeton, 0.
1878—Princeton, 1 goal; Yale, 0.
1879—Yale, 2 safeties; Princeton, 5 safeties.
1880—Yale, 5 safeties; Princeton, 11 safeties.
1881—Yale, 0; Princeton, 0.
1882—Yale, 2 goals 1 safety; Princeton, 1 safety.
1883—Yale, 1 goal; Princeton, 0.
1884—Yale, 1 goal; Princeton, 1 touchdown.
1885—Princeton, 1 goal from touchdown; Yale, 1 goal from field.
1886—Yale, 1 touchdown; Princeton, 0.
1887—Yale, 2 goals; Princeton, 0.
1888—Princeton, 1 goal, 1 touchdown; Yale, 0.
1889—Yale, 32 points; Princeton, 0.
1890—Yale, 19 points 2 goals 2 touchdowns; Princeton, 0.
1892—Yale, 12 points, 2 goals; Princeton, 0.
1893—Princeton, 6 points, 1 goal; Yale, 0.
1894—Yale, 24; Princeton, 0.

The record stands thus:

YEAR.	Yale.	Harvard.	YEAR.	Yale.	Harvard.
1875.....	0	18	1885.....	No game.	
1876.....	4	0	1886.....	29	4
1877.....	No game.		1887.....	17	8
1878.....	4	0	1888.....	Harv'd fortd	0
1879.....	12	6	1889.....	6	29
1880.....	9	0	1890.....	6	12

1883.....	23	2	1893.....	6	0
1884.....	52	0	1894.....	12	4

Highest score—England: 17 goals to 0, Nottingham Foresters, match, Derbyshire, March 30, 1881. America: 158 points to 0, Harvard college, match with Exeter, Exeter, Mass., Nov. 3, 1886.

H. A. F. Chambers dribbled the ball around the hurdle forming the 120yds. hurdle course in 44½s., Finchley, England, May 18, 1878.

Place kick, with a run—200ft. 8in., William P. Chadwick, Exeter, N. H., Nov. 29, 1886. 350ft. 10in., R. Young, Cambridge university, July 2, 1881. 174ft., S. Pritchard, Brisbane, Australia, October, 1882; S. Brutton, aged 14 years, placed 13 goals out of 14 attempts, Leatherhead, England, March, 1884.

Drop kick—172ft. 8in., F. Hardgrave, Queen's Park, Brisbane, Australia, October, 1882. 161 ft. 9in., M. Cooper, Cambridge university, Cambridge, England, Nov. 21, 1881. *168ft. 7½in., J. E. Duffy, Ann Arbor, Mich., May 22, 1886.

RAILROADING.

May 9, 1893, the Empire State express on the New York Central & Hudson River rail-

road, consisting of engine 998, three coaches and a Wagner drawing-room car, made a run of 102 miles in 1h.

May 10, 1895. The same train ran 1 mile in 32s, a rate of 112½ miles in 1h.

The "Exposition Flyer," an engine and four Wagner coaches, repeatedly made the run from New York to Chicago, 976 miles, in 20h. The record noted on May 10—a mile in 32s—has been questioned by some railroad men.

1 mile—97s. Philadelphia & Reading railroad, Nov. 20, 1892; engine had 64-foot drivers; train, one combination car, two day coaches and a Pullman car.

2 miles—1m. 15s., same train; second mile in 38s.

3 miles—1m. 54s., same train; third mile in 39s. 5 miles—3m. 25s., same train, five consecutive miles, an average of 87.8 miles an hour; this train also ran five miles on a section having a heavy grade in 4m., an average of 75 miles an hour.

1 mile—39 4/5s. Philadelphia & Reading railroad, Aug. 27, 1891; 60½s., during run of special train from St. Philadelphia to Jersey City, Sept. 4, 1892.

2.1 miles—1m. 35s., engine 386 and an ordinary day coach, P. & R. R. R., Yardley to Trenton Junction, N. J., March 10, 1890.

2.9 miles—2m. engine 348 and an ordinary day coach, P. & R. R. R., Somerton to Neshaoy Falls, N. J., March 10, 1890.

3.1 miles—2½m. engine, two parlor cars and dining-room car, P. R. R., Aberdeen to Perryman's, N. J., March 10, 1890.

4.1 miles—3m. engine 366 and an ordinary day coach, P. & R. R. R., Skillman to Belle Mead, N. J., March 10, 1890.

4.1 miles—4m. engine 348 and an ordinary day coach, P. & R. R. R., Bethayres to Neshaoy Falls, N. J., March 10, 1890.

10 miles—8m. 38s., Skillman to Weston, N. J., engine 366 and one ordinary day coach, P. & R. R. R., March 10, 1890.

14 miles—11m. locomotive Hamilton Davis and six cars, N. Y. C. R. R., 1885.

18 miles—15m. special train conveying the duke of Wellington, Paddington to Slough, England.

27.1 miles—20m. special extra 963 and two cars, Pennsylvania R. R., Morrisville to Germantown Junction, Pa., May 6, 1885.

36.7 miles—34m. special extra 963 and two cars, Pennsylvania R. R., Rahway to Trenton, N. J., May 6, 1885.

44 miles—43m. 30s., special train conveying newspaper correspondents, last 1¼ miles in 14m., Washington Junction to Washington, D. C., June 13, 1894.

53 miles—49m. broad-gauge engine Great Britain, four carriages and vans, Paddington to Didcot, England, May 11, 1883.

54.9 miles—49m. 30s., engine 366 and one ordinary day coach, P. & R. R. R., Wayne Junction, Pa., to Bound Brook, N. J., March 10, 1890.

59.3 miles—56m. engine 366 and one ordinary day coach, P. & R. R. R., Philadelphia (9th and Chestnut streets) to Bound Brook, N. J., March 10, 1890.

59.4 miles—51m. (actual running time 85m.), special train, engine 366 and one ordinary day coach, P. & R. R. R., 9th and Green streets, Philadelphia, to Jersey City, N. J., March 10, 1890.

90 miles—1h. 37m. (actual running time 90m.), special extra 963 and two cars, Pennsylvania R. R., Jersey City to Broad street station, Philadelphia, May 6, 1885; 1h. 47m. train 19, engine 733 and six cars, two regular stops, Jersey City, N. J., to Broad street, Philadelphia, Feb. 12, 1889.

111 miles—98m., Fontaine engine and two coaches, Amherstburg to St. Thomas, Can-

ada, May 5, 1881; 109m., locomotive, baggage car, one coach and one Pullman palace car, St. Thomas to Amherstburg, Sept. 13, 1877.

115 miles—123m. engine No. 10, special palace car; 17 miles (Welland to Victoria) in 1¼m.; St. Thomas to Victoria, Canada, 153 miles, Fontaine engine and two coaches, in 251m., May 5, 1881. The schedule time from London to Bristol, England, 118¼m., by the train known as "The Flying Dutchman," is 123m.

157.4 miles—165m., special train, Niagara Falls to Syracuse, N. Y., March 1, 1876. 158 miles in 178m., West Coast Flyer, London to Crewe, England, Aug. 6, 1888.

228 miles—A Pennsylvania railway train consisting of one Pullman combination car, a parlor car and an observation car made the run from New York to Washington, Nov. 28, 1891, in 4h. 11m. The 11m. was consumed in stops and changing locomotives, making the actual running time 4h., an average of 57 miles an hour.

228.9 miles—4h. 18m., including stops, A. M. Palmer's special theater train, two parlor cars and a Pullman dining car, Pennsylvania R. R., Jersey City to Washington, D. C., March 10, 1890. Made return trip same day in 4h. 19m.

400 miles—7h. 25m., West Coast Flyer, London to Edinburgh, Scotland, Aug. 6, 1888.

404½ miles—New York to Buffalo, New York Central & Hudson River railroad (actual running time), 7h. 49m., Sept. 1, 1891. This is the most wonderful run on record. The train consisted of engine No. 870, weight 100 tons; private car No. 347, weight 85,540 lbs.; Wagner Palace Car company's private car, Traveler, weight 77,500 lbs., and Marquette, weight 95,600 lbs. Total weight of train, 220 tons, about equal to that of an ordinary passenger train of five cars. The run from New York to Albany, 143 miles, which was made without stop, occupied 140m.; the distance from Albany to Syracuse, 148 miles, was covered in 146m., and that from Syracuse to East Buffalo, 136 miles, in 147m. 44s. The change of engines at Albany required 3m. 28s., the change at Syracuse 2m. 58s., and a hot journal at Fairport occasioned a delay of 7m. 50s. The gross time of the trip from New York to East Buffalo, 439½ miles, was 439m. 44s. (7h. 49m.), including all stops, while the actual running time, exclusive of all stops, was 425m. 44s. (7h. 41m. 10s.) for the 439½ miles. An accurate schedule of the time between stations was kept by a disinterested party. The 438 miles between Kirkville and Chittenango were made in 34s., or at the rate of 68.63 miles an hour. The 5.37 miles between West Batavia and Corfu were made in 4m. 20s., a speed of 74.35 miles an hour. The run from Forks to East Buffalo, 3.25 miles was made in 2m. 36s., a rate of 75 miles an hour.

486.7 miles—Counsell Bluffs to Chicago, April 22, 1891, Jay Gould's special train, including baggage car, one ordinary passenger coach, and Mr. Gould's private car. The entire distance was made in a little less than ten hours, including stops, an average of 49.6 miles per hour; actual running time averaged 52.9 miles per hour.

513 miles—23h. (actual running time 19h. 30m.), special train conveying Washington newspaper correspondents from convention, Chicago, Ill., to Washington, D. C., June 7 and 8, 1884.

Jersey City to San Francisco, Cal., 83h. 59m. 16s., Jarrett & Palmer's train, combination passenger, mail and baggage car and Pullman hotel car, June 1 to 4, 1876. No stop between Jersey City and Pittsburg, Pa.

MISCELLANEOUS.

TYPEWRITING.

Charles H. McGurrin, memorized sentences, 208 correct words in one minute before the London Press club, London, England, on No. 2 Remington, Sept. 15, 1892.

John S. Cass, memorized sentences, 145 words in one minute; same, blindfolded, 136 words in one minute; new matter from dictation, 136 words per minute; on Remington typewriter; accurate work; at Illinois state fair, Peoria, Sept. 29, 1892.

Miss Mae E. Orr, writing five minutes each on legal testimony and ordinary correspondence, wrote 987 words, averaging nearly 99 words per minute; Toronto, Canada, Aug. 13, 1893.

8,709 words in 1h. 30m.; 4,294 or 95.55 per minute from dictation, and 4,115 or 93.11 per minute from copy, 45 m. each; Frank E. McGurrin, Cincinnati, O., July 25, 1888.

SHORTHAND.

Isaac S. Dement, writing one minute on new matter, at Clear Lake, Iowa, on July 22, 1890, 339 words and read his notes accurately.

Same conditions, at Dayton, O., Aug. 26, 1890, 315 words.

In a private test at same place and same conditions, on Aug. 29, 1891, 347 words with perfect accuracy.

Same conditions at Chicago, Oct. 4, 1891, 350 words.

BILLIARDS.

Best run, 3-ball carrom rail game, 2,572; Harvey McKenna, Boston, Mass., Dec. 21, 1887; average, 416%. Best run, 4-ball carrom game, 3,304; J. McDevitt, New York, Jan. 8, 1888.

Best at champions' game, 3-ball carrom, 14x23 lines—398, George Slosson, Paris, France, February, 1892; in America, 351, J. R. Helser, New York, Feb. 14, 1894. English spot stroke game, 3,304; W. J. Peall, London, England, Nov. 3 to 8, 1890.

Fourteen-inch balk-line game, 555, Jacob Schaefer, in a match with Frank Ives and George Slosson, New York, Dec. 15, 1888; 455, Frank Ives, in a match with Jacob Schaefer, Chicago, Nov. 24, 1888.

Both these runs made with the "anchor nurse"; K. S. Frank C. Ives, Chicago, match with Jacob Schaefer, Dec. 6, 1894, "anchor nurse" barred.

TRADE, COMMERCE AND MANUFACTURES IN 1894.

Following are brief reviews of the general conditions prevailing in various important lines of business in 1894:

GENERAL REVIEW.

The year 1894 was far from satisfactory so far as relates to the business interests of the country. One year ago we were just emerging from the ruin wrought by a financial panic as severe as any ever experienced by our people. The lapse of time enables us to state with some certainty the causes of these disasters.

Among those most conspicuous we may enumerate:

1. A spirit of speculation incident to the development of a new country possessed of great natural resources.

2. Personal and business extravagance growing out of the possession of large but unstable incomes.

3. Overtrading and overproduction, induced by what is falsely termed "enterprise."

4. Unwise interference with the natural course of trade through the creation of trusts, the organization of labor and class legislation, both state and national.

5. The undermining of general credit by the exposure of dishonesty and fraud in the management of the affairs of corporations and municipalities.

6. Uncertainty as to the result of the prolonged agitation for tariff reform.

7. The exceedingly unsatisfactory character of our currency, aggravated by the agitation for radical changes in the laws relating to coinage and note issues.

The speculative spirit has almost ceased to manifest itself and economy has become painfully apparent among all classes; overtrading is succeeded by relentless liquidation; overproduction has been followed by the rigid restriction of the output of commodities to the present narrow demands of consumers; dishonesty and fraud in the management of our great railroad and other corporations are resulting in exposure as well as bankruptcy and the public conscience in our great cities is demanding the detection and punishment of their criminally unfaithful servants.

While much progress has been made in our vigorous endeavors to recover from the effects of the panic, adverse influences have not been wanting. Agriculture has been far

from prosperous. Failure of crops in several important states west of the Mississippi has brought suffering upon a region ill prepared for such a disaster and low prices for the chief products of the farm and plantation have been conspicuous factors in delaying the return of better times. This low range of values has rendered the practice of economy imperative, while it has not enabled us to prevent a large falling off in the exportation of these products. From this results a flow of gold to Europe which is untimely and unfortunate.

The employment of labor has been restricted during the entire year and must be for some time to come but the intelligent wage-worker is becoming cognizant of the fact that capital, as well as labor, is cursed with enforced idleness or inefficient earnings and that the interests of both are better served by co-operation as fair-minded allies than by unreasonable contention as prejudiced foes.

It is clear that prosperity can only result from increased consumption of commodities and no considerable or permanent increase can be expected until the laborer and the farmer are delivered from the necessary practice of the severest economies, for these two are the great consuming classes.

The chief financial features of the year have been large and increasing deposits in the banks, the reserve of the treasury diminishing discount lines, and the lowest interest rates known for many years. Just as the year closes some increased activity among borrowers is noted, with slightly hardening rates.

Manufacturers, prior to the passage of the new tariff bill, were involved in great doubt and pursued a waiting policy, which was extremely prejudicial to the interests of both capital and labor. Since the customs duties have been definitely fixed they are moving more hopefully but at a moderate pace. It will be fortunate if they succeed in keeping the output within the lines of increasing consumption, for to outrun the latter would produce congestion and reaction.

Wholesale and retail dealers were both greatly hampered during the pendency of the new tariff bill and bought only what was necessary to keep up assortments. Since its passage a little more courage has been exhibited but all are acting with great caution.

Railway lines have, as a rule, suffered severely. The falling off of tonnage in and out, as well as in passenger traffic, and the losses incident to the great strike have depressed their earning capacities and given a phenomenally low range to the prices of railway shares already overcharged with wind and water.

It is to be hoped that we are now approaching the end of the period of liquidation. All classes have been striving to reduce their liabilities rather than to make gains. It is one of the most hopeful signs that so much progress has been made in this direction. The insolvent and the fraudulent have ceased to vex us and the severe strain felt by sound institutions has not been without its salutary influence. We may safely say that at no time have there been proportionately fewer business houses unworthy of confidence.

In conclusion let us not forget that the recuperative powers of an intelligent and industrious people, occupying a vast country possessed of unequalled natural resources, will surely, and in due time, restore to healthy action all the great forces which make for good government and material prosperity. Sustained by this belief, we enter hopefully upon the new year, confident that it will bring to us more of happiness and prosperity than has the one whose triumphs and defeats have now passed into history.

EDWARD S. LACEY.

BOARD OF TRADE MARKETS.

While the general business of the board has been fairly good and members on the whole have had very little cause for complaint, the gradual decline in values has been rather severe on investors and holders of per bushel lower basis than one year ago, wheat. The shrinkage is attributable to many causes, probably the most potent being the decline in silver and advance in gold, owing to the general strife among nations that were once on a bimetal basis but are now changed to the gold standard. They of course want to fortify themselves with as large a reserve of gold as possible, which makes competition strong. This, however, is but one of the many factors.

In the United States the condition of the country the last year made it necessary for the producer to realize on his product as soon after harvest as possible and thus the grain has been crowded into country warehouses and from them into the great centers, like Minneapolis, Duluth and Chicago. Formerly European countries used to store large quantities of wheat when the price was low and money plentiful at a low rate of interest, but the low interest, our bankers having large balances and wheat being the best possible security, they have been anxious to loan all they could on elevator receipts.

The low rate of interest and the immense quantities of grain crowded into market the first few weeks after harvest proved an inducement for capitalists to build elevators. They thus continued to encourage the bringing into sight the grain which in former years remained in the hands of the producers, small warehousemen and European investors. It is this condition that prevents merchants abroad who distribute to the consumer from being capitalists to the least alarmed about keeping up their stocks or feeling the necessity of carrying stocks of their own to supply the trade. They merely have to cable here for supplies as wanted. This, together with the immense profits derived from short selling and the difficulties of the large amount of wheat being controlled by investors, is a leading factor in causing the low prices that

have prevailed and which probably are the lowest known to the trade for many years.

If we can believe anything in statistics we must admit that what is known as the "invisible supply" is lighter than ever before, that millions of bushels have been fed to animals, exports have gone to far-away places never before reached, the acreage seeded for the coming year materially reduced, consumption greatly increased and with anything like the return of a fairly reasonable prosperity we may look with confidence to a higher range of prices for the year 1895.

LIVE STOCK.

Few people realize that the live-stock business, in all of its branches, is the largest and most far-reaching of all American industries. This particular business has gradually branched out in every direction until nearly every state and territory are producers and feeders of stock and with enterprise, capital and improved methods live stock is carefully prepared and distributed throughout the civilized world.

The cattle supply during 1894 shows a reduction of about 15 per cent compared with 1893, and while the fluctuations in values during the year were not as wide as usual the general trade was more satisfactory to the producer and prices will average better than during the preceding year.

The American hog maintains its place among the foremost articles of commerce and the fact still remains that this is the only country that can satisfactorily raise and mature hogs. The product of the hog is one of the largest commodities exported and under the present very rigid and efficient "inspection" laws there is no danger whatever regarding the purity and healthfulness of our hog product.

Speculation, always a very important feature in shaping values, has been very small during the year, but prices during the first nine months were very satisfactory and remunerative to the producer. During the last three months the supplies at all markets have been heavy, owing largely to the prevailing high price of corn, and consequent general and free marketing seemed to exist everywhere. Wheat feeding, owing to its comparative low price, has been a prominent factor in the hog trade, and feeders have found wheat a good substitute for corn, especially for young stock.

The south is now raising hogs in large numbers and with a good corn crop, is practically independent of the northern markets and, as it does not now depend upon the cotton crop entirely, has become an important factor in the live-stock trade. The packing interests have worked more in harmony this season and prices declined \$2 to \$2.50 per hundred-weight compared with the best prices current during the year and the stocks of provisions are now quite liberal; and having been produced at comparatively low prices the packers will rather favor higher prices in the future. Had it not been for the hogs during the last two years the farmers of our country would have had more financial trouble, but hogs, always in demand at comparatively good prices, furnished them with a revenue when all else failed.

The receipts of cattle will show a decrease compared with 1893 but a good increase in the supply of hogs and sheep. The sheep branch of the live-stock trade has grown to enormous proportions, the heavy receipts during 1893 and 1894 being a continuation of the wholesale liquidation that was started in 1892. Prices fluctuated somewhat during the year, but, with the exception of a few months early in the year, ruled comparatively low.

The low prices created a good export demand at times, which still continues. One of the principal features of the sheep trade, however, is the development of the Chicago market into the best in the country. With continued improvement in the general industrial situation, and stability of the live-stock trade it would appear that this great industry should have its share of any improvement that may occur in other lines.

HORSES.

With all other branches of trade throughout the land suffering from the severe shock caused by the panic of the previous year; with general prostration and apathy in business; with uncertainty in the legislative enactments of congress toward a settlement of the long agitated tariff measures, the horse market opened the year 1894 most encouragingly, with considerable activity and decided strength. Unlike any other year in its history, the volume of trade and the prices realized in the month of January almost equaled that of March and exceeded either February, April or May, which, taken together, embrace that period when the highest prices are realized and heaviest receipts handled. The low level of prices which prevailed in the last half of 1893 was sharply advanced 10 to 20 per cent and with some variable fluctuation, to which all speculative articles are subject, remained the greater part of the year steady and firm and in some particular instances and for special classes was decidedly strong. The elimination from the market of that heretofore large demand for a class known as "streeters," used to operate our street cars, but since superseded by the conversion of the same into electric motive power, has not only caused a shrinkage in value of \$25 a head but has, by being added to the general-purpose class, created a glut and as in all such cases a sharp decline followed. The proportion of common to good horses has been seven to one and even among the better ones there are very few that are absolutely sound and free from blemishes.

Trade was very active up to the moment of the great railroad strike and with the embargo raised an immediate revival set in which, without much change, has continued uninterruptedly to the closing days of the year. Among the better class of horses those of the heavy draft perhaps suffered most. In the early fall, in consequence of the destruction by fire of the vast lumber, timber and pinery interests, the trade naturally looked forward to a large demand and a permanent improvement at a substantial gain in price. An urgent demand at a sharp advance of 25 to 50 per cent followed, but lasted hardly long enough to record it.

The foreign elements have become all-important factors in the market. England, against whom one of our great statesmen once proposed to erect a Chinese wall, has been an extensive buyer; France quite liberal, with Mexico and Havana, Cuba, occasionally. The foreign orders on the market the last three months of the year were nearly ample to absorb the entire offerings and yet, extensive as they were, we are told they are only trial orders, which, if successful, will pave the way for a business far greater than the most enthusiastic could anticipate. Foreigners buy chiefly either good, big drivers, singly or as teams, and coaches with some action and for the war, as they have been paying in the last year, fancy prices. Here, then, are markets susceptible of unlimited expansion and need only, like the soil, a little cultivation to produce the most wonderful results.

The limited area, the dense population and the many inordinately congested districts of France and England compel the farmer with small holdings or farms to diversify the production of the soil in table delicacies and the fruits of the vineyard, leaving to the boundless prairies of the western states the breeding of horses suitable to the tastes and conformable to the necessities of the people.

Will the American farmer prove equal to the occasion or will he stolidly by and by his indifference compel the stimulation and development of breeding establishments in the vast plains of Brazil and the Argentine Republic? In the past two years the farmers all over the country have either discontinued entirely the breeding of mares or have reduced it so that next year's foals will not, from all reports obtainable, be more than 20 per cent of three years ago. This large reduction is due to the low prices that have prevailed in the leading markets of the country, men forgetting or ignoring altogether that the condition is largely due to the constantly increasing supply of a class of horses lacking the first element of quality, shape or action, while the reverse is equally true that all horses of any class have sold and will continue to sell well.

PRODUCE.

The conditions prevailing in the produce commission business in 1894 were very unfavorable. The year started out with every indication of a prosperous season but, owing to the low prices and the great injury done by the Pullman strike and boycott in the summer, business failed to come up to expectations. Omitting the strike and some localities where failure of crop occurred the year would have been a fair one but not up to the average of seasons that have passed.

PACKING.

The total receipts and shipments at the Union stock yards, Chicago, for the year 1894 were:

RECEIPTS.

Cattle.....	2,973,972
Calves.....	161,104
Hogs.....	7,481,857
Sheep.....	3,098,442
Horses.....	97,093

SHIPMENTS.

Cattle.....	950,351
Calves.....	11,988
Hogs.....	2,462,289
Sheep.....	333,084
Horses.....	90,282

As compared with 1893, this shows a decrease in receipts, but this is accounted for by the fact that many of the packers have killed cattle at points west; but the product is distributed from Chicago and in many cases actually brought here to be either cured or shipped fresh. Another cause is that during the railroad strikes of last summer, when Chicago was practically blockaded against live stock, packers shipped cattle, etc., from outside points—many being shipped as far east as New York and slaughtered there.

The strike also had its bad effect upon trade, for it came on just at the time that stock, particularly cattle, should have been coming to come in freely and, although the packers were in readiness to go on, and did so the moment protection was afforded to the railroads, the facilities of transportation were so poor that nothing could be done until the packers themselves took the matter in hand and manned engines themselves to move their product. The terminal charges imposed by the railroads also had a tendency to decrease the quantity of stock shipped to Chicago.

The German exclusion of meat products cannot fail to have a bad effect, both on the stock-raiser in the country and the packer in the city, for the greater number of markets a producer or manufacturer has for his output the better prices he is able to obtain.

The cost of stock this year has been high on cattle right through and, until the last two months, high on hogs—much higher in proportion to the prices obtained for the manufactured products than it ever has been before.

FRUIT.

In the fruit trade the year 1894 was a general disappointment and well in keeping with the general business of the country. While the tariff does not affect the business so prominently and radically as in some lines, the handling of fruits is affected by the general conditions prevailing. The year opened with a good promise of abundant crops but the storms of February cut off the early supply from the southern states. Later frosts practically wiped out the tree fruit of the section south of the Ohio river and most of the small fruit in the country south of parallel of 40 degrees.

Practically no peaches, pears, plums or apples were received in the market from the south in a very light supply of berries. This scarcity affected the trade severely but prices did not advance much. California had just commenced sending her supply when the railroad strike demoralized everything and the effects were felt to the close of the season in low prices and overripe supplies. Western Michigan had a large supply of peaches but the price ruled very low, so that the commissions scarcely equaled the actual cost of handling. The supply of apples has not been large, yet sufficient to keep the price low and as the price governs the profits very largely, the net result to the trade has been small.

The depression of business through the country is the cause of the low prices, as with a normal condition of general affairs throughout the country a short supply would mean high prices. This, however, has not followed this year, so that when the two elements are considered much could not be expected. As the season closes, however, there is a general feeling that the worst is past, and are looking forward to a healthy, if smaller, trade from this time on. Stocks of green fruits are small, and the outlook is for a steady consumption and fair business in the future.

The year 1894 started with a very light supply of apples over the whole country. This was made up of Canadian, New England and New York fruit principally, with quite a number of crates of California apples added, a new feature of the trade. Prices were the highest known in years, starting January at about \$4.25 to \$4.50 a barrel for choice fruit, advancing about \$1 a barrel by March 1 and another dollar higher by April. The season was practically finished in the early part of May, choice fruit then selling at about \$5 a barrel, the last barrel selling at the hitherto unheard-of price of \$50. The new crop bade fair to be very heavy, but drought and heavy winds shortened it, still leaving in the aggregate a heavy supply. Perhaps the principal feature of the fall apple trade has been the demand from Europe, on account of short crop there, to supply which up to Dec 1 we shipped the total of about 1,000,000 barrels, over half of which went to Liverpool, Boston alone in one week clearing about 50,000 barrels. The prices realized at first were very high, netting back in some cases as high as \$5.00 a barrel net, but soon declined to an average of about \$1.75 net here at shipping points.

Many estimates have been made as to the total crop for this last fall, running all the way from 2,500,000 to 4,500,000 barrels. Taking the amount exported to Dec. 1, 1894, 1,000,000 barrels; the amount now in storage in the United States and Canada, probably 900,000 to 1,000,000, and the amount in farmers' hands, perhaps 400,000 barrels, we have a total of 2,300,000 barrels, which, added to what have been already used in this country up to this time, Dec. 1, and what have spoiled, which is a large item, we would have something like 3,300,000 barrels as the total 1894 crop of the United States and Canada.

The crop started in July with prices for the first few days about \$4.50 a barrel. Prices kept high until the Duchess apple came in freely in August, when it dropped to \$1.50 a barrel for choice fruit and gradually worked back to about \$2.25 to \$2.50 in September, near which price it has remained ever since, a few cars of good fruit having been sold at \$2 and under in some cases where necessity compelled quick sales.

WHOLESALE GROCERIES.

The whole grocery trade of Chicago for the year 1894, while not as large as during the year 1893, has not been a disappointment, because the largely increased local demand during the World's Fair was a thing of the past and was only partially made good by an increase in population in 1894, which increase largely exceeded that of any previous year.

The year 1894 opened with the shadow of the panic of 1893 still hanging over us, prompting the wise merchant to use the utmost caution both in carrying stock as well as giving credits. Values early in the year were low and with almost a single exception remained so during the year. The condition of all manufacturing industries was such as might be expected from the great lack of confidence caused by tariff legislation and the fact that, as a nation, our expenses largely exceeded our income. With manufacturing curtailed and in many instances totally suspended credits were necessarily restricted, stocks throughout the country were reduced to the minimum and the grocery business generally was brought down to as near a cash basis as possible. Among Chicago jobbers the trade of merchants who discounted their bills was vigorously cultivated and the policy of buying and selling for cash and for immediate wants only obtained to a marked degree. The cash principle as applied to the retail trade has been increased and such retail merchants as have adhered to this rule have been able to increase their sales and universally report a very satisfactory year. A marked feature of the trade and one that may seem strange has been the unusually large number of new stores started in both city and country, which can only be accounted for by the fact that a great many men were thrown out of employment because of the hard times and having saved a few hundreds or thousands of dollars desired to invest in a line of business embracing the necessities of life.

The total business for the year may be said to be about 10 per cent less than in 1893, with a smaller showing of profit because of the fact of a general decline in values—which decline will average fully 15 per cent. The trade generally throughout the east, which a few years since thought that Chicago was a market for meats and grain products only, has opened its eyes to the fact that this market is New York's most vigorous competitor and in many lines exceeds New York as a

market in which to buy best goods at lowest cash prices.

Teas, both in China and Japan, have ruled higher, showing an advance of 3 to 4 cents per pound, or say 15 per cent; this advance, however, was partially counterbalanced by a decline in silver in which currency all transactions in these lines are made in the tea-growing countries. Desirable styles of gunpowder teas have shown a greater advance than any other kinds, and because of the vigorous policy pursued by our custom-house inspectors in excluding impure or adulterated teas, low grades of teas are very scarce and firm at the advance. The large increase of shipments of teas, especially Japans, from Chicago to eastern jobbers, has been a striking feature of the market.

Coffees have declined during the year about 3 cents per pound, with the exception of Javias, which are held about 3 cents per pound higher and are said to be controlled by a syndicate. The consumption of coffees was about the same as in 1893. The trade on roasted coffees is rapidly superseding that of green grades. Prospects for the coming year are good for a further decline on nearly all grades.

Sugars opened early in the year at very low prices, 4 cents for granulated, and closes on the same basis, notwithstanding the change in tariff, which, under ordinary circumstances, would have increased the cost fully 1 cent per pound. But as sugars are almost wholly controlled by the sugar trust, the law of supply and demand seldom applies—the desire of the American Sugar Refinery company to put the market up or down as may best further its interests being supreme. During the season of 1894 granulated advanced to 5 cents in New York owing to causes already stated, the trust taking the advantage of the heavy demand in July, August and September.

Rice has shared the general decline but not to the extent that some other lines have shown. The reduction of duty from 2 cents to 1½ cents has stimulated importations to the point that the trade in Japan and Java rice is now fully 40 per cent of the total rice sales.

Dried fruits show a decline of 25 per cent, with a largely increased output, Chicago being now without doubt the largest distributing point for foreign and domestic fruits in the United States. California products are crowding foreign fruits to such an extent that but few imported raisins find market in this country. Currants, which were imported free of duty under the McKinley law, now pay 1½ cents per pound duty and show a corresponding advance in value.

Canned goods show a decline of perhaps 10 per cent, with a larger demand for fine goods than ever. Low-grade fruits are in less demand because of the fact that choice evaporated fruits are cheaper and better.

Sirups and molasses, tobaccos and cigars, fancy groceries and sundries hold their own in the general average.

The future, owing to present low values and prospective careful attention to credits and collections, promises well for another year.

THE RAILWAYS.

The business of the railways for 1894 was the most unprosperous of any year since the depression following the panic of 1873. The freight business of 1893 was far from satisfactory but the passenger earnings from World's-Fair traffic made up, to some extent, the loss in freight earnings.

For 1894 both branches of traffic suffered severely and the railways resorted to every expedient to reduce their expenses to meet,

so far as possible, the great loss in earnings. While the general depression in manufacturing interests and the failure of crops is largely responsible for the reduced earnings of railways during 1894, there were two great strikes which added greatly to the loss of business. First was the coal miners' strike, spreading over Pennsylvania, Ohio, Indiana, Illinois, Iowa and Missouri and continuing from April 23 to July 1. Excessive competition among coal producers and railways, it is claimed by some, reduced the price of coal so low that miners could scarcely make living wages and they struck. The strike was a failure. The second was the American Railway union strike, brought about by the effort of that organization to stop the running of Pullman cars. This effort was successfully resisted by the railways and after an interruption of from fifteen to twenty days business was resumed. The two strikes cost the railways many millions of dollars and largely increased their expenses at a period when they could least stand it. Figures compiled by the Railway Age give the amount of new railway construction for the year at 1,919 miles, which is less than is credited to any previous year since 1875. The record for the four preceding years is as follows: 1890, 5,670 miles; 1891, 4,282 miles; 1892, 4,178 miles; 1893, 2,635 miles. The greatest year of railway construction was 1887, when nearly 13,000 miles of road were built.

COAL.

In reviewing any particular line of business one naturally turns toward its statistical features first, then afterward tries to analyze the facts as shown by the figures of the statistician. Following out this line of review, we find, from the figures given us by the "bureau of coal statistics" published by H. A. Bischoff, these startling facts as to the enormous decrease in net tonnage in and through Chicago this year, taking the first eleven months only into consideration and comparing them with the same period of 1893:

Anthracite coal.....	266,568
Coke.....	295,748
Pennsylvania bituminous.....	105,845
Ohio bituminous.....	173,489
Illinois (northern, eastern and southern).....	490,273
Indiana.....	426,731

A total decrease of about.....1,700,000

The only increase shown in net tonnage is in coal from West Virginia, Kentucky and central Illinois:

West Virginia and Kentucky.....	137,362
Central Illinois.....	61,511

Chicago's total receipts in tons for the eleven months of all kinds of coal and coke have been:

1893.....	7,026,717
1894.....	5,233,482

Total decrease.....1,695,235

Total shipment in tons from Chicago in the same period in each year, and included in these figures:

1893.....	1,264,105
1894.....	845,936

Decrease.....418,169

In consideration with the figures showing the enormous decrease in the tonnage in the coal business this year should also be taken the decline in prices. Anthracite coal is selling to-day at \$1 or more a ton less than at this time last year, both at wholesale and retail; Ohio and Pennsylvania bituminous

coals from 30 to 40 cents, and Illinois coals from 20 to 30 cents less.

It is not a cheerful task for a coal man to review such an array of dismal figures, but as a review of any line of trade, if an honest one (and any other is worthless), should be fair and impartial, let us try and get at the facts and reasons for this great decline not only in volume of business but in selling price.

In the early months of 1894 the coal trade did not seem to have felt the effects of the panic of 1893 as did other lines. The weather was fairly cold and tonnage and prices normal. As the year advanced and spring came on the demand fell off rapidly and prices began to decline. Manufacturers seemed to be afraid to produce their goods or carry any stock on hand, consequently the demand for coal grew less. The uncertainty as to the action of congress unquestionably brought this state of affairs around. During the month of April rumors of the great strike that was imminent filled the air, consumers of all kinds of products, manufacturers, electric-light companies—in fact, almost all consumers—became frightened, and fearing a shortage, bought in large quantities, making business active and prices fair. Some consumers less provident did not lay in a stock; therefore when the strike came they felt the full effects of it and were forced to buy at any price or close their plants. In some cases they paid premiums of \$2 and \$3 a ton for immediate delivery.

This condition of the market drew coal from all districts of the United States that were not tied up by the strike. The account for any increase shown in shipments from any district during the year, particular reference being had to the increase as shown on Kentucky and West Virginia coal and coal from central Illinois, these districts being the only ones tributary to Chicago that continued to operate during the strike, can be accounted for the strike. The Pana, Illinois, district worked every day during the strike and realized enormous profits to the mine-owners, who sold their coals at an advance of from 200 to 300 per cent above their normal price at the mines. One rather remarkable incident occurred during the strike—namely, the shipment of coal from Milwaukee, Superior and other northern lake ports to Chicago by rail, something never before known.

After the strike was over our expectations were for better business and better prices; all stocks were cleaned up and consumers had been educated to paying better prices. But a new element had entered into our market. New coals which had been drawn here for the first time during the strike on account of the scarcity of our domestic Illinois and Indiana coals, such as Kentucky and West Virginia and other points which do not usually reach this market, had gained a foothold, and every mine-owner in every state tributary to Chicago at once began shipping coal to Chicago on account of the premiums dealers had been paying.

In a short time the market was glutted; Illinois, Indiana, Ohio, Kentucky and West Virginia operators all had coal on track, with the natural result on the market—a break in prices, and coal was offered regardless of cost. This demoralization continued for the rest of the year, because, either on account of certain admirable qualities of the new coals, which created a certain demand, or the desire of the operators handling these coals to keep them in this market, they continued to dump them here, notwithstanding lack of demand and surplus of other coals. Again the demoralization in prices. This accounts for the great depression in the price of soft coal sent in this market.

Anthracite coal, being naturally influenced to a great extent by the selling price of bituminous coal and by the fact that the companies during the bituminous strike mined and produced great quantities of coal, naturally declined in price. This is true especially as no combination now exists for keeping up artificially the prices of anthracite coal or has ever existed except in the minds of the people and during the strike.

The great decrease in tonnage in anthracite and bituminous coal in Chicago in the last twelve months can naturally be accounted for in many ways—among others by the increase in the use of natural gas and crude petroleum, as well as in the falling off in the demand of manufacturers, a great many factories in the last twelve months having run only six months of the time and during those six months only half-time. Natural gas has particularly affected the sale of anthracite coal for domestic use, a large number of householders having put in natural gas, burning it under their boilers and their ranges instead of anthracite coal. Crude oil, in its turn, has displaced a great quantity of bituminous coal among some of the largest manufacturers, although to-day a great number of manufacturers are throwing out their crude oil and returning to bituminous coal, which they find more economical and safer.

The falling off in the use of coke has to be accounted for by the shutting down of steel mills and other large industries that were the chief consumers of this grade of fuel and which shut down on account of the dull times.

In closing this review it is not fair to say that with cold weather coming on and with the decrease in the use of gas by private consumers and of petroleum by the factories on account of expense, and with the lesson taught the miners of foreign coals that they cannot make a catch-basin of the Chicago market for their surplus coal without suffering the penalty of selling their coal at less than cost, the outlook for prices and tonnage of coals that have Chicago as their natural market is much brighter, and the year of 1895 should be an excellent one for the coal trade in Chicago. We should all bear in mind that coal has helped to make Chicago the greatest manufacturing city in the world and will continue to do so for years to come.

IRON.

A decline in the price of iron so strong that for a time no one knew where the bottom was made the memorable feature of the trade for the year 1894. At the beginning of the year bar iron was selling at \$1.35 per hundredweight, but the decline was steady throughout the year, until \$1.10 per hundredweight was reached. For the first six months of the year the volume of trade was about 25 per cent less than for the same period in 1893. From that time forward the demand existed but it was not sufficient to strengthen prices. During the last six months the business showed about 12 per cent increase in volume over the same period in 1893, thus making a falling off in the iron business of about 15 per cent in comparison with the whole year of 1893. Mild steel suffered proportionate declines, while wire nails are fully 25 cents per keg less to-day than at the beginning of last year.

The increased demand for these materials during the last two months, owing to a slight revival of car building and some other manufacturing, has checked declines and prices are now comparatively firm. There is an indication and a hope that prices will remain unchanged after Jan. 1, with possibly some slight advance occasioned by the new business offered at that time of year. As a natural re-

sult, in sympathy with iron, all kinds of heavy hardware have declined in price, but an increase in sales has been reported by dealers monthly for the last six months and as a whole the situation is more cheerful. There is every indication that affairs will continue to improve.

The year of 1894 opened with an exceedingly gloomy outlook for the iron ore and pig iron trade and, notwithstanding the long-continued coal and coke strikes, prices continued to go lower and the markets dull until the latter part of October, when more activity was manifest, and the year closed with a larger movement in tonnage but at lower prices, with the general conditions more satisfactory and better prospects for an increase in the volume of the business. At this time there does not appear to be early prospect of increase in prices, but there is a more settled feeling, both among producers and consumers, and the outlook seems favorable for a good business at low prices.

SHELF HARDWARE.

The shelf-hardware business in 1894 suffered in comparison with other lines from the prevailing conditions. In the first six months of the year the effects of the panic were still plainly felt, while the currency and tariff measures made buying an uncertainty. After July 1 steady gains were made in all territories except those where the crops proved a loss. As a whole the year's sales will approximate those of 1893, but a much larger volume of goods has been handled, as there has been a depreciation of values of at least 20 per cent. Stocks are in good shape, collections through the year have been excellent and the conditions would seem to favor a healthy business for 1895.

GLASS.

The volume of business in the glass line for the year 1894 has been about 20 per cent less than that of 1893, and with little or no profit on the business done, besides suffering quite a large loss from decline in values brought about by the tariff bill going into effect; so, altogether, it has been quite a disastrous year for the manufacturer and jobber.

LUMBER.

During the year there was a falling off from the normal condition of things in the lumber trade. This was due in the main to general business depression and a reaction from unusual activity in 1892.

The total sales of 1894 were 200,000,000 feet less than in the preceding year. In the early months of the past year trade was very dull but the last five months saw a decided change for the better. During these months sales and shipments steadily increased and increases over 1893 were noted. The panic times affected the lumber trade about in the same measure as other branches of business. The total Chicago sales in 1894 were 1,626,284,421 feet as against 1,647,986,053 for 1893. The total receipts for 1894 were 1,522,835,000, while in 1893 they were 1,559,058,000. The receipts of shipments in 1894 were 308,513,000, as opposed to 243,907,000 in 1893.

BRICK.

During the past year quite a number of brickyards were not operated at all and none of the larger yards was operated for much more than half time. Prices have ranged about the same as in 1893—namely, from \$4.50 to \$5.75 per thousand, except during the spring strike, when those firms which were fortunate enough not to be involved in the strike received for a short time \$6.50 per thousand.

There have been no financial failures

among the brick manufacturers and there are not apt to be any, as most of the manufacturers own their plants and have ample resources to carry themselves through to better times.

FURNITURE.

The furniture business suffered from the panic during the year 1894 proportionately with other branches of trade, if we except staple lines. In June and July, 1893, when the panic struck, a great many manufacturers closed up entirely, while a few continued to run under a limited force, say from one-third to two-thirds their usual capacity. During the spring and summer of 1894 manufacturers were gradually increasing their output, but in the early autumn the retailers, who had been buying very sparingly for more than a year, began to order more freely and the manufacturers found a greater demand than they had anticipated. In many instances they were unable to fill their orders.

AGRICULTURAL IMPLEMENTS.

The agricultural-implement business generally east of the Missouri river during the season of 1894 was considerably better than in 1893 but not so good as in 1892. Owing to the hot winds and drought in South Dakota, Nebraska and western Kansas crops in that district were practically a failure and the implement business in the same territory was nearly so. The trade in Minnesota also fell off about 50 per cent in 1894. The prospects for 1895 indicate that we will have a better trade than we have had during the past two years and something near that of 1892. The history of the agricultural-implement business shows that after a couple of bad seasons like 1893 and 1894 the trade revives and for the next series of years it improves until we strike another panic or crop failure.

MUSICAL INSTRUMENTS

The sales for the first seven months of 1894 fell short of the same period of 1893 by about 20 per cent. For the last five months of 1894 sales exceeded 1893 by about 25 per cent. In the whole, the volume of business was about equal to that of 1893. Among the working classes the hard times created a tendency to purchase a lower grade of goods than in other years, with the result that a given number of transactions would not make the same amount of business as in former periods. Using 1892 as a standard, when trade in this line reached its apogee, the year 1894 may safely be set down as being not within 25 per cent of the capacity or expectations of the houses in the trade. There were no failures of consequence, but the utmost conservatism was displayed upon all orders. Few new enterprises materialized and a disposition to wait quietly for better times before making new connections was very generally evinced. The depression was perhaps less felt in Chicago than elsewhere, all the local factories having furnished an ample trade and income to their workmen. Another year it is generally believed, will find the musical trade again enjoying great prosperity. The total capital represented in Chicago in the music business is about \$12,000,000. Eighteen hundred and ninety-four will be remembered as the year when the music trade took possession of Wabash avenue in such numbers and to such an extent as to make it a great musical thoroughfare.

PRINTING AND STATIONERY.

The outlook in the printing and stationery trades at the beginning of the year was anything but encouraging, a gradual decrease in gross sales and margins of profit having been the rule for the preceding year. The same conditions continued during the first eight

months of 1894, but the bottom seems to have been reached at the last four months have shown a small but apparently healthy reaction. November and December will compare very favorably with the corresponding months of 1893 and the outlook for 1895 is very promising. The indications are for still greater improvements in the volume of business, although the margin of profit will probably be closer than prevailed prior to 1892.

The improvement seems to be more marked in the stationery than in the printing lines, but this is probably due to the particular season of the year in which the observations have been made and is not indicative of any lasting conditions other than those which will be apparent along the entire line.

DRUGS.

The year 1894 was a most disastrous one for the retail druggists of the United States. The percentage of corporations and sole lives or dies greater than in any previous year in the history of the country. The causes of this state of affairs are not far to seek. In older countries the pharmacist is regarded as an essential safeguard to the health and well-being of the community, while in the United States nobody seems to care for the lives or dies. Notwithstanding the great care and responsibility attaching to the preparation of medicinal agents and the importance of intrusting such difficult work to qualified apothecaries only, the drugs and medicines in widest use among our people are manufactured by irresponsible corporations and sold by dry-goods merchants, grocers and in department stores. It is high time for congress to pass a law forbidding the manufacture and sale of any drug, chemical or medical preparation whatsoever unauthorized by the pharmacopoeia. Until such a national law is enforced the American pharmacist, like the prophet of old, will remain practically unhonored in his native land, in good times earning the poorest reward and in hard times forced into bankruptcy.

CIGARS AND TOBACCO.

Members of the cigar and tobacco trade, like most of their co-laborers in the various other commercial pursuits, have but scant praise to sing for the year 1894. There is a general feeling of relief that this ill-fated year has passed into history and individuals are inclined to congratulate themselves that they have survived the hard times, being assured by present indications that the new-born year will be marked by a revival of business activity.

The last year was distinguished only by extreme dullness, poor collections and an abundance of losses. The cigar and tobacco merchant looks in vain for events or circumstances worthy to be recorded in the annals of his trade. One happy reduction may be drawn therefrom—viz., that the cigar and tobacco jobbing trade has stood the ordeal well and thereby proved its financial strength.

American manufacturers of fine Havana cigars have during the last year continued to prove their ability to furnish the people of this country with as good, yet even better, article than the Cuban factories. For years past they have been improving their product, encouraged by the preference recently given them by the most intelligent smokers, until, at the present time, even in the face of a reduction in tariffs on imported cigars, by far the greatest majority of high-priced cigars consumed in this country are of domestic manufacture. The man who is up to date seldom calls for an imported cigar, as the experience of the last few years has taught him that the finest Cuban tobaccos are now made

into cigars in this country by expert hand workmen. These goods are sold for considerably less money to our people than equal grades of imported and as a result the importations are fast dwindling into insignificance.

DRY GOODS.

The amount of business in wholesale dry goods was hardly up to that of 1892 in cash value owing to the decrease of some 25 per cent in prices of goods, but the quantity sold was greater. It was about 10 per cent greater than in 1893. The characteristics of the year were great conservatism in buying, a closer adherence to cash sales and a promptness in making payments and disposition to take advantage of discounts. Staple articles of use were handled more and luxuries less than for many years before. The large number of people out of employment and the general feeling that there existed a dire necessity to economize account for this comparison and the reduced sales. In many lines, even of what has been considered necessities.

It is by the transfers of business from other markets to Chicago that the increase in gross business is explained, in view of the decreased consumption of all sorts of goods. Large retailers who have always before bought in New York have turned to Chicago in the last year or two, with the result that in these times of panic just passed Chicago has fared better than any other city in this line of trade.

There seems every reason to expect good things of the coming year. Large manufacturing enterprises are resuming their work and it seems that we may count on no further tariff legislation or changes for some time at least. Prices are now improving slowly from the bottom prices where they have been. Merchants who have been in a position to buy at the prices recently prevailing have been favored and may feel that their goods were bought at the very foot of the price list.

The first three-quarters of 1894 were hard ones in which to do a great retail business—hard, probably, for all retail merchants in this country. All felt the effects of the panic; all were utterly unable to look ahead during the long period of uncertainty incident to the tariff debate and all were obliged to readjust their stocks to meet the requirements of the new tariff after that measure had become a law. The last quarter of the year, however, was very satisfactory.

CLOTHING.

The wholesale clothing trade for 1894 was better than that of 1893, so far as volume was concerned, but below that of 1892. The fall business of 1894 was very satisfactory to all jobbers who were not loaded heavily with old goods. The general expense account of most wholesale houses was considerably reduced and the net outcome of 1894 will be better than the net outcome of 1893. As a rule stocks held by jobbers and retailers are much lighter than they have been in many years and all well-regulated houses are in condition to take new goods at the present reduced prices. There is at the present time no overplus of woolen goods, although the domestic mills are nearly all running at full time. Yet, as the new tariff does not take effect until Jan. 1, 1895, spring goods will be most used of domestic manufacture. Though, of course, the fact that so many goods will be thrown on the market after Jan. 1 had the effect of making the price on domestic productions. The retail clothing business suffered from the prevailing dullness but was comparatively satisfactory.

MILLINERY.

Inasmuch as a considerable portion of the millinery business is in goods which rank as

luxuries rather than as necessities, it is of course one of the first to feel a stringency in money matters. This naturally accounts for the slight decrease in the volume of business of the year for 1894 as compared with that of 1893. Nevertheless, as business has been done with such care, and stocks have been reduced more than usual, the year has many gratifying things to note. Outstanding accounts are being liquidated and speculative trading in extravagantly large stocks seems to be a thing of the past.

CARPETS.

In the carpet trade there was considerable depression during the year. There was a shrinkage in values of fully 10 per cent. In the course of the last two months of the year a revival was experienced and better things are looked for in 1895.

WOOL.

After the year 1893, with all its disasters, those engaged in the wool trade looked forward to 1894 with high hopes for brighter prospects. But, as a whole, the season has been anything but satisfactory to all engaged in wool, no matter from what standpoint it is looked at. Growers, dealers and manufacturers all say that it has been an off year and should be classed with 1893 as such.

Prices declined throughout the entire year, there being no activity shown except just at the time the tariff bill was passed. The low and medium grades maintained their supremacy of a year ago, while fine and fine mediums moved slow and at lower prices. Stocks are larger than usual but nearly all woolen machinery is running and it is safe to presume that it will all be wanted before the new clip. The tariff bill, in so far as it affects goods, went into operation Jan. 1. Just how it will affect our manufactures is as yet unknown but there is little doubt the American mills will hold their own and continue to be large consumers of raw material. Wool was made in 1893, 1. since which time there has been very little change in prices, as the difference had been fully discounted previous to that time.

The season closed with the market in buyers' favor and prices lower than ever known, showing an average decline of about 15 per cent for the year and about 43 per cent for two years.

LEATHER.

During the first three months of 1894 the leather business was still suffering from the blight of the panic of the previous year. But at the same time the trade was gradually working out of those troublesome conditions and looking forward to improvement. About April a good trade began again and from that time forward it is but fair to characterize it as a good average year. Stocks had been left in good condition by the pressure of hard times, for dealers bought as little as possible and worked off old goods at low prices. Thus when better times came in sight they were ready to buy practically full stocks again. The condition of credits was better, too, from manufacturer down to retailer, every one requiring more care and promptness in settling accounts when due or refusing to give the liberal terms and time of previous years. A large demand for lower-priced goods was apparent everywhere, and of course had to be met.

SHOES.

The business of the year 1894 was much better than could be expected after the terrible cyclone in the financial world of the year previous, when all conditions and all phases of society economized, whether in the rail-

ment they wore or the shoes they put on their feet. The consequence was that not only Chicago but the east and all over the country people bought cheaper goods of lower grades than ever before. The business of the year was, as a general thing, much better than was anticipated under the circumstances, on account of the low price of wheat in the northwest and the depressed feeling throughout the country.

JEWELRY.

In jewelry the first ten months of the year showed a shrinkage of about 15 per cent as compared with 1893 and about 25 per cent for the corresponding ten months of 1892. The last two months, however, showed a gain of 20 per cent over 1893, but not up to 1892 by about 5 per cent. The new tariff law has raised the duties on some lines of goods and notably on diamonds, but as stocks were generally large in anticipation of this, losses are not likely to be advanced for some time to come.

LAKE MARINE.

The season of 1894 has been favorable to navigation in some respects, though not to vessel-owners financially. There have been fewer vessels and fewer lives lost than for several seasons past. The worst storm of the season was that of May 18, which was particularly severe in the vicinity of Chicago, there being nine vessels that went out of existence here at that time and a number of lives lost. During the dry season there was a great deal of trouble on account of the smoke that spread over the lakes from the great forest fires of northern Michigan, which at times was very dense. A large number of accidents can be attributed directly to this cause. The losses have been confined mostly to the older class of vessels, and, as a rule, have little or no insurance. The losses on modern steamers have been few, and, as a whole, the season has been a profitable one for the insurance companies and they must have made money. During the season sixty lives were lost and thirty-eight vessels, with a total tonnage of 15,381 and valued at \$600,000, were destroyed.

The fall was most remarkable for fine weather and there has been more business done in the month of December than ever before. The continued mild weather has caused many steamers, that had come to Chicago to lie up for the winter to make another trip down with grain and one steamer made a round trip from Chicago to Buffalo and return in the month of December. Three steamers cleared from Chicago Dec. 16 with grain for the lower lakes. Though there have been instances of vessels making late trips, it has never been so general as this year. The freights having been very low during the regular season, a slight advance at this time was a strong temptation to owners of first-class steamers to take the chances of encountering the cold blasts of winter in hopes of evening up on the season.

As a whole the season has not been a profitable one. While some of the more modern steamers have paid a small dividend, on an average not over 3 per cent, the older and smaller classes have barely paid their actual running expenses, not counting depreciation, which is greater than on any other kind of property. Even with this, the season was better than last season, when many vessels actually lost money. The average daily freight on corn from Chicago to Buffalo for the season was 1.19 cents, and on coal from Buffalo to Chicago 47.12 cents. This on an average is not over one-third the cost of transportation by railroad.

SCHOOL CENSUS OF THE CITY OF CHICAGO.

[Taken April, 1894.]

Following are brief descriptions of some of the more important buildings begun, projected or completed in Chicago in 1894:

FORT DEARBORN BUILDING.

The Fort Dearborn building stands at the southwest corner of Clark and Monroe streets. It is twelve stories high, with an iron and steel skeleton and terra cotta exterior. It is fire proof. The ground floor on Clark street is divided into five stores and the entrance to the office part of the structure is on Monroe street. West of this entrance are two stores. The second floor is designed for the use of a bank or similar institution, while all the remaining floors are partitioned off into office suites. Jenney & Mundie are the architects and the Galena Safety company owns the building. Among the stockholders are Jacob Newman, Henry N. Hart, Herman F. Hahn, Adolph Loeb, James B. Stubbs, R. P. Shields, Arnold Freshman, John Early, H. N. Greenbaum, L. Franklin, W. H. Keyser and a number of well-known Chicago business men. The lot on which the building stands has a frontage of eighty feet on Clark and ninety feet on Monroe. It was leased by Mr. H. H. Kohlsaat from L. C. P. Freer and sub-leased to the deposit company on these terms: \$25,000 until May 1, 1895; an annual rental of \$33,000 until May 1, 1899; an annual rental of \$40,000 until May 1, 1898, and an annual rental of \$30,000 for an additional optional period of fifty years, until May 1, 2038. The cost of the building is estimated at about \$400,000.

NEW TEMPLE OF MUSIC.

The new Temple of Music building stands on ground leased from the trustees of the Society of New Jerusalem. The lot, which is on the north side of Van Buren street, between

Wabash and Michigan avenues, was formerly occupied by the old Swedenborgian church. The building is 62 by 91 feet and is eleven stories and basement in height. It is owned by the New Temple Music Building company, a corporation of which Mr. W. H. Winslow is president, Mr. P. A. Winslow treasurer and Mr. Edward C. Wentworth secretary. The construction is of steel, iron, brick and terra cotta. The first or street floor of the building will be used for a music store. The second floor will be entirely taken up by the principal feature of the enterprise, a dainty, richly embellished and beautiful recital hall, to be used entirely for chamber concerts of the highest order. The auditorium will extend through the third floor and all the floors above will be divided into musical studios for teachers in every department of the art. It is said that this will be the only building of its size in the country devoted to music and local musicians are deeply interested. The entrance to the building will also be the entrance to the recital hall. This entrance will be ornamental and will extend up to the third floor, for a wide, easy staircase of generous proportions will ascend to the hall and balconies. The corridor and halls will be finished in light marbles and ornamental iron work, treated by the Bower-Barr process. The dense black iron against the marble will combine to make a rich effect. The floors will be laid in rich mosaic.

The recital hall will be 58 by 53 feet in area and, with the balcony, will have a seating capacity of about 450. On both sides of the entrance to the auditorium will be lobbies and cloak rooms and all the other conveniences will be provided. The stage, or rather platform, will be in the shape of a quarter-sphere, for it will be a half-circle in outline, and the sounding board will curve upward and for-

ward to form a hollow quarter-sphere. It will accommodate about fifty musicians. The hall will be ornamented and embellished in a manner to conform to the Italian renaissance and will be treated in light colors so as to secure a dainty daylight effect. To give an unobstructed view of the stage it will be necessary to take out four of the main columns, so that all the stories above the fourth floor will be carried on three large, deep trusses, two of them running north and south and the other east and west.

The musical studios will be sound-proof. The walls between the studios will be double and the space between will be filled with a mineral-wool quilt. The ventilating device for the auditorium is another novelty. It is designed to give each person in the hall 1,800 cubic feet of fresh air every hour. The air will be carried in through four concealed air-ducts in the ceiling. The air will be drawn from the fourth story, carried to the basement and heated in winter and cooled by water spray and ice in summer. A feature of the building will be the profusion of ornamental wrought-iron work which will be used. The architect is Dwight H. Perkins of the firm of Park & Selby. The cost of the structure complete is placed at \$280,000.

PROSPECT FLAT BUILDING.

The Prospect flat building, at the northeast corner of Vincennes avenue and 36th street, will be seven stories in height, will cover an area of 99 by 99 feet and will be constructed of blue Bedford stone for the basement and first story and Chicago hydraulic pressed brick above, with fire-proof partitions of mack-olite. The interior is to be finished with all the latest devices. The flats, of which there will be forty-nine, will contain from three to five rooms each and will be provided with every convenience found in modern apartments. There will be two elevators. The owners are Emsley O. Whistler and Frederick W. Deutsch, the architect is J. Speyer and the estimated cost is \$150,000.

RINGOLD APARTMENT HOTEL.

The Ringold apartment hotel, the foundations for which were laid in December, will have a frontage of 100 feet on Indiana avenue and 161 feet on 22d street, will be six stories high and will contain 300 rooms, divided into suites of from two to five rooms each. On the ground floor there will be nine stores. The apartments will all be finished in the finest modern style, particular attention being paid to heating and ventilation. For the convenience and comfort of the tenants there will be a large lobby, a bureau of information, fire and burglar proof vaults, elevator, electric and gas fixtures and kitchens with refrigerators. The building, which was designed by Henry Ives Cobb, will adjoin the Ringold hotel on the east, so that the whole of the north front of 22d street between Michigan and Indiana avenues will be used for hotel purposes. The owners, the Ringold Apartment Hotel company, estimate the total cost at about \$150,000.

1ST REGIMENT ARMORY.

The 1st regiment armory stands on the site of the old structure at Michigan avenue and 16th street and is similar to it in general design. (A description of the old armory, burned in March 1893, may be found in the Daily News Almanac of 1891.) It occupies a ground space of 164 by 174 feet. The ground floor is designed to be used as a great drill hall. The entire floor space is without a post or an obstruction of any kind, the weight of the upper floors being sustained by steel cables hung from the roof. Extending all around the walls of this room, which are forty feet in the clear and without break or win-

dow, is the visitors' balcony. Light is admitted from the large court which extends to the roof, eighty feet above. The first floor or gallery above the drill room contains the regiment headquarters, seven rooms in all, and twelve company rooms. The officers' room or banquet hall, the dining-room and library are also on this floor. In the second balcony are the twelve company lookers or squad rooms, rooms for the bugle and drum corps, the cycle corps, the non-commissioned staff, the veteran corps and the gymnasium. The top floor contains the attics and a billiard room 120 feet long, in which are tables of the finest make. The basement contains four rifle ranges and eight bowling alleys. The new building stands on the foundations of the burned structure and the walls in part were permitted to stand as before the fire. The walls are of stone with no opening to the height of forty feet, above which point they are of antique brick. The cost of the new structure was about \$195,000. Legally the building belongs to the First Infantry Regiment Armory association, of which the trustees are J. J. Mitchell, president; Charles L. Hutchinson, Walter L. Peck, H. H. Kohlsaat, Col. Henry Turner, Lieut.-Col. George Lauman and Capt. A. L. Bell. The architects were D. H. Burnham & Co.

RELIANCE BUILDING.

The Reliance building is situated on the southwest corner of Washington and State streets, the site measuring 55 feet on State street by 85 feet on Washington street. There had been a five-story building on this site of very heavy masonry, which was the lower floor of which had been used for a bank. The leases of the upper floors expired May 1, 1894.

In 1890 plans were made for a sixteen-story building by Burnham & Root and the foundations and first story of this new building were then put in, the upper four stories of the building being held up on screws while the first story of the new building was slipped under them.

On May 1, 1894, the old building was taken down to the second floor and the new building, according to entirely new plans, made by D. H. Burnham & Co., is being erected from the second floor up. The tenants of the first floor and basement—a dry-goods firm—remain in their store and keep it open for business during the period of construction.

The building being very narrow compared to the height—viz., 55 feet wide and 200 feet high—special attention has been given to designing the framework, which is of steel, and which carries the outer walls of the building. For wind-bracing, instead of tension rods, which had been used heretofore, it was determined to put plate girders twenty-four inches deep at each floor between the outside columns, thus binding the columns together and transferring the wind strain from story to story on the table-leg principle. These plate girders are bolted to the face of the column and form a perfectly rigid connection with the column. The columns are in two-story lengths and adjoining columns break joints at each floor. Every piece of iron in the construction, including all the roof beams, is thoroughly fire-proofed with porous fire-proofing. Each piece of fire-proofing around the column is wired to the column with copper wire.

The exterior of the building is white enameled terra cotta and plate glass. The interior of the building will be the most elaborately finished of any building in Chicago. The woodwork is of the finest mahogany; the floors are marble mosaic; the halls above the second floor are white Italian marble and the first and second floors colored marble. Cost of building, \$500,000.

COURTS OF COOK COUNTY.

The courts of Cook county are as follows, to wit: (1) Justices of the Peace and Police Magistrates; (2) County court; (3) Probate court; (4) Circuit and Superior courts; (5) Appellate court.

First—Justices of the peace and police magistrates have jurisdiction to try the following cases where the amount does not exceed \$200, to wit: Actions arising on contracts. Actions for damages for injury to real property or for taking, detaining or injuring personal property. Actions for rent and distress for rent. Actions against railroad companies and other companies or persons using any railroad for killing or injuring horses, cattle, sheep, hogs or other stock; for loss or injury to baggage or freight, for injury or damage to real or personal property caused by setting fire by their engines or otherwise. Actions of replevin where the value of the property claimed does not exceed \$200. Actions for damages for fraud in the sale or exchange of personal property and in all cases where the action of debt or assumpsit will lie where the claim or demand is not more than \$200. Actions for violating city or village ordinances. Actions of debt against mortgagors for selling personal property mortgaged by them without notice. Actions for the recovery of damages for injury to sheep by dogs. Actions for damages for keeping a place where access can be had by other creatures to and become infected by a sheep which is known to be affected with contagious disease. Actions to recover back money lost at gaming or by betting on horse-racing. Actions for violations of the provisions of the dram-shop act. Actions for selling liquor at or near a fair ground. Actions for driving a motor vehicle on a highway. Actions for allowing animals running at large. Actions against justices of the peace for money received for sale of estrays. Actions for violating statutes relating to hunting and fishing. Actions for violating act relating to roads and bridges and obstructing highways. Actions for violating law relating to ferries. Actions for failure to pay toll on plank roads. Actions for bringing and leaving pauper in county where such pauper is not lawfully settled. Actions for taking too much toll and for violating act relating to mills and millers. Actions for dog tax assessed on dog. Actions for a forcible entry and detainer. Actions relating to estrays. Actions against justices and constables to compel them to pay over money received by them in their official capacity. And in all actions of misdemeanor where the punishment is by fine only when the fine does not exceed \$200. All actions of assault and battery and affrays in which the people are plaintiffs. Justices of the peace and police magistrates also have jurisdiction as examining magistrates to bind over to the grand jury in all criminal cases.

PROBATE COURT.

The Probate court has original jurisdiction in all matters of probate, the settlement of estates of deceased persons, the appointment of guardians and conservators and the settlement of their accounts and all matters relating to apprentices and in cases of the sale of real estate of deceased persons to pay debts. The terms commence on the third Monday of each month and shall always be open for the granting of letters testamentary and guardianship and for probate business.

COUNTY COURT.

The County court is a court of record and has concurrent jurisdiction with the Circuit

court in all that class of cases wherein a justice of the peace has jurisdiction where the amount, claim or value of the property in controversy does not exceed \$1,000 and in all appeals from justices of the peace and police magistrates; it also has jurisdiction for collection of taxes and assessments, including special assessments, condemnation proceedings and insolvent estates.

Appeals lie to the Circuit and Superior courts and in some cases to the Appellate court.

CRIMINAL COURT.

The Criminal court of Cook county has the jurisdiction of a Circuit court in all cases of a criminal and quasi-criminal nature arising in the county of Cook and all recognizances and appeals taken in said county in criminal and quasi-criminal cases. It has no jurisdiction in civil cases except in those on behalf of the people and incident to criminal and quasi-criminal matters. The court is held by one or more of the judges of the Circuit or Superior court.

The terms of the Criminal court begin on the first Monday of each month.

CIRCUIT COURT.

The Circuit court has original jurisdiction in all cases in law or in equity and has appellate jurisdiction in all appeals from justices of the peace, from the Probate court and County court, except in criminal cases, where the appeal goes to the Criminal court as above stated.

The Circuit court now consists of thirteen judges and its terms begin on the third Monday of each month. Appeals and writs of error lie from its final orders, judgments and decrees to the Appellate court of the 1st district in all cases except in all criminal cases and cases involving a franchise or freehold or the validity of a statute, in which the appeal or writ of error goes direct to the Supreme court.

SUPERIOR COURT.

The Superior court of Cook county has the same jurisdiction as the Circuit court and appeals and writs of error lie from its final orders, judgments and decrees to the Appellate and Supreme courts the same as from the Circuit court. It only differs from the Circuit court in name.

It now has twelve judges and its terms of court begin on the first Monday of each month.

APPELLATE COURT.

The county of Cook forms the 1st appellate district of Illinois and the Appellate court for this district is held by three judges selected by the Supreme court from the Circuit and Superior court judges. It holds two terms each year, one commencing on the first Tuesday of March and the other on the first Tuesday of October.

It has appellate jurisdiction only. Appeals and writs of error lie to it from the Circuit and Superior court and from the County court in all cases except criminal cases and cases involving a franchise or freehold or the validity of a statute. Appeals lie to the Supreme court from the final orders, judgments and decrees of the Appellate court except in actions *ex contractu* wherein the amount involved is less than \$1,000 exclusive of costs and all cases sounding in damages where the judgment of the court below is less than \$1,000 exclusive of costs.

TOPICAL SCRAP-BOOK SYSTEM.

TOPICAL SCRAP-BOOK SYSTEM

TOPICAL SCRAP-BOOK SYSTEM

THE NEED OF IT.

Articles of great value are constantly appearing in the secular and religious periodicals, and any one who does not save valuable newspaper matter is losing a great deal. The words of One wiser than Solomon are pertinent here—"Gather up the fragments that remain that nothing be lost."

But all the methods for preserving newspaper clippings previously in use have serious defects—take too much time to find them, to fold, re-fold and replace them, and are not handy for rapid reference. Now the

Topical Scrap-Book System

does away with all these difficulties. With this library any literary person secures, in handsome form and at his fingers' ends, a systematic classification of all valuable newspaper matter. It is not one or two scrap-books filled with all sorts of matter, but

A "Separate" Scrap-Book

for each important subject, made expressly for the purpose, with the title lettered on the back. (See out above.)

ITS ADVANTAGES:

1st. *All the matter upon any given subject is collected together and can be found in a moment.*

2d. *It saves time.* There is no hunting to be done, or folding, re-folding or replacing. *A touch of mucklidge at the top and bottom of an article and it is in its place.* This permits them to be removed when no longer desired, or parts of them to be cut out for platform or other use.

3d. *It is handy for suggestion,* as well as for reference. A feature possessed by no other system. A book on any subject may be taken down and glanced over at will.

4th. *It is convenient in size,* being no larger than an ordinary hand volume, 6¼ by 10 inches, yet large enough to preserve any amount of material, containing 120 pages.

5th. *A handsome addition to the book shelves,* filling them with a fine set of leather-back books, looking like a fine bound Encyclopedia, and they are nothing less than that when filled with choice cuttings.

6th. *And cheap beyond example.* A big point, for it enables a man to have a Library of such books, instead of the usual one or two, and at a small outlay.

THE TITLES.

WE PUT UPON THE BOOKS ANY TITLES YOU MAY WANT. THE FOLLOWING TITLES ARE SUGGESTED:

ILLUSTRATIONS, TEMPERANCE, MISCELLANEOUS, SOCIAL QUESTIONS, POLITICS, EDUCATION, CHRISTIAN WORK, SERMONS, THE BIBLE, MISSIONS, THE CHURCH, CHRISTIANITY, PERSONAL, GOD, BOOK REVIEWS, ISMS, ESCHATOLOGY, SUNDAY SCHOOL—THE YOUNG, THE CHRIST, SIN AND ATONEMENT, HOLY SPIRIT, EXECUTICAL, DEVOTIONAL, HOMILETIC NOTES, SOCIAL QUESTIONS, DUTIES AND GRACES, PREACHERS AND PREACHING, BIOGRAPHICAL, REVIVALS, HEALTH, SPEECHES, POLITICAL, JOURNALISTIC, ETC., ETC.

PRICE \$1.00.

The volumes are put at the LOW price of ONE DOLLAR each.

1st. We will send SAMPLE volume, with any title you may choose to put upon the back in gilt, POSTAGE PAID BY US, upon receipt of \$1.00. If you are not satisfied with the book, it may be returned and we will

refund the amount paid for it, less the postage.

2d. If you order a half dozen, after you obtain your sample, we will make you a discount of 10 per cent and send prepaid upon receipt of \$5.40.

3d. If you order twelve volumes we will give you a discount of 20 per cent and pay express charges to your nearest express office upon receipt of \$9.60.

MAIL ALL ORDERS TO

THE INTER OCEAN.

CHICAGO, April 16, 1894.

DEAR MR. BONNELL:

I think, and so do my pressmen, that the ink you furnish us is in every way the most satisfactory and perfect ink that can be made, irrespective of price—it certainly makes The Inter Ocean the best looking paper in Chicago, and I am so well pleased with it that I hope to always use it.

Very truly yours,

H. H. KOHLSAAT,

Publisher.

DECORATE....

**Your Windows with
Kaul's New Method**

Stained Glass Substitute.

It is Chromo-Colored Paper, which, when applied to the window, resembles the *costliest of stained glass*, while it *costs but a trifle*. It will stand the weather and will absolutely not peel off.

**Send for Descriptive Circular
and Price List.**

AGENTS WANTED 

M. Kaul & Co., 128 West Adams-st.,
CHICAGO, ILL.

**ASSESSMENT OF COOK COUNTY PROPERTY.

MONROE STREET

CHICAGO

SANITARY DISTRICT OF CHICAGO.

Offices, Bialto building.

OFFICERS.

Pres.—Frank Wenter. Clerk—Thos. F. Judge.
Treas.—M. E. Stone. Atty.—G. E. Dawson.
Chief Engineer—Isham Randolph.

BOARD OF TRUSTEES.

John J. Altpeter, Wm. Boldenweck,
Lyman E. Cooley, Bernard A. Eckhart,
Arnold P. Gilmore, Thomas Kelly,
Richard Prendergast, William H. Russell,
Frank Wenter.

The following extract from President Wenter's message shows the condition of the work and the cost: The entire length of deep cutting is under contract from Robey street, Chicago, to Lockport—twenty-eight miles. From Lockport to the Upper Pool of Joliet (the so-called tail race) a route was adopted that presents a most favorable situation for the development of considerable water-power without materially adding to the necessary expense of conveying the water down to the Upper Pool. From the Upper Pool, through the city of Joliet, plans are being prepared for adoption, and I see no reason why, by the exertion of due diligence on the part of the board, every piece of work necessary to carry the water off may not be under contract by early spring.

At this time (Dec. 1, 1894) more than 40 per cent of the material in the channel has been excavated, which shows remarkable progress, considering the time required to construct the new river diversion and to install complete plants for the execution of work of this kind. It must be further considered that out of the first letting in the summer of 1892, sections 1 to 14 inclusive, but six sections remain in the hands of the original contractors. The other eight were either relet or assigned to new parties, and two of the six remaining sections were adjusted. These assignments and relettings were due to a failure to comply with the contracts in not making the necessary progress.

From Willow Springs to Summit, sections A to F inclusive were put under contract in the spring of 1893. Section E has within the last three months been relet, as the original parties refused to carry out the contract. From Summit to Robey street, sections G to O inclusive were put under contract in the fall of 1893 and spring of 1894, and the work on these sections is progressing very satisfactorily. Section 15, the last on the line, was contracted for about three months ago.

With all the difficulties and delays that have been encountered by reason of our being obliged to relet and assign a number of sections, all within an average time of hardly two years, I think it should be gratifying to you all to note the present stage of the work.

We have paid up to Nov. 1, 1894, the sum of \$6,079,259.51 for construction, over one-third of the amount of our contract requirements, and this showing has been made in the face of all the unavoidable difficulties that had to be met, as heretofore mentioned. We can therefore, judging the future by the past, look forward with confidence to seeing this great work become an accomplished fact by the end of 1895, although, indeed, before the end of 1895 most of the rock sections will be finished.

The situation, however, does not preclude all difficulties. Some of the glacial drift sections are behind the average requirements. The results on these sections in the near future will undoubtedly guide the action of your honorable body.

The sanitary district owns 6,284.38 acres of land, with perhaps 500 acres to be added, a large portion of which is already in suit, which

will complete all the land purchases; 1,490 acres are required for the main drainage channel, river diversion, levees, highway crossings, and such other works as are essential to bring about the full usefulness of the main channel and river diversion. That will leave, approximately, 5,200 acres of land, but this land cannot be put to any use by which an income from rental can be derived, except it be from Robey street to Corwith, about two and one-half miles, and a few places below Summit, where the banks are unincumbered with spoil. It will take an average time of four years to excavate the material and place it on the banks. How much time will be required to remove the same is a question.

The contracts for removing the material from the channel amount to, approximately, \$18,500,000. It is true that a large deduction must be made, as for material put in levees, embankments, retaining walls, etc., but this reduction will not exceed 20 per cent on the \$18,500,000. I cite these conditions to your honorable body for reflection as to what amount of revenue, if any, can be expected in the near future. The district may be able to realize something on the broken stone from its channel.

Since my last annual message the sanitary district issued and sold at a small premium \$5,000,000 of 5 per cent interest-bearing United States currency bonds. In this connection, it may be said that the security for these bonds does not rest on the success of the drainage channel, though there cannot be the least doubt of its success, but their payment is secured by all the property in the sanitary district of Chicago.

The total revenue derived from date of organization to Nov. 1, 1894, is \$12,673,718.69, as follows:

Tax levy 1890, collected..	\$ 957,290.78
Tax levy 1891, collected..	1,022,548.75
Tax levy 1892, collected..	1,167,097.26
Tax levy 1893, collected	(balance of about \$100,000 in process of collection)
	1,051,169.80

Total tax levy	\$ 4,197,877.59
Total amount of 5 per cent bonds issued to date.....	8,000,000.00
Bond premium and interest.....	127,389.34
Loans.....	100,000.00
Interest on funds deposited in banks, and sundry receipts on various accounts	247,901.76

Total income to Nov. 1, 1894, \$12,673,718.69

The total expenditures for the entire work, from its inception to Nov. 1, 1894, were \$10,193,130.69, as follows:

Engineering department.....	\$ 570,720.00

J. HARPER BONNELL, ESQ.,

New York City. .

My Dear Sir—

"You will find Bonnell's Ink satisfactory, I believe, and I would recommend that you give it a trial," said MR. CHILDS, when we were discussing the neat appearance of the *Philadelphia Ledger*. I have experimented with a number of inks during the past year and finally reached the conclusion that the quality of your product was such as to justify our continuing as one of your regular customers. I may say, therefore, in reply to your inquiry, that we are entirely satisfied with the ink you are now furnishing the TIMES.

Very truly yours,

Geo. F. Spinney.

These sections can be reached by the following railroads:

Chicago & Alton, Canal and Adams streets.—Going, leaves Chicago at 8:30 a. m. daily and 2 p. m. daily except Sunday. Returning, leaves Joliet at 11:25 a. m. daily except Sunday and 5:25 p. m. daily; leaves Lemont at 12:10 and 5:55 p. m. daily except Sunday. Alton trains stop at Brighton Park, Summit, Mount Forest, Willow Springs, Sag Bridge, Lemont and Lockport.

Atchison, Topeka & Santa Fe, Dearborn and Polk streets.—Going, leaves Chicago at 8:30 a. m. and 2 p. m. daily except Sunday. Returning, leaves Joliet at 8:10 a. m. daily and 11:45 a. m. and 4:15 p. m. daily except Sunday. Leaves Lemont at 8:44 a. m. daily and 12:13 and 4:43 p. m. daily except Sunday. Santa Fe trains stop at McCook, Garry, Willow Springs, Lemont, Romeo and Lockport.

The rock work begins at Willow Springs and can be seen in its most advanced stages at Lemont and Romeo, extending both ways. The earth work begins at the Chicago river and extends to Willow Springs.

CATARRH.

ELY'S CREAM BALM

IS applied directly into the nostrils; all is absorbed and causes a thorough cleansing and healing of the diseased mucous membrane.

CREAM BALM

Effectually cleanses the nasal passages of catarrhal virus, causing healthy secretions; soothes and allays inflammation and irritation, protects the membranous lining of the head from fresh colds, completely heals the sores and restores the senses of taste, smell and hearing. It also removes bad taste and foul breath when resulting from Catarrh. Wonderfully beneficial effects are realized by a few applications.

A trial of the Balm will always relieve, and its continued use will produce a perfect cure. As an immediate relief for colds in the head, catarrhal headache and snuffles, and as a household remedy for local irritations, CREAM BALM gives the highest satisfaction.

Catarrhal sufferers should remember that ELY'S CREAM BALM is the only Catarrhal remedy which is QUICKLY AND THOROUGHLY ABSORBED by the diseased membrane, and for that reason it DOES NOT DRY UP THE SECRETIONS, but changes them to a limpid and odorless and finally to a natural and healthy character. Even in acute cases the Balm imparts almost instant relief.

Mothers will please observe that children may use the Balm with perfect safety, as in no case does it produce the slightest ill effect. For all stoppages and colds in the head, which often trouble them, it will be found the pleasantest and surest of prescriptions, and infinitely the easiest to administer.

If your druggist is not supplied we will mail the Balm to any part of the United States on receipt of 50 cents.

ELY BROTHERS,

56 WARREN STREET,

NEW YORK

CHICAGO GRAIN AND PRODUCE STATISTICS.

Advertisements of Special Wants.

THE CHICAGO DAILY NEWS is the principal medium of Chicago and the Northwest for the publication of small "WANT" ADVERTISEMENTS.

THE DAILY NEWS publishes a larger number of advertisements of this character during the year than any other paper in the United States, the New York Herald and World alone excepted. It is therefore the well-recognized channel of communication in Chicago and throughout the tributary Northwest for the supplying of SPECIAL WANTS, such as Situations Wanted, Help Wanted, Agents Wanted, Boarding, Rooms to Rent, Real Estate for Sale or to Rent, Financial, Business Chances, to Exchange, Partners Wanted, Lost and Found, Information Wanted, Instruction, Personal Notices, to Buy or Sell Horses, Carriages, Machinery, Store and Office Fixtures, Household Furniture, etc.

MANUFACTURERS and all others throughout the Northwest employing labor will find the "Want" columns of THE DAILY NEWS especially efficient in supplying their needs. Those seeking employment will always find therein a large number and choice of offers from employers, while those who wish to make their own personal application for employment can through its columns most easily, cheaply and effectively address the largest possible number of employers. The "Want" columns of THE DAILY NEWS are, in fact, a BUREAU OF EXCHANGE where labor and capital most easily meet and execute their mutual exchange of value.

For ALL the various kinds of special "WANTS" THE CHICAGO DAILY NEWS is the leading and recognized medium of communication.

Advertising rates will be mailed upon application.
